The award recipient will first conduct a comprehensive literature review of laws, policies and practices pertaining to juvenile sex offenses and offenders. This literature review will update the review in the above NCJFCJ publication. The results of this review will guide the second phase of the research.

In the second phase more specific information will be gathered in at least 5 sites representative of the national juvenile justice system, taking into account geographic regions of the country, urban or rural settings, and large-state as opposed to small-state systems. At each selected site the juvenile justice system response to juvenile sex offenders will be assessed. At each site this assessment will address the following issues and consider, minimally, the following questions:

1. Reporting

Are specific efforts made to improve the extent of reporting juvenile sex offenses? Are there practices which discourage reporting?

2. Investigation

Are investigations conducted by individuals trained to interview child witnesses? Are efforts made to reduce the number of interviews? Is cooperation adequate among prosecutors, police, child protective services, and evaluation providers?

3. Prosecution

Is there consistency among the sites, or within each site, regarding the severity of the offense charged in relation to the offending behavior observed? Are sex offenses often negotiated down to non-sex offenses? What dispositions are made at this point and why?

4. Defense Counsel

Are defense attorneys available who are trained and experienced in dealing with juvenile sex offenses?

5. Court Process

Does the court provide the necessary mandate to impose involuntary treatment? Are adequate treatment options available? Are they used? Are adult and juvenile sanctions and treatments imposed in a consistent manner? Are probation officers and court workers who supervise offenders in the community specially trained? What dispositions are made by the court?

6. Assessment

Does the court order assessments of offender dangerousness, treatment needs, prognosis, etc.? Are there qualified providers available to make the assessments?

7. Aftercare and Follow-up

Are resources available to permit a gradual reduction of control and support for offenders being released from treatment or supervision? What is the relationship between familial variables and outcome?

Product

A published report that covers both phases of the research. It will document how the juvenile justice system is addressing sex offenders including effective approaches.

Application Requirements

All applications must be submitted in accordance with the requirements set forth in the OJJDP Application Kit.

Eligibility Requirements

Applications are invited from individuals, public and nonprofit organizations, educational institutions, or combinations thereof. Applicants must demonstrate that they have experience in the design and implementation of this type of program.

Selection Criteria

Applications will be rated on the extent to which they meet the following selection criteria:

1. The problem to be addressed by the project is clearly stated. (10 points).
2. The objectives of the project are clearly defined. (15 points).
3. The project design is sound and contains program elements directly linked to the achievement of the project objectives. (35 points).
   - The design contains research elements directly related to the program objectives. (20 points).
   - Applicant provides a detailed workplan describing the methodology of the program. (15 points).
4. The project management structure is adequate to conduct the program successfully. (15 points).
   - Applicant provides specific guidelines and timelines with regard to the program activities. (10 points).
   - Applicant explains how the management structure is consistent with the needs of the program. (5 points).
5. Organizational capability is demonstrated at a level sufficient to

conduct the project successfully. (15 points).

• Applicant demonstrates knowledge and experience with juvenile justice issues, particularly in the area of study to be addressed. (8 points).

• Applicant identifies staff qualified to support the project successfully. (7 points).

6. Budgeted costs are reasonable, allowable and cost effective for the activities proposed and are directly related to the achievement of the program objectives. (10 points).

Award Period

The award period will be 18 months.

Award Amount

A grant of up to $200,000 will be awarded to the successful applicant.

Due Date

Applications must be received by mail or delivered to OJJDP by May 11, 1992. Applications postmarked after this due date will not be considered. Those applications sent by mail should be addressed to the Research and Program Development Division, OJJDP, room 784, 633 Indiana Avenue, NW., Washington, DC 20531.

Intermediate Sanctions and User Accountability

Juvenile Restitution

Purpose

To provide training and technical assistance for the development and improvement of restitution (including community service) programs in juvenile justice agencies.

Background

OJJDP initiated support for juvenile restitution over a decade ago. This support included program development and evaluation of the first OJJDP funded restitution programs. Subsequent support covered training and technical assistance to expand and upgrade restitution programs, and the development of training and guideline materials.

There have been significant advances in juvenile restitution programming and management over the years. The formal programs provide written policy and procedural guidelines, management information systems, program staff, and a variety of components, which extend beyond simple repayment of damages to victims. Such components may include innovative community service projects, victim-offender mediation, private or public sector job development, supervised work situations for offenders, the utilization of volunteers in program operations, and other resource development.

Progressive juvenile restitution programs foster offender accountability to the victim and/or the community. In addition, good restitution programs appear to have implications for reducing recidivism of juvenile offenders. Data from the national evaluation of OJJDP-supported restitution programs for four jurisdictions indicated that in three of the four programs, by comparison with alternative interventions, restitution had a clear suppression effect on delinquency. A positive effect of restitution on recidivism is also suggested by Butts and Snyder in a 1991 draft article showing a positive effect on restitution and recidivism.

In spite of the valuable results of these programs, OJJDP estimates that less than one-third of all juvenile court jurisdictions have restitution programs sufficiently developed to achieve the multiple benefits of this alternative disposition. Inability to pay, lack of paid employment, insufficient community service opportunities, and liability concerns, among other issues, have been cited as barriers to wider use of restitution by A.L. Schneider and J.S. Warner in a 1989 study. However, accumulated program information does not support the arguments against wider use of restitution (see Bazemore, "The Restitution Experience in Youth Employment," 1989; Feinman, "Liability and Legal Issues in Juvenile Restitution," 1990).

OJJDP has determined that the use of restitution should be expanded as a viable alternative juvenile justice disposition, as an intermediate sanction, and as a means of reducing institutionalization of juvenile offenders. Restitution and its various components should be viewed and used as potential catalysts for overall juvenile justice system improvement, leading to changes both in system philosophy and procedure. An example of such change is the progression from the traditional or "treatment-oriented" (medical model) handling of juvenile offenders to the "balanced approach" in juvenile probation and other segments of the system (Maloney, Romig and Armstrong, 1988; Barton, Streit and Schwartz, 1991).

Goals

• To reduce juvenile delinquency through the expanded implementation of effective restitution, including community service, programs; and

• To strengthen the juvenile justice system by providing effective dispositional alternatives to juvenile courts.

Objectives

• To develop a training and technical assistance strategy (including a training and technical assistance marketing plan) in order to increase structured restitution programs and to assist agencies in upgrading existing programs;

• To compile or develop training and other informational materials, as necessary, including materials describing innovative restitution program models or prototypes;

• To implement training and technical assistance in accordance with the developed strategy;

• To assess the results of training and technical assistance, in order to improve restitution program services; and

• To utilize restitution programs as catalysts for overall juvenile justice system improvement.

Program Strategy

OJJDP expects to fund a three-year project under this program announcement. Grant awards will be made annually, for each of three 12-month budget periods.

The program will include three phases:

1. Phase one will consist of the development and testing of a strategy for increasing structured restitution programs, and for upgrading existing programs through delivery of technical assistance and training, and through information dissemination. This strategy should help guide OJJDP's short- and long-range support of restitution programs in the juvenile justice system.

The strategy should also include recommendations for any ancillary restitution-related activities for which OJJDP support might be indicated, such as demonstration projects, research, evaluation, and promotion of restitution under the OJJDP Formula Grants Program. In addition, the strategy document should provide cost estimates of OJJDP expenditures required to carry out the training, technical assistance and other strategy recommendations. The recommendations will need to be prioritized to assure funding for the most crucial activities.

The strategy to be developed will require both recommendations for the programmatic content of the training and technical assistance to be conveyed to the field, and a marketing plan which can help assure optimum exposure of the juvenile justice policymakers, managers, and practitioners to the programmatic content.

The training and technical assistance program recommendations must be developed in concert with the marketing plan. These recommendations should cover the process and the content of training and technical assistance. They should address training and technical assistance materials development, training design, settings, extent, and target audiences.

The basic questions are: What training and technical assistance can best assure that juvenile restitution and community service programs compensate the victims, help salvage the offenders, and provide crime control in their host communities? What ancillary activities (research, demonstration, evaluation, etc.) are needed to start, maintain, expand, and improve restitution and community service programs? What funding is required for all of the above purposes, and how can it be secured for the short- and long-range?

The restitution and juvenile justice focus in the strategy document should be on recommendations for significant advancements over previous practices that have not worked well. The strategy should also include the rationale for these advancements. While the "balanced approach," already referred to, may not be the only possible innovation in juvenile justice and restitution procedures and programming, it does provide both a theoretical base and practical guide for action. Thus, it can be used as the framework for improvements both in individual restitution programs and in the juvenile justice system overall. The combined concepts of community protection, offender accountability, and competency development are viable goals, which, when properly presented (marketed), can generate the kinds of community acceptance and support that have declined for the traditional programs of probation or institutional custody.

The strategy proposed for future OJJDP support under this program announcement should represent the cutting edge in current restitution and juvenile justice knowledge and practice.

OJJDP expects that the award recipient will make full use of the results of the national survey of restitution programs currently being completed under the Restitution Education, Specialized Training & Technical Assistance cooperative agreement, and that, prior to making strategy recommendations, the grantee will inspect successful restitution programs in the field.

Phase one of the project should conclude with the completion of a strategy document, which will provide recommendations for further activities to be undertaken by the award recipient, and for the future OJJDP role in restitution and related juvenile justice programming. The project's first phase should also include the testing of the proposed strategy, in whole, or in part, in two to three jurisdictions.

The strategy development and testing is expected to be completed approximately during the first 12-month budget period.

2. Phase two, the second 12-month budget period, will be devoted to expanded implementation of the restitution program strategy, in accordance with the marketing plan developed during the previous project phase.

Phase two should also include any training, technical assistance and program marketing materials development indicated by the strategy. Documents produced by the project must build on (not duplicate) publications issued under the RESTTA cooperative agreement (e.g., Rubin and Thornton, "Restitution Improvement Curriculum: A Guidebook for Juvenile Restitution Workshop Planners," 1988), or on other relevant information in the area of juvenile restitution. The specific design and workplan for the second phase of the project is expected to be contained in the continuation application covering the second 12-month budget period.

3. The project's third 12-month phase will continue implementation of the restitution program expansion and refinement strategy, and will provide an assessment of the results of the 36-month effort. The assessment report should indicate both the accomplishments at the conclusion of the project period, and any significant training, technical assistance, or other needs in the juvenile restitution area which remain unmet. The project must maintain a management information system from the outset that can capture data pertaining to the questions noted above. This phase must also cover the completion of any publications started, but not finished, during the previous phase. The design for this phase of the project will be presented in the third year continuation application.

The information and requirements provided in this announcement pertaining to phases two and three of the project are sparse because the specific work to be performed during each of these subsequent 12-month budget periods will depend on the program strategy developed during phase one. Thus, while applicants must convey competence to handle the entire thirty-six month project period, the initial applications submitted under this announcement must place the main emphasis on the first phase.

Products

• A strategy document providing recommendations for training, technical assistance, marketing, and related activities to be implemented by the award recipient, and recommendations for future OJJDP support of juvenile restitution program expansion and improvement, including cost estimates, and mini-reports of the test site results;

• Training, technical assistance, and marketing materials determined necessary during the strategy development phase of this project;

• A project assessment report indicating accomplishments during the three-year grant period, and identifying remaining training, technical assistance or other program support needs in the area of restitution; and

• Quarterly progress reports regarding project activities.

Eligibility Requirements

Applications are invited from public and private organizations. Private for-profit organizations must waive their fee to be eligible. Joint proposals by two applicants are welcome, as long as one organization is designated as the applicant and the other as co-applicant.

Selection Criteria

Applications will be rated on the extent to which they meet the following selection criteria:

1. Conceptualization of the problem. (25 points). The applicant must convey a clear understanding of the issues covered in this program announcement and of the work to be performed. In particular, such understanding must pertain to the interface of restitution and community-service programs with other juvenile justice system endeavors, and with the broader efforts of juvenile and criminal justice system improvement and of community crime control. The applicant must also exhibit knowledge of marketing techniques and of other procedures to be employed for expanding the utilization of restitution and community-service approaches as viable, alternative juvenile justice dispositions.

2. Statement of goals and objectives. (15 points). The goals and objectives to be achieved by the project must be clearly defined, and expressed in operational terms consistent with the issues and performance requirements

set forth in the conceptualization of the problem section of the application.

3. Project design. (20 points). The application must propose a project design, indicating a work plan, specific procedures to be carried out, performance schedules, expected accomplishments, and products. The design must be consistent with the project's goals and objectives, and with the conceptualization of the problem statement(s).

4. Project management. (15 points). The project's management structure and staffing must be appropriate for the successful implementation of the project. Key staff should have significant experience in program management and in the subject area(s) addressed in this announcement. Staff résumés should be attached to the application.

5. Organizational capability. (15 points). The applicant organization's ability to conduct the project successfully must be clearly documented in the proposal. The documentation should include organizational experience in the subject areas, and experience in conducting projects of the scope and complexity reflected in this program announcement.

6. Budget. (10 points). The proposed budget must be reasonable, allowable, and cost effective *vis-a-vis* the activities to be performed.

Award Period

The project period is 36 months. The initial budget period is 12 months.

Award Amount

The award for the initial 12-month budget period will be up to $200,000. The awards for the subsequent budget years will be consistent with the program strategy proposed by the project funded under this program announcement, approved by OJJDP, and with the availability of funds.

Due Date

Applications must be received by mail or delivered to OJJDP by June 1, 1992.

Drug Prevention

Professional Development for Youth Workers

Purpose

To develop and provide youth workers with training opportunities to promote their professional development and ensure that state-of-the-art instruction in matters affecting high-risk youth is available to those entrusted with their care.

Background

Since 1975, OJJDP has funded a number of training projects to address individual needs and occasional crisis situations. To have a more permanent impact on the professionalism of the cadre of youth workers employed in a myriad of agencies and to foster their professional development, a formal and continued training program should be developed.

Recently it was estimated by the Center for Youth Development and Policy Research of the Academy for Educational Development that over 17,000 organizations exist in the country that focus primarily on youth programming. The organizations range in size and mission. At the present time, there are diversified approaches to the professional development of staff personnel in community-based programs in such areas as school security, shelter-care, after-care, probation, court intake and youth services. However, to the extent to which information is available, there is no core curriculum for individuals addressing the needs of high-risk youth in our society.

Consequently, it appears that the staff personnel employed in youth-serving organizations assisting high-risk youth are not receiving the support required to deliver quality care. Without a formal system of professional development opportunities, this dedicated group of individuals may not have the quality of support needed to make a difference in the lives of these youth.

Goal

To establish a professional development training curriculum for youth workers in community-based agencies, serving high-risk youth.

Objectives

- To conduct an inventory of existing training programs;
- To conduct an assessment of present and future training needs for the target population;
- To develop several curricula areas deemed to be of greatest need;
- To develop a set of core modules tailored to the unique needs of youth service workers in three to five youth-service settings; and
- To establish an implementation mechanism for the training package(s) developed and conduct an evaluation using measurable criteria.

Program Strategy

During the first year of a three-year project period, the grantee will first conduct an inventory of existing training programs. While the inventory is being catalogued, the grantee will also conduct a survey of a representative sample of youth-serving organizations to determine present and future training needs. Additionally, the grantee will review the findings of recently conducted needs assessments of training by OJJDP in collaboration with the National Institute of Corrections and the Office of National Drug Control Policy as well as information available from the Family and Youth Services Bureau of the Department of Health and Human Services, to determine whether the findings may lend themselves to achieving the goals and objectives of this initiative. From the results of the survey, several areas will be identified for development and refinement into curricula for training modules. The grantee will also undertake an analysis to determine the most economical means and the soundest approaches of providing the training to the greatest number of persons in the target audience. The analysis will consider traditional classroom approaches, distance learning, computer assisted training, etc. Finally, the grantee will provide OJJDP with recommendations of various options for providing the training to the field. During the second and third year of the program, the developed curricula in several topical areas will be provided to the field through a number of approaches, including distance learning and traditional classroom means. For each training program offered, the grantee will develop an evaluation protocol to determine the worth and effectiveness of the developed curricula.

Specific products to be completed during this project are:

- A report on existing training opportunities focusing on youth-serving agencies and professional youth workers which describes at a minimum, the target populations, subject matter, modality or format (how the training was offered to the target audience), funding (cost per trainee), and effectiveness measures and results;
- A survey instrument, for OJJDP's prior approval, to be employed in conducting the survey of present or future training needs;
- A report of the survey of a representative sample of high-risk youth-serving organizations of various sizes to determine present and future training needs which describes, at a minimum, the targeted population, issues being addressed, training objectives, and relative priority among survey results;
- A report of recommendations to OJJDP for development of several topical areas for which curricula should be developed, including the mechanism or means of providing the recommended curricula;
- A number of topical areas, as determined by OJJDP, developed into curricula modules for this training program; and
- Several developed curricula modules offered to the field during the initiative's second year.

Eligibility Requirements

Applications are invited from public agencies and private organizations that can demonstrate the experience and capability to conduct a training needs assessment, develop curricula, and provide training for youth-serving organizations working with high-risk youth. Applicants must also identify a listing of up to 50 persons dealing with high-risk youth from a cross-section of youth-service agencies who could be invited to a national conference to support the training needs assessment.

Selection Criteria

Applications will be rated on the extent to which they meet the following selection criteria:

1. Conceptualization of the problem. (15 points). The applicant must demonstrate a clear understanding of, and competence to deal with, issues addressed by youth-serving organizations, needs assessments, curricula development, and providing training to the target population.

2. Statement of objectives. (15 points). The project's objectives must be clearly defined and consistent with the issues and requirements set forth in the conceptualization of the problem.

3. Project design. (30 points). The project's procedures, workplan and products must be directly linked with the stated objectives addressed by this announcement.

4. Project management. (10 points). The project's management structure and staffing must be adequate for the successful implementation and completion of the project. The management plan describes a system whereby logistical activities are handled in the most efficient and economical way and supported by a sound financial structure.

5. Organizational capability. (15 points). The applicant organization's ability to conduct the project successfully must be documented in the application. Organizational experience in serving high-risk youth, curricula development, and training experience with this population is required. Key project staff personnel should have significant experience in serving youth supported by experience in training youth services workers.

6. Budget. (15 points). The proposed budget must be reasonable, allowable and cost effective vis-a-vis the activities to be undertaken.

Award Period

The project period is 36 months. Additional funding beyond this period will be considered upon review of periodic reports of the project's accomplishments, reaction of the field to the endeavor, and available funds within the OJJDP appropriation.

Award Amount

Up to $200,000 will be available for this project for the first 12-month budget period of the project.

Due Date

Applications must be received by mail or delivered to OJJDP by June 9, 1992.

Contact

For further information contact Frank M. Porpotage II, Training, Dissemination, and Technical Assistance Division, (202) 307–0598.

Native American Alternative Community-Based Program

Purpose

To support the development of community-based alternatives for Native American juvenile offenders adjudicated by the tribal Courts who are being retained in the community, and for Native American youth who are returning from institutional placement.

Background

Examination of data with regard to racial and ethnic involvement in the juvenile justice system makes it clear that Native American youth are disproportionately involved. This disproportionately high involvement extends across all aspects of the system—from arrest to disposition and incarceration. There is a significant crime problem on Native American reservations, but are the right steps being taken to resolve it? (See the Concept Paper of the Native American Community-Based Alternatives for Adjudicated Youth Working Group, the topical bibliography developed for this initiative and the background paper, entitled "Native American Delinquency: An Overview of Prevalence, Causes and Correlates, and Promising Interventions" has been developed. These documents are available from OJJDP on request.)

OJJDP proposes to assist Native American tribal governments in developing community-based interventions for adjudicated youth or youth who are reentering the community after incarceration. The approach that will be taken is process oriented and designed to empower the tribes to develop their own programs based on their cultural norms. Technical assistance and training will be provided to assist the selected tribes in planning, and to provide insight into promising approaches to community-based alternatives and reentry programs that have been identified by OJJDP grantees and other Federal, State, and locally supported programs.

Goal

To assist selected tribal governments in developing effective community-based alternatives for adjudicated youth and effective reentry programs for incarcerated youth.

Objectives

- To fund a training provider that is experienced with Native American tribal governments, tribal courts and tribal juvenile justice systems;
- To fund approximately 10 tribal governments which have juvenile court jurisdiction to assist them in planning and implementing community-based alternatives for adjudicated youth and reentry programs for incarcerated youth;
- To provide training and technical assistance to these tribal governments to assist them in planning and implementing community-based alternatives and reentry programs that reflect the cultural and traditional norms and values of their tribes;
- To enlist the financial and/or technical support of other Federal agencies or private foundations which have related programs; and
- To implement and evaluate the respective community-based alternative and reentry programs.

Program Strategy

Phase I of this program will involve the selected tribal governments in a planning process that is designed to enumerate the juvenile justice-related needs and problems on the reservations and to identify the existing resources that may be utilized to develop and sustain community-based alternatives and reentry programs for adjudicated Native American juvenile offenders. Phase II will involve the selected tribes in implementing community-based

alternative or reentry programs they have chosen.

To assist the tribes in this effort, a training and technical assistance provider with substantial experience in working with tribal governments, tribal courts, and the tribal juvenile justice systems will be competitively selected through this solicitation. The selected training provider will assist the tribes in all aspects of this planning process during Phase I and provide training and technical assistance during the implementation phase (Phase II).

While the framework for the envisioned model is generic, it should incorporate certain core elements. The basic concept is that an increased level of social control and service provision is required as the severity of offending behavior increases and the personal problems and needs of the youth become more pronounced. The program should:

- Be grounded in the accepted values and customs of the tribe;
- Respond to the identified problems, needs, and deficits of targeted youth and their families;
- Utilize appropriate traditional customary sanctions;
- Focus on building the capacity of the tribal governments and related agencies to serve the targeted youth in the community. There should be a commitment on the part of the tribal governments to promote entrepreneurial activities that provide youth opportunities;
- Build on existing relevant research to advance program planning such as:
  —Restitution and community service;
  —Intensive supervision programing; and
  —Aftercare and reentry programs;
- Develop broad-based community support and a sense of community ownership and responsibility; and
- Involve youth.

The selection of necessary program components should be based on a careful assessment of risks and needs of the youth. Mechanisms should assure that the necessary program components are available to the tribal courts and to provide reasonable assurance of community safety and program accountability.

This program envisions the community as a circle, with the youth in the center and the cluster of services in individual but overlapping circles around the circumference of the circle. When the youth are removed (institutionalized), the circle is broken, social harmony is disrupted, and the entire community is negatively affected. This proposed multi-disciplinary approach is designed to keep the youth in the community, if at all possible, and to keep the circle intact. This philosophical perspective is consistent with the metaphysical beliefs of many Native Americans throughout the United States and is often felt to be a fundamental aspect of social integration and cohesion in the community.

The respective parties will be responsible for the following activities:

—Phase I

- **Training Provider.** The training provider will:
  (1) Assist OJJDP with the selection of the tribes that will participate in this initiative;
  (2) Produce a training curriculum on assessment and planning techniques which will be delivered to the selected tribal representatives;
  (3) Develop a plan to deliver training to the tribes either on a cluster, regional, or individual site basis, as best suits the resources made available for this effort;
  (4) Plan a method to provide technical assistance to help the tribes construct alternative community-based programs for adjudicated juvenile offenders; and
  (5) Identify promising community-based alternatives and aftercare approaches with the assistance of OJJDP and its grantees.
- **Tribal Governments.** After notification of selection, each tribe will:
  (1) Identify a coordinator or key person to assume responsibility for the assessment and planning process;
  (2) Participate through key tribal leaders and the selected coordinator in the training provided by the training and technical assistance provider;
  (3) Provide support to the coordinator who will be responsible for conducting the assessment and facilitating the planning on the reservation; and
  (4) Consult with the coordinator who will be expected to draft a plan for approval and implementation by the tribal government.

—Phase II

- **Training Provider.** The training provider will:
  (1) Continue to identify promising approaches in community-based alternatives to incarceration and effective aftercare; and
  (2) Provide training and technical assistance to the tribes to assist them in implementing the program components that have been chosen by the tribe and in developing the necessary management information system for the program.
- **Tribal Governments.** The tribal governments will:
  (1) Complete the selection of all components for the program;
  (2) Identify all resources that will be made available; and
  (3) Implement the chosen program components.

The following products will be developed by the respective parties:

—Phase I

- **Training Provider.**
  (1) A plan for providing the training and technical assistance;
  (2) A curriculum on assessment and planning for the alternative community-based programs; and
  (3) Technical assistance materials necessary to carry out this responsibility.
- **Tribal Governments.**
  (1) An assessment report; and
  (2) A plan for implementing the community-based alternatives for adjudicated juvenile offenders and the reentry program for youth returning from institutions.

—Phase II

- **Training Provider.**
  (1) A plan for identifying additional promising programs and for providing training and technical assistance to the selected tribal governments; and
  (2) A training curriculum and technical assistance materials on alternative community-based programs for adjudicated youth and youth returning from institutional placement.
- **Tribal Governments.**
  (1) The program design for their alternative community-based program for adjudicated youth and youth returning from institutional placement;
  (2) Training materials developed by the tribe to train staff in implementing the project; and
  (3) A policies and procedures manual for the project.

Eligibility Requirements

Because this effort will include funding for a training provider to assist the tribes and direct grants to the tribal governments, OJJDP invites applications from public or private nonprofit agencies, or institutions for the training and technical assistance aspect of the program. Concept papers are invited from interested tribal governments which have juvenile court jurisdiction. "Juvenile court jurisdiction" means tribal courts that have legal authority to adjudicate cases involving juveniles for criminal offenses.

- **Training Provider.**

OJJDP invites applications from public agencies or private nonprofit organizations. Pursuant to section 261 (a) of the JJDP Act, 42 U.S.C. 5665(a), applications cannot be accepted from profit making firms.

Applicants must demonstrate that they have substantial experience with, and knowledge of, tribal life and culture, tribal governments, tribal courts, and the tribal juvenile justice systems. They must demonstrate experience with the government grant process, providing training and technical assistance, and the ability to evaluate and assess tribal court operations and organize data and information collection. Applicants must demonstrate that they have credibility with tribal court jurisdictions by the inclusion of letters of support.

- **Tribal Governments.**

OJJDP invites pre-applications from tribal governments which:

- Have an established tribal court system with juvenile jurisdiction;
- Demonstrate a commitment of the tribal council and the juvenile court to develop alternative community-based programs for adjudicated youth and effective aftercare programs for youth returning to the reservation;
- Demonstrate a long-term commitment (36 months) of tribal council support for implementation of the program;
- Establish a need for alternative programs, as evidenced by high levels of incarceration and lack of community-based programs on the reservation. For example, at any given time, at least 50 youths are on probation or aftercare status in the community;
- Establish a need for reentry programs and aftercare as evidenced by high rates of recidivism (a rate higher than non-Native American youth committed to State institutions);
- Demonstrate a commitment to bring other resources to support the program; and
- Have a reliable database to provide information for documenting problems with juvenile offending, incarceration, and recidivism on the reservation.

Application Requirements

All applications must be submitted in accordance with the general requirements set forth in the OJJDP Application Kit. Specific requirements for the tribal governments follow.

- **Tribal Governments.**

Because OJJDP will be awarding small planning grants of no more than $20,000 to tribal governments for a 9-month period, OJJDP has decided to utilize a pre-application process to select up to 10 tribes. The pre-applications must be limited to 20 double spaced pages or less, excluding appendices that may include resumes, charts, etc. The concept papers must contain the following:

(1) A concise description of the problems with delinquency on the reservation, including the amount, severity, and rate of detention, incarceration, and recidivism of adjudicated juvenile offenders in the tribal courts.

(2) A brief history of the traditional sanctions providing for juvenile misbehavior in the tribe and the extent to which these traditional sanctions are still utilized.

(3) A brief description of the juvenile court and juvenile justice system operation on the reservation.

(4) A brief discussion of how the tribe will participate in the planning process (e.g., what personnel will be assigned to assist with the planning).

(5) A concise discussion of other resources (e.g., monetary, human, etc.) that will be made available to support the planning and implementation of the community-based alternative project.

(6) A time-task plan that identifies key milestones and dates for accomplishment.

(7) Letters of commitment from the Tribal Chairman, Tribal Council, and the Tribal Judge. These letters must reflect an understanding of the proposed projects and a commitment to at least a three-year effort.

Selection Criteria

- Training Provider.

Applications will be rated on the extent to which they meet the following selection criteria:

1. *The problem to be addressed. (20 points).* The problem to be addressed by the project is clearly stated and represents a clear understanding of the nature and scope of problems and issues in the Native American juvenile justice system.

2. *Goals and objectives. (10 points).* The goal(s) and objectives are clearly defined and the objectives are measurable.

3. *Project design. (35 points).* The project design is sound and contains program elements directly linked to the achievement of project objectives.

The overall design for the training and technical assistance aspect of this project will be assessed on the basis of its appropriateness, conceptual clarity, and technical adequacy. The design must conform to the program strategy described above. The applicant must provide a preliminary plan for carrying out the activities and developing the products outlined in the Program Strategy section of this solicitation. The proposed plans must clearly relate to the goal and objectives of this program to develop effective community-based alternatives for adjudicated juvenile offenders.

4. *Management structure. (15 points).* The project management structure is adequate to conduct the project successfully.

The management structure for the project must be consistent with the project goals and tasks described in the application. The program implementation plan will be evaluated to determine whether:

—The applicant demonstrates in the time-task plan and program design that it will complete the major milestones of the project on time.

—There is appropriate staffing to meet the requirements of the project.

5. *Organizational capability. (15 points).* The applicant demonstrates organizational capability sufficient to support the project successfully.

Both the personnel of the organization as well as its technical capabilities must be sufficient to accomplish the tasks of the project.

The applicant must demonstrate that staff members have sufficient substantive expertise and technical expertise (see Eligibility Requirements). The applications will be judged on the appropriateness of the position descriptions, required qualifications, and staff selection criteria.

6. *Budget. (5 points).* Budgeted costs are reasonable, allowable, and cost effective for the activities proposed to be undertaken. All costs must be fully justified in a budget narrative that explains how a particular cost item was determined.

- **Tribal Governments.**

The concept paper or preapplication will be rated on how well they meet the following criteria:

1. *The problem to be addressed. (25 points).* The applicant has comprehensively identified the nature and scope of the problems of juvenile delinquency on the reservation, the current resources that are available to address them, and a description of the juvenile court and juvenile justice system operation on the reservation.

2. *Goals and objectives. (15 points).* The applicant has thoroughly identified clear goals and objectives for the planning stage of the project.

3. *Project design. (25 points).* The applicant has clearly and concisely described how it will participate in the planning process.

4. *Management structure. (15 points).* The applicant has discussed the staff and other resources which will be available to implement the planning stage of the project and has demonstrated that the staff is qualified

to carry out this function. Also the applicant has provided a time-task plan with timely milestones for the planning period.

5. *Organizational capability. (15 points).* The applicant has juvenile court jurisdiction and has provided letters of commitment from the tribal chairman, presiding judge, chief of police, and any other key leader on the reservation.

6. *Budget. (5 points).* A budget is provided which is fully justified.

Award Period

The program period will be 36 months. The initial budget period will be 12 months for the training provider and 9 months for the selected tribal applicants.

Award Amount

Up to $300,000 has been allocated for this program: Up to $100,000 for the initial award to the training provider; and up to $20,000 will be awarded to each of the approximately 10 tribes as a 9-month planning grant.

Due Date

• **Training Provider.**

Applications must be received by mail or delivered to OJJDP by May 26, 1992.

• **Tribal Governments.**

Concept papers from the tribal governments must be received by mail or delivered to the above address by 5 p.m. on July 3, 1992. Concept papers postmarked after this due date will not be considered. An original and two copies of the concept paper should be sent to OJJDP.

Contact

For further information contact Eugene Rhoden, Special Emphasis Division, (202) 307–5914.

Field-Initiated Program

Purpose

To develop promising, innovative ideas relevant to the mission of OJJDP, particularly approaches that address OJJDP and OJP priority areas, but that utilize approaches other than those by current and planned OJJDP projects.

Background

Customarily, the research, development, and training programs which OJJDP has supported deal with areas that are specified by Congress or address agency priorities. Applicants have been limited to proposals which respond to specific requests by OJJDP. Thus, other imaginative and innovative approaches of researchers and practitioners are not always known to OJJDP. Through the Field-Initiated Program, OJJDP welcomes proposals which address the priority areas of OJP for Fiscal Year 1992. These priorities are listed and described below. Examples of specific topics of importance are included:

• *Gangs and violent offenders.* Prevention, intervention and suppression of illegal gang activity and gang recruitment of juveniles is an important and challenging subject of research. Gang-related homicides and violent crime are tragically high. Gang violence and chronic, violent delinquency are of particular interest to OJJDP, as well as intensive supervision and aftercare.

• *Victims.* Children are abused, neglected, abandoned, and exploited. Young victims need special assistance. The criminal justice and juvenile justice systems must strive to implement policies and programs to improve services to crime victims.

• *Community-based policing and police effectiveness.* The juvenile justice system should assume a primary role in mobilizing communities to develop comprehensive strategies for combating gang violence and preventing drug trafficking. Alliances between community residents and the police are essential for making neighborhoods safe and drug-free.

• *Intermediate sanctions and user accountability.* These sanctions fill the gap between traditional probation and secure incarceration and are usually less severe than detention or prison. They provide graduated levels of correctional programs which foster accountability and appropriate treatment. Drug testing should be considered an essential component of intermediate sanctions.

• *Drug prevention.* Drug prevention activities are focused on community-based efforts to reduce drug abuse, gang activity, illiteracy, juvenile delinquency, and school dropouts, especially in minority communities. Programs which focus on mobilizing law-abiding citizens to get involved with preventing drug trafficking, serious crime, gang violence, and child sexual exploitation in their neighborhoods are particularly needed.

• *Intensive prosecution and adjudication.* Prosecution and adjudication should be a primary focus of the juvenile justice system to attack the problems of drug trafficking, gang violence, and community exploitation. Activities should focus on policies, procedures, and practices that expedite the identification, processing, adjudication, and case disposition of serious, violent juvenile offenders.

• *Evaluations.* Evaluations are a primary component of OJJDP discretionary grant programs. OJJDP promotes program evaluation so that effective programs can be identified, publicized, and replicated in other jurisdictions, while programs that have not proven effective can be discontinued.

• *Information systems support and statistics.* Juvenile justice agencies need accurate, comprehensive, and timely information in developing policies and allocating resources to control and prevent juvenile delinquency. Activities focus on the collection and analysis of juvenile justice information related to serious crime, gang activity, illegal drug use, pre- and post-adjudicatory incarceration, criminal careers, and system-wide service response effectiveness.

Goal

To promote applications that will advance the prevention and suppression of juvenile delinquency and the effectiveness of juvenile justice practices.

Objectives

• To promote and support innovative research, development, demonstration, or training programs in the juvenile justice field with emphasis on the Fiscal Year 1992 OJP priorities;

• To encourage new methods for dealing with the current priority problems; and

• To develop knowledge that will lead to new techniques, approaches, and methods to prevent delinquency.

Program Strategy

Through the Field-Initiated Program, OJJDP is soliciting innovative program proposals. Proposed programs must address pertinent issues and problems in the areas of current priorities. Proposals should define the needs and/or problems, and describe the objectives, strategy, and methodology to be employed. A brief review of the history of the issue and current knowledge and approaches to addressing this issue should be included. Through a competitive process, applications will be subjected to peer review. As many grants will be awarded to projects as funding allows. Projects may last up to 18 months.

Eligibility Requirements

Applications are invited from individuals, public and private agencies, organizations, educational institutions, or combinations thereof. To expand the pool of eligible candidates, applications will be accepted from for-profit organizations, provided they agree to waive any profit or fee and accept only allowable costs.

Applicants must demonstrate that they have experience in the design and implementation of the types of programs for which they are applying.

Selection Criteria

Applications will be rated on the extent to which they meet the following selection criteria:

1. The problem(s) to be addressed by the project is clearly stated. (15 points).

• The problem(s) to be addressed is based upon issues that have particular relevance to current OJJDP and OJP priorities. (7 points).

• The applicant demonstrates broad knowledge of the current situation and practices and is aware of training, research, or demonstration project needs. (8 points).

2. The objectives of the proposed project are clearly defined. (20 points).

• The applicant fully explains the project's objectives. (10 points).

• The objectives are clear and measurable. (10 points).

3. The project design is sound and contains program elements directly linked to the achievement of the project objectives. (25 points).

• The design contains research, training or demonstration elements directly related to the program objectives. (10 points).

• The applicant provides a detailed workplan describing the methodology of the program. (15 points).

4. The project management structure is adequate to conduct the program successfully. (15 points).

• The applicant provides specific guidelines and timelines with regard to the training, research, or demonstration program activities. (10 points).

• The applicant explains how management structure is consistent with the needs of the program. (5 points).

5. The applicant's organizational capability is demonstrated at a level sufficient to conduct the project successfully. (15 points).

• The applicant demonstrates knowledge and experience with juvenile justice issues, particularly with regard to the area of study addressed. (5 points).

• The applicant identifies staff qualified to successfully support the project. (10 points).

6. Budgeted costs are reasonable, allowable, and cost effective for the activities to be undertaken and are directly related to the achievement of the program objectives. (10 points).

Award Period

The grant period may be up to 18 months.

Award Amount

The total amount available is $500,000. Award amounts will be subject to negotiation. OJJDP anticipates funding 8 to 11 projects with available funds.

Due Date

Applications must be received by mail or delivered to OJJDP by May 11, 1992.

Contact

For further information contact D. Elen Grigg, Research and Program Development Division, (202) 307–5929.

Evaluations

Summer Research Fellowship Program

Purpose

To provide an opportunity for individuals to analyze existing research data and to produce innovative information on juvenile justice and delinquency prevention, focussing on programmatic priority areas.

Background

The Summer Research Fellowship Program has been established within the National Institute for Juvenile Justice and Delinquency Prevention (NIJJDP) at OJJDP.

The NIJJDP encourages and coordinates research in many aspects of juvenile justice. The priority areas of OJJDP and OJP are stated above under the "Field-Initiated Program" descriptor, and are incorporated herein by reference.

OJJDP and other Federal agencies have funded numerous projects that have contributed significantly to our understanding of juvenile delinquency and its prevention, and of the operations of the juvenile justice system. Many of these projects have been costly and time-consuming and resulted in extensive data. OJJDP's interest in these data does not end with the achievement of the project's original objectives. Reexamination of such data can yield innovative insights. Moreover, secondary analysis can corroborate other findings. A meta-analysis of various research products can reveal new perspectives and produce new, useful information for policy guidance.

Goal

To provide innovative information to guide and enhance juvenile justice and delinquency prevention through short-term studies in the areas of the OJP priorities mentioned above.

Objectives

• To conduct additional analysis of statistical and research data in the field of juvenile justice and delinquency prevention;

• To conduct a meta-analysis of existing research data, particularly of research data and data sets resulting from OJJDP-sponsored research;

• To promote the use of research data and data sets which can provide critically needed information on important juvenile justice issues; and

• To prepare special analyses and disseminate the results of such work.

Program Strategy

Proposals are solicited from researchers who are interested in performing a further analysis or a meta-analysis of existing research data and findings in the OJP priority areas. While this program is intended primarily for senior researchers and relatively new Ph.D.s, it is not limited to them. Although project problem identification and data selection are the choice of the applicants, proposals to examine juvenile justice and delinquency prevention research data and data sets generated under the auspices of OJJDP or other Federal agencies are of particular interest to OJJDP. These are available through the National Juvenile Court Data Archive, the Interuniversity Consortium for Political and Social Research at the University of Michigan, or the National Institute of Justice Data Resource Program.

Studies based on other research data will also be considered for funding. Applicants should make a special effort to describe in detail the research data for the proposed analyses and their relevance to the goals of OJJDP.

Eligibility Requirements

Applications will be accepted from researchers who have achieved doctorates, but it is not limited to them. Applicants should submit an application along with the following information:

A. A proposal not to exceed 10 double-spaced pages which should include:

(1) The policy or research question to be addressed;

(2) The research design to be employed;

(3) Any data set(s) to be employed;

(4) The procedure and analytical methodology, including a description of how planned analyses replicate or build on results obtained by others using such information;

(5) The potential policy implications; and

(6) The expected products of the research.

B. A detailed one-page budget for salaries, supplies, computing costs, and

other expenses. Applicants should include the cost of one trip to present the results of this research at an appropriate professional society meeting, such as the annual meeting of the American Society of Criminology or at a colloquium at the OJJDP offices. This program is designed as summer support for individuals; the inclusion of general institutional and indirect costs is not acceptable.

C. The Summer Research Fellow applicants must submit two letters of recommendation from individuals who are familiar with work and qualifications for this fellowship (with one recommendation from the supervisor or dean indicating an evaluation of the proposed topic and the potential of the applicant).

D. Résumés, also required for key fellowship program personnel, should include background, academic work, professional experience and publications.

Selection Criteria

Applications will be rated on the extent to which they meet the following selection criteria:

1. The problem to be addressed by the project is clearly stated. (30 points).

• The problem to be addressed is based upon issues which are significantly related to juvenile justice and delinquency prevention in the OJP priority areas. (15 points).

• The applicant demonstrates broad knowledge of the problem and surrounding issues and is aware of present practices or programs addressing the problem. (15 points).

2. The objectives are clearly defined and relate directly to the problem to be studied. (20 points).

3. The project design is sound and contains program elements directly linked to the achievement of the project objectives. The applicant must provide a workplan with a timeline which indicates significant milestones in the project, due dates for products, and the nature of the products to be submitted. (25 points).

4. The project management structure is adequate to conduct the project successfully. (5 points).

5. The applicant's capability is demonstrated at a level sufficient to conduct the project successfully. The applicant's academic and/or employment credentials provide adequate knowledge and experience of juvenile justice issues to complete the project successfully. (15 points).

6. Budgeted costs are reasonable, allowable and cost-effective for the proposed activities. (5 points).

Award Period

The project period will be up to five months. Extensions for the Summer Research Fellowships are as follows:

• Time extensions may be granted for completion and the delivery of the final report, but no further funds will be awarded.

• These time extensions must be requested before the expiration of the original grant and require a report of reasonable progress toward the objectives identified in the original application.

Award Amount

Funding for this program has been set at $30,000. Funds for each fellowship will be subject to negotiation. Two to three grant awards will be made. The maximum amount for any one Fellowship is $15,000.

Due Date

Applications must be received by mail or delivered to OJJDP by May 11, 1992.

Contact

For further information contact D. Elen Grigg, Research and Program Development Division, (202) 307–5929. Applicants who anticipate accessing the National Juvenile Court Data Archives at the National Center for Juvenile Justice (NCJJ) in Pittsburgh, Pennsylvania, should contact Howard Snyder at NCJJ (412) 227–6950 regarding the availability of appropriate data.

Graduate Research Fellowship Program

Purpose

To encourage scholars to undertake research in juvenile justice, and delinquency prevention, focusing on the current program priority areas.

Background

The Graduate Research Fellowship Program has been established within the National Institute for Juvenile Justice and Delinquency Prevention (NIJJDP) at OJJDP to solicit proposals from doctoral students entering the dissertation stage of their graduate program. The NIJJDP encourages and coordinates research in many aspects of juvenile justice. The priority areas of OJJDP and the OJP are the set forth above under the "Field-Initiated Program" descriptor and are incorporated herein by reference.

This program supports doctoral students at the dissertation stage of their academic careers. Through their sponsoring universities, doctoral students are awarded grants of up to $25,000 to support the completion of their dissertations. Dissertations resulting from this program should contribute to juvenile justice policy, delinquency prevention, promotion of literacy among juveniles and high-risk youth, prevention and treatment programs for juvenile sex offenders, analyses of pertinent data, or the advancement of knowledge concerning important juvenile justice issues.

Goal

To add to the knowledge of juvenile justice and delinquency prevention pertinent to the OJP priority areas described above, and to provide the opportunity for selected individuals in doctoral programs to choose a research topic in the field of juvenile justice, delinquency prevention or a related area for their dissertation study, thereby encouraging the expansion of researchers in this field.

Objectives

• To conduct basic or policy research on a specific issue, problem, or activity within juvenile justice and delinquency prevention pertinent to priorities; and

• To investigate policy procedures and practices important to resolving operational issues in the juvenile justice system.

Program Strategy

Research subjects should address juvenile justice and delinquency prevention within the current OJP priorities listed above. Extensive data exists for analysis. Proposed research which appears to develop new knowledge, evaluate existing or proposed policies and practices, or revise old information has the potential for improving current practice and, therefore, has merit.

Eligibility Requirements

Applicants must have completed all university requirements for the doctoral degree, except for the internship (where required) and the research, writing, and defense of the dissertation.

The proposal must be accompanied by a vita that includes information on the candidate's education, experience and publications, if any. The applicant should also enclose a letter of support from his or her adviser indicating an evaluation of the proposed topic and the potential of the applicant. Graduate Research Fellowship applicants should submit a paper, no longer than 10 double-spaced pages, which addresses research objectives, hypotheses and methodology; the appropriateness of the design to the issues raised; time schedules for major events of the study; and documentation that any necessary cooperation from organizations will be forthcoming.

To be eligible to administer a Graduate Research Fellowship grant on behalf of a doctoral candidate, an institution must be fully accredited by one of the regional institutional accrediting commissions recognized by the U.S. Secretary of Education and the Council on Postsecondary Accreditation. Overhead costs are not allowed for this program.

Selection Criteria

Applications will be rated on the extent to which they meet the following criteria:

1. The problem to be addressed by the research project is clearly stated. (30 points).

• The problem to be addressed is based upon issues which are significantly related to juvenile justice and/or juvenile delinquency prevention in the OJP priority areas. (15 points).

• The applicant demonstrates broad knowledge of the problem and any surrounding issues and is aware of present practices or programs addressing the problem. (15 points).

2. The objectives of the proposed project are clearly defined and relate directly to the stated problem. (20 points).

3. The project design is sound and contains program elements directly linked to the achievement of the project objectives. The applicant provides a workplan with a timeline which indicates significant milestones in the project, due dates for products, and the nature of the products to be submitted. (20 points).

4. The project management structure is adequate to conduct the project successfully. (5 points).

5. Applicant's academic credentials reflect adequate knowledge of juvenile justice issues to complete the project successfully. (20 points).

6. Budgeted costs are reasonable, allowable and cost effective for the activities proposed. (5 points).

Award Period

The project period will not exceed one year.

• Time extensions may be granted for completion and the delivery of the dissertation, but no further funds will be awarded.

• These time extensions must be requested before the expiration of the original grant and require the receipt of all progress reports showing reasonable progress toward the objectives identified in the original application.

Award Amount

Funding for this program has been set at $70,000, which will support two to five fellowships. The maximum amount for any one fellowship is $25,000. The specific amount is subject to negotiation.

The grant may include the fellow's stipend and other university expenses, including continuing registration, library and certain university fees. Major project costs that may be compensated include: Clerical assistance, special supplies, document reproduction, necessary local and out-of-town travel (reimbursed at the university's rate), foreign travel (with prior OJJDP approval) and computer time. Costs incurred prior to the formal grant award are not reimbursable.

Due Date

Applications must be received by mail or delivered to OJJDP by May 11, 1992.

Contact

For further information contact D. Elen Grigg, Research and Program Development Division, (202) 307–5929.

Effectiveness of Juvenile Offender Prevention and Treatment Programs: What Works Best and for Whom?

Purpose

To provide the most reliable and significant information available on effective prevention and treatment programs for juvenile offenders to facilitate the decision-making process for juvenile and family courts.

Background

According to the OJJDP draft publication, "Juvenile Court Statistics 1989," the delinquency case rate increased steadily between 1985 and 1989, so that by 1989 the rate was 11 percent greater than the case rate in 1985. Case rate increases occurred within each of the general offense categories. Between 1985 and 1989 the case rate for offenses against the person increased by 23 percent, property offenses cases by 8 percent, drug law violation cases by 6 percent, and public order cases by 14 percent.

These juveniles exhibited a wide range of educational, social, physical, and psychological problems which juvenile courts addressed. In order to provide additional support to the juvenile justice system, OJJDP is sponsoring a grant initiative to develop for juvenile and family courts a compendium of the most current information available on effective prevention and treatment programs for the juvenile offender. A number of prevention and treatment programs are being used by juvenile courts, e.g., early-family intervention, crisis intervention, mediation, restitution, diversion, intensive probation, employment programs, and others.

The juvenile offender needs to be provided the prevention or treatment services most appropriate for his or her problem(s) to deter future delinquency.

This grant initiative is expected to produce a "what works" manual that identifies specific prevention and treatment programs for different types of juvenile offenders. Such a manual will assist the juvenile justice system in the decision-making process in matching the juvenile offender with effective prevention or treatment programs. Through this OJJDP initiative, it is hoped that the number of juvenile offenders will decrease, lessening the burden on the already overloaded juvenile justice system.

Goal

To identify effective prevention and treatment programs for juvenile offenders being used by the juvenile and family courts, and to specify the target groups these programs serve.

Objectives

• To identify and describe the various juvenile offender prevention and treatment programs which are currently being used, including the following information elements: program target group, program components, goals and objectives, cost, evaluation, and contact person;

• To describe how offender classifications are being used in assigning delinquents to particular prevention and treatment programs; and

• To synthesize the information in a "what works" manual on effective prevention and treatment programs for juvenile offenders from court intake through probation to the juvenile and family courts.

Program Strategy

The applicant shall conduct a survey of juvenile and family courts nationwide in order to obtain the necessary information for the successful completion of this project. In addition, the following areas need to be specifically addressed within the application:

1. Establishment and tasks of a project advisory board;

2. Development of criteria for identifying effective juvenile offender prevention and treatment programs;

3. Development of a data-collection strategy and classification system on

effective juvenile offender prevention and treatment programs;

4. Establishment of an outline format to describe in detail the programs and the contact person for each one;

5. Identification of the strengths and weaknesses of each prevention and treatment program; and

6. Description of the juvenile court intake process on a continuum and the relationship of prevention and treatment programs to that process.

Eligibility Requirements

Applications are invited from individuals, public and private organizations, agencies, educational institutions, or combination thereof. Applicants must demonstrate that they have experience in the design and implementation of the type of program for which they are applying.

Selection Criteria

Applications will be rated on the extent to which they meet the following selection criteria:

1. The problem to be addressed by the project is clearly stated. (10 points).

2. The objectives of the proposed project are clearly defined with specific outcomes identified. (15 points).

3. The project design is sound and contains elements directly linked to the achievement of the project objectives. (35 points).

- The design contains elements directly related to the project objectives. (20 points).
- The applicant provides a detailed workplan describing the methodology of the project. (15 points).

4. The project management structure is adequate to conduct the project successfully. (15 points).

- The applicant provides specific guidelines and timelines in regard to the completion of project outcomes. (10 points).
- The applicant explains how management structure is consistent with the needs of the project. (5 points).

5. The applicant demonstrates its organizational capability is at a level sufficient to conduct the project successfully. (15 points).

- The applicant demonstrates knowledge and experience with juvenile justice issues, particularly in the area of study to be addressed. (8 points).
- The applicant identifies personnel staff qualified to support the project successfully. (7 points).

6. Budgeted costs are reasonable, allowable and cost effective for the activities proposed and are directly related to the achievement of the project objectives. (10 points).

Award Period

The award period will be 12 months.

Award Amount

OJJDP has allocated up to $50,000 for this grant.

Due Date

Applications must be received by mail or delivered to OJJDP by May 11, 1992.

Contact

For further information contact Marilyn Landon, Research and Program Development Division, (202) 307–0586.

Intensive Prosecution and Adjudication

A Study to Examine the Delays in Juvenile Justice Sanctions

Purpose

To assess the juvenile justice system to determine the extent of unnecessary delays in the processing of juvenile cases; the causes of delays; and their effects on juveniles and the administration of juvenile justice.

Background

The extent and effects of unavoidable delays in the juvenile justice process on the system and offenders are not well known because of the lack of research in this area. Since the Supreme Court decision of *In Re Gault*, 387 U.S. 1, 87 S.Ct. 1428, 18 L. Ed.2d 527 (1967) juvenile adjudicatory proceedings have become increasingly litigious and thereby have become more closely paralleled to adult criminal trials. The decision by a U.S. Court of Appeals in *U.S.* v. *Furey*, 500 F.2d 338 (2d Cir. 1974) granted juveniles the right to a speedy trial.

The role of the juvenile justice system traditionally has been to rehabilitate the offender rather than to punish. Regardless of how the role is defined, delay in the process impedes the effectiveness and efficiency of the juvenile justice system. Long processing time often overtakes the memories of victims, witnesses, and others. Moreover, witnesses move away and juveniles grow out of the system. When these situations occur, justice is not served.

The National Advisory Committee Standards on the Administration of Juvenile Justice state that a detained youth should have a detention hearing within 24 hours after the juvenile has been detained. An adjudicatory hearing should be held within 15 days of the detention hearing if the youth is detained or 30 days if not detained. A disposition hearing should be held within 15 days after the adjudicatory hearing.

The National District Attorneys Association's Standards on Juvenile Delinquency call for detained youth to have an initial hearing within 24 hours, a waiver hearing within 72 hours, an adjudicatory hearing within 30 days, and a disposition hearing within 30 days after the adjudicatory hearing. The time frames for non-detained youth are 3 days, 7 days, 60 days and 30 days, respectively. These are just two examples of standards developed by different organizations.

For any disposition sanction to be effective it must be imposed swiftly; it must be definitive; and it must be appropriate. The juvenile justice system should, at a minimum, assure the first two. Every day that a juvenile waits for treatment is a lost day for attaining the system's goals.

Goals

- To study the sequence of processing and decision-making to determine the duration of delays in comparison to existing standards;
- To estimate the extent of the delays at each step of the process; and
- To determine the effect that delays have on the effectiveness of juvenile justice system operations.

Objectives

- To provide reliable and accurate information to the juvenile justice field and OJJDP regarding delays in the administration of juvenile justice;
- To determine if the delays are system-wide or not and determine if the juvenile court processing time can be improved;
- To describe the influence of avoidable delays on the effectiveness and efficiency of the juvenile justice system;
- To determine if the affected juveniles experience any benefits or adverse results from known delays in the system; and
- To make recommendations for reducing avoidable delays.

Program Strategy

The program will involve the completion of three distinct tasks. These tasks will entail: Researching the extent and nature of the problem (Task I); further researching the severity and effects of delays and the causes for them, including systems that operate without delays (Task II); and developing recommendations on how the juvenile justice system can improve processing time and shorten delays (Task III).

Task I. This task entails preliminary work to be done in this project. The completion of this task, which addresses the first project objective, will necessitate a thorough literature review and assessment of previous work involving delays in the administration of juvenile justice. Previous research that documents delays in juvenile justice system operations in general should also be reviewed in an effort to discover clues to the causes. With information from the literature review, a survey of a sample of juvenile justice jurisdictions should be conducted to gather knowledge that will be the basis for assessing the nature of the delay problem. A report should detail the findings of the survey. The National Advisory Committee for Juvenile Justice and Delinquency Prevention's "Standards for the Administration of Juvenile Justice," the Institute for Judicial Administration-American Bar Association's "Standards for Juvenile Justice," the National District Attorneys Association's "Prosecution Standard 19.2," and the Conference of State Court Administrators' "National Time Standards for Case Processing," or a similar set of criteria should be used to determine if there are in fact any delays and if they are reasonable for the juvenile justice system to operate with both efficiency and effectiveness.

Task I should assist OJJDP in determining the scope of subsequent research.

Task II. Evaluation of the effect these delays have on effectiveness and efficiency. From the jurisdictions surveyed in Task I, a specified number of sites will be selected for further study, based on criteria developed from data collected during Task I and other socioeconomic and geographic factors. The sites will include both jurisdictions which are experiencing delay problems in juvenile processing and those which are not.

This more intensive site research initiative should include information collected from interviews with court administrators, prosecutors, juvenile court judges, detention center staff, parents of accused juveniles, the juveniles themselves, and any other people who may be instrumental in the processing of the cases.

The research should examine such variables as the number of petitions filed against a particular juvenile, the severity of the allegations, the effect that legal representation has on the processing time, the use of court appointed attorneys and private counsel, the use of plea bargains or mediation, and whether the juvenile is being held in a detention center or has been released to a legal guardian. All of these factors should be considered at the very least and studied, if necessary.

Task III. The final task to be completed will be the development of a new set of guidelines for processing juvenile justice system cases. These guidelines should be based on the findings of what is reasonable for the system and what is in the best interests of the juvenile.

Eligibility Requirements

Applications are invited from public and private agencies, organizations, educational institutions, or combinations thereof. Applicants must demonstrate that they have knowledge or experience, or both, in research involving juvenile justice, as well as experience in research of this nature. The applicant should indicate some knowledge and previous work in the juvenile justice area.

Selection Criteria

Applications will be rated on the extent to which they meet the following criteria:

1. The problem to be addressed by the project is clearly stated. (15 points).

- The applicant includes a clear, concise statement of the problem to be addressed in this program. (5 points).
- Problems of juvenile processing time as well as court administration and delays are discussed. (5 points).
- The applicant demonstrates broad knowledge of the current situation and practices involving juvenile justice and is aware of research and program development needs as related to the proposed program. (5 points).

2. The objectives of the proposed project are clearly defined. (15 points).

- The applicant fully explains the goals and objectives of the project. (10 points).
- The stated goals and objectives are clear, measurable, and attainable. (5 points).

3. The project design is sound and contains program elements directly linked to the achievement of the project objectives. (30 points).

- The applicant provides a detailed program strategy and research design that includes the methodology to be used in the completion of the listed tasks. (10 points).
- The applicant provides a detailed workplan describing the methodology of the program. (10 points).
- The applicant explains how the attainment of the stated objectives will give a comprehensive view of the problems related to delays in the processing of juvenile cases. (10 points).

4. The project management structure is adequate to the successful conduct of the product. (15 points).

- The applicant provides specific guidelines and timelines with regard to the research program activities. (10 points).
- The applicant explains how management structure is consistent with the needs of the program. (5 points).

5. The applicant's organizational capability is demonstrated at a level sufficient to conduct the project successfully. (20 points).

- The applicant demonstrates knowledge and experience in the juvenile justice field, particularly with regard to the area of study this project is addressing. (10 points).
- The applicant identifies staff personnel qualified to support the project successfully. (10 points).

6. Budgeted costs are reasonable, allowable and cost effective for the activities proposed to be undertaken and are directly related to the achievement of the program objectives. (5 points).

Award Period

The budget period will be 12 months.

Award Amount

Up to $75,000 has been allocated for the initial award (12 months). One award will be made competitively with an initial budget period of 12 months and a project period of 36 months. This research program will consist of the three tasks discussed above. The initial 12-month award will provide support for the completion of Task I. One or more noncompeting continuation awards will be considered to complete Tasks II and III during the remaining 24 months of the project period.

Due Date

Applications must be received by mail or delivered to OJJDP by 5 p.m. May 11, 1992.

Contact

For further information contact Donni LeBoeuf, Research and Program Development Division, (202) 307–0586.

Juvenile Justice Personnel Improvement

Purpose

To improve the quality of key personnel in juvenile detention centers.

Background

OJJDP's Fiscal Year 1992 program plan included a multi-year applied research program to raise the quality of key juvenile justice personnel.

OJJDP has decided to include in its Fiscal Year 1992 efforts a focus on juvenile detention personnel. The Office has determined that this juvenile justice

system component is experiencing the most pressing personnel problems.

America's juvenile justice system has always experienced problems recruiting and retaining qualified personnel, especially in the juvenile corrections field. Salaries are low and the work is very often difficult and challenging. Diminished State and local government revenues have often been disproportionately allocated to building and operating adult prisons at the expense of juvenile corrections. Funding for juvenile corrections too often has not kept pace with the growing demand for such programs. Personnel problems are particularly acute in the juvenile corrections detention function.

Juvenile detention often succeeds or fails as a result of highly interpersonal relationships which are established by key personnel with the youth entrusted to their care. The obvious effects of the high turnover among detention personnel are disruption of administration and increasing costs of recruitment and training. Despite high turnover rates, there are capable and experienced staff professionals who stay on the job, are satisfied, and do excellent work. The challenge the field faces is increasing this cadre of skilled juvenile detention professionals. Effective training of existing staff is the key.

Goal

To improve the quality and skills of juvenile detention center line staff.

Objectives

- To conduct an assessment of the functions, program knowledge, and skills of detention center line staff;
- To conduct an assessment of effective programs for juvenile detention center clients;
- To conduct an assessment of accepted policies and procedures for the administration of juvenile detention programs; and
- To produce a resource manual, a Detention Desktop Guide, which will be appropriate for training entry-level detention center staff and for in-service training of other line staff as well (similar to the "Desktop Guide to Good Juvenile Probation Practice").

Program Strategy

This applied research effort will require two related activities. First, assessment research must be conducted in order to identify training needs of detention center line staff, accepted policies and procedures, and effective programs. In each of these areas, the applicant should build upon previous national, State and local products. Identification of training needs and accepted policies and procedures should not require original research. On the other hand, identification of effective programs will require a systematic review and assessment of previous applied research and program evaluations, resulting in a synthesis of state-of-the-art program approaches known to be effective in treatment and control of detention center clients.

Second, the results of the assessment research must be incorporated into a tool that can be used in the training of detention center staff: A resource manual, or Detention Desktop Guide. Professional judgment must be applied in determining the most appropriate contents of such a guide, based in part on the results of the assessments. At a minimum, it should include job related skill requirements, references to existing standards (e.g., Guidelines for the Development of Policies and Procedures—Juvenile Detention Facilities and Standards for Juvenile Detention Facilities, developed by the American Correctional Association), and accepted policies and practices.

Eligibility Requirements

Applications are invited from eligible agencies, institutions or individuals, public or private. Private-for-profit organizations must waive their fee in order to be eligible.

Selection Criteria

Applications will be rated on the extent to which they meet the following criteria:

1. The applicant clearly states the problem to be addressed by the project. (20 points).

The applicant demonstrates an understanding of the extent and nature of the problem, including associated factors such as personnel skill levels and training needs.

2. The applicant clearly defines the objectives of the proposed project. (20 points).

a. The objectives relate directly to the problem and strategies to be employed. (10 points).

b. The objectives are specific and yield an appropriate product. (10 points).

3. The project design is sound and constitutes an effective approach for successful completion of the project. (30 points).

a. The design includes a sound, workable strategy for obtaining detention profession input. (20 points).

b. The applicant provides a work plan with a timeline which indicates significant event milestones in the project and due dates for products. (10 points).

4. The project management structure and organizational capability are adequate to the successful conduct of the project. (15 points).

The applicant provides an organizational capability statement which demonstrates the necessary technical, substantive, and financial capabilities to administer the project effectively.

5. Budgeted costs are reasonable, allowable, and cost effective for the proposed activities to be undertaken. The applicant includes a complete budget and budget narrative for all proposed costs. (15 points).

Award Period

The award period will cover 12 months.

Award Amount

The award amount will not exceed $100,000.

Due Date

Applications must be received by mail or delivered to OJJDP by May 11, 1992.

Improvement in Correctional Education for Incarcerated Juvenile Offenders

Purpose

To assist the field by identifying effective juvenile correctional education services which incorporate reading programs that contribute substantially to furthering specific vocational and academic objectives in detention centers and secure correctional institutions.

Background

It is widely accepted that, with a few exceptions, incarcerated juvenile offenders exhibit serious academic deficits. One cause of their inability to show significant progress in vocational and academic studies is the inability to decipher (translate print to speech) textbook material accurately and fluently, not necessarily the inability to comprehend text material due solely to cognitive deficits. One correlate of delinquency and recidivism is poor academic achievement, and this itself is in part related to the inability to decipher text material accurately and fluently. Contrary to popular opinion, reading comprehension in most cases is related to poor deciphering.

Research has shown that a significant number of juveniles released from secure confinement do not return to school but seek employment. As a result, there is a greater need for youth to acquire vocational competencies as well as functional academic skills. We know that the majority of these youth do not have a high school diploma or general education diploma. Research, also shows that the unemployment rate of youth with less than a high school diploma is over 20 percent and growing.

A significant number of juveniles who are committed to our correctional institutions were not attending school or employed at the time of their detention. Academic achievement test scores indicate that the majority of these youths functions well below the average pupil in their respective communities.

Corrections administrators have many problems, not the least of which is developing effective educational programs to meet the very diverse needs of juveniles in their care. We recognize and understand that there are impediments to the provision and delivery of educational services in corrections. Proceedings of the National Forum on Building Relationships for Educational Excellence in Corrections, October 1984, reported on such issues as inadequate facilities, frequent movement of inmates, out-of-date equipment and materials, a lack of qualified staff, and a lack of mission and coordination within the system.

In mid-December 1991, OJJDP and the Department of Education, Office of Correctional Education, cosponsored a workshop entitled, "Improvement in Correctional Education for Juvenile Offenders: A Look at System Reform." Many participants expressed the need for a total reform in juvenile correctional education.

Participants pointed out that correctional education is basically very traditional and that research has shown that the traditional approach to educating detained and confined juvenile offenders has not worked well. Though research findings reveal that only a very small percent of incarcerated juvenile offenders return to school and graduate; nevertheless, most State departments of education continue to mandate the "traditional" secondary curriculum in spite of the fact that it fails to meet the vocational and personal needs of this population.

Many participants in the Forum believed that correctional educators must be creative, take risks, determine what works through ongoing evaluation, and disseminate information about instructional programs, particularly developmental reading programs that have proven more effective than traditional approaches.

Participants also emphasized that in the current movement for correctional reform, very little is said about correctional education because researchers have not systematically studied such programs, and until this is done the effects of specific philosophies and methods used with incarcerated students will remain unclear.

While OJJDP is unable to address all of the issues mentioned above, we believe that juvenile offenders can reach their vocational, and in some cases academic, goals more quickly and with greater ease if they are able to improve their deciphering and reading comprehension skills. This initiative is designed to identify, assess, and promote effective educational programs, which are characterized as having reading instruction components. These components are supported by empirical evidence of replicated experimental research, and are designed to support directly the vocational and academic needs of the students.

Goal

To assist juvenile corrections administrators in improving the overall effectiveness of correctional and education services, and, as an integral part of that process, to improve reading instruction.

Objectives

- To identify and assess the existing literature and research on juvenile correctional education, including research-based literacy skills programs;
- To develop criteria for identifying proven and research-based literacy skills programs and other strategies for improving academic and vocational educational programs;
- To assess and document the correctional education programs that are being implemented in eight correctional ventures sites;
- To develop training and technical assistance materials to assist the sites and eventually the field in implementing effective research-based correctional education programs;
- To provide technical assistance and training to correctional education and other institutional professionals in developing and implementing proven research-based, and effective juvenile correctional education literacy skills programs; and
- To develop monographs and informational materials on effective correctional education programs for dissemination.

Program Strategy

Proposals are being solicited from applicants to enter into a cooperative agreement with OJJDP to assist in the implementation of the Improvement in Correctional Education Initiative. Applicants are asked to be creative in their implementation approach. This project will have a three-year project period. The first budget period will be for 12 months and up to $100,000 will be awarded.

Applicants are to develop their own strategy and budget for achieving the objectives and tasks of this initiative. The strategy and implementation plans must not exceed three years and must include, at a minimum, the implementation of the following tasks:

1. The successful applicant will be required to perform a detailed and comprehensive review of the literature and research on juvenile correctional vocational and academic programs. This assessment must include an analysis of the diagnostic procedures and instruments used to assess the reading levels of youth and whether the diagnostic screening assesses the youth's ability to decipher and decode words. The assessment must also include a discussion as to how these diagnostic screening programs are implemented.

2. The successful applicant will be required to develop criteria for identifying proven research-based effective correctional vocational and academic programs to include deciphering and decoding literacy programs.

3. The successful applicant will be required to perform an assessment of the correctional vocational and academic programs at eight juvenile corrections institutions which have been previously selected by OJJDP to implement the corrections ventures program. This assessment must include a review of the diagnostic procedures and instruments used, if any, to determine a youth's ability to decipher and decode words. Following the assessments, the successful applicant will be required to develop technical assistance and training material and to use this material to deliver technical assistance and training to assist the institutions in implementing or adapting successful correctional vocational and academic programs. The technical assistance and training provided to these institutions must be site specific. The institutions are located in the following states: Ohio, Washington, Texas, Kansas, South Carolina, Virginia, Connecticut, and New Mexico.

These eight institutions are currently participating in an OJJDP-sponsored Juvenile Corrections Industries and Venture Initiative and are receiving technical assistance and training in implementing various industry program

models. Another OJJDP-sponsored program will offer training for the academic teachers at these institutions in the techniques of teaching phonics to youth.

The successful applicant will be required to work in concert with these other OJJDP-sponsored programs in an effort to provide these institutions with the opportunity to implement successful correctional education programs.

Under separate funding, OJJDP will consider supporting an evaluation to determine the effectiveness of this program and may consider an expansion of this effort into other sites if the program is successful and funds are available.

The successful applicant will also be required to prepare informational material and position papers on various juvenile corrections vocational and academic topics for publications in OJJDP bulletins.

Applicants are reminded that only the first year of their program plan will be funded at a cost not to exceed $100,000. Applicants must be specific about the tasks they can accomplish in this time frame with this amount of money. The applicant must list and explain activities and the products that will be produced in the first year and provide an overview of the tasks to be accomplished and the products to be developed for years two and three.

Applicants are encouraged to establish an advisory committee which will provide comments and recommendations regarding the strategies, activities, and products for this program.

Eligibility Requirements

Applications are invited from public agencies or private nonprofit organizations. Applicant organizations may choose to submit joint proposals with other eligible organizations, as long as one organization is designated in the application as the applicant, and co-applicants are designated as such. The applicant and co-applicants must demonstrate, in addition to program knowledge and support experience, programmatic and fiscal management capabilities to implement a project of this size and scope effectively. Applicants who fail to demonstrate that they have the experience and capability to manage a program of this size and complexity will be ineligible for funding consideration.

Selection Criteria

Applications will be rated on the extent to which they meet the following criteria:

1. *The problem to be addressed.* (15 Points). The applicant clearly identifies the nature and scope of the problem of educating detained and incarcerated juvenile offenders.

2. *Goals and Objectives.* (10 Points). The applicant provides a succinct statement demonstrating an understanding of the objectives and tasks associated with the program.

3. *Project design.* (20 Points). The applicant clearly demonstrates an understanding of the nature of the program area and the soundness of the approach to implementing each stage of the program for meeting the goals and objectives.

4. *Implementation plan.* (25 Points). Project activities and management structure are adequate and appropriate. The feasibility and clarity of the time task plan is apparent as it addresses what, when, who and where project activities will be performed and products developed.

5. *Organizational capability.* (20 Points). Project management structure is adequate to conduct the project successfully. The applicant demonstrates adequate program management and experience in coordination of research, program development, and training and technical assistance delivery.

6. *Budget.* (10 Points). Proposed costs are complete, reasonable, appropriate, and cost effective in relationship to the proposed strategy and task to be accomplished.

Award Period

The program period for the cooperative agreement supporting the Improvement in Correctional Education Program is three years. One cooperative agreement will be awarded with an initial 12-month budget period.

Award Amount

Up to $100,000 has been allocated for the initial award budget period. Commensurate financial support for the remaining two project budget periods will be determined by the performance of the grantee, the program development needs as determined by OJJDP, and the availability of funds.

Due Date

Applications must be received by mail or delivered to OJJDP by May 11, 1992.

Information Systems Support and Statistics

Telecommunications Technology for Training and Information Dissemination

Purpose

To examine the feasibility of using advanced telecommunications technologies in the training and information activities of OJJDP.

Background

Rapidly developing telecommunications technologies are becoming more economical in use, and they are changing the way businesses and schools are providing education, training, and information throughout the United States. Enlisted over the past seven years to meet the needs of geographically isolated communities, these technologies, united with trained and enthusiastic teachers and trainers, are beginning to enrich all training environments in what has been called distance learning. No longer must the instructor sit in a classroom with the students. The instructor can engage students, interactively, from thousands of miles away to talk to students at a dozen or more training sites.

Distance learning networks that provide courses or information can also bring people and experiences to the classroom to expand traditional instructional practices and provide entirely new alternatives. Many organizations in the private and public sectors and, more recently, many Federal agencies, have opted to use advanced telecommunications technologies in their training and information dissemination activities. According to proponents of the technology in the industry, these methods have proven to provide the following major advantages to the more traditional training and information dissemination means:

1. *Cost savings in travel and time.* Organizations may generate savings in travel costs and per diem expenses by not needing to bring participants to a central learning site. Additionally, organizations save staff travel time in that employees need not be away from their business location.

2. *More timely transfer of information.* Electronic delivery of information can produce benefits in that more people can receive information quickly. An audio or point-to-point teleconference can be convened in minutes, eliminating "float time" or delay for time-critical information. Large groups can receive the information and "hear" the same message at the same time.

3. *Greater access.* These technologies provide greater access to larger numbers of students or interested parties. The technology does not improve learning but it does improve access to information. It provides a means of maximizing efficiency because it provides a way to meet with several groups in different locations, at the same time.

OJJDP, like many other Federal agencies, has numerous information dissemination and training responsibilities. Through the Juvenile Justice and Delinquency Prevention Act of 1974, 88 Stat. 1109, 42 U.S.C. 5601–5778, OJJDP is charged with developing and implementing effective methods of preventing and reducing delinquency; improving the quality of juvenile justice in the country; increasing the capacity of State and local governments and public and private agencies to conduct effective programming for juveniles; and providing research, evaluation, and training services in the field of juvenile delinquency prevention.

It seems entirely plausible that, through the use of telecommunications, OJJDP will be better able to fulfill its congressionally mandated tasks with a wider audience at a lesser cost. Through this program, we hope to test this hypothesis.

Definitions

Ad Hoc: Teleconferencing technology and sites assembled for an event. Equipment may be rented and not necessarily permanently installed by the convener and sites are not usually part of a network.

Business Television: The production and distribution, via satellite, of video programs for closed user group audiences.

Downlink: The transmission of radio frequency signals from a satellite to an earth station. It may also be defined as a satellite receiving station.

Fiber Optics: A communications medium based on a laser transmission that uses a glass or plastic fiber which carries light to transmit video, audio, or data signals.

Telecommunications: The use of wire, radio, optical, or other electromagnetic channels to transmit or receive signals for voice, video, and data communications.

Teleconference: Electronic communications between two or more groups, or three or more individuals, who are in separate locations via audio, audiographics, video or computer. An audio teleconference denotes two-way communications between two or more groups, or three or more individuals, in separate locations. A video teleconference will require one (or more) uplink and downlink sites and may be fully interactive voice and video, two-way voice or one-way video.

Uplink: An earth station which transmits a radio frequency signal to a communications satellite. An uplink consists of a large antenna and high power amplifiers to concentrate signals in one direction.

Goal

To ascertain possible advantages or benefits of using the application of telecommunications technology for the training and information dissemination activities of OJJDP.

Objectives

- To conduct an assessment of what current programs being implemented by OJJDP may lend themselves to telecommunications;
- To conduct an assessment of what modes of the technology (e.g., audio or video teleconferencing, distance education, business television, fiber optics, etc.) would best suit the needs of the target audiences and be in the best interests of the government;
- To conduct an assessment of what cost benefits OJJDP would reap through application of the technology; and
- To test the use of the technology through a demonstration effort using the technology to conduct an evaluation.

Program Strategy

OJJDP will select an organization to conduct a feasibility study on the use of telecommunications for OJJDP training and information dissemination activities. The organization, upon receipt of a cooperative agreement award, will conduct an in-depth review of OJJDP's training and information dissemination activities for the past 24 months. This information will then be analyzed from a telecommunications perspective to determine which training and information activities should be using the new technologies and which modes of the technology best suit the current activities or types of activities. This analysis must examine the following criteria: (1) Benefits including cost savings, the quality and effectiveness of instruction, the training of instructors to use the technology, time savings, student acceptability, access throughout the country of ad-hoc teleconferencing hardware, production requirements and responsibilities, an evaluation of teleconferences, and (2) other implementation issues. OJJDP may request that additional criteria be added to the analysis during the course of the study. The grantee will also be required to complete a series of recommendations to OJJDP for proceeding into the field through a logical step-by-step economical approach. For example, the grantee will be asked to recommend an ongoing OJJDP training or information dissemination activity for a demonstration project to be conducted toward the end of the grant period. An evaluation of the pilot's success compared to the traditional means for the activity will also be undertaken by the grantee.

The grantee will have access to appropriate OJJDP records and staff for interviews in conducting the feasibility study.

Specific products to be completed during this project are:

- A feasibility study report with specific chapters addressing the objectives noted above and focusing on the criteria outlined above (each chapter will be submitted to OJJDP in draft form prior to final submission);
- A pilot demonstration effort using the technology for an existing OJJDP activity and evaluating the effort with past traditional approaches for the same activity; and
- A summary report which includes recommendations for future implementation of telecommunications for OJJDP.

Eligibility Requirements

Applications are invited from public agencies and private organizations which can demonstrate the capability to conduct a practical and effective feasibility study of the implementation of telecommunications for distance learning and training activities of OJJDP. Private for-profit organizations must waive their fee to be eligible.

Selection Criteria

Applications will be rated on the extent to which they meet the following criteria:

1. Conceptualization of the problem. (15 points). The applicant must demonstrate a clear understanding of, and competence to deal with, telecommunications, distance learning, and an understanding and competence to conduct a feasibility study.

2. Statement of objectives. (15 points) The objectives to be achieved by the project must be clearly defined and consistent with the issues and requirements set forth in the conceptualization of the problem.

3. Project design. (30 points). The procedures, workplan and proposed products of the project must be directly linked with the stated objectives, and

with the problem addressed by this announcement.

4. Project management. (10 points). The project's management structure and staffing must be adequate for the successful implementation and completion of the project. The management plan describes a system whereby logistical activities are handled in the most efficient and economical way.

5. Organizational capability. (15 points). The applicant organization's ability to conduct the project successfully must be documented in the proposal. Organizational experience with telecommunications feasibility studies is highly recommended. Key project staff should have significant experience in the subject area addressed in this announcement.

6. Budget. (15 points). The proposed budget must be reasonable, allowable and cost-effective vis-a-vis the activities to be undertaken.

Award Period

The project will be funded for 12 months.

Award Amount

Up to $100,000 will be available for this project.

Due Date

Applications must be received by mail or delivered to OJJDP by May 26, 1992.

March 26, 1992

Part III

Department of Transportation

Coast Guard

46 CFR Part 67

Documentation of Vessels; Recording of Instruments; Proposed Rule

DEPARTMENT OF TRANSPORTATION

Coast Guard

46 CFR Part 67

[CGD 89-007]

RIN 2115-AD29

Documentation of Vessels; Recording of Instruments

AGENCY: Coast Guard, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Coast Guard proposes to establish new recording practices to fully implement the provisions of the codification of the Ship Mortgage Act. In addition, it proposes to simplify the procedures for documentation of vessels. The proposed revision, if adopted, would make the regulations easier to use by the affected public and would more fully implement statutory requirements.

DATES: Comments must be received on or before June 24, 1992.

ADDRESSES: Comments must be in writing and may be mailed to the Executive Secretary, Marine Safety Council (G-LRA/3406) (CGD 89-007), U.S. Coast Guard Headquarters, 2100 Second Street SW., Washington, DC 20593-0001), or may be delivered to room 3406 at the above address between 8 a.m. and 3 p.m., Monday through Friday, except Federal holidays. For information concerning comments, the telephone number is (202) 267-1477.

The Executive Secretary maintains the public docket for this rulemaking. Comments will become part of this docket and will be available for inspection or copying at room 3406, U.S. Coast Guard Headquarters.

FOR FURTHER INFORMATION CONTACT: Mr. Thomas L. Willis, Chief, Vessel Documentation and Tonnage Survey Branch, Merchant Vessel Inspection and Documentation Division, Office of Marine Safety, Security and Environmental Protection, (202) 267-1492.

Normal office hours are between 7 a.m. and 3:30 p.m., Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION:

Request for Comments

The Coast Guard encourages interested persons to participate in this rulemaking by submitting written data, views, or arguments. Persons submitting comments should include their names and addresses, identify this rulemaking (CGD 89-007) and the specific section of this proposal to which each comment applies, and give a reason for each comment. Persons wanting acknowledgment of receipt of their comment should enclose a stamped, self-addressed postcard or envelope.

The Coast Guard will consider all comments received during the comment period and may change this proposal in view of the comments. Direct responses to individual questions concerning the rulemaking will not be made. All significant comments will be addressed in supplemental rulemakings, if necessary, or in the final rule.

The Coast Guard plans no public hearing. Persons may request a public hearing by writing to the Marine Safety Council at the address under "**ADDRESSES**." If it determines that the opportunity for oral presentations will aid this rulemaking, the Coast Guard will hold a public hearing at a time and place announced by a later notice in the **Federal Register**.

Drafting Information

The principal persons involved in drafting this document are Mr. Thomas L. Willis, Project Manager, and Lieutenant Commander Don M. Wrye, Project Counsel, Office of Chief Counsel.

Background and Purpose

On November 23, 1988, Congress enacted Public Law 100-710 (the "Codification Act") which amended and codified the Ship Mortgage Act of 1920 into 46 U.S.C. chapter 313; amended section 9 of the Shipping Act of 1916 (46 U.S.C. app. 808); and eliminated the prohibition against collecting fees for commercial vessel documentation services by amending 46 U.S.C. 2110. The Codification Act was the subject of technical corrections ("Corrections") when Congress enacted Public Law 101-225. Both the Codification Act and the Corrections introduced significant changes which are at variance with the former law and with existing Coast Guard regulations.

Most of the provisions of the Codification Act which require changes to the Coast Guard's regulations became effective on January 1, 1989. Certain of the changes were unequivocal and were implemented by an interim final rule published October 12, 1989 (54 FR 41835). The interim final rule was adopted as final in a rulemaking published January 10, 1991 (56 FR 960).

Other statutory revisions, some of which became effective on January 1, 1989, and others which became effective on January 1, 1990, require a more considered approach, including the opportunity for public comment. These latter changes are the subject of this rulemaking. Because the intent of the Codification Act and the Corrections was to simplify and streamline the documentation process, the Coast Guard proposes to revise all of its existing vessel documentation regulations. The result will be to clarify and simplify the rules and present them in a more orderly fashion.

The user fees for services related to vessel documentation which the Coast Guard is required to establish pursuant to the Omnibus Budget Reconciliation Act of 1990 (Public Law 101-508) will be the subject of a separate rulemaking document.

Sections of the proposed rules not addressed below do not contain any substantive changes from the existing regulations. Among those proposed non-substantive changes are a number of editorial or housekeeping changes. These latter changes include the correction of several addresses and substitution of the word endorsement for license and recreational endorsement for pleasure license to conform the language of the rules to statutory terminology.

One universal change to the rules is substitution of the concept of port of record for the term home port. This change was made to reflect elimination of home ports in law, to better describe the function the port provides, and to eliminate confusion among members of the general public. In many instances vessels never actually visit their "home ports", which are in fact repositories of records concerning the vessel.

Because the format of part 67 would be changed, a derivation table, presented as Table 1 below, is provided to assist in comparison of the existing rules with the proposed rules.

Discussion of the Proposed Rules

Proposed § 67.3 in proposed subpart A contains several new definitions. These include citizen, coastwise trade, endorsement, Exclusive Economic Zone, fisheries, hull, Manufacturer's Certificate of Origin, person, port of record, and registration. In addition, the definition of acknowledgment has been expanded to specifically include an acknowledgment or notarization which is in substantial compliance with the laws of the State in which it is taken; and acceptable format for acknowledgment has also been provided.

Proposed § 67.5 contains an editorial change clarifying the fact that the requirement for documented vessels to be wholly owned by a citizen or citizens of the United States applies only to vessels documented under this part. Certain limited forms of documentation may be permitted for vessels not wholly owned by a citizen or citizens in accordance with rules in 46 CFR part 68.

Proposed § 67.9 would amend the present regulations by providing that vessels of five net tons or more operating in the fisheries in the Exclusive Economic Zone but outside of the navigable waters of the United States are not excluded from the requirement to be documented. In addition, to be consistent with 46 U.S.C. 12110(b), proposed paragraph (c)(2) of § 67.9 provides that barges are no longer exempt from the requirement to be documented if they engage in Great Lakes trade or coastwise trade on the Great Lakes, even if used in part on rivers, harbors, lakes, canals or internal waters of a state.

Proposed § 67.11 sets forth the requirement for Maritime Administration consent for transfer of an interest in certain documented vessels to a person who is not a citizen within the meaning of section 2 of the Shipping Act, 1916 (46 U.S.C. app. 802). It also describes the types of vessels which may be transferred without restriction.

Proposed § 67.12 gives notice of the right to appeal an action or decision under this part by or on behalf of the Coast Guard.

Proposed § 67.13 incorporates by reference the Federal Information Processing Standards Publication 55DC, Guideline: Codes For Named Populated Places, Primary County Divisions, and Other Location Entities of the United States And Outlying Areas (1987). This publication lists those geographical places which may be used as hailing ports for documented vessels.

Proposed § 67.14 displays the current OMB control number for information collection requirements.

Proposed subpart B and the rest of part 67 have been amended by substitution of the word endorsement for the word license. This change was made to conform the regulations to the new terminology introduced by the Corrections. In addition, the term pleasure license has been changed to recreational endorsement in accordance with changes in chapter 121 of title 46 U.S.C. as enacted by Public Law 99-36.

In § 67.37, the Coast Guard proposes to insert the word "enforceable," to clearly reflect its existing interpretation that a vessel owned in a trust arrangement is not barred from documentation solely because a non-citizen with a non-enforceable interest as a beneficiary participates in the trust. An example of such a trust would be a charitable trust, which may directly or indirectly operate to the benefit of persons who are not citizens of the United States.

Proposed § 67.45 contains the citizenship savings provision for fishing vessels. The Coast Guard, in its final rule published on December 12, 1990 at 55 FR 51244, implemented the American control provisions of the Commercial Fishing Industry Vessel Anti-Reflagging Act of 1987. In that rulemaking at section 67.03-15, the Coast Guard published the "grandfather" or savings provision regarding citizenship requirements for fishing vessels. That section of the Coast Guard's regulations is the subject of litigation: *Southeast Shipyard Assn.* v. *United States*, No. 90-1142 (D.D.C.). On April 30, 1991 the District Court decided that the Coast Guard's interpretation of the savings provision of the Anti-Reflagging Act was incorrect. The decision of the District Court is being appealed. Parties who may be affected should maintain appropriate cognizance over this and future judicial decisions which may significantly affect their rights and responsibilities. Once the appellate court has reached a decision on the matter, proposed § 67.45 may be the subject of further revision.

Proposed § 67.47 would permit documentation of certain vessels which may have been transferred to persons who are not citizens within the meaning of section 2 of the Shipping Act, 1916, (46 U.S.C. app. 802), but who are qualified to document vessels pursuant to 46 U.S.C. 12102, without obtaining consent of the Maritime Administration. Included are vessels which were documented exclusively for the fisheries or recreation, as well as other vessels to which the Maritime Administration has granted general approval in 46 CFR part 221 for sale or transfer to noncitizens. This change as well as the changes in proposed §§ 67.59 and 67.61 are permitted by the amendment to section 9 of the Shipping Act of 1916 enacted by section 104(c)(1) of the Codification Act.

With the establishment of two new methods, proposed Section 67.53 sets forth four means of establishing title to vessels: (1) Simplified method without evidence of build, (2) simplified method with evidence of build, (3) complete chain of title without evidence of citizenship for each entity in the chain, and (4) complete chain of title with evidence of citizenship for each entity in the chain.

Proposed § 67.59 provides that where ownership of a documented vessel has changed, and a registry, fishery, or recreational endorsement is sought, citizenship evidence would not be required for each owner subsequent to the last person for which the vessel was documented. This relaxation would be permitted only if the vessel (a) was documented exclusively as a fishing, fish processing, fish tender, or recreational vessel or both, either since its initial documentation or for a period of not less than one year prior to change in ownership, or (b) is a vessel for which the Maritime Administration has granted general approval in 46 CFR part 221 for sale or transfer or to non-citizens. This change has the potential to alleviate the need for the owners of approximately 97 percent of the documented fleet to collect citizenship information concerning former owners, significantly reducing the current paperwork burden on the public.

Proposed § 67.61 would permit vessels to be returned to documentation with a registry, fishery, or recreational endorsement without the requirement for a complete chain of title and evidence of citizenship for all owners subsequent to the last person for whom the vessel was documented. This relaxation would be permitted only if the vessel (a) was documented exclusively as a fishing, fish processing, fish tender or recreational vessel or both since its initial documentation, or for a period of not less than one year prior to change in ownership, or (b) is a vessel for which the Maritime Administration has granted general approval in 46 CFR part 221 for sale or transfer to non-citizens. The Coast Guard estimates that this change would allow 97 percent of the owners of vessels which had been deleted from documentation to return them to documentation without the requirement to establish a complete chain of title or to collect citizenship information concerning intervening owners, resulting in further substantial paperwork burden savings.

Proposed § 67.63 would eliminate the requirement to provide evidence of citizenship for owners in the chain of title prior to documentation of captured, forfeited, or wrecked vessels except where a coastwise or Great Lakes endorsement is sought.

Proposed § 67.73 provides that transfer of title prior to documentation may be evidenced by completion of a transfer section on the reverse of the revised builder's certification (CG-1261) or the Manufacturer's Statement of Origin, in lieu of a bill of sale in recordable form.

Proposed § 67.81, dealing with passage of title to a vessel in conjunction with a merger, would specifically provide that where all of the assets of a corporation are transferred to another corporation, the vessel need not be specifically identified as being

among those assets. This proposal merely formalizes the Coast Guard's long-standing interpretation and practice regarding passage of title by a corporate merger.

Proposed § 67.99 provides that an officer or employee of a company which built a vessel could certify the facts of build based upon the records of the company. The present regulation requires the certification of the supervisor of construction or the actual builder of the vessel. In many cases, supervisors of construction have no knowledge of the source of components of the vessel, or of the party(ies) for whom the vessel is built. In the case of large corporate builders, corporation records provide a much more reliable source of information. The proposal further clarifies the fact that a Manufacturer's Certificate of Origin, which usually recites neither the place of assembly of the vessel nor the source of major components of the hull and superstructure, does not provide evidence of the facts of build.

Proposed § 67.107 sets forth the requirement for a Certificate of Measurement for vessels measured in accordance with regulations set forth in subpart B, C, or D, of 46 CFR part 69.

Proposed § 67.113 is a new section setting forth the requirement to designate a managing owner for every vessel and the requirement to report a change in the address of the managing owner. The purpose of this proposed requirement is to ensure that the Coast Guard corresponds with the person responsible for documentation matters.

Proposed § 67.115 differs from present home port designation, henceforth called "port of record," requirements in that the Coast Guard will assign the port of record based on the address of the managing owner. In addition, the proposal specifically provides that the same port of record will be used for all vessels owned by the same owner. The port of record for a vessel owned by an individual will be based upon any address of the managing owner. The present rule requires the home port to be fixed in accordance with domicile of the owner. The use of domicile has proven problematic in that it is possible to be absent from one's domicile for many years, and to have a domicile at which one cannot receive mail or which is not valid for service of process. In addition, appropriate port of record boundaries are established for the First, Fifth, and Eleventh Coast Guard Districts.

Proposed § 67.117 requiring a vessel name designation differs from the present regulation by clarifying the requirement for vessel names to be approved by the Secretary, a function which has been delegated to the Commandant. In addition, it makes clear that names which are obscene, indecent, profane, or which contain racial or ethnic slurs will not be approved. This is consistent with the purpose of vessel names, which serve as a means of identification, and is not inconsistent with the requirements for so-called "vanity license plates" in many States. In addition, clarification is made that vessel names must be composed only of letters of the Latin alphabet, or Arabic or Roman numerals, or combinations thereof.

Proposed § 67.119 would require the vessel owner to designate a hailing port on form CG–1258. The present rule is extremely restrictive and limits vessel owners to either the home port or the address used to determine the home port, and further requires that the address be recognized by the Post Office. The proposed rule would allow vessel owners to choose among more than 190,000 place names listed in the Federal Information Processing Standards Publication 55DC, Guideline: Codes for Named Populated Places, Primary County Divisions, and Other Locational Entities Of The United States and Outlying Areas (1987). This reduces unnecessary bureaucratic restriction while at the same time enhancing the identification of vessels by helping to eliminate duplication of vessel name and hailing port combinations. In addition, it gives the owners of multiple vessels the opportunity to mark their vessels with hailing ports which are appropriate for the area in which those vessels are employed. A further change gives the Officer in Charge, Marine Inspection (OCMI) at the port where application is made, instead of the OCMI at the vessel's port of record, final authority to settle disputes as to the propriety of the hailing port selected.

Proposed § 67.120 provides that a Certificate of Documentation does not become valid until the vessel for which it is issued is marked in accordance with the rules in the balance of subpart I.

Proposed § 67.121 requires that the marking of the official number on a vessel must be done in a manner which renders alteration or removal of the number obvious. This is consistent with requirements in 33 CFR part 181 regarding affixing hull identification numbers. The requirement to submit a written certificate asserting that the marking has been made, presently found at 46 CFR 67.15–7, would be eliminated. The purpose of vessel markings is similar to the requirement for automobiles to bear license plates. The present bureaucratic burden of requiring marking certificates is no more justified than a motor vehicle bureau's routinely requiring motorists to certify that the license plates have been attached to their vehicles. In addition to reducing the paperwork burden on the public, this proposed change will expedite the issuance of Certificates of Documentation.

Proposed § 67.125 gives authority for settling disputes regarding the permanence, durability, legibility, or placement of a vessel's markings to the OCMI for the zone in which the vessel is located. This change is proposed partly because many vessels never enter the zone covered by their port of record. In addition, it is consistent with changing the emphasis on ensuring compliance with marking requirements through enforcement instead of self-certification by vessel owners.

Proposed § 67.141 contains the basic application process to be followed for all transactions involving initial application, application for exchange, replacement, or redocumentation. The requirements for presentation of evidence of vessel marking prior to issuance of a new Certificate of Documentation for name change has been eliminated. For that reason, name change approvals do not expire, and a vessel may not revert to its previous name without a new application.

Proposed § 67.145, which summarizes the requirement and procedure for mortgagee consent to exchange of Certificates of Documentation under certain circumstances, would also require mortgagee consent for an exchange for the purpose of changing or adding a trade endorsement.

Proposed § 67.151 would eliminate the requirement that Certificates of Documentation be replaced when spaces for notation of changes are filled. Since deployment of a computer system for issuing Certificates, the only notations of change made to existing Certificates of Documentation are changes of address. All other changes are noted by issuing a new Certificate of Documentation.

Proposed § 67.163 differs from present § 67.23–1 by making clear the requirement to apply for renewal of the endorsement(s), if any, prior to the end of the twelfth month following issuance or renewal. Also included is a provision that an endorsement may be renewed at any port instead of only at the vessel's port of record. Another change in order to conform to existing policy, provides that the owner may submit either the completed Notice of Expiration (CG–1280) or Warning Notice (CG–1280–B) in order to effect the renewal.

Proposed § 67.165 would provide that Certificates of Documentation issued to vessels which are exempt from the requirement to be documented may be placed on deposit with the documentation officer at the vessel's port of record. It is the intent of this section to eliminate the requirement to renew the endorsements on Certificates of Documentation issued to those vessels. Title 46 U.S.C. 12110(b) provides that barges which meet the requirements for eligibility to engage in coastwise trade are exempt from the requirement to be documented when employed in coastwise trade on rivers, harbors, lakes (except the Great Lakes), canals and inland waters. Such vessels are often documented, however, in order to make them the subject of preferred mortgages. Certificates placed on deposit would be valid for purposes of 46 U.S.C. chapters 125 and 313, as well as those sections of the Shipping Act, 1916, regarding foreign transfers, and section 902 of the Merchant Marine Act, 1936, permitting the Secretary of Transportation to purchase or requisition the vessel in time of national emergency.

Proposed § 67.167 sets forth the requirement for exchange of Certificates of Documentation under certain circumstances, instead of surrender. This change in wording is for the sole purpose of eliminating the confusion which currently exists over the meaning of the term "surrender." A distinction is also drawn between those circumstances which immediately invalidate the Certificate of Documentation and the trade endorsement and those for which a "grace" period may be granted. These latter reasons are often outside of the owner's control and may occur when a vessel is at sea or under reconstruction. For example, the change would allow a vessel to continue to operate until it came into port if the corporate stock of the owner is sold while it is at sea. It would also allow the Certificate of Documentation to remain valid for the purpose of filing and recording a new mortgage or related instrument despite a change in tonnage caused by a change in vessel configuration during the course of repair or rebuilding without requiring immediate remeasurement of the vessel. In addition, the proposed regulation identifies several circumstances requiring exchange, which although not addressed in the present regulations, reflect current Coast Guard policy and understanding. These include a change in a trustee or a beneficiary with an enforceable interest in a trust arrangement which owns a vessel, and a change in the state of incorporation of a corporation owning a vessel. Another change would make exchange of the Certificate optional instead of mandatory when a vessel attains special privileges or when certain trade restrictions change by deletion.

Proposed § 67.171 provides for the first time that a vessel is subject to deletion from documentation when the owner fails to maintain the markings required by subpart I of this part. In addition, it would permit deletion of a vessel from documentation at any port of documentation, instead of only at the vessel's port of record. A certificate evidencing deletion would be issued upon complying with the requirements for deletion and payment of the fee prescribed in subpart Y.

Proposed § 67.173 would permit a vessel owner to submit a Certificate of Documentation which is subject to cancellation to any port of documentation, instead of only at the vessel's port of record.

Proposed § 67.200 would allow filing and recording of interlender agreements as well as assignments of and amendments to notices of claim of lien. These are in addition to those instruments currently eligible for filing and recording.

Proposed § 67.209 would require submission of only an original and one copy of a preferred mortgage, instead of two originals and two copies of certification as in the present regulation. Although 46 U.S.C. 31324 requires the mortgagor of a preferred mortgage covering a self-propelled vessel to keep a certificate copy of the mortgage aboard the vessel, the mortgagor and mortgagee can jointly certify a copy without Coast Guard involvement.

Proposed § 67.211 eliminates the requirement for filing a Declaration of Citizenship on form MA–899 in all but a very few cases. The declaration would normally be needed only where a vessel owner seeks to document a vessel with a coastwise or Great Lakes endorsement and one or more intermediary owners has not made application for documentation, or in the case of mortgages or related instruments covering very large vessels not documented exclusively for recreation or the fisheries.

Proposed § 67.215 eliminates a definition for the time and date of recording. That definition is no longer needed since filing gives an instrument efficacy against third parties. Provision is also made for retention of the original filing date and time when supplemental materials are filed for an instrument whose filing was subject to termination.

Proposed § 67.223 would permit filing and recording of a bill of sale when application is made for deletion of a vessel from documentation. Presently, bills of sale may be recorded only in conjunction with an application for documentation. Permitting such recordings would make existing records more accurate, thus providing better information to law enforcement authorities, and would facilitate the return of the vessel to documentation at a later date.

Proposed § 67.231 makes provision for an optional application for filing and recording of mortgages and related instruments. The application would summarize all of the information the Coast Guard requires for indexing information about the instrument. When an instrument is accompanied by such an application, the Coast Guard will not review the instrument to ensure that it complies with the requirements of 46 U.S.C. chapter 313. This change is proposed in accordance with the recommendations of the Committee on Merchant Marine and Fisheries in committee report H.R. 100–918.

Proposed § 67.233 provides that a mortgage or assumption may not be recorded if the mortgagor or assuming party did not actually hold legal title to the vessel being mortgaged or covered by the assumption at the time of filing of the mortgage or assumption, and that the vessel(s) covered by a mortgage must have been documented or the subject of an application for documentation at the time of filing.

Proposed §§ 67.235, 67.237, and 67.239, respectively, eliminate the requirement to specify the interest in the vessel granted to each mortgagee, the interest in the mortgage granted to each assignee, and the interest in the mortgage assumed by each party.

Proposed § 67.245 is a new section setting forth the requirements interlender agreements must meet in order to qualify for filing and recording.

Proposed §§ 67.257 and 67.259 detail the requirements for assignments and amendments, reprectively, of notices of claim of lien.

Proposed subpart T, which describes the General Index and Abstract of Title, no longer provides for issuance of Certificates of Ownership. Present law makes no provision for such Certificates, which do not contain as much information as Abstracts of Title. Certified Abstracts of Title, which contain more information than the Certificates of Ownership presently issued will be available to any person upon request.

Sections 67.89, 67.101, 67.117, 67.133, 67.141, 67.163, 67.171, 67.175, 67.177, 67.203, and 67.303 include reference to user fees prescribed by subpart Y. Those fees will be proposed in a separate rulemaking document.

Subpart Y has been reserved for user fees.

Disposition of Existing Regulations

This supplementary information shows the disposition of existing regulations in 46 CFR part 67. All of those regulations have been revised in substance and form.

TABLE 1.—DISPOSITION OF PRESENT REGULATIONS—PART 67

Present §	Concept now discussed at §	Other action
67.01-1	67.3

67.45-17	67.335	
67.45-19	67.329	
67.45-21	67.327	
67.45-23	67.331	
67.45-25	67.333	

The disposition of existing §§ 67.43-1, 43-3, 43-5, 43-7, 43-9, 49-11, and 43-13 will be discussed in a future rulemaking document dealing with user fees.

Discussing of Proposed Forms

Most of the existing vessel documentation forms will be revised in conjunction with the proposed regulations. The forms will be consolidated and simplified to elicit only the information necessary to ensure compliance with substantive statutory provisions. Certain forms would be eliminated outright, while others would be revised to make their completion simpler. One new form, an optional application for filing and recording of mortgages and related instruments is proposed.

For the reader's convenience, prototypes of the proposed forms are reproduced in appendix A. These forms should be considered in conjunction with the proposed regulations. Comments or suggestions pertaining to their format or content will be welcomed. These proposed forms will be submitted to the Office of Management and Budget for approval prior to publication of the final rule. Until these rules are published, the existing forms should be used.

Table 2, which is provided as supplementary information shows the intended use of proposed forms.

TABLE 2.—FUNCTION OF PROPOSED FORMS

Form No.	Name/use
CG-1261	1. Title evidence for initial documentation of new vessel. 2. Evidence of U.S. build for coastwise, Great Lakes and fisheries vessels.
CG-1258	1. Application for initial documentation. 2. Application for all changes. 3. Application for replacement of certificate for documentation.
CG-1270	Certificate of Documentation—All endorsements.
1280	Renewal of endorsement of Certificate of Documentation.
CG-1280-A and 1280-B	
CG-1332	1. Transfer of records for change of port of record. 2. Full record of vessel ownership and encumbrance history.

TABLE 2.—FUNCTION OF PROPOSED FORMS—Continued

Form No.	Name/use
CG-1340	Evidence of title for used vessels.
CG-1356	Evidence of sale by governmental entity.
CG-4593	Evidence of Mortgagee consent to exchange of Certificate of Documentation or withdrawal of application for documentation.
CG-5542	Optional application for filing and recording of mortgage or related instrument.

Table 3, which is provided as supplementary information, shows the frequency with which forms must be filed, and the person responsible for completion of the form.

TABLE 3.—SUBMISSIONS OF PROPOSED FORMS

Form	Completed by	Frequency
CG-1261	Builder	Once.
CG-1258	Vessel owner	1. Initial documentation. 2. Any change in data on certificate of documentation. 3. Any replacement of certificate of documentation.
CG-1270	Documentation officer.	
CG-1280	Vessel owner	Annually.
CG-1332	Documentation officer.	
CG-1340	Seller of vessel	Any sale of vessel.
CG-1356	Government agency.	Any vessel sale arising from court or other governmental action.
CG-4593	Vessel mortgagee.	Change in any vessel data on certificate of documentation issued to vessel covered by preferred mortgage.
CG-5542	Vessel mortgagee.	Optional on filing of mortgage or related instrument.

Incorporation by Reference

The following material would be incorporated by reference in § 67.119: Federal Information Processing Standards Publication 55DC, Guideline: Codes for Named Populated Places, Primary County Divisions, and Other Locational Entities of the United States and Outlying Areas (1987). Copies of the material are available for inspection where indicated under "ADDRESSES." Copies of the material are available at the addresses in § 67.13.

Regulatory Evaluation

This proposal is not major under Executive Order 12291, but because it concerns matters on which there is substantial public interest, it is significant under the Department of Transportation Regulatory Policies and Procedures (44 FR 11040; February 26, 1979). The following constitutes the draft regulatory evaluation for the rulemaking.

This rulemaking proposes simplifying the paperwork and reporting requirements necessary to effect the documentation of a vessel and to streamlining internal administrative procedures and requirements.

The benefits of documenting a vessel are practical, legal, and financial. The salient practical benefit (and not coincidentally the reason the concept of federal documentation exists at all) is to ensure unencumbered interstate and international commerce. This practical benefit is intimately related to the legal benefits attendant upon federal documentation. The existence of a federal system of documentation serves to preempt state numbering and regulatory schemes such that a vessel operated under a federal endorsement (e.g., a coastwise endorsement) is ensured access to state waters for various activities. In fact, the federal documentation statues, which date to the earliest days of our Republic, are a direct result of dissatisfaction with impediments to the free flow of commerce once imposed by the several states. That federal documentation continues to provide this benefit is evidence by the recurring preemption cases in which a vessel owner or operator invokes the protections of documentation against a state seeking to close its waters to nonresidents for certain activities. In the field of international commerce, documentation establishes the nationality of a vessel and confers the privileges, protections, and immunities contemplated by long-standing international law and custom. Another practical benefit of federal documentation stems from the preferential customs and tax treatment accorded to "vessels of the United States." Established national policy seeks to promote the existence of an American merchant marine as a resource to be drawn upon in time of emergency or war. To the extent that documentation is a condition precedent to the receipt of preferential customs and tax treatment, it serves as a tool to promote national policy interests. The major financial benefit conferred by documentation is preferred mortgage financing. The availability of capital for maritime financing hinges upon the existence of the preferred mortgage as security for loans against vessels. Since the proposed regulations will make it easier to document a vessel under U.S. law, and will make filing a mortgage easier, they will enhance the benefits outlined above.

In considering this proposal, the reader should note that not all vessels of the requisite size are required by law to be documented. Documentation is not statutorily required for vessels engaging in foreign trade or for those used exclusively for recreational purposes. A registry endorsement is obtained on a voluntary basis for purposes of establishing the nationality of a vessel for the protections of international law and/or to obtain preferred mortgage financing. Recreational vessels are documented mainly for the purpose of obtaining preferred mortgage financing.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), the Coast Guard must consider whether this proposal will have a significant economic impact on a substantial number of small entities. "Small entities" include independently owned and operated small businesses that are not dominant in their field and that otherwise qualify as "small business concerns" under section 3 of the Small Business Act (15 U.S.C. 632).

The proposed regulations will apply to the following small entities: Small businesses, individuals, nonprofit organizations, and municipal governments currently owning documented vessels or seeking to document vessels in the future; brokers, attorneys, and law offices providing vessel documentation services; small shipbuilders building vessels which are subsequently documented; boat dealers selling vessels of at least five (5) net tons in size; and lending institutions engaging in preferred mortgage financing.

The changes being proposed in this rulemaking are procedural and administrative in nature. The changes are largely technical amendments which the affected small entities should have little difficulty understanding or adopting into their business practices. Therefore, the Coast Guard certifies under 5 U.S.C. 605(b) that this proposal, if adopted, will not have a significant economic impact on a substantial number of small entities. If, however, you think that your business qualifies as a small entity and that this proposal will

have a significant economic impact on your business, please submit a comment (see "ADDRESSES") explaining why you think your business qualifies and in what way and to what degree this proposal will economically affect your business.

Collection of Information

Under the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), the Office of Management and Budget (OMB) reviews each proposed rule which contains a collection of information requirement to determine whether the practical value of the information is worth the burden imposed by its collection. Collection of information requirements include reporting, recordkeeping, notification, and other similar requirements.

This proposal contains collection of information requirements in the following sections: 67.43, 67.47, 67.55, 67.53, 67.57, 67.59, 67.51, 67.63, 67.70, 67.73, 67.75, 67.77, 67.79, 67.81, 67.83, 67.85, 67.87, 67.89, 67.90, 67.101, 67.105, 67.111, 67.113, 67.117, 67.119, 67.130, 67.131, 67.132, 67.133, 67.134, 67.141, 67.143, 67.145, 67.147, 67.149, 67.151, 67.163, 67.165, 67.167, 67.169, 67.171, 67.175, 67.177, 67.205, 67.207, 67.209, 67.211, 67.231, 67.235, 67.237, 67.239, 67.241, 67.243, 67.245, 67.250, 67.253, 67.255, 67.257, 67.259, 67.267, 67.283, and 67.265.

The reporting and recordkeeping requirements associated with this rule are being submitted to the OMB for approval in accordance with 44 U.S.C. chapter 35. The following particulars apply:

DOT No: 2115; *OMB Control No:* 0110.
Administration: U.S. Coast Guard.
Title: Vessel Documentation.
Need for Information: This information collection requirement is needed to establish a vessel's eligibility to (1) be documented as a U.S. vessel; (2) engage in particular trade; and (3) become the object for a preferred ship's mortgage. All of the foregoing convey privileges to the vessel owner and mortgagee.
Proposed Use: The Coast Guard uses this information to determine if a vessel is eligible for benefits as a U.S. vessel. The Internal Revenue Service (IRS) also uses this information to determine eligibility for investment tax credits.
Frequency: On occasion.
Burden Estimate: 54,000 hours.
Respondents: 180,000.
Form(s): CG–1258, 1261, 1270, 1280, 1280–A, 1280–B, 1340, 1356, 4593, 5542, MA–899.
Average Burden Hours per Respondents: Burden is expressed as follows: CG–1258, 30 minutes; CG–1261, 30 minutes; CG–1280 or 1280–B, 5 minutes; CG–1280–A, negligible; CG–1340, 20 minutes; CG–1356, 20 minutes; CG–4593, 10 minutes; CG–1270, negligible; CG–5542, 10 minutes; MA–899, 15 minutes.

This rulemaking significantly reduces the paperwork burden on the public. For example, in 1990 approximately 60,000 submissions of form MA–899 were required; under this proposal, the Coast Guard estimates that only 1,000 submissions will be required. This is a reduction of 19,600 hours. In addition, form CG–1322 would be eliminated, reducing the burden by another 13,000 hours.

For further information contact: The Information Requirements Division, M–34, Office of the Secretary of Transportation, 400 Seventh Street, SW, Washington, DC 20503, (202) 395–7340.

Federalism

The Coast Guard has analyzed this proposal in accordance with the principles and criteria contained in Executive Order 12612 and has determined that this proposal does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Environment

The Coast Guard considered the environmental impact of this proposal and concluded that under § 2.B.2 of Commandant Instruction M16475.1B, this proposal is categorically excluded from further environmental documentation. This proposal deals with procedural regulations including reporting and recordkeeping requirements in order to obtain privileges as vessels of the United States and to record title and encumbrance instruments. These regulations are administrative in nature and clearly have no environmental impact. A Categorical Exclusion Determination is available in the docket for inspection or copying where indicated under "ADDRESSES."

List of Subjects in 46 CFR Part 67

Incorporation by reference, Vessels.

For the reasons set out in the preamble, the Coast Guard proposes to revise 46 CFR part 67 to read as follows:

PART 67—DOCUMENTATION OF VESSELS

Subpart A—General

67.1 Purpose.
67.3 Definitions.
67.5 Vessels eligible for documentation.
67.7 Vessels requiring documentation.
67.9 Vessels excluded from or exempt from documentation.
67.11 Restriction on transfer of an interest in documented vessels to foreign persons; foreign registry or operation.
67.12 Right of appeal.
67.13 Incorporation by reference.
67.14 OMB control numbers assigned pursuant to the Paperwork Reduction Act.

Subpart B—Forms of Documentation; Endorsements; Eligibility of Vessel

67.15 Form of document—all endorsements.
67.17 Registry endorsement.
67.19 Coastwise or Great Lakes endorsement.
67.21 Fishery endorsement.
67.23 Recreational endorsement.

Subpart C—Citizenship Requirements for Vessel Documentation

67.30 Requirement for citizen owner.
67.31 Stock or equity interest requirements.
67.33 Individual.
67.35 Partnership, association, or joint venture.
67.37 Trust.
67.39 Corporation.
67.41 Governmental entity.
67.43 Evidence of citizenship.
67.45 Citizenship savings provision for fishing vessels.
67.47 Evidence of Maritime Administration approval.

Subpart D—Title Requirements for Vessel Documentation

67.50 Requirement for title evidence.
67.53 Methods of establishing title.
67.55 Requirement for removal from foreign registry.
67.57 Extent of title evidence required for initial documentation.
67.59 Extent of title evidence required for change in ownership of a documented vessel.
67.61 Extent of title evidence required for vessels returning to documentation.
67.63 Extent of title evidence required for captured, forfeited, special legislation, and wrecked vessels.

Subpart E—Acceptable Title Evidence; Waiver

67.70 Original owner.
67.73 Transfers prior to documentation.
67.75 Transfers by sale or donation subsequent to documentation.
67.77 Passage of title by court action.
67.79 Passage of title without court action following death of owner.
67.81 Passage of title in conjunction with a corporate merger or similar transaction.
67.83 Passage of title by extra-judicial repossession and sale.
67.85 Change in general partners of partnership.
67.87 Change of legal name of owner.
67.89 Waiver of production of bill of sale eligible for filing and recording.

Subpart F—Build Requirements for Vessel Documentation

67.95 Requirement for determination.
67.97 United States built.
67.99 Evidence of build.
67.101 Waiver of evidence of build.

Subpart G—Tonnage and Dimension Requirements for Vessel Documentation

67.105 Requirement for determination.
67.107 System of measurement; evidence.

Subpart H—Designations and Assignments Required for Vessel Documentation

67.111 Assignment of official number.
67.113 Managing owner designation; address; requirement to report change of address.
67.115 Assignment of port of record.
67.117 Vessel name designation.
67.119 Hailing port designation.

Subpart I—Marking Requirements for Vessel Documentation

67.120 General requirement.
67.121 Official number marking requirement.
67.123 Name and hailing port marking requirements.
67.125 Disputes.

Subpart J—Application for Special Qualifications for Vessel Documentation

67.130 Submission of applications.
67.131 Forfeited vessels.
67.132 Special legislation.
67.133 Wrecked vessels.
67.134 Captured vessels.

Subpart K—Application for Documentation, Exchange or Replacement of Certificate of Documentation, or Return to Documentation; Mortgagee Consent; Validation

67.141 Application procedure; all cases.
67.143 Restriction on withdrawal of application.
67.145 Restrictions on exchange; requirement and procedure for mortgagee consent.
67.147 Exchange of Certificate of Documentation; special procedure for change of port of record.
67.149 Exchange of Certificate of Documentation; vessel at sea.
67.151 Replacement of Certificate of Documentation; special procedure for wrongfully withheld document.

Subpart L—Validity of Certificates of Documentation; Renewal of Endorsement; Requirement for Exchange, Replacement, Deletion, Cancellation

67.161 Validity of Certificate of Documentation.
67.163 Renewal of endorsement.
67.165 Deposit of certificate of documentation.
67.167 Requirement for exchange of certificate of documentation.
67.169 Requirement for replacement of certificate of documentation.
67.171 Deletion; requirement and procedure.
67.173 Cancellation; requirement and procedure.

Subpart M—Miscellaneous Applications

67.175 Application for new vessel determination.
67.177 Required application for rebuilt determination.

Subpart N—[Reserved]

Subpart O—Filing and Recording of Instruments—General Provisions

67.200 Instruments eligible for filing and recording.
67.203 Restrictions on filing and recording.
67.205 Requirement for vessel identification.
67.207 Requirement for date and acknowledgment.
67.209 Required number of copies.
67.211 Requirement for citizenship declaration.
67.213 Place of filing and recording.
67.215 Date and time of filing and recording.
67.217 Termination of filing and disposition of instruments.

Subpart P—Filing and Recording of Instruments—Bills of Sale and Related Instruments

67.220 Requirements.
67.223 Filing limitation.

Subpart Q—Filing and Recording of Instruments—Chattel Mortgages, Preferred Mortgages, and Related Instruments

67.231 General requirements; optional application for filing and recording.
67.233 Restrictions on recording—mortgages, preferred mortgages, and related instruments.
67.235 Requirements for mortgages.
67.237 Requirements for assignments of mortgages.
67.239 Requirements for assumptions of mortgages.
67.241 Requirements for amendments of or supplements to mortgages.
67.243 Requirements for instruments subordinating mortgages.
67.245 Requirements for interlender agreements.

Subpart R—Filing and Recording of Instruments—Notices of Claim of Lien and Supplemental Instruments

67.250 General requirements.
67.253 Requirements for notices of claim of lien.
67.255 Restrictions on filing and recording.
67.257 Requirements for assignments of notices of claim of lien.
67.259 Requirements for amendments to notice of claim of lien.

Subpart S—Removal of Encumbrances

67.261 General requirements.
67.263 Requirement for removal of encumbrances by court order, affidavit, or Declaration of Forfeiture.
67.265 Requirements for instruments evidencing satisfaction or release.

Subpart T—General Index and Abstracts of Title

67.301 Requirements for General Index.
67.303 Request for Abstract of Title.

Subpart U—Prohibitions

67.311 Alteration of Certificate of Documentation.
67.313 Command by non-citizen.
67.315 Failure to have Certificate of Documentation on board.
67.317 Failure to produce Certificate of Documentation.
67.319 Failure to report endorsements on the Certificate of Documentation.
67.321 Failure to report change in vessel status and surrender Certificate of Documentation.
67.323 Fraudulent application for Certificate of Documentation.
67.325 Fraudulent use of Certificate of Documentation.
67.327 Operation without Documentation.
67.331 Operation under Certificate of Documentation with invalid endorsement.
67.333 Unauthorized name change.
67.335 Improper markings.
67.337 Failure to report change of address of managing owner.

Subparts V–Y—[Reserved]

Appendix A to Part 67—Ports of Documentation

Authority: 14 U.S.C. 664; 31 U.S.C. 9701; 42 U.S.C. 9118; 46 U.S.C. 2103, 2107, 2110; 46 U.S.C. App. 802, 809, 876, 841a, 883; 49 U.S.C. 322, 49 CFR 1.46.

Subpart A—General

§ 67.1 Purpose.

A Certificate of Documentation is required for the operation of a vessel in certain trades, serves as evidence of vessel nationality, and permits a vessel to be subject to preferred mortgages.

§ 67.3 Definitions.

The following definitions are for terms used in this part.

Acknowledgment means:

(1) An acknowledgment or notarization which is in substantial compliance with the Uniform Acknowledgments Act, the Uniform Recognition of Acknowledgments Act, the Uniform Law on Notarial Acts, or the statutes of the State within which it is taken, made before a notary public or other official authorized by a law of a State or the United States to take acknowledgment of deeds;

(2) A certificate issued under the Hague convention Abolishing the Requirement for Legalisation of Public Documents, 1961; or

(3) Any attestation which is substantially in the following form:

State:
County:
Subscribed and sworn to before me on [date]
Notary Public
My commission expires: [date]

Certificate of Documentation means form CG–1270.

Citizen, unless expressly provided otherwise, means a person as defined in this section, meeting the applicable

citizenship requirements of subpart C as a United States citizen.

Coastwise trade includes the transportation of passengers or merchandise between points embraced within the coastwise laws of the United States

Commandant means the Commandant of the United States Coast Guard.

Note: Submissions and correspondence made to the Commandant pursuant to this part should be addressed to Commandant (G–MVI–6), U.S. Coast Guard, 2100 Second Street, SW., Washington, DC 20593–0001.

Documentation officer means the Coast Guard official who is authorized to approve and process applications made under this part, and record instruments authorized to be filed and recorded under this part.

Documented vessel means a vessel which is the subject of a valid Certificate of Documentation.

Endorsment means an entry which may be made on a Certificate of Documentation, and which, except for a recreational endorsement, is conclusive evidence that a vessel is entitled to engage in a specified trade.

Exclusive Economic Zone (EEZ) means the zone established by Presidential Proclamation No. 5030, dated March 10, 1983, (48 FR 10605, 3 CFR, 1983 Comp., p. 22).

Fisheries includes processing, storing, transporting (except in foreign commerce), planting, cultivating, catching, taking, or harvesting fish, marine animals, pearls, shells, or marine vegetation in the navigable waters of the United States or in the Exclusive Economic Zone.

Hull means the shell, or outer casting, and internal structure below the main deck which provide both the flotation envelope and structural integrity of the vessel in its normal operations. In the case of submersible vessel, the term includes all structural members of the pressure envelope.

Manufacturer's Certificate of Origin means a certificate issued under the law or regulation of a State, evidencing transfer of a vessel from the manufacturer as defined in 33 CFR part 181 to another person.

Non-citizen means a person who is not a citizen of the United States as defined in this section.

Officer in Charge, Marine Inspection (OCMI) means the Coast Guard official designated as such by the Commandant, under the superintendence and direction of a Coast Guard District Commander, who is in charge of an inspection zone in accordance with regulations set forth in 46 CFR part 1.

Person means an individual, corporation, partnership, association, joint venture, trust arrangement, the government of the United States, a State or political subdivision thereof, and includes a trustee, beneficiary, receiver, or similar representative of any of them.

Port of Documentation means a port which has been designated by the Commandant as a place which may serve as a port of record for vessel documentation purposes. A documentation office is located in each port of documentation. A list of designated ports of documentation may be found in appendix A to this part.

Port of record means the port of documentation at which the records for a vessel are kept.

Registration means a certificate of number issued pursuant to rules in 33 CFR part 173, a record under the maritime laws of a foreign country, or a certificate issued by a political subdivision of a foreign country.

Secretary means the Secretary of Transportation.

State means a State of the United States or a political subdivision thereof, Guam, Puerto Rico, the Virgin Islands, American Samoa, the District of Columbia, the Northern Mariana Islands, and any other territory or possession of the United States.

Superstructure means any structural part of a vessel above or including its main deck.

United States, when used in a geographic sense means the States of the United States, Guam, Puerto Rico, American Samoa, the District of Columbia, the Northern Mariana Islands, and any other territory or possession of the United States, except that in § 67.19 trust territories are not considered to be part of the United States.

Vessel includes every description of watercraft or other contrivance used or capable of being used as a means of transportation on water, but does not include aircraft. Vessel also includes ocean thermal energy conversion facilities and ocean thermal energy conservation plantships.

(1) *Ocean thermal energy conversion facility* means any facility which is standing in or moored in or beyond the territorial sea of the United States and which is designed to use temperature differences in ocean water to produce electricity or another form of energy capable of being used directly to perform work.

(2) *Ocean thermal energy conversion plantship* means any vessel which is standing in or moored in or beyond the territorial sea of the United States and which is designed to use temperature differences in ocean water to produce electricity or another form of energy capable of being used directly to perform work.

Note: Rulings and interpretations concerning coastwise trade and the fisheries can be obtained from the U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, DC 20229 (Attn: Carrier Rulings Branch).

§ 67.5 Vessels eligible for documentation.

Any vessel of at least five (5) net tons wholly owned by a citizen or citizens of the United States is eligible for documentation under this part. This includes, but is not limited to, vessels used exclusively for recreational purposes and vessels used in foreign trade.

§ 67.7 Vessels requiring documentation.

Any vessel of at least five (5) net tons which engages in the fisheries on the navigable waters of the United States or in the Exclusive Economic Zone, Great Lakes trade, or coastwise trade, unless exempt under § 67.9, must have a Certificate of Documentation bearing the appropriate endorsement.

§ 67.9 Vessels excluded from or exempt from documentation.

(a) A vessel of less than five (5) net tons is excluded from documentation.

(b) A vessel which does not operate on the navigable waters of the United States or in the fisheries in the Exclusive Economic Zone is exempt from the requirement to have a Certificate of Documentation.

(c) A non-self-propelled vessel, qualified to engage in the coastwise trade is exempt from the requirement to be documented with a coastwise endorsement when engaged in coastwise trade:

(1) Within a harbor;

(2) On the rivers or lakes (except the Great Lakes) of the United States; or

(3) On the internal waters or canals of any State

(d) A vessel exempt from the requirement to be documented by paragraph (b) or (c) of this section may, at the option of the owner, be documented provided it meets the other requirements.

§ 67.11 Restriction on transfer of an interest in documented vessels to foreign persons; foreign registry or operation.

(a) Without the approval of the Maritime Administration, a documented vessel which is owned by a citizen of the United States as defined in section 2 of the Shipping Act, 1916 (46 U.S.C. app 802), may not be:

(1) Placed under foreign registry or operated under the authority of a foreign country; or

(2) Sold, mortgaged, leased, chartered, or delivered to any person who is not a citizen of the United States as defined in section 2 of the Shipping Act, 1916 (46 U.S.C. app. 802)

(b) The restriction in paragraph (a) of this section does not apply to a vessel that has been operated only as:

(1) A fishing vessel, fish processing vessel, or fish tender vessel (as defined in 46 U.S.C. 2101);

(2) A recreational vessel; or

(3) Both

Note: For purposes of this part only, the Coast Guard will deem a vessel which has been documented exclusively with a fishery or recreational endorsement or both from the time it was first documented, or for a period of not less than one year prior to foreign transfer or registry, to qualify for the exemption granted in paragraph (b) of this section.

§ 67.12 Right of appeal.

Any person directly affected by a decision or action taken under this part by or on behalf of the Coast Guard may appeal therefrom in accordance with subpart 1.03 of part 1 of this chapter.

§ 67.13 Incorporation by reference.

(a) Certain material is incorporated by reference into this part with the approval of the Director of the Federal Register in accordance with 5 U.S.C. 552(a). To enforce any edition other than that specified in paragraph (b) of this section, the Coast Guard must publish notice of change in the **Federal Register** and make the material available to the public. All approved material is on file at the Office of the Federal Register, 1100 L Street NW., Washington, DC and at the U.S. Coast Guard, Merchant Vessel Inspection and Documentation Division, 2100 Second Street SW., Washington, DC 20593–0001 and is available from the source indicated in paragraph (b) of this section.

(b) The material approved for incorporation by reference in this part and the section affected is:

U.S. Department of Commerce, National Technical Information Service, Springfield, VA 22181, Federal Information Processing Standards Publication 55DC, Guideline: Codes for Named Populated Places, Primary County Divisions, and Other Locational Entities of the United States and Outlying Areas (1987) * * * § 67.119.

§ 67.14 OMB control numbers assigned pursuant to the Paperwork Reduction Act.

(a) *Purpose.* This section collects and displays the control numbers assigned to information collection and recordkeeping requirements in this subchapter by the Office of Management and Budget (OMB) pursuant to the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*). The Coast Guard intends that this section comply with the requirements of 44 U.S.C. 3507(f) which requires that agencies display a current control number assigned by the Director of the OMB for each approved agency information collection requirement.

(b) *Display.*

46 CFR part or section where identified or described	Current OMB control No.
Part 67	2115–0110
Part 68	2115–0110

Subpart B—Forms of Documentation; Endorsements; Eligibility of Vessel

§ 67.15 Form of document—all endorsements.

(a) The form of document is a Certificate of Documentation, form CG–1270.

(b) Upon application in accordance with subpart K of this part and determination of qualification by the documentation officer with whom the application is filed, a Certificate of Documentation may be issued with a registry, coastwise, Great Lakes, fishery, or recreational endorsement.

(c) A Certificate of Documentation may bear simultaneous endorsements for recreation and more than one trade, including operation under 46 CFR part 68.

Note: Where a vessel possesses a Certificate of Documentation bearing more than one endorsement, the actual use of the vessel determines the endorsement under which it is operating.

§ 67.17 Registry endorsement.

(a) A registry endorsement entitles a vessel to employment in the foreign trade; trade with Guam, American Samoa, Midway or Kingman reef; and any other employment for which a coastwise, Great Lakes, or fishery endorsement is not required.

(b) Any vessel eligible for documentation under § 67.5 is eligible for a registry endorsement.

(c) A vessel otherwise eligible for a registry endorsement for which the Maritime Administration has not granted general approval in 46 CFR part 221 for sale or transfer to non-citizens loses that eligibility during any period in which it is mortgaged to a person which does not meet the requirements of § 67.233(b).

§ 67.19 Coastwise or Great Lakes endorsement.

(a) A coastwise endorsement entitles a vessel to employment in unrestricted coastwise trade and any other employment for which a registry, fishery, or Great Lakes endorsement is not required.

(b) A Great Lakes endorsement entitles a vessel to employment in the Great Lakes trade and any other employment for which a registry, fishery, or coastwise endorsement is not required.

(c) If eligible for documentation and not restricted from coastwise or Great Lakes trade by paragraph (d) or (e) of this section, the following vessels are eligible for a coastwise or Great Lakes endorsement or both:

(1) Vessels built in the United States (§ 67.97);

(2) Forfeited vessels (§ 67.131);

(3) Vessels granted coastwise trading privileges by special legislation (§ 67.132);

(4) Wrecked vessels (§ 67.133);

(5) Captured vessels (§ 67.134); and

(6) Vessels purchased, chartered, or leased from the Secretary of Transportation by persons who are citizens of the United States (46 U.S.C. app. 808).

(d) A vessel otherwise eligible for a coastwise or Great Lakes endorsement under paragraph (c) of this section permanently loses that eligibility if:

(1) It is thereafter sold in whole or in part to any owner that is not a citizen as defined in subpart C of this part, or a person permitted to document vessels pursuant to 46 CFR part 68;

(2) It is thereafter registered under the laws of a foreign country;

(3) It undergoes rebuilding as defined in § 67.177(a) outside of the United States; or

(4) It is a crude oil tanker of 20,000 deadweight tons or above, and after 17 October 1978 has segregated ballast tanks, a crude oil washing system, or an inert gas system installed outside of the United States as defined in § 67.3.

(e) A vessel otherwise eligible for a coastwise or Great Lakes endorsement under paragraph (c) of this section loses that eligibility, except as provided in paragraph (f) of this section, during any period in which it is:

(1) Owned by a corporation which does not meet the citizenship requirements of § 67.39(b), or;

(2) Mortgaged to a person not listed in § 67.233(b).

(f) The restriction imposed by paragraph (e)(2) of this section does not apply to any vessel for which the Maritime Administration has granted general approval of 46 CFR part 221 for mortgage to non-citizens.

§ 67.21 Fishery endorsement.

(a) A fishery endorsement entitles a vessel to employment in the fisheries as defined in § 67.3 subject to federal and state laws regulating the fisheries, and in any other employment for which a registry, coastwise, or Great Lakes endorsement is not required. A fishery endorsement entitles a vessel to land its catch, wherever caught, in the United States.

(b) If eligible for documentation and not restricted from the fisheries by paragraph (c) of this section, the following vessels are eligible for a fishery endorsement:

(1) Vessels built in the United States (§ 67.97);

(2) Forfeited vessels (§ 67.131);

(3) Vessels granted fisheries privileges by special legislation (§ 67.132);

(4) Wrecked vessels (§ 67.133); and

(5) Captured vessels (§ 67.134).

(c) A vessel otherwise eligible for a fishery endorsement under paragraph (b) of this section permanently loses that eligibility if it undergoes rebuilding as defined in § 67.177(a) outside of the United States.

(d) A vessel otherwise eligible for a fishery endorsement under paragraph (b) of this section and not protected by the savings provision in § 67.45 loses that eligibility during any period in which it is owned by a partnership which does not meet the citizenship requirements of § 67.35(a) and § 67.35(a)(3), or by a corporation which does not meet the citizenship requirements of § 67.39(d).

§ 67.23 Recreational endorsement.

(a) A recreational endorsement entitles a vessel to pleasure use only.

(b) Any vessel eligible for documentation under § 67.5 is eligible for a recreational endorsement.

Note: A vessel having a Certificate of Documentation endorsed only for recreation may not be bareboat chartered except for recreational use. Guidance on the elements of a valid bareboat charter should be obtained through private legal counsel.

Subpart C—Citizenship Requirements for Vessel Documentation

§ 67.30 Requirement for citizen owner.

Certificates of Documentation may be issued under this part only to vessels which are wholly owned by United States citizens. Certificates of Documentation with limited endorsements may be issued to vessels owned by certain persons who are not citizens as defined in this part in accordance with part 68 of this chapter, under the Bowater Amendment and for oil spill response vessels under the Oil Pollution Act of 1990.

§ 67.31 Stock or equity interest requirements.

(a)(1) The stock or equity interest requirements for citizenship under this subpart encompass: title to all classes of stock; title to voting stock; and ownership of equity. An otherwise qualifying corporation or partnership may fail to meet stock or equity interest requirements because: stock is subject to trust or fiduciary obligations in favor of non-citizens; non-citizens, exercise, directly or indirectly, voting power; or non-citizens, by any means, exercise control over the entity. The applicable stock or equity interest requirement is not met if the amount of stock subject to obligations in favor of non-citizens, non-citizen voting power, or non-citizen control exceeds the percentage of the non-citizen interest permitted.

(2) For the purpose of this section, control includes an absolute right to direct corporate or partnership business, to limit the actions of or replace the chief executive officer, a majority of the board of directors or any general partner, to direct the transfer or operations of any vessel owned by the corporation or partnership, or otherwise to exercise authority over the business of the corporation or partnership, but not the right to simply participate in these activities or the right to receive a financial return, e.g., interest or the equivalent of interest on a loan or other financing obligations.

(b) For purposes of meeting the stock or equity interest requirements for citizenship under this subpart where title to a vessel is held by an entity comprised, in whole or in part, of other entities which are not individuals, each entity contributing to the stock or equity interest qualifications of the entity holding title must be a citizen eligible to document vessels in its own right with the trade endorsement sought.

§ 67.33 Individual.

An individual is a citizen if native-born, naturalized, or a derivative citizen of the United States, or otherwise qualifies as a United States citizen.

§ 67.35 Partnership, association, or joint venture.

(a) A partnership is a citizen if all its general partners are citizens, and:

(1) For the purpose of obtaining a registry or recreational endorsement, at least 50 percent of the equity interest in the partnership is owned by citizens;

(2) For the purpose of obtaining a coastwise or Great Lakes endorsement or both, at least 75 percent of the equity interest in the partnership is owned by citizens; or

(3) For the purpose of obtaining a fishery endorsement, more than 50 percent of the equity interest in the partnership is owned by citizens.

(b) An association is a citizen if each of its members is a citizen.

(c) A joint venture is a citizen if each of its members is a citizen.

§ 67.37 Trust.

A trust arrangement is a citizen if each of its trustees and each of its beneficiaries with an enforceable interest in the trust is a citizen.

§ 67.39 Corporation.

(a) For the purpose of obtaining a registry or a recreational endorsement, a corporation is a citizen if:

(1) It is incorporated under the laws of the United States or of a State;

(2) Its chief executive officer, by whatever title, is a citizen;

(3) Its chairman of the board of directors is a citizen; and

(4) No more of its directors are non-citizens than a minority of the number necessary to constitute a quorum.

(b) For the purpose of obtaining a coastwise or Great Lakes endorsement of both, a corporation is a citizen if:

(1) It meets all the requirements of paragraph (a) of this section; and

(2) At least 75 percent of the stock interest in the corporation is owned by citizens.

(c) A corporation which does not meet the requirements of paragraph (b) of this section may qualify for limited coastwise trading privileges by meeting the requirements of Part 68 of this chapter.

(d) A corporation is a citizen for the purpose of obtaining a fishery endorsement if:

(1) It meets all the requirements of paragraph (a) of this section; and

(2) More than 50 percent of the stock interest in the corporation including a majority of voting shares in the corporation is owned by citizens.

§ 67.41 Governmental entity.

A governmental entity is a citizen for the purposes if it is the federal government of the United States or the government of a State as defined in § 67.3.

§ 67.43 Evidence of citizenship.

A completed original Application for Initial Issue, Exchange, or Replacement Certificate of Documentation; or Redocumentation (form CG–1258) establishes a rebuttable presumption that the applicant is a United States citizen.

§ 67.45 Citizenship savings provision for fishing vessels.

A corporation that meets the requirements of paragraph (d)(1) of § 67.39 but does not meet the requirements of paragraph (d)(2) of that section, or a partnership that meets the requirements of paragraphs (a) and (a)(1) of § 67.35 but does not meet the requirements of paragraph (a)(3) of that section, may nonetheless be eligible to obtain a fishery endorsement for a vessel if the Secretary of Transportation, or the Secretary's delegate determines that prior to July 28, 1987, the vessel:

(a) Was documented under 46 U.S.C. chapter 121 and operating as a fishing, fish processing, or fish tender vessel in the navigable waters of the United States or the Exclusive Economic Zone as defined in 46 U.S.C. 2101(10a); or

(b) Was contracted for purchase for use as a fishing, fish processing, or fish tender vessel in the navigable waters of the United States or the Exclusive Economic Zone as defined in 46 U.S.C. 2101(10a), if the purchase is shown by the contract or similarly reliable evidence acceptable to the Secretary or the Secretary's delegate to have been made for the purpose of using the vessel in the fisheries.

§ 67.47 Evidence of Maritime Administration approval.

(a) The following transactions, among others, require approval of the Maritime Administration in accordance with 46 CFR part 221:

(1) Placement of the vessel under foreign registry;

(2) Operation of the vessel under the authority of a foreign country; and

(3) Sale or transfer of an interest in or control of the vessel from a citizen, as defined in section 2 of the Shipping Act, 1916 (46 U.S.C. app. 802), to a person not a citizen within the meaning of section 2 of that act.

(b) A Certificate of Documentation may not be issued for a vessel which subsequent to the last issuance of a Certificate of Documentation has undergone any transaction listed in paragraph (a) of this section, even if the owner meets the citizenship requirements of this subpart, unless evidence is provided that the Maritime Administration approved the transaction.

(c) The restriction imposed by paragraph (b) of this section does not apply to a vessel identified in § 67.11(b).

Subpart D—Title Requirements for Vessel Documentation

§ 67.50 Requirement for title evidence.

The owner of a vessel must present title evidence in accordance with one of the methods specified in this subpart:

(a) When application is made for a coastwise or Great Lakes endorsement for a vessel which has not previously been qualified for such endorsement;

(b) For initial documentation of a vessel;

(c) When the ownership of a documented vessel changes in whole or in part;

(d) When the general partners of a partnership owning a documented vessel change by addition, deletion, or substitution, without dissolution of the partnership; or

(e) When a vessel which has been deleted from documentation is returned to documentation and there has been an intervening change in ownership.

§ 67.53 Methods of establishing title.

Title to a vessel may be established through one of the following methods:

(a) *Simplified method without evidence of build.* The owner must produce a copy of the last registration of the vessel (State, federal, or foreign) and evidence which establishes chain of title from that registration to the present owner.

(b) *Simplified method with evidence of build.* The owner must produce a copy of the last registration of the vessel (State, federal, or foreign) and evidence which establishes chain of title from that registration to the present owner along with evidence of the facts of build in accordance with subpart F of this part.

(c) *Complete chain of title, without evidence of citizenship for each entity in that chain of title.* The owner must provide evidence which establishes:

(1) The facts of build in accordance with subpart F of this part; and

(2) A complete chain of title for the vessel from the person for which the vessel was built to the present owner.

(d) *Complete chain of title, with evidence of citizenship for each entity in that chain of title.* The owner must provide evidence which establishes:

(1) The facts of build in accordance with subpart F of this part; and

(2) A complete chain of title for the vessel from the person for which the vessel was built to the present owner, accompanied by competent and persuasive evidence establishing the citizenship of each entity in the chain of title.

§ 67.55 Requirement for removal from foreign registry.

The owner of a vessel must present evidence of removal of the vessel from foreign registry whenever:

(a) The owner applies for initial documentation of a vessel that has at any time been registered under the laws of a foreign country; or

(b) The owner applies for reentry into documentation of a vessel that had been registered under the laws of a foreign country since it was last documented under the laws of the United States.

§ 67.57 Extent of title evidence required for initial documentation.

(a) Vessels never registered under any system:

(1) Where a coastwise or Great Lakes endorsement is sought, the only title evidence required for a vessel being documented by the owner for whom it was built is the certification of the builder (form CG–1261) described in § 67.99. Any other applicant must present title evidence in accordance with § 67.53(d).

(2) Where a fishery endorsement is sought, the only title evidence required for a vessel being documented by the owner for whom it was built is the certification of the builder (form CG–1261) described in § 67.99. Any other applicant must present title evidence in accordance with either paragraph (c) or (d) of § 67.53.

(3) Where a registry or recreational endorsement is sought by an applicant who is the first owner of the vessel, that applicant must produce the certification described in § 67.99, or a Manufacturer's Certification of Origin. Any other applicant must also present title evidence in accordance with either paragraph (c)(2) or (d)(2) of § 67.53.

Note: Manufacturer's Certificates of Origin are sometimes used as shipping documents for vessels, and may recite as the first owner a person other than the person for which the vessel was built. Therefore, a chain of title which begins with a Certificate of Origin will be deemed incomplete.

(b) Vessels previously registered under the laws of a State or a foreign government:

(1) Where a coastwise or Great Lakes endorsement is sought, title evidence must be presented in accordance with § 67.53(d).

(2) Where a fishery endorsement is sought, title evidence must be presented in accordance with either paragraph (b), (c), or (d) of § 67.53.

(3) Where a registry or recreational endorsement is sought, title evidence must be presented in accordance with

either paragraph (a), (b), (c), or (d) of § 67.53.

§ 67.59 Extent of title evidence required for change in ownership of a documented vessel.

When the ownership of a documented vessel changes, in whole or in part, the applicant for documentation must present:

(a) The title evidence required by subpart E of this part to reflect all ownership changes subsequent to the last issuance of a certificate of Documentation; and

(b) Where a registry, fishery, or recreational endorsement is sought, evidence of the citizenship of all owners subsequent to the last owner for whom the vessel was documented except for a vessel:

(1) Identified in § 67.11(b); or

(2) For which the Maritime Administration has granted approval for transfer of sale under 46 CFR part 221.

(c) Where a coastwise or Great lakes endorsement is sought, evidence establishing the citizenship of all owners subsequent to the last owner for whom the vessel was documented with a coastwise or Great Lakes endorsement, if such evidence is not already on file with the Coast Guard. If the vessel has never been documented with a coastwise or Great Lakes endorsement, evidence must be presented to establish the citizenship of each owner for whom such evidence is not already on file with the Coast Guard.

§ 67.61 Extent of title evidence required for vessels returning to documentation.

(a) When the owner of a vessel which has been deleted from documentation applies to have the vessel returned to documentation, except as provided in paragraphs (b) and (c) of this section, the owner must provide evidence establishing the complete chain of title from the last owner under documentation, and citizenship evidence for all owners in that chain of title.

(b) When a vessel is returned to documentation after having been under foreign registry, the owner must provide a copy of the last foreign registry, the evidence required by § 67.55, and evidence establishing the complete chain of title from the last owner under foreign registry. No citizenship evidence need be provided for owners in that chain.

(c) The owner of a vessel identified in § 67.11(b) or for which the Maritime Administration has granted approval for transfer or sale, either by written order or by general approval in 46 CFR Part 221, and which was under a State or federal registration or titling system, must provide a copy of the last registration or title, the evidence required by § 67.55 if applicable, and evidence establishing the complete chain of title from the last owner under such registry or title. No citizenship evidence need be provided for owners in that chain. Although vessels returned to documentation without a complete chain of title are not eligible for coastwise or Great Lakes endorsements, this does not preclude such an endorsement if the chain of title is completed at a later date.

§ 67.63 Extent of title evidence required for captured, forfeited, special legislation, and wrecked vessels.

(a) In the case of a captured or forfeited vessel, the owner must provide evidence establishing the chain of title from the judicial decree of capture or decree of forfeiture, or the evidence of administrative forfeiture described in § 67.13(b). Citizenship evidence for all owners in the chain is required only if a coastwise or Great Lakes endorsement is sought.

(b) In the case of a wrecked vessel or a vessel which is the subject of special legislation, the owner must provide:

(1) For initial documentation of a vessel, or return to documentation of a vessel which was deleted from documentation, a copy of the last federal, state, or foreign registration, the evidence required by § 67.55 if applicable, and evidence establishing the chain of title from the point of that registration, subsequent to the Commandant determination that the vessel is eligible for documentation under 46 U.S.C. app. 14. Citizenship evidence for all owners in the chain of title is required only if a coastwise or Great Lakes endorsement is sought.

(2) For a documented vessel, the title evidence reflecting all ownership changes subsequent to the last documented owner of record. In addition, unless the vessel qualifies for exemption under § 67.11(b) or the vessel is the subject of Maritime Administration general approval in 46 CFR part 221 for sale or transfer to non-citizens, citizenship evidence must be presented for all owners in that chain of title.

Subpart E—Acceptable Title Evidence; Waiver

§ 67.70 Original owner.

The builder's certification described in § 67.99 serves as evidence of the original owner's title to a vessel.

§ 67.73 Transfers prior to documentation.

A transfer of vessel title prior to documentation may be evidenced by:

(a) Completion of the transfer information on the reverse of the builder's certification on form CG–1261;

(b) Completion of the transfer information on the reverse of the Manufacturer's Statement of Origin; or

(c) A bill of sale which meets the criteria for filing and recording set forth in subpart P of this part.

§ 67.75 Transfers by sale or donation subsequent to documentation

(a) Except as otherwise provided in this subpart, transfers of vessel title must be evidenced by a bill of sale which meets the criteria for filing and recording set forth in subpart P of this part. Except as otherwise provided in supart O of this part, each bill of sale must be accompanied by a declaration of citizenship from the new owner, executed on the appropriate Maritime Administration form described in § 67.211.

(b) The bill of sale form used may be form CG–1340 or form CG–1356, if appropriate.

(c) An applicant for documentation who cannot produce required title evidence in the form of an instrument eligible for filing and recording in accordance with subpart P of this part may apply for a waiver of that requirement in accordance with the provisions of § 67.99.

§ 67.77 Passage of title by court action.

(a) When title to a vessel has passed by court action, that passage must be established by copies of the relevant court order(s) certified by an official of the court.

(b) When authority to transfer a vessel has been conferred by court action, that authority must be established by copies of the relevant court order(s) certified by an official of the court.

§ 67.79 Passage of title without court action following death of owner.

When title to a vessel formerly owned in whole or in part by an individual now deceased passes without court action, an applicant for documentation must present:

(a) A copy of the death certificate, certified by an official of a State or political subdivision thereof, when title passes to a surviving joint tenant or tenants or to a tenant by the entirety; or

(b) Evidence of compliance with applicable State law where the laws of the cognizant jurisdiction permit passage of title without court action.

§ 67.81 Passage of title in conjunction with a corporate merger or similar transaction.

When the title to a vessel has passed as the result of a corporate merger or similar transaction wherein the assets of one corporation has been transferred to another, the passage of title must be established by:

(a) Materials, such as a resolution of the board of directors or shareholders of the corporation which held title to the vessel before the transaction, which either unequivocally transfers all of the assets of the corporation or which specifically identify the vessel as being among the assets transferred; and

(b) In jurisdictions where there is an official recognition of corporate mergers and similar transactions, a copy of such official recognition certified by the cognizant official of that jurisdiction.

§ 67.83 Passage of title by extra-judicial repossession and sale.

When title to a documented vessel has passed by reason of an extra-judicial repossession and sale, such passage must be established by:

(a) A copy of the instrument under which foreclosure was made;

(b) An affidavit from the foreclosing party setting forth the reasons for foreclosure, the chronology of foreclosure, the statute(s) under which foreclosure was made, and the steps taken to comply with the relevant instrument and statute(s);

(c) Evidence of substantial compliance with the relevant instrument and statute(s); and

(d) A bill of sale which meets the criteria for filing and recording set forth in subpart P of this part from the foreclosing party as agent for the defaulting owner(s).

§ 67.85 Change in general partners of partnership.

When the general partners of a partnership owning a documented vessel change by addition, deletion, or substitution without dissolution of the partnership, the change must be established by a written statement from a surviving general partner detailing the nature of the change.

§ 67.87 Change of legal name of owner.

(a) When the name of a corporation which owns a documented vessel changes, the owner must present certification from the appropriate governmental agency evidencing registration of the change.

(b) When the name of an individual who owns a documented vessel changes for any reason, competent and persuasive evidence establishing the change must be provided.

§ 67.89 Waiver of production of a bill of sale eligible for filing and recording.

(a) When the evidence of title passage required by this subpart is a bill of sale which meets the criteria for filing and recording set forth in subpart P of this part, and the applicant is unable to produce a bill of sale meeting those criteria, the applicant may request that the documentation officer at the port where application for documentation, exchange, or redocumentation is made waive that requirement.

(b) The request for waiver must include:

(1) A written statement from the applicant detailing the reasons why an instrument meeting the filing and recording criteria of this part cannot be obtained;

(2) Competent and persuasive evidence of the passage of title; and

(3) The fee prescribed in subpart Y of this part.

(c) No waiver of the requirement to produce a bill of sale eligible for filing and recording may be granted in the absence of competent and persuasive evidence of passage of title.

Subpart F—Build Requirements for Vessel Documentation

§ 67.95 Requirement for determination.

Evidence that a vessel was built in the United States must be on file for any vessel for which a coastwise, Great Lakes, or fishery endorsement is sought, unless the vessel is otherwise qualified for those endorsements under subpart J of this part.

§ 67.97 United States built.

To be considered built in the United States a vessel must meet both of the following criteria:

(a) All major components of its hull and superstructure are fabricated in the United States; and

(b) The vessel is assembled entirely in the United States.

§ 67.99 Evidence of build.

(a) Evidence of the facts of build may be either a completed original form CG–1261, or other original document containing the same information, executed by a person having personal knowledge of the facts of build because that person:

(1) Constructed the vessel;

(2) Supervised the actual construction of the vessel; or

(3) Is an officer or employee of the company which built the vessel and has examined the records of the company concerning the facts of build of the vessel.

(b) A vessel owner applying for documentation must file a separate certificate from each builder involved in the construction of the vessel.

(c) A Manufacturer's Certificate of Origin is not evidence of the facts of build.

§ 67.101 Waiver of evidence of build.

(a) A vessel owner applying for documentation unable to obtain the evidence required by § 67.99 may apply for a waiver of that requirement to the documentation officer at the port where application for documentation is made.

(b) The application for waiver must include:

(1) A written request for the waiver, explaining why the evidence required by § 67.99 cannot be furnished;

(2) Competent and persuasive evidence of the facts of build; and

(3) The fee specified in subpart Y of this part.

(c) No waiver of the requirements imposed by § 67.99 may be granted in the absence of competent and persuasive evidence of the facts of build.

Subpart G—Tonnage and Dimension Requirements for Vessel Documentation

§ 67.105 Requirement for determination.

The gross and net tonnage and dimensions of a vessel must be determined:

(a) For initial documentation;

(b) Whenever there is a change in the gross or net tonnage or dimensions of a documented vessel; or

(c) When the gross or net tonnage of a vessel returning to documentation has changed since the vessel was last documented.

§ 67.107 System of measurement; evidence.

(a) The gross and net tonnage and dimensions of a vessel for purposes of this part are determined in accordance with 46 CFR part 69.

(b) A Certificate of Measurement issued by an authorized official is the only acceptable evidence of the gross and net tonnage of a vessel measured in accordance with subpart B, C, or D of 46 CFR part 69. Because the gross and net tonnage of vessels measured under subpart E of 46 CFR part 69 are determined as part of the documentation process, no Certificate of Measurement is required.

Subpart H—Designations and Assignments Required for Vessel Documentation

§ 67.111 Assignment of official number.

(a) The owner of a vessel must submit an Application for Initial Issue, Exchange, or Replacement Certificate of Documentation; or Redocumentation (form CG–1258) to the documentation officer at the port of record of the vessel assigned in accordance with § 67.115, or the documentation office nearest where the vessel is located, to apply for an official number for the vessel when:

(1) Application is made for initial documentation of the vessel; and

(2) An existing vessel has been severed, with two (2) or more vessels resulting. In this case, the official number of the original vessel is retired and the owner of each resulting vessel must apply for designation of a new official number.

(b) Upon receipt of form CG–1258, the documentation officer at the port where application for documentation is made will have an official number assigned to the vessel and furnish it to the vessel owner.

§ 67.113 Managing owner designation; address; requirement to report change of address.

Every vessel must have a managing owner who shall be designated on the Application for Documentation, Exchange or Replacement of Document, or Redocumentation (CG–1258).

(a) The managing owner of a vessel owned by one person is the owner of the vessel.

(b) The managing owner of a vessel owned by more than one person must be one of the owners. The person designated as managing owner must have an address in the United States except where no owner of the vessel has an address in the United States.

(c) The managing owner of a vessel owned in a trust arrangement must be one of the trustees.

(d) The address of the managing owner is defined as follows:

(1) For an individual, any residence of the managing owner.

(2) For a partnership, its address:

(i) In the State under whose laws it is organized; or

(ii) Of its principal place of business.

(3) For a corporation, its address:

(i) Within the State of incorporation; or

(ii) Of its principal place of business.

(e) The managing owner must notify the documentation officer at the port of record of the vessel within ten days of a change of address.

§ 67.115 Assignment of port of record.

(a) A port of record is assigned to a vessel:

(1) Upon initial documentation;

(2) When there is a change in the ownership of the vessel, in whole or in part; or

(3) When the owner requests to change the port of record of the vessel in accordance with the rules in paragraph (c) of this section. The owner shall not be required to change the port of record of the vessel solely because of a change of address of the managing owner.

(b) The same port of record will be assigned to all vessels owned by the same owner(s).

(c) The port of record of the vessel is:

(1) Boston, MA if the address of the managing owner is located within the Boston Marine Inspection Zone, the Portland, Maine Marine Inspection Zone, or the Providence Marine Inspection Zone in the First Coast Guard District;

(2) New York, NY if the address of the managing owner is located within the New York Marine Inspection Zone in the First Coast Guard District;

(3) St. Louis, MO, if the address of the managing owner as is located in the Second Coast Guard District;

(4) Philadelphia, PA, if the address of the managing owner is located within the Philadelphia Marine Inspection Zone in the Fifth Coast Guard District;

(5) Norfork, VA if the address of the managing owner is within the Hampton Roads Marine Inspection Zone, the Baltimore Marine Inspection Zone, or the Wilmington Marine Inspection Zone in the Fifth Coast Guard District;

(6) Miami, FL if the address of the managing owner is located in the Seventh Coast Guard District;

(7) New Orelans, LA if the address of the managing owner is located in a State other than Texas or New Mexico, within the Eighth Coast Guard District;

(8) Houston, TX if the address of the managing owner is located in Texas or New Mexico within the Eighth Coast Guard District;

(9) Cleveland, OH if the address of the managing owner is located in the Ninth Coast Guard District;

(10) Los Angeles, CA if the address of the managing owner is located in the Los Angeles-Long Beach Marine Inspection Zone or the San Diego Marine Inspection Zone within the Eleventh Coast Guard District;

(11) San Francisco, CA if the address of the managing owner is located within the San Francisco Marine Inspection Zone within the Eleventh Coast Guard District;

(12) Portland, OR if the address of the managing owner is located in Oregon or Idaho within the Thirteenth Coast Guard District;

(13) Seattle, WA if the address of the managing owner is located within the Fourteenth Coast Guard District, or in Washington or Montana within the Thirteenth Coast Guard District; or

(14) Juneau, AK if the address of the managing owner is located in the Seventeenth Coast Guard District.

Note: Geographical boundaries for the Coast Guard Marine Inspection Zones and Coast Guard Districts identified in this section can be found in 33 CFR part 3.

(d) For a vessel owned by a State, territory, possession, any political subdivision of the same, or any agency of a State, territory, possession or political subdivision, the port of record is the port of documentation serving the address in which the capital of the State, territory, or possession is located.

(e) For a vessel owned by the United States Government the port of record is Norfolk, VA.

(f) If the managing owner does not have an address within the United States the port of record may be any port of documentation.

§ 67.117 Vessel name designation.

(a) The owner of a vessel must submit an Application for Initial Issue, Exchange, or Replacement Certificate of Documentation; or Redocumentation (form CG–1258) to the documentation officer at the port of record of the vessel assigned in accordance with § 67.115, or the documentation office nearest where the vessel is located, to designate a name for the vessel:

(1) Upon application for initial documentation of the vessel; or

(2) When the owner elects to change the name of the vessel.

(b) The name designated must be approved by the Secretary or Secretary's delegate, and may not be identical, actually or phonetically to any word or words used to solicit assistance at sea. The name, which must be composed of letters of the Latin alphabet or Arabic or Roman numerals, may not actually contain nor be phonetically identical to obscene, indecent, or profane language, or to racial or ethnic epithets.

(c) The name of a documented vessel may not be changed without the prior approval of the documentation officer at the port where application for name change is made, and payment of the fee specified in subpart Y of this part.

(d) Until such time as the owner of a vessel elects to change the name of a vessel, the provisions of paragraph (b) of this section do not apply to vessels validly documented before [*insert the effective date of the final rule*].

§ 67.119 Hailing port designation.

(a) Upon application for any Certificate of Documentation in accordance with subpart K of this part, the owner of a vessel must designate a hailing port to be marked upon the vessel.

(b) The hailing port must be a place in the United States included in the U.S. Department of Commerce's Federal Information Processing Standards Publication 55DC.

(c) The hailing port must include the State, territory, or possession in which it is located.

(d) The OCMI for the port at which application for documentation is made has final authority to settle disputes as to the propriety of the hailing port designated.

(e) Until such time as a port of record assignment is required in accordance with § 67.115, or the owner elects to designate a new hailing port, the provisions of this section do not apply to vessels which are the subject of a Certificate of Documentation issued before July 1, 1982.

Subpart I—Marking Requirements for Vessel Documentation

§ 67.120 General requirement.

No Certificate of Documentation issued under this part will be deemed valid until the vessel is marked in accordance with the rules in this subpart.

§ 67.121 Official number marking requirement.

The official number of the vessel, preceded by the abbreviation "NO." must be marked in block type Arabic numerals not less than three (3) inches in height on some clearly visible interior structural part of the hull. The number must be permanently affixed to the vessel so that alteration, removal, or replacement would be obvious. If the official number is on a separate plate, the plate must be fastened in such a manner that its removal would normally cause some scarring of or damage to the surrounding hull area.

§ 67.123 Name and hailing port marking requirements.

(a) For vessels other than those covered in paragraphs (b) and (c) of this section, the name of the vessel must be marked on some clearly visible exterior part of the port and starboard bow and the stern of the vessel. The hailing port of the vessel must be marked on some clearly visible exterior part of the stern of the vessel.

(b) Vessels with square bow. For vessels having a square bow, the name of the vessel may be marked on some clearly visible exterior part of the bow in order to avoid obliteration. The name and hailing port must be marked on some clearly visible exterior part of the stern.

(c) Recreational vessels. For vessels documented exclusively for recreation, the name and hailing port must be marked together on some clearly visible exterior part of the hull.

(d) The markings required by paragraphs (a), (b), and (c) of this section, which may be made by the use of any means and materials which result in durable markings, must be made in clearly legible letters of the Latin alphabet or Arabic or Roman numerals not less than four (4) inches in height.

§ 67.125 Disputes.

The OCMI for the zone in which the vessel is located has final authority in any disputes concerning the permanence, durability, legibility, or placement of a vessel's markings.

Subpart J—Application for Special Qualifications for Vessel Documentation

67.130 Submission of applications.

(a) All applications made under this subpart and all subsequent filings to effect documentation, except as provided in § 67.133(b), must be submitted to the documentation officer at the port of record of the vessel assigned in accordance with § 67.115 or at the documentation office nearest where the vessel is located.

(b) Once a transmission under this subpart has been initiated at a documentation office, all subsequent filings for that transaction must be made at that same documentation office.

§ 67.131 Forfeited vessels.

(a) A forfeited vessel is:

(1) One which has been adjudged forfeited by a federal district court to the federal government of the United States for a breach of its laws; or

(2) One which has been forfeited under an administrative forfeiture action to the federal government of the United States for a breach of its laws; or

(3) One which has been seized by the federal government of the United States for a breach of its laws and which has been sold at an interlocutory sale, the proceeds of which have been adjudged forfeited by a federal district court to the federal government of the United States. A vessel is considered forfeited within the meaning of this section even if the proceeds, though adjudged forfeited to the United States, do not actually accrue to the United States.

(b) In addition to any other submissions required by this part, the owner of a forfeited vessel applying for a Certificate of Documentation for that vessel must submit the following:

(1) Where the vessel has been adjudged forfeit, or the proceeds of the sale of the vessel have been adjudged forfeit to the federal government of the United States by a federal district court, a copy of the court order certified by an official of the court;

(2) Where the vessel was forfeited to the federal government of the United States under an administrative forfeiture action, an affidavit from an officer of the agency which performed the forfeiture who has personal knowledge of the particulars of the vessel's forfeiture or a Declaration of Forfeiture issued by the agency which performed the forfeiture.

§ 67.132 Special legislation.

(a) Vessels not otherwise entitled to be operated in the coastwise trade, Great Lakes trade, or in the fisheries may obtain these privileges as a result of special legislation by the Congress of the United States.

(b) In addition to any other submissions required by this part, the owner of a vessel which is entitled to engage in a specified trade because it is the subject of special legislation must include a copy of the legislation to establish the entitlement.

§ 67.133 Wrecked vessels.

(a) Under the provisions of 46 U.S.C. app. 14, a wrecked vessel is one which:

(1) Has incurred substantial damage to its hull or superstructure as a result of natural or accidental causes which occurred in the United States or its adjacent waters; and

(2) Has undergone, in a shipyard in the United States or its possessions, repairs equaling three (3) times the appraised salved value of the vessel.

(b) The determinations of the appraised salved value (which will include consideration of the fact that the vessel, if found in compliance with the Act, will attain coastwise and fishery privileges) and that the repairs made upon the vessel are equal to three times that value must be made by a board of three (3) appraisers. The Commandant will appoint the members of the board, and the cost of the board must be borne by the applicant. The owner of a vessel requesting a determination that the vessel is wrecked within the meaning of 46 U.S.C. app. 14 must submit the following to the Commandant:

(1) Competent and persuasive evidence of the casualty and its location. Coast Guard situation or investigation reports are acceptable as casualty evidence. Other competent and persuasive evidence may be accepted at the discretion of the Commandant.

(2) A writing setting forth the physical location of the vessel, containing a guarantee that the requesting party assumes full responsibility for all costs, liabilities, and other expenses that arise in conjunction with the services performed by the board of appraisers, and stating that at the time of documentation the vessel will be owned by a citizen of the United States; and

(3) The fee specified in subpart Y of this part.

(c) In addition to other submissions required by this part, a vessel owner applying for a Certificate of Documentation for a vessel accorded privileges by the Wrecked Vessel Statute (R.S. 4136) must include a copy of the Commandant's determination that the vessel qualifies for documentation under 46 U.S.C. app. 14.

§ 67.134 Captured vessels.

(a) A captured vessel is one which has been taken by citizens of the United States during a period of war and is thereafter condemned as a prize by a court of competent jurisdiction.

(b) In addition to other submissions required by this part, a vessel owner applying for a Certificate of Documentation of a vessel which qualifies as a captured vessel must include a copy of the court order stating that the vessel was lawfully captured and condemned as a prize.

Subpart K—Application for Documentation, Exchange or Replacement of Certificate of Documentation, or Return to Documentation; Mortgagee Consent; Validation

§ 67.141 Application procedure; all cases.

The owner of a vessel applying for an initial Certificate of Documentation, exchange or replacement of a Certificate of Documentation, or return of a vessel to documentation after deletion from documentation must:

(a) Submit the following to the documentation officer at the port of record of the vessel assigned in accordance with § 67.115 or at the documentation office nearest where the vessel is located:

(1) Application for Initial Issue, Exchange, or Replacement Certificate of Documentation; or Redocumentation (form CG–1258);

(2) The fee specified in subpart Y of this part;

(3) Title evidence, if applicable; and

(4) If the application is for replacement of a mutilated document or exchange of documentation, the outstanding Certificate of Documentation.

(b) Upon receipt of the Certificate of Documentation and prior to operation of the vessel, ensure that the vessel is marked in accordance with the requirements set forth in subpart I of this part.

§ 67.143 Restriction of withdrawal of application.

The owner of a vessel making application pursuant to § 67.141 may not withdraw that application if a mortgage has been filed against a vessel covered by the application unless the mortgagee consents to withdrawal of the application. Consent of the mortgagee is evidenced by filing a properly completed original Consent of Mortgagee to Exchange of Certificate of Documentation or Withdrawal of Application for Documentation (form CG–4593).

§ 67.145 Restrictions on exchange; requirement and procedure for mortgagee consent.

(a) A Certificate of Documentation issued to a vessel which is the subject of an outstanding mortgage recorded pursuant to Subpart Q or predecessor regulations may not be exchanged for a cause arising under § 67.167(a) or § 67.167(b) (1) through (6) without the consent of the mortgagee, except as provided in paragraph (b) of this section.

(b) The provisions of paragraph (a) of this section do not apply to a vessel which is subject only to a mortgage filed or recorded before January 1, 1989, which had not attained preferred status as of that date.

(c) When the owner of a vessel applies for a Certificate of Documentation and the consent of the mortgagee is required under paragraph (a) of this section, the applicant must submit a properly completed original Consent of Mortgagee to Exchange of Certificate of Documentation or Withdrawal of Application for Documentation (form CG–4593) signed by or on behalf of the mortgagee to the documentation officer at the port where application for exchange is made.

(d) If an application for exchange is made to a documentation officer at a port of documentation other than the port of record, form CG–4593 must be accompanied by a certified copy of the vessel's Abstract of Title (form CG–1332) issued at the vessel's port of record not more than fifteen (15) days prior to the date on which the application is made.

§ 67.147 Exchange of certificate of documentation; special procedure for change of port of record.

When the owner of a documented vessel elects or is required to change the port of record of a vessel the owner must:

(a) Comply with the requirements of § 67.141;

(b) Comply with the requirements of § 67.145, if applicable; and

(c) In accordance with § 67.301, request that the documentation officer at the vessel's present port of record forward the vessel's General Index (form (CG–1332) to the new port of record assigned for the vessel in accordance with § 67.115.

Note: In the case of a simultaneous change of owner and port of record, these procedures must be followed by the new owner of the vessel.

§ 67.149 Exchange of certificate of documentation; vessel at sea.

When exchange of a Certificate of Documentation issued to a vessel which is at sea is required pursuant to Subpart L, the procedures in this section may be followed while the vessel is still at sea.

(a) The vessel owner must:

(1) Comply with the requirements § 67.141(a) (1)–(3); and

(2) Mark the vessel with its new name or hailing port in accordance with subpart I, if applicable, when the vessel reaches its first port of call, wherever that may be.

(b) The documentation officer prepares a new Certificate of Documentation and forwards it for delivery to the vessel's next port of call. If the port of call is in the United States, the Certificate is forwarded to the nearest U.S. Coast Guard Marine Safety Office. If the port of call is in a foreign country, the Certificate is forwarded to the nearest American Consulate. The new Certificate is delivered only upon surrender of the old Certificate, which is then forwarded to the port of record of the vessel.

§ 67.151 Replacement of certificate of documentation; special procedure for wrongfully withheld document.

When the owner of a documented vessel alleges that the Certificate of Documentation for that vessel is being wrongfully withheld by any person the owner must:

(a) Submit to the Commandant, via the documentation officer at the port of record of the vessel assigned in accordance with § 67.115, or at the documentation office nearest where the vessel is located, a statement setting forth the reasons for the allegation; and

(b) Upon the Commandant's finding that the Certificate is being wrongfully withheld, apply for replacement of the Certificate in accordance with the requirements of § 67.141.

Subpart L—Validity of Certificates of Documentation; for Renewal of Endorsement, Requirement for Exchange, Replacement, Deletion, Cancellation

§ 67.161 Validity of certificate of documentation.

(a) Notwithstanding any other provision of this subpart, except as provided in paragraph (b) of this section, a Certificate of Documentation but no trade endorsement thereon, issued to a vessel which is the subject of an outstanding mortgage filed or recorded in accordance with subpart Q or any predecessor regulations, remains valid for purposes of:

(1) 46 U.S.C. chapter 125;

(2) 46 U.S.C. chapter 313 for an instrument filed or recorded before the date of invalidation, and an assignment or a notice of claim of lien filed after that date;

(3) Sections 9 and 37(b) of the Shipping Act, 1916 (46 U.S.C. app. 808, 835(b)); and

(4) Section 902 of the Merchant Marine Act, 1936 (46 U.S.C. app. 1242).

(b) The provisions of paragraph (a) of this section do not apply to a vessel which is subject only to a mortgage filed or recorded before January 1, 1989, which had not attained preferred status as of that date.

§ 67.163 Renewal of endorsement.

(a) *Requirement for renewal of endorsement.* Endorsements on Certificates of Documentation are valid for one year. Prior to the expiration of that year, the owner of a vessel which is not exempt from the requirement for documentation under paragraph (c) of § 67.9 must apply for renewal of the endorsement(s) by complying with paragraph (b) of this section. The owner of a vessel exempt from the requirement for documentation under paragraph (c) of § 67.9 must either:

(1) Apply for renewal of the endorsement by complying with paragraph (b) of this section; or

(2) Place the Certificate of Documentation on deposit in accordance with § 67.165.

(b) *Renewal application.* The owner of a vessel must apply for renewal of each endorsement by executing an original Notice of Expiration (CG–1280) or Final Notice After Expiration (CG–1280–B) certifying that the information contained in the Certificate of Documentation and any endorsement(s) thereon remains accurate, and that the Certificate has not been lost, mutilated, or wrongfully withheld. The completed CG–1280 or CG–1280–B must be forwarded to the documentation officer at any port of documentation. The fee specified in subpart Y must be paid if:

(1) Application for renewal is made at a port other than the vessel's port of record;

(2) The owner requests that the renewal decal described in paragraph (c) of this section be forwarded to an address other than the vessel owner's address of record; or

(3) The application for renewal is not received within sixty (60) days after the date on which the endorsement(s) expired.

(c) *Documentation officer procedure.* Upon receipt of a properly executed form CG–1280 or form CG–1280–B and any applicable fees, the documentation officer forwards a renewal decal, CG–1280–A, to the vessel owner at the owner's address of record or other address as requested by the owner.

(d) *Requirement to affix decal.* The owner must affix the renewal decal to the Certificate of Documentation. The presence of a current renewal decal is evidence that the endorsement has been renewed.

§ 67.165 Deposit of certificate of documentation.

(a) *Option for deposit in lieu of renewal of endorsement.* In lieu of renewing the endorsement(s) in accordance with § 67.163, the owner of a vessel which is exempt from the requirement for documentation under paragraph § 67.9(c) may deposit the vessel's outstanding Certificate of Documentation with the documentation officer at he vessel's port of record assigned in accordance with § 67.115.

(b) *Reporting requirement.* The owner of a vessel whose Certificate is on deposit in accordance with paragraph (a) of this section must make a written report to the documentation officer at the vessel's port of record:

(1) When exchange of the Certificate is required upon the occurrence of one or more of the events described in § 67.167(b), (c), or (d);

(2) The vessel is subject to deletion from the roll of actively documented vessels upon the occurrence of one or more of the events described in § 67.167 (a)(1) through (8).

(c) *Validity of document on deposit.* A Certificate of Documentation placed on deposit in accordance with the paragraph (a) of this section is valid for the purposes of:

(1) 46 U.S.C. chapter 125;

(2) 46 U.S.C. chapter 313;

(3) Sections 9 and 37(b) of the Shipping Act, 1916 (46 U.S.C. app. 808, 835(b)); and

(4) Section 902 of the Merchant Marine Act, 1936 (46 U.S.C. app. 1242).

§ 67.167 Requirement for exchange of certificate of documentation.

(a) When application for exchange of the Certificate of Documentation is required upon the occurrence of one or more of the events described in paragraphs (b), (c), or (d) of this section, or the owner of the vessel chooses to apply for exchange of the Certificate pursuant to paragraph (e) of this section, the owner must send or deliver the Certificate to the documentation officer at the port of record of the vessel assigned in accordance with § 67.115 or at the documentation office nearest where the vessel is located, and apply for an exchange of the Certificate in accordance with subpart K.

(b) A Certificate of Documentation together with any trade or recreational endorsement thereon becomes invalid immediately, except as provided in § 67.161, when:

(1) The ownership of the vessel changes in whole or in part;

(2) The general partners of a partnership change by addition, deletion, or substitution;

(3) The port of record of the vessel changes;

(4) The State of incorporation of any corporate owner of the vessel changes;

(5) The vessel is placed under the command of a person who is not a citizen of the United States;

(6) The hailing port of the vessel changes; or

(7) The name of the vessel changes.

(c) A Certificate of Documentation together with any trade or recreational endorsement thereon becomes invalid, except as provided in § 67.161 and in paragraph (f) of this section, immediately if the vessel is not at sea, or upon the vessel's next arrival in port anywhere in the world if the vessel is at sea, when:

(1) The gross or net tonnages or dimensions of the vessel change;

(2) Any beneficiary with an enforceable interest in a trust arrangement owning a vessel changes by addition or substitutions;

(3) The trustee of a trust arrangement owning a vessel changes by addition, substitution, or deletion;

(4) A tenant by the entirety owning any part of the vessel dies;

(5) The restrictions imposed on the vessel changes by addition or substitution;

(6) The legal name of any owner of the vessel changes;

(7) A self-propelled vessel becomes non-self-propelled or a non-self-propelled vessel becomes self-propelled;

(8) The endorsements for the vessel change by addition, deletion, or substitution; or

(9) A substantive or clerical error made by the issuing documentation officer is discovered.

(d) Although a Certificate of Documentation and all trade endorsements thereon remain valid, the owner of a documented vessel must apply for exchange of the Certificate upon an election to designate a new managing owner of the vessel in accordance with § 67.113.

(e) Although the trade or recreational endorsement(s) on a Certificate of Documentation remain valid, the owner may apply for exchange of the Certificate if:

(1) The restrictions imposed on the vessel change by deletion; or

(2) The vessel attains a special entitlement under Subpart J.

(f) A Certificate of Documentation which becomes invalid pursuant to paragraph (b) of this section remains valid for thirty (30) days for the purposes of 46 USC chapter 313.

§ 67.169 Requirement for replacement of certificate of documentation.

(a) The owner of a documented vessel must make application in accordance with subpart K for replacement of a Certificate of Documentation which is:

(1) Lost;

(2) Mutilated; or

(3) Wrongfully withheld from the vessel owner.

(b) When application for replacement of a Certificate of Documentation is required because the Certificate has been mutilated, the existing Certificate must be physically given up to the documentation officer to whom application is made.

§ 67.171 Deletion; requirement and procedure.

(a) A Certificate of Documentation issued to a vessel, together with any endorsements thereon, is invalid, except as provided in § 67.161, and that vessel is subject to deletion from the roll of actively documented vessels when:

(1) The vessel is placed under foreign flag;

(2) The vessel is sold or transferred in whole or in part to a person who is not a citizen of the United States within the meaning of Subpart C of this part;

(3) Any owner of the vessel ceases to be a citizen of the United States within the meaning of subpart C of this part;

(4) The owner no longer elects to document the vessel;

(5) The vessel no longer measures at least five (5) net tons;

(6) The vessel ceases to be capable of transportation by water;

(7) The owner fails to exchange the Certificate as required by § 67.167;

(8) The owner fails to maintain the markings required by subpart I of this part; or

(9) The owner fails to:

(i) Renew the endorsement(s) as required by § 67.163; or

(ii) Comply with the provisions of § 67.165.

(b) Where a cause for deletion arises for any reason under paragraphs (a)(1) through (8) of this section, the owner must send or deliver the original Certificate of Documentation to any documentation officer together with a statement setting forth the reason(s) deletion is required.

(c) When a Certificate of Documentation is required to be deleted because the vessel has been placed under foreign flag or has been sold or transferred in whole or in part to a non-citizen of the United States, the owner of that vessel must comply with the requirements of paragraph (b) of this section, and file:

(1) Evidence of the sale or transfer, if any; and

(2) Evidence that the Maritime Administration has consented to the sale or transfer, except for vessels identified in § 67.11(b) of this part and vessels for which the Maritime Administration has granted general approval in 46 CFR part 221 for sale or transfer to non-citizens.

(d) A certificate evidencing deletion from U.S. documentation will be issued upon request of the vessel owner upon compliance with the applicable requirements of this subpart and payment of the fee specified in subpart Y of this part.

§ 67.173 Cancellation; requirement and procedure.

A Certificate of Documentation issued to a vessel, together with any endorsements thereon, is invalid, except as provided in § 67.161, and subject to cancellation upon a determination by the Commandant or a documentation officer that the issuance of the Certificate was improper for any reason. When a Certificate is subject to cancellation, the owner of the vessel upon being notified of such requirement must send or deliver the Certificate to a documentation officer at any port of documentation. The vessel owner may submit an application for exchange in accordance with subpart K of this part to correct the error giving rise to cancellation. If the vessel for which the Certificate was cancelled was previously documented, it remains documented under the previous Certificate of Documentation, unless deleted under the provisions of § 67.171.

Note: Certificates of Documentation which have been canceled are retained at the last port of record of the vessel.

Subpart M—Miscellaneous Applications

§ 67.175 Application for new vessel determination.

(a) A vessel is new if:

(1) Its hull and superstructure are constructed entirely of new materials; or

(2) It is constructed using structural parts of an existing vessel, which parts have been torn down so that they are no longer advanced to a degree which would commit them to use in the building of a vessel.

(b) When the vessel has been constructed entirely of new materials, no application for a new vessel determination need be made under this section. Application for initial documentation must be made in accordance with subpart K of this part.

(c) When parts of an existing vessel have been used in the construction of a vessel and the owner wants a determination that the resulting vessel is new in accordance with paragraph (a)(2) of this section, the owner must file with the Commandant:

(1) A builder's certification, as described in § 67.99;

(2) A written statement describing the extent to which materials from the existing vessel were used in the construction and the extent to which those materials were torn down;

(3) Accurate sketches or blueprints of the hull and superstructure which must identify, where practicable, components of the old vessel; and

(4) The fee specified in subpart Y of this part.

§ 67.177 Required application for rebuilt determination.

(a) A vessel is rebuilt when any considerable part of its hull or superstructure is built upon or substantially altered.

(b) The owner of a vessel which has not previously permanently lost coastwise, Great Lakes, or fisheries privileges must file with the Commandant the items listed in paragraph (c) of this section if:

(1) The vessel is altered outside the United States in a manner which gives rise to a reasonable belief that the vessel is rebuilt; or

(2) A major component of the hull or superstructure not built in the United States is added to the vessel.

(c) The required submissions must consist of:

(1) A written statement outlining the work performed and naming the place where the work was performed;

(2) Accurate sketches or blueprints describing the work performed; and

(3) The fee specified in subpart Y of this part.

Subpart N—[Reserved]

Subpart O—Filing and Recording of Instruments—General Provisions

§ 67.200 Instruments eligible for filing and recording.

Only the following listed instruments are eligible for filing and recording:

(a) Bills of sale and instruments in the nature of bills of sale;

(b) Deeds of gift;

(c) Chattel mortgages, and assignments, assumptions, supplements, amendments, subordinations, satisfactions, and releases thereof;

(d) Preferred mortgages, and assignments, assumptions, supplements, amendments, subordinations, satisfactions, and releases thereof;

(e) Interlender agreements affecting chattel and preferred mortgages and related instruments; and

(f) Notices of claim of lien, assignments, amendments, and satisfactions and releases thereof.

§ 67.203 Restrictions on filing and recording.

(a) No instrument will be accepted for filing unless the vessel to which it pertains is the subject of:

(1) A valid Certificate of Documentation; or

(2) An application for initial documentation, exchange of Certificate of Documentation, return to documentation, or for deletion from documentation, which is in substantial compliance with the applicable regulations has been made at the port where the filing is made.

(b) An instrument identified as eligible for filing and recording under § 67.200 may not be filed and recorded if it bears a material alteration.

(c) An instrument identified as eligible for filing and recording under § 67.200 (a) or (b) may not be filed and recorded if any vendee or transferee under the instrument is not a citizen of the United States as defined in section 2 of the Shipping Act, 1916, (46 U.S.C. app. 802) unless the Maritime Administration has consented to the grant to a non-citizen made under the instrument.

(d) The restriction imposed by paragraph (c) of this section does not apply to a bill of sale or deed of gift conveying an interest in a vessel which was neither documented nor last documented pursuant to these regulations or any predecessor regulations thereto at the time the instrument was executed, nor to an instrument conveying an interest in a vessel identified in § 67.11(b).

(e) An instrument identified as eligible for filing and recording under § 67.200(c) may not be filed and recorded if the mortgagee or assignee is not a citizen of the United States as defined in 46 U.S.C. app. 802 or a trustee as defined in 46 U.S.C. 31328, unless the Maritime Administration has consented to the grant to a non-citizen made under the instrument. This restriction does not apply to an instrument conveying an interest in a vessel identified in § 67.11(b).

(f) An instrument identified as eligible for filing and recording under § 67.200(d) may not be filed and recorded if the mortgagee or assignee is not a person described in 46 U.S.C. 31322(a)(1)(D). This restriction does not apply to an instrument conveying an interest in a vessel identified in § 67.11(b).

(g) No instrument will be accepted for filing if it is not accompanied by the fee specified in subpart Y of this part.

§ 67.205 Requirement for vessel identification.

(a) Every instrument presented for filing and recording must contain sufficient information to clearly identify the vessel(s) to which the instrument relates.

(b) Instruments pertaining to vessels which have been documented must contain the vessel's name and official number, or other unique identifier.

(c) Vessels which have never been documented must be identified by one of the following:

(1) The vessel's Hull Identification Number assigned in accordance with 33 CFR 181.25; or

(2) Other descriptive information, which clearly describes the vessel. Such information may include length, breadth, depth, year of build, name of manufacturer, and any numbers which may have been assigned in accordance with 33 CFR part 173.

§ 67.207 Requirement for date and acknowledgement.

(a) Every instrument presented for filing and recording must:

(1) Bear the date of its execution; and

(2) Contain an acknowledgment.

(b) No officer or employee of the Coast Guard is authorized to take such acknowledgments unless the instrument is executed on behalf of the Federal Government of the United States.

§ 67.209 Required number of copies.

All instruments presented for filing and recording must be presented in duplicate; at least one copy must bear original signatures.

§ 67.211 Requirement for citizenship declaration.

(a) Instruments in the nature of a bill of sale or deed of gift, mortgages, and assignments of mortgages, are not eligible for filing and recording, except as provided in paragraph (c) of this section, unless accompanied by a properly executed declaration stating information about the citizenship of the grantee.

(b) Citizenship declarations must be executed on the form prescribed by the Maritime Administration at 46 CFR 221.5. These forms are available from all Coast Guard documentation offices and from the Vessel Transfer and Disposal Officer (MAR-745.1), Maritime Administration, United States Department of Transportation, Washington, DC 20590.

(c) The requirement in paragraph (a) of this section for presentation of a citizenship declaration does not apply to instruments conveying an interest in a vessel:

(1) To a government of the United States or a political subdivision thereof or a corporate entity which is an agency of any such government or political subdivision;

(2) To a person making application for documentation; or

(3) Identified in § 67.11(b).

Note: If the grantee(s) of an ownership interest in a vessel described in paragraph (c)(2) of this section do(es) not make application for documentation, a declaration of citizenship may be required in order to ensure that the vessel so conveyed retains any coastwise or Great Lakes privileges to which it may be entitled.

§ 67.213 Place of filing and recording.

(a) Instruments submitted for filing and recording at the same time that the vessel owner applies for issuance or a change to a Certificate of Documentation must be submitted to the documentation officer where the application is made; mortgages filed in conjunction with such applications may be filed at the same port at any time before the Certificate is issued or changed. All other instruments must be

submitted for filing and recording at the port of record of the vessel.

(b) All instruments are recorded at the port(s) of record of the vessel(s) affected by the instrument.

(c) Where the port of record of a vessel is being changed, recording is effected at the new port of record.

§ 67.215 Date and time of filing and recording.

(a) An instrument is deemed filed at the actual date and time at which the instrument is delivered to the documentation office where it is submitted for filing, except as provided in paragraph (b) of this section.

(b) If filing of an instrument is subject to termination in accordance with § 67.217(a) and a substitute for the original instrument is filed, the filing of the original instrument will be terminated in accordance with § 67.217(c) and the substitute instrument will be deemed a new instrument which will be deemed filed at the actual time and date it is delivered to the documentation office where the original instrument was filed.

§ 67.217 Termination of filing and disposition of instruments.

(a) The filing of an instrument is subject to termination if:

(1) It is determined that the instrument cannot be recorded because the instrument itself is not in substantial compliance with the applicable regulations in this part;

(2) The filing was not made in compliance with the requirements of § 67.213;

(3) The application for issuance or exchange of a Certificate of Documentation was not made in substantial compliance with the applicable regulations of this part;

(4) The owner of the vessel submits a written request for withdrawal of the Application for Initial Issue, Exchange, or Replacement Certificate of Documentation, accompanied by consent of the mortgage, if any; or

(5) An instrument is filed evidencing satisfaction or release of any instrument described in subpart Q of this part.

(b) Ninety (90) days prior to terminating the filing pursuant to paragraphs (a)(1), (2), or (3) of this section, the documentation officer at the port where the filing was made will send written notice detailing the reasons the filing is subject to termination to the following persons(s) and any agent known to be acting on behalf of:

(1) The applicant for documentation, if a bill of sale, instrument in the nature of a bill of sale, or a deed of gift;

(2) The mortgagee or assignee, if a mortgage or assignment or amendment thereof;

(3) The claimant, if a notice of claim of lien; or

(4) The lender first named in an interlender agreement affecting a chattel or preferred mortgage or related instrument.

(c) If the reason(s) which subject the filing to termination remain uncorrected for a period of ninety (90) days after the notice described in paragraph (b) of this section is sent, or upon receipt of the request described in paragraph (a)(4) of this section, or satisfaction, or release described in paragraph (a)(5) of this section, the instrument will be returned to either:

(1) The applicant for documentation, if a bill of sale, instrument in the nature of a bill of sale, or a deed of gift;

(2) The mortgagee or assignee, if a mortgage or assignment or amendment thereof;

(3) The claimant, if a notice of claim of lien;

(4) The lender first named in an interlender agreement affecting a chattel or preferred mortgage or related instrument; or

(5) An agent for the appropriate party, provided that the agent has filed with the Coast Guard an original writing signed by the appropriate party clearly identifying the instrument being returned stating that the instrument may be returned to the agent.

Subpart P—Filing and Recording of Instruments—Bills of Sale and Related Instruments

§ 67.220 Requirements.

An instrument in the nature of a bill of sale or a deed of gift must:

(a) Meet all of the requirements of subpart O of this part;

(b) Be signed by or on behalf of all the seller(s) or donor(s); and

(c) Recite the following:

(1) The name(s) and address(es) of the seller(s) or donor(s) and the interest in the vessel held by the seller(s) or donor(s); and

(2) The names(s) and address(es) of the buyer(s) or donee(s) and the interest in the vessel held by each buyer or donee.

§ 67.223 Filing limitation.

An instrument presented for filing and recording under this subpart may be filed only in conjunction with an application for initial documentation or redocumentation of the vessel or with an application for a change to or deletion of the vessel's outstanding Certificate of Documentation.

Subpart Q—Filing and Recording of Instruments—Chattel Mortgages, Preferred Mortgages, and Related Instruments

§ 67.231 General requirements; optional application for filing and recording.

(a) A mortgage or related instrument presented for filing and recording must meet all of the requirements of subpart O of this part in addition to the pertinent section(s) of this subpart.

(b) All instruments supplemental to mortgages must recite information which clearly identifies the mortgage to which the supplemental instrument is applicable. Such information will normally consist of the book and page where that mortgage is recorded and the date and time of filing. If the submission of the supplemental instrument is contemporaneous with submission of the mortgage, the information should include the names of all parties to the mortgage, the date of the mortgage, and the amount of the mortgage, so as to adequately identify the mortgage to which the supplemental instrument applies.

(c) An Optional Application for Filing (CG–5542) may be attached to a mortgage or related instrument. If form CG–5542 is properly completed with all information required for indexing the instrument and the signature(s) specified thereon, the instrument to which it is attached will be filed and recorded with no further review.

§ 67.233 Restrictions on recording—mortgages, preferred mortgages, and related instruments.

(a) A mortgage or assumption of mortgage which otherwise meets the requirements of this subpart is nonethleless not eligible for filing and recording if a mortgagor or assuming party(ies) did not actually hold legal title to the interest in the vessel being mortgaged or covered by the assumption at the time of filing of the mortgage or assumption, or if the vessel(s) which the mortgage cover(s) is (are) not documented or the subject of an application for documentation.

(b) No mortgage submitted for filing and recording as a preferred mortgage or supplemental instrument thereto which otherwise meets the requirements of this subpart is eligible for filing and recording, except as provided in paragraph (c) of this section, if it results in a mortgage interest being held by a person other than:

(1) A State;

(2) The United States Government;

(3) A federally insured depository institution, unless disapproved by the Secretary pursuant to regulations in 46 CFR part 221;

(4) An individual who is a citizen of the United States;

(5) A person qualifying as a citizen of the United States as defined in 46 U.S.C. app. 802; or

(6) A person approved by the Secretary pursuant to regulations in 46 CFR part 221.

(c) The requirements of paragraph (b) of this section do not apply to the mortgagee of a vessel identified in § 67.11(b) or to any other vessel to which the Maritime Administration has given general approval in 46 CFR part 221 for mortgage to a noncitizen.

§ 67.235 Requirements for mortgages.

(a) A chattel mortgage presented for filing and recording must:

(1) Be signed by or on behalf of the mortgagor(s); and

(2) Recite the following:

(i) The name(s) and address(es) of the mortgagor(s) and the interest in the vessel held by the mortgagor(s);

(ii) The name(s) and address(es) of the mortgagee(s) and the interest in the vessel granted by the mortgage; and

(iii) The amount of the direct or contingent obligations that is or may become secured by the mortgage, excluding interest, expenses, and fees. The amount may be recited in one or more units of account as agreed to by the parties.

(b) A mortgage submitted for filing and recording as a preferred mortgage must cover the whole of a vessel.

(c) A mortgage which secures more than one (1) vessel may, at the option of the parties, provide for separate discharge of such vessels.

§ 67.237 Requirements for assignments of mortgages.

An assignment of mortgage presented for filing and recording must:

(a) Be signed by or on behalf of the assignor(s); and

(b) Recite the following:

(1) The name(s) and address(es) of the assignor(s) and the interest in the mortgage held by the assignor(s); and

(2) The name(s) and address(es) of the assignee(s) and the interest in the mortgage granted to the assignee(s).

§ 67.239 Requirements for assumptions of mortgages.

An assumption of mortgage presented for filing and recording must:

(a) Be signed by or on behalf of the original mortgagor(s), the mortgagee(s), and the assuming party(ies); and

(b) Recite the following:

(1) The name(s) and address(es) of the original mortgagor(s) and the interest in the vessel mortgaged by the original mortgagor(s); and

(2) The name(s) and address(es) of the assuming party(ies) and the interest in the mortgage assumed by the assuming party(ies).

§ 67.241 Requirements for amendments of or supplements to mortgages.

An amendment of or supplement to a mortgage presented for filing and recording must:

(a) Be signed by or on behalf of the mortgagor(s) and the mortgagee(s); and

(b) Recite the following:

(1) The name(s) and address(es) of the mortgagor(s) and mortgagee(s); and

(2) The nature of the change effected by the instrument.

§ 67.243 Requirements for instruments subordinating mortgages.

An instrument subordinating a mortgage presented for filing and recording must:

(a) Be signed by or on behalf of the mortgagee whose mortgage is being subordinated; and

(b) Recite the following:

(1) The name(s) and address(es) of the mortgagee(s) whose mortgage is being subordinated; and

(2) The name(s) and address(es) of the parties holding the mortgage to which it is made subordinate.

§ 67.245 Requirements for interlender agreements.

An interlender agreement between multiple mortgagees must:

(a) Be signed by or on behalf of all mortgagees who are party to the interlender agreement; and

(b) Recite the names and addresses of all parties to the interlender agreement.

Subpart R—Filing and Recording of Instruments—Notices of Claim of Lien and Supplemental Instruments

§ 67.250 General requirements.

(a) A notice of claim of lien or supplemental instrument thereto submitted for filing and recording must meet all of the requirements of subpart O of this part.

(b) An instrument assigning or amending a notice of claim of lien must recite information which clearly identifies the notice of claim of lien being assigned or amended. Such information will normally consist of the book and page where the notice of claim is recorded and the date and time of filing. If the submission of the assignment or amendment is contemporaneous with submission of the notice of claim of lien, the information should include the name(s) of the original claimant(s), the date of the notice of claim, and the amount of the claim and other information, so as to adequately identify the notice of claim of lien being assigned or amended.

§ 67.253 Requirements for notices of claim of lien.

A notice of claim of lien must:

(a) Be signed by or on behalf of the claimant(s); and

(b) Recite the following:

(1) The name(s) and address(es) of the claimant(s);

(2) The nature of the lien claimed;

(3) The date on which the lien was established; and

(4) The amount of the lien claimed.

§ 67.255 Restrictions of filing and recording.

A notice of claim of lien is not entitled to filing and recording unless the vessel against which the lien is claimed is covered by a preferred mortgage filed or recorded in accordance with subpart Q of this part or predecessor regulations thereto.

§ 67.257 Requirements for assignments of notices of claim of lien.

An assignment of a notice of claim of lien must:

(a) Be signed by or on behalf of the original claimant(s) or last assignee(s) of record; and

(b) Recite the following:

(1) The name(s) and address(es) of the claimant(s); and

(2) The name(s) and address(es) of the assignee(s) and the interest in the claim being assigned.

§ 67.259 Requirements for amendments to notice of claim of lien.

An amendment to notice of claim of lien presented for filing and recording must:

(a) Be signed by or on behalf of the original claimant(s) or last assignee(s) of record; and

(b) Recite the nature of the change being effected by the instrument.

Subpart S—Removal of Encumbrances

§ 67.261 General requirements.

The filing of an instrument filed against a vessel in accordance with subparts Q or R of this part may be terminated, and if recorded removed from the record of that vessel by the filing of:

(a) A court order, affidavit, or Declaration of Forfeiture described in § 67.263; or

(b) A satisfaction or release instrument described in § 67.265 which meets the requirements of this part for filing and recording.

§ 67.263 Requirement for removal of encumbrances by court order, affidavit, or Declaration of Forfeiture.

The encumbrances described in subparts Q and R of this part are removed from the record upon filing of:

(a) A copy of the order from a court of competent jurisdiction certified by an official of the court declaring title to the vessel to be free and clear, or declaring the encumbrance to be of no effect, or ordering the removal of the encumbrance from the record;

(b) A copy of the order from a federal district court in an *in rem* action certified by an official of the court requiring the free and clear sale of the vessel at a marshal's sale accompanied by a copy of the order confirming such sale certified by an official of the court, where issued under local judicial procedures;

(c) A copy of an order from a federal district court certified by an official of the court declaring the vessel itself to be forfeited, or the proceeds of its sale to be forfeited to the federal government of the United States for a breach of its laws; or

(d) Where the vessel was forfeited under an administrative forfeiture action to the federal government of the United States, an affidavit from an officer of the agency which performed the forfeiture, who has personal knowledge of the particulars of the vessel's forfeiture, or a Declaration of Forfeiture issued by the agency which performed the forfeiture.

§ 67.265 Requirements for instruments evidencing satisfaction or release.

An instrument satisfying or releasing a mortgage, a notice of claim of lien, or a preferred mortgage presented for filing and recording must:

(a) Meet all the requirements of subpart O of this part;

(b) Be signed by or on behalf of:

(1) The mortgagee(s) if a mortgage; or

(2) The claimant(s) if a notice of claim of lien; and

(c) Recite the following:

(1) The name(s) of the mortgagor(s), if any, and the name(s) of the mortgagee(s) or claimant(s);

(2) The amount of the mortgage or claim of lien; and

(3) Information which clearly identifies the mortgage or claim of lien being satisfied or released. Such information will normally consist of the book and page where that mortgage or claim of lien is recorded. If the recording information cannot be provided because the satisfaction or release is being submitted prior to recording of the mortgage or claim of lien, the instrument must recite other information sufficient to clearly identify the encumbrance being satisfied or released.

Subpart T—General Index and Abstracts of Title

§ 67.301 Requirement for general index.

Whenever the port of record of a documented vessel changes, the owner of the vessel must apply to the documentation officer at the existing port of record of the vessel for forwarding to the new port of record the General Index of the vessel on form CG–1332.

§ 67.303 Issuance of abstract of title.

An Abstract of Title for a vessel will be issued by the documentation officer at the vessel's port of record upon the request of any person and payment of the fee specified in subpart Y of this part.

Subpart U—Prohibitions

§ 67.311 Alteration of certificate of documentation.

Except for affixing a new address label in accordance with the direction of a documentation officer or a renewal decal issued in accordance with § 67.163, no person other than a documentation officer shall intentionally alter a Certificate of Documentation.

§ 67.313 Command by non-citizen.

No documented vessel shall be commanded by other than a United States citizen.

§ 67.315 Failure to have certificate of documentation on board.

(a) The person in command of a documented vessel must have on board that vessel the original Certificate of Documentation currently in effect for that vessel.

(b) The requirement of paragraph (a) of this section does not apply:

(1) To non-self-propelled vessels not engaged in foreign trade;

(2) When the Certificate of Documentation is being submitted to a documentation officer exclusively for purposes of exchange for change of:

(i) port of record,

(ii) name of vessel, or

(iii) both; or

(3) When the vessel is in storage or out of the water.

§ 67.317 Failure to produce certificate of documentation.

(a) The person in command of a documented vessel must produce the original Certificate of Documentation currently in effect for that vessel upon the demand of any person acting in an official public capacity.

(b) The requirement of paragraph (a) of this section does not apply:

(1) To non-self-propelled vessels not engaged in foreign trade;

(2) When the Certificate of Documentation is being submitted to a documentation officer exclusively for purposes of exchange for change of:

(i) port of record,

(ii) name of vessel, or

(iii) both; or

(3) When the vessel is in storage or out of the water.

§ 67.319 Failure to renew endorsements on the certificate of documentation.

(a) Except as provided in paragraph (b) of this section, the owner of a documented vessel must annually renew the endorsement upon the current Certificate of Documentation for that vessel in accordance with § 67.163.

(b) The requirement of paragraph (a) of this section does not apply to Certificates of Documentation placed on deposit in accordance with § 67.165.

§ 67.321 Failure to report change in vessel status and surrender certificate of documentation.

The owner of a documented vessel must immediately report any change in vessel status which causes any Certificate of Documentation to become invalid under subpart L of this part and which must be exchanged, replaced, deleted, or canceled, to a documentation officer at any port of documentation. The outstanding Certificate must be surrendered in accordance with the requirements of subpart K and subpart L of this part.

§ 67.323 Fraudulent application for certificate of documentation.

(a) No owner of a vessel, nor person purporting to act on behalf of an owner, shall knowingly falsify or conceal a material fact in connection with the documentation of that vessel.

(b) No owner of a vessel, nor person purporting to act on behalf of an owner, shall knowingly make a false statement or representation in connection with the documentation of that vessel.

§ 67.325 Fraudulent use of certificate of documentation.

No person shall knowingly use a Certificate of Documentation in a fraudulent manner.

§ 67.327 Operation without documentation.

No vessel which is required by § 67.7 to be documented may engage in unlimited coastwise trade, the Great Lakes trade, or the fisheries without being documented in accordance with the requirements of this part.

§ 67.329 Violation of endorsement.

A vessel may not be employed in any trade other than a trade endorsed upon the Certificate of Documentation issued for that vessel. A vessel documented exclusively for recreation may not be used for purposes other than pleasure.

§ 67.331 Operation under certificate of documentation with invalid endorsement.

Except for vessels identified in § 67.9, no vessel may be operated under a Certificate of Documentation with endorsements.

Appendix A to Part 67—Ports of Documentation

Regional port of documentation	Location	CG district served
Boston, MA	USCG Marine Safety Office, Boston, MA	First District: Boston, Portland, ME, Providence Marine Inspection Zones.
New York, NY	USCG Marine Inspection Office, New York, NY	First District: New York Marine Inspection Zone.
St. Louis, MO	USCG Marine Safety Office, St. Louis, MO	Second District: all.
Norfolk, VA	USCG Marine Safety Office, Hampton Roads, Norfolk, VA	Fifth District: Hampton Roads, Baltimore, Wilmington Marine Inspection Zones.
Philadelphia, PA	USCG Marine Safety Office, Philadelphia, PA	Fifth District: Philadelphia Marine Inspection Zone.
Miami, FL	USCG Marine Safety Office, Miami, FL	Seventh District: all.
New Orleans, LA	USCG Marine Safety Office, New Orleans, LA	Eighth District: all except Texas and New Mexico.
Houston, TX	USCG Marine Safety Office, Houston, TX	Eighth District: Texas and New Mexico only.
Cleveland, OH	Commander, Ninth Coast Guard District (m)	Ninth District: all.
Los Angeles, CA	USCG Marine Safety Office, Long Beach, CA	Eleventh District: Los Angeles-Long Beach Marine Inspection Zone.
San Francisco, CA	USCG Marine Safety Office, San Francisco, CA	Eleventh District: San Francisco Marine Inspection Zone.
Portland, OR	USCG Marine Safety Office, Portland, OR	Thirteenth District: Oregon or Idaho.
Seattle, WA	USCG Marine Safety Office, Seattle, WA	Thirteenth District: Montana or Washington. Fourteenth District: all.
Juneau, AK	USCG Marine Safety Office, Juneau, AK	Seventeenth District: all which have become invalid under subpart M.

§ 67.333 Unauthorized name change.

The owner of a documented vessel may not change or allow the change of the name of that vessel without applying for exchange of the Certificate of Documentation issued to the vessel in accordance with subpart K of this part. The new name of the vessel may be marked upon receipt of the new Certificate issued on the basis of that application.

§ 67.335 Improper markings.

The owner of a documented vessel must not permit the operation of that vessel unless it is marked in accordance with subpart I of this part.

§ 67.337 Failure to report change of address of managing owner.

The owner of a documented vessel must immediately report any change in the address of the managing owner.

Subparts V—Y [Reserved]

Dated: March 18, 1992.

J.W. Kime,

Admiral, U.S. Coast Guard Commandant.

PRIVACY ACT STATEMENT

IN ACCORDANCE WITH 5 U.S.C. 552a, THE FOLLOWING INFORMATION IS PROVIDED TO YOU WHEN SUPPLYING PERSONAL INFORMATION TO THE U.S. COAST GUARD.

1. AUTHORITY. SOLICITATION OF THIS INFORMATION IS AUTHORIZED BY 46 U.S.C., CHAPTERS 121 AND 125; 46 U.S.C. APP. 882 AND 883.

2. THE PRINCIPAL PURPOSES FOR WHICH THIS INFORMATION IS TO BE USED ARE:
(1) TO DETERMINE CITIZENSHIP OF THE OWNER OF THE VESSEL FOR WHICH APPLICATION FOR DOCUMENTATION IS MADE; AND
(2) TO DETERMINE ELIGIBILITY OF THE VESSEL TO BE DOCUMENTED WITH THE TRADE ENDORSEMENT SOUGHT.

3. THE ROUTINE USES WHICH MAY BE MADE OF THIS INFORMATION INCLUDE RELEASE TO LAW ENFORCEMENT OFFICIALS, TO THE GENERAL PUBLIC UNDER FREEDOM OF INFORMATION ACT, AND TO RELEASE INFORMATION ABOUT U.S. DOCUMENTED VESSELS.

4. DISCLOSURE OF THE INFORMATION REQUESTED ON THIS FORM IS VOLUNTARY. HOWEVER FAILURE TO PROVIDE THE INFORMATION REQUESTED WILL RESULT IN DENIAL OF THE APPLICATION FOR DOCUMENTATION, WHICH MAY PREVENT THE OWNER FROM OPERATING THE VESSEL(S) IN A SPECIFIED TRADE.

THE COAST GUARD ESTIMATES THAT THE AVERAGE BURDEN FOR THIS FORM IS 30 MINUTES. YOU MAY SUBMIT ANY COMMENTS CONCERNING THE ACCURACY OF THIS BURDEN ESTIMATE OR MAKE SUGGESTIONS FOR REDUCING THE BURDEN TO: COMMANDANT (G-MVI), U.S. COAST GUARD, WASHINGTON, DC 20593-0001 OR OFFICE OF MANAGEMENT AND BUDGET, OFFICE OF INFORMATION AND REGULATORY AFFAIRS, ATTENTION: DESK OFFICER FOR DOT/USCG, OLD EXECUTIVE OFFICE BUILDING, WASHINGTON, DC 20503.

NOTICE:

THE CERTIFICATE OF DOCUMENTATION FOR THE VESSEL IDENTIFIED BELOW EXPIRES AT THE END OF THE MONTH INDICATED. TO OBTAIN YOUR RENEWAL DECAL, COMPLETE THE CERTIFICATION ON THE REVERSE OF THIS NOTICE AND RETURN IT PRIOR TO THE DATE OF EXPIRATION. FAILURE TO DO SO MAY RESULT IN PENALTIES AND THE REMOVAL OF THE VESSEL FROM DOCUMENTATION.

IF YOU ARE UNABLE TO COMPLETE THE CERTIFICATION BECAUSE ONE OR MORE OF THE ITEMS LISTED HAS CHANGED, YOU MUST CONTACT THE DOCUMENTATION OFFICE BEFORE THE CERTIFICATE OF DOCUMENTATION EXPIRES. FAILURE TO DO SO MAY RESULT IN PENALTIES AND REMOVAL OF THE VESSEL FROM DOCUMENTATION. OPERATION OF THE VESSEL WHILE THE CERTIFICATE REMAINS INACCURATE MAY ALSO RESULT IN PENALTIES.

IF YOUR ADDRESS HAS CHANGED, PLEASE INDICATE YOUR NEW ADDRESS ON THE REVERSE AND PRESENT THE CERTIFICATE OF DOCUMENTATION TO THIS OFFICE AS SOON AS POSSIBLE.

U.S. COAST GUARD VESSEL DOCUMENTATION RENEWAL DECAL FORM

Attached is a decal which indicates that the Certificate of Documentation for the vessel named above has been renewed for the next year. The Certificate of Documentation expires on the last day of the month and year indicated on the decal. The official number of your vessel is shown on the decal. Please verify that the number is the same as is shown on the document and report any discrepancies to this office.

Please remove the decal below from it's backing and affix the new decal on the back of the Certificate of Documentation. If all the blocks on the back are filled with decals, place the new decal over the oldest decal. The placement of the decal is the last step in the renewal process. THE DECAL MUST BE AFFIXED TO THE DOCUMENT TO INDICATE THE CURRENT STATUS OF THE VESSEL. If any changes occur prior to next year's renewal (i.e.; address, ownership, dimensions, etc.), please contact this office immediately in writing.

NOTICE:

OUR RECORDS INDICATE THAT THE CERTIFICATE OF DOCUMENTATION ISSUED TO THE VESSEL NAMED BELOW HAS EXPIRED.

FAILURE TO RENEW THE VESSEL'S CERTIFICATE OF DOCUMENTATION AND/OR OPERATION OF THE VESSEL WITH AN EXPIRED CERTIFICATE IS A VIOLATION OF FEDERAL LAW AND REGULATION, AND MAY RESULT IN A PENALTY OF UP TO $500.00 PER DAY.

IF THE VESSEL HAS BEEN LOST, SOLD, ABANDONED, DESTROYED, OR PLACED UNDER STATE REGISTRATION, THE CERTIFICATE OF DOCUMENTATION MUST BE TURNED IN TO THIS OFFICE. IF THERE HAVE BEEN ANY CHANGES IN THE DATA RECITED IN THE CERTIFICATE OF DOCUMENTATION, YOU MUST CONTACT THIS OFFICE REGARDING STEPS TO UPDATE THE CERTIFICATE. IF THE CERTIFICATE OF DOCUMENTATION HAS BEEN LOST, YOU MUST ADVISE US OF THAT FACT, AND IF YOU DESIRE TO CONTINUE DOCUMENTATION OF THE VESSEL, TAKE THE NECESSARY STEPS TO REPLACE THE CERTIFICATE.

THE CERTIFICATION ON REVERSE MUST BE COMPLETED AND RETURNED TO THIS OFFICE AS SOON AS POSSIBLE. FAILURE TO RETURN THE FORM WITHIN THE NEXT TEN DAYS, OR TO ADVISE THIS OFFICE OF THE CURRENT STATUS OF THE VESSEL AND THE CERTIFICATE OF DOCUMENTATION, WILL RESULT IN THE VESSEL BEING REMOVED FROM DOCUMENTATION.

INSTRUCTIONS

1. INDICATE CURRENT DOCUMENTED NAME. (IF VESSEL HAS NEVER BEEN DOCUMENTED SELLER MUST COMPLETE AND SIGN DATA SECTION ABOVE.)
2. INDICATE OFFICIAL NUMBER AWARDED TO VESSEL OR HULL IDENTIFICATION NUMBER ASSIGNED BY MANUFACTURER. (IF THE VESSEL HAS NO HULL IDENTIFICATION NUMBER AND HAS NEVER BEEN DOCUMENTED, SELLER MUST COMPLETE AND SIGN THE VESSEL DATA SECTION ABOVE.)
3. INSERT NAMES AND ADDRESSES OF ALL PERSONS SELLING VESSEL, ALONG WITH TOTAL INTEREST OWNED BY THOSE PERSONS. IF MORE ROOM IS NEEDED, AN ATTACHMENT MAY BE MADE SHOWING THE ADDRESSES OF THE SELLERS.
3A. SELF-EXPLANATORY.
4. INSERT NAMES AND ADDRESSES OF ALL BUYERS, ALONG WITH THE INTEREST TRANSFERRED TO EACH. IF THERE IS MORE THAN ONE BUYER AND NO DIVISION OF INTEREST IS SHOWN, THIS BILL OF SALE WILL RESULT IN EACH BUYER HOLDING AN EQUAL INTEREST. (IF MORE ROOM IS NEEDED, AN ATTACHMENT MAY BE MADE SHOWING THE ADDRESSES OF THE BUYERS.)
4A. SELF-EXPLANATORY.
4B. CHECK ONE OF THE BLOCKS TO CREATE A FORM OF OWNERSHIP OTHER THAN A TENANCY IN COMMON. IF "OTHER" IS CHECKED, THE FORM OF OWNERSHIP MUST BE DESCRIBED.
5. OPTIONAL. IF THE AMOUNT PAID FOR THE VESSEL IS INSERTED, IT WILL BE NOTED ON THE VESSEL'S GENERAL INDEX.
6. SELF-EXPLANATORY. USE "REMARKS" SECTION ABOVE IF VESSEL IS NOT SOLD FREE AND CLEAR, OR TO LIST VESSEL APPURTENANCES WHICH ARE NOT SOLD WITH THE VESSEL.
7. SELF-EXPLANATORY.
8. SHOW THE DATE ON WHICH THE INSTRUMENT IS SIGNED.
9. IN ADDITION TO THE PRINTED OR TYPED NAME OF THE SIGNER, SHOW WHETHER THAT PERSON WAS ACTING AS AN OWNER, AS AN AGENT FOR AN OWNER, AS TRUSTEE, AS THE PERSONAL REPRESENTATIVE OR EXECUTOR OF AN ESTATE, OR OTHER CAPACITY WHICH ENTITLED THAT PERSON TO SIGN THE BILL OF SALE.

PRIVACY ACT STATEMENT

IN ACCORDANCE WITH 5 USC 552(A), THE FOLLOWING INFORMATION IS PROVIDED TO YOU WHEN SUPPLYING PERSONAL INFORMATION TO THE U.S. COAST GUARD.

1. AUTHORITY. SOLICITATION OF THIS INFORMATION IS AUTHORIZED BY 46 USC, CHAPTER 313 AND 46 CFR, PART 67.

2. THE PRINCIPAL PURPOSES FOR WHICH THIS INSTRUMENT IS TO BE USED ARE:

(A) TO PROVIDE A RECORD, AVAILABLE FOR PUBLIC INSPECTION AND COPYING, OF THE SALE OR OTHER CHANGE IN OWNERSHIP OF A VESSEL WHICH IS DOCUMENTED, WILL BE DOCUMENTED, OR HAS BEEN DOCUMENTED PURSUANT TO 46 USC, CHAPTER 121.
(B) PLACEMENT OF THIS INSTRUMENT IN A BOOK FOR EXAMINATION BY GOVERNMENTAL AUTHORITIES AND MEMBERS OF THE GENERAL PUBLIC.

3. THE ROUTINE USE WHICH MAY BE MADE OF THIS INFORMATION INCLUDES DEVELOPMENT OF STATISTICAL DATA CONCERNING DOCUMENTED VESSELS.

4. DISCLOSURE OF THE INFORMATION REQUESTED ON THIS FORM IS VOLUNTARY. HOWEVER, FAILURE TO PROVIDE THE INFORMATION COULD PRECLUDE FILING OF A BILL OF SALE AND DOCUMENTATION OF THE VESSEL NAMED HEREIN PURSUANT TO 46 USC, CHAPTER 121. MOREOVER, BILLS OF SALE WHICH ARE NOT FILED ARE NOT DEEMED TO BE VALID AGAINST ANY PERSON EXCEPT THE GRANTOR OR A PERSON HAVING ACTUAL KNOWLEDGE OF THE SALE. (46 USC 31321(A)).

THE COAST GUARD ESTIMATES THAT THE AVERAGE BURDEN FOR THIS FORM IS 20 MINUTES. YOU MAY SUBMIT ANY COMMENTS CONCERNING THE ACCURACY OF THIS BURDEN ESTIMATE OR MAKE SUGGESTIONS FOR REDUCING THE BURDEN TO: COMMANDANT (G-MVI), U.S. COAST GUARD, WASHINGTON, DC 20593-0001 OR OFFICE OF MANAGEMENT AND BUDGET, OFFICE OF INFORMATION AND REGULATORY AFFAIRS, ATTENTION: DESK OFFICER FOR DOT/USCG, OLD EXECUTIVE OFFICE BUILDING, WASHINGTON, DC 20503.

Part IV

Department of Labor

Employment and Training Administration

Interim Report of the Advisory Panel for the Dictionary of Occupational Titles; Notice

DEPARTMENT OF LABOR

Employment and Training Administration

Interim Report of the Advisory Panel for the Dictionary of Occupational Titles (APDOT)

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice of interim report; request for comments.

SUMMARY: The Dictionary of Occupational Titles Review (DOT) is a Secretarial initiative designed to ensure that the DOT becomes an effective tool for meeting the workforce challenges of the 1990's and beyond. As the nation's single most comprehensive source of occupational information, the DOT is uniquely positioned to help the Department of Labor (DOL) shape its response to the issues of workplace changes and skills development. In August 1990, the Secretary of Labor appointed the Advisory Panel for the Dictionary of Occupational Titles (APDOT) and charged the panel with recommending strategies for developing, producing, and disseminating a new DOT. By the end of the Review, in February 1993, the APDOT Chair and members are required to complete the following specific duties: (1) Recommend the type and scope of coverage as well as the level of detail that should be collected on occupations to produce a DOT; (2) Advise on appropriateness of methodologies of occupational analysis used to identify, classify, define, and describe jobs in the DOT; (3) Advise on new or alternative approaches to the production, publication, and dissemination of the DOT; and (4) Recommend options for implementation of improvements to the DOT. The Interim Report that follows was developed by APDOT to clarify the approach and status of activities in the DOT Review and to solicit comments from interested persons and organizations on critical issues currently under discussion. The report describes activities undertaken to date, tentative findings, and potential options for recommendations. Specific sections in the report correspond to ten (10) major issue areas currently under study. To encourage response, specific questions for comment are listed at the conclusion of the report. The Interim Report was prepared by APDOT and does not necessarily reflect the views of the U.S. Department of Labor.

DATES: Comments are invited from the public. Written comments must be received by June 9, 1992.

ADDRESSES: Send comments to Dr. Marilyn B. Silver, Executive Director, Advisory Panel for the Dictionary of Occupational Titles, room N4470, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210.

FOR FURTHER INFORMATION CONTACT: Dr. Marilyn B. Silver, Executive Director, Advisory Panel for the Dictionary of Occupational Titles, room N4470, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210. Telephone 202–535–0161 (this is not a toll-free number).

Signed at Washington, DC this 17th day of March, 1992.

Roberts T. Jones,

Assistant Secretary for Employment and Training.

Appendix

Interim Report

From The Advisory Panel for the Dictionary of Occupational Titles (APDOT)

Members of the Advisory Panel for the Dictionary of Occupational Titles (APDOT)

Ms. Dixie Sommers, Chair, Ohio Bureau of Employment Services, Columbus, Ohio
Mr. Ken Baker, Freeman White Architects, Charlotte, North Carolina
Dr. Sue Berryman, Institute on Education and Economy, New York, New York
Mr. Manfred Emmrich, North Carolina Employment Security Commission, Raleigh, North Carolina
Dr. Marilyn K. Gowing, Office of Personnel Management, Washington, DC
Mr. Reese Hammond, International Union of Operating Engineers, Washington, DC
Dr. Anita Lancaster, Defense Manpower Data Center, Arlington, Virginia
Dr. Malcolm Morrison, National Association of Rehabilitation Facilities, Reston, Virginia
Dr. Kenneth Pearlman, American Telephone & Telegraph, Morristown, New Jersey
Dr. Richard Santos, University of New Mexico, Albuquerque, New Mexico
Dr. C. Gary Standridge, Fort Worth Independent School District, Forth Worth, Texas
Mr. Charles Tetro, Training and Development Corporation, Bucksport, Maine
Executive Director, Dr. Marilyn B. Silver, Aguirre International
Project Officer, Ms. Donna Dye, U.S. Employment Service

I. Executive Summary

Background

The DOT Review is a Secretarial Initiative designed to ensure that the Dictionary of Occupational Titles (DOT) becomes an effective tool for meeting the workforce challenges of the 1990's and beyond. As the nation's single most comprehensive source of occupational information, the DOT is uniquely positioned to help the Department of Labor shape its response to the issues of workplace changes and skills development. A revised DOT has the potential to serve as a centerpiece of the Department of Labor's strategy to improve the competitiveness of the American workforce. The Secretary of Labor has appointed the Advisory Panel for the Dictionary of Occupational Titles (APDOT) and charged the panel with recommending strategies for developing, producing, and disseminating a new DOT. Final recommendations are expected in February 1993.

The Interim Report was developed by APDOT to clarify the approach and status of activities in the DOT Review and to solicit comments from interested persons and organizations on critical issues currently under discussion. The report describes activities undertaken to date, tentative findings, and potential options for recommendations. To encourage response, specific questions for comment are listed at the conclusion of the report.

Contents Overview

A review of the Interim Report reveals that APDOT is confronting difficult and complex issues. Specific sections in the report correspond to ten (10) major issue areas currently under study. The remainder of the Executive Summary outlines these ten areas.

Purpose Statement

Believing that decisions on form and function should follow purpose, APDOT advocates that the Department of labor clearly define the intended purpose of the DOT. In its recommendation, APDOT expands the current DOT purpose statement to move beyond serving the traditional employment service job matching function to promote the development of the workforce. APDOT's view of the DOT's purpose underscores increased linkages between the workplace and the education and training community. As defined in the report:

> The purpose of the Dictionary of Occupational Titles (DOT) is to promote the effective development and use of the American workforce. The DOT accomplishes its purpose by providing a database that identifies, defines, and classifies occupations in the economy in an accessible and flexible manner.

Ten Guiding Principles

To focus staff research efforts and to provide guidance for making recommendations, APDOT has formulated a framework of Ten Guiding Principles. These principles are as follows:

1. The DOT must have a high degree of reliability and validity in accomplishing the core mission for the Department of Labor.
2. The DOT must provide information about occupations that includes a variety of relevant occupational characteristics, such as skill types and levels, educational requirements, work environment characteristics, and associated work behaviors or worker requirements.
3. The DOT must provide occupational information to foster the development and training of American workers. The occupational characteristics used in the DOT must encourage the efficient use of human resources and reflect actual job requirements.
4. The DOT should become the national benchmark for identifying, defining, and classifying occupational information. In promoting a common language among consumers of occupational information, the DOT can foster uniformity in data systems and link easily with related databases.
5. The DOT should be a user-friendly, high accessible database.
6. The level of aggregation in the DOT must be useful to major users.
7. Data collection for the DOT must be based on systematic sampling techniques.
8. The Department of Labor should investigate the potential for dramatically decreasing the number of occupations to be detailed in the DOT.
9. The Department of Labor should explore the potential for contracting with other agencies/users that require data beyond that needed by DOL's core users.
10. APDOT will make recommendations that are fiscally responsible, but that also consider return on investment and cost/benefit analysis.

Priority Ranking of Uses

APDOT was asked to priority rank DOT user needs. APDOT believes that setting priorities for meeting user needs is the only way to develop a fiscally responsible plan for revising the DOT. Identifying Department of labor officials and State and local grantees as core users of the DOT, APDOT recommended these users as the DOT's top-priority constituency. Although APDOT believes that meeting the needs of Department of Labor users will also meet most needs of other groups including private sector employers, it has recommended that the Department explore the potential for contracting with other agencies/users that require data beyond that needed by its core users.

DOT Users and Uses

The Interim Report acknowledges that before final recommendations can be offered, a thorough analysis of empirically-based data, gained through a comprehensive user survey, must be completed. This survey will be completed later this year. To date, APDOT has heard from a wide range of users who testify to literally millions of decisions being made annually based on the DOT in areas such as career counseling and placement, social security disability determinations, alien labor certifications, and employment and training program planning and evaluation. The Interim Report summarizes 12 generalizations that have emerged regarding user needs. These include requests for currency, accuracy, flexibility, validity, and reliability of data in the new DOT as well as improved linkages with other classification systems and the capability to identify skills transferability across occupations.

Skills and Other Occupational Characteristics

Many users of the DOT need to know the skills and skill levels that are necessary for successful job performance. APDOT has proposed a structure of four domains for organizing and presenting skill-related information. The skill-related information categorized in these four domains varies in its degree of generality or specificity and spans both worker-oriented and job-oriented content. The four domains, which are defined and described in the report, have been labeled: Basic Aptitudes and Abilities, Cross-Functional Skills, Generalized Work Behaviors, and Occupation-Specific Skills.

Basic aptitudes and abilities, the most general category of skill-related information, is composed of the classic aptitude/ability domains: cognitive, psychomotor, spatial/perceptual, and physical. (This domain is analogous to the Secretary's Commission on Achieving Necessary Skills (SCANS) "basic" and "thinking" skills.)

Cross-functional skills, a more specific category of skill-related information, represent applications of aptitudes and abilities to the performance of broad activities that occur across wide ranges of occupations. Examples of cross-functional skills are: fact finding, evaluating information, organizing and planning, interpersonal skills, and negotiation skills. (This domain is analogous to many of the SCANS "competencies.")

Generalized work behaviors are more specific than cross-functional skills. Examples of generalized work behaviors include: writing reports, reading blueprints, preparing budgets, and repairing electrical appliances. APDOT's rationale for including generalized work behaviors stems from the view that this intermediate level of skill description may be a particularly useful level for evaluating skills transferability across occupations.

Occupation-specific skills, the most specific category of skill-related information, is composed of skills, knowledge, and machine, tool, and equipment proficiencies that tend to be unique to specific occupations or homogeneous job families. Such information may be stated as occupation-specific tasks such as "inspect and recharge mobile communications equipment," or "type and proofread statistical charts." Because some DOT users need occupational information that is not readily described within the structure of the four domains, APDOT will also examine procedures for including occupational characteristics such as education, experience, physical demands, work environment characteristics, interests, and temperaments.

International Review

The report indicates that several countries are apparently ahead of the United States in developing skill-based systems for classifying and describing occupations.

DOT Use in Federal Statutes, Regulations, and Legislation

Although DOT use for many Federal agencies is mandated or suggested in Federal regulations, this does not appear to restrict modifications to the DOT.

Regulations evolved from DOT use; if the DOT is changed, APDOT believes that regulations can and should be changed.

Classification Issues

APDOT is currently investigating options for classifying occupational information (1) by skills; (2) by type of work performed; and/or (3) by some other method. There is considerable interest, particularly on the part of the Bureau of Labor Statistics and the Office of Management and Budget, in coordinating proposed revisions of the Standard Occupational Classification with the DOT to produce a system that better serves the needs of Federal agencies. APDOT recommends that the Secretary establish a single work group or other entity within the Department of Labor with responsibility for occupational classification systems. APDOT believes that assigning responsibility in this way will help ensure that the resulting classification systems are both conceptually and technically compatible.

Job Analysis Methodologies

APDOT is reviewing alternative job analysis methodologies and techniques that could replace and/or supplement the current plan. The current DOT job analysis methodology was developed at a time when the nature of work was routinized, repetitive, and organized along hierarchical lines. In today's economy, work is becoming more flexible, problem-oriented, and organized in teams. Many occupations are increasingly knowledge-based, demanding more cognitively-oriented work skills. Such changes add new dimensions of interaction and complexity to work activities, and potentially change the traditional concept of a job or occupation. Concerns regarding the current job analysis methodology focuses on its adequacy in capturing occupational characteristics within increasingly dynamic work settings.

Format and Dissemination Issues

Current users of the DOT appear unanimous consent in their desire for an electronic, automated DOT database with some hard-copy availability. Users appear to desire the capability of conducting database searches of information with different variables. Automation offers increased flexibility in the way data are presented and accessed. In giving both DOT developers and users a range of options not previously available, an automated, electronic database has the potential to drastically alter the way the DOT is developed and used.

II. Background

The DOT Review is a Secretarial Initiative designed to ensure that the Dictionary of Occupational Titles (DOT) becomes an effective tool for meeting the workforce challenges of the 1990's and beyond. As the nation's single most comprehensive source of occupational information, the DOT is uniquely positioned to help the Department of Labor (DOL) shape its response to the issues of workplace changes and skills development. A revised DOT has the potential to serve as a centerpiece of the Department of Labor's strategy to improve the competitiveness of the American workforce. The Secretary of Labor has appointed the Advisory Panel for the Dictionary of Occupational Titles (APDOT), and charged the panel with recommending strategies for developing, producing, and disseminating a new DOT. By the end of the Review, in February 1993, the APDOT Chair and members are required to complete the following specific duties:

(1) Recommend the type and scope of coverage as well as the level of detail that should be collected on occupations to produce a DOT;

(2) Advise on appropriateness of methodologies of occupational analysis used to identify, classify, define, and describe jobs in the DOT;

(3) Advise on new or alternative approaches to the production, publication, and dissemination of the DOT; and

(4) Recommend options for implementation of improvements to the DOT.

The Interim Report was developed by the APDOT at the request of the Employment and Training Administration (ETA). While APDOT is not prepared to make final recommendations at this time, the Interim Report will clarify the approach and status of activities currently underway in the DOT Review. The report will inform Secretary Martin and through publication in the **Federal Register**, the interested public, about activities undertaken to date, tentative findings and potential options for recommendations. The intention of APDOT and the Department of Labor in developing the Interim Report is to solicit comments from interested persons and organizations in critical issues currently under discussion. Specific questions for comment are listed at the conclusion of the report.

The DOT Review Project has been divided into major issue categories currently under study and represented by the following sections in the Interim Report:

- DOT Purpose Statement
- Ten Guiding Principles for DOT Review
- Priority Ranking of Uses
- DOT Users and Uses
- Skills and Other Occupational Characteristics
- International Review
- DOT Use in Federal Statutes, Regulations, and Legislation
- Classification Issues
- Job Analysis Methodologies
- Format and Dissemination Issues
- Toward Recommendations/ Questions for Reader Response

III. DOT Purpose Statement

Purpose Statement

The purpose of the Dictionary of Occupational Titles (DOT) is to promote the effective development and use of the American workforce. The DOT accomplishes its purpose by providing a database that identifies, defines, and classifies occupations in the economy in an accessible and flexible manner.

Background

Historically, the purpose of the DOT was to provide the public employment service with a comprehensive body of standardized occupational information to be used for placement and job matching. Today, the uses of the DOT reach far beyond this initial purpose and include a large and diverse user population. The purpose of the DOT now extends to promoting the effective use and development of the American workforce by providing information for numerous functions in career development, education and training, human resources management, and vocational counseling.

The DOT provides occupational information for employees, workers, government agencies, teachers, students, human resource professionals, unions, and other to support uses such as counseling, rehabilitation services, placement, alien labor certification, disability determination, curriculum development, employment and training program planning and evaluation, social science research, and the development of labor market information. Many of these uses share the common goal of placing workers in jobs. By identifying and defining characteristics of occupations, and by facilitating the match of individual workers with jobs, the DOT supports the effective use of the current workforce.

Supporting the development of the capabilities/skills of current and future

workers is an expanded role for the DOT. This expanded role maintains the Department of Labor perspective of improving the workforce and moves beyond the public employment service's traditional use of the DOT into more extensive use by the education and training community. To support the development of the workforce, a revised DOT needs to described various types and levels of skill-related information. Such information may be used to create educational curricula and for other human resource management purposes. Thus, a revised DOT can be used to more effectively link the world of work with education and training.

The DOT's potential for accomplishing an expanded purpose of promoting the development and use of the American workforce is greatly enhanced through the addition of computer technology. While a revised DOT will continue to identify, define, and classify occupational information in the economy, an automated, electronic database will allow users to access, select, the organized information about occupations. This will greatly improve the accessibility and flexibility of the DOT to respond to user needs and fulfill its purpose.

IV. Ten Guiding Principles for DOT Review

APDOT developed the following guiding principles to assist with its review of the DOT. The principles will guide DOT Review staff in its ongoing research efforts. Most importantly, these principles will help APDOT as it makes decisions regarding specific recommendations for revising the DOT.

1. The DOT must have a high degree of reliability and validity in accomplishing the core mission for the Department of Labor.

This guiding principle refers to the inclusion of information that accurately represents occupations as they exist in the current American labor market. It also underscores APDOT's view that the DOL core users of the DOT represent its top-priority constituency. (See section below on Priority Ranking of DOT Uses.) To meet this challenge, alternative data collection methodologies may be needed or the existing methodology may need to be adapted to reflect a changing occupational structure. Because much occupational research uses the DOT as a standard of comparison, the methodologies selected to conduct data collection must ensure the reliability and validity of occupational information. These methodologies must identify major dimensions of occupations and reflect scales that measure these dimensions following acceptable psychometric practices.

2. The DOT must provide information about occupations that includes a variety of relevant occupational characteristics, such as skill types and levels, educational requirements, work environment characteristics, and associated work behaviors or worker requirements.

Occupational characteristics define work and work behaviors, including associated workers requirements. These characteristics describe the work itself independent of personal attributes associated with workers. To identify the occupational characteristics needed in a new DOT, APDOT will begin by reviewing occupational characteristics described in the current DOT. These characteristics are: Occupational Definition, Worker Functions, General Education Development (GED), Specific Vocational Preparation (SVP), Physical Demands, Environmental Conditions, Aptitudes, and Temperaments. The Guide for Occupational Exploration (GOE) will be studied as part of a new approach to including interest as an occupational characteristic. Finally, APDOT will coordinate efforts with other DOL initiatives such as the Secretary's Commission on Achieving Necessary Skills (SCANS) and the National Advisory Commission on Work-Based Learning that are looking at skills assessment and skills standards issues.

3. The DOT must provide occupational information to foster the development and training of American workers. The occupational characteristics used in the DOT must encourage the efficient use of human resources and reflect actual job requirements.

This guiding principle addresses the issue of fully using human resources. The DOT provides information for employers, workers, government agencies, teachers, students, human resource professionals, and other interested in the development and use of the workforce. Among the uses of the DOT are: Curriculum development, employment and training program planning and evaluation, counseling, certification, human resource development, and other occupational information needs. The collection of valid and reliable occupational information in a revised DOT will result from the use of measures that reflect actual job requirements. The use of such measures eliminates barriers to diversity in the workforce and facilitates the ability of workers to engage in career mobility activities. This principle is particularly important for addressing Equal Employment Opportunity (EEO) concerns. In addition, focusing on actual job requirements facilitates the development of appropriate curricula for training and the selection of appropriate candidates for job placement.

4. The DOT should become the national benchmark for identifying, defining, and classifying occupational information. In promoting a common language among consumers of occupational information, the DOT can foster uniformity in data systems and link easily with related databases.

This guiding principle addresses the need for the uniformity of data systems and highlights the opportunity to maximize intra- and interagency coordination. Inherent in this guiding principle is the need to standardize occupational terminology for consistent use across sectors. As the nation's single most comprehensive source of occupational information, the DOT is uniquely positioned to foster a common language and to serve as a national benchmark. The future DOT may be able to meet the needs of key DOL initiatives such as the Secretary's Commission on Achieving Necessary Skills and the National Advisory Commission on Work-Based Learning while linking with related databases from the Office of Personnel Management, the Bureau of Labor Statistics, and the Census Bureau as well as from industry, education, and defense. APDOT understands that if the future DOT differs significantly from the current version, appropriate crosswalks will be needed to facilitate users' longitudinal studies. Crosswalks will also be needed for existing classification systems and databases that use the DOT.

5. The DOT should be a user-friendly, highly accessible database.

This guiding principle addresses the issue of DOT format and dissemination. There is universal agreement among DOT users on the need to automate the next DOT. The revised DOT will be a database that is easily available to all users of occupational information. The database will facilitate the manipulation of DOT data to accommodate the diverse needs of users. The terminology the DOT will use to describe job tasks and technology will be understandable to all users. Because of anticipated changes, DOL may need to develop specialized, user-friendly software including various "help menus" and/or instructional programs and user manuals to train people in using the new DOT database.

6. The level of aggregation in the DOT must be useful to major users.

This guiding principle addresses the level of aggregation in the DOT. It includes considering the range of occupations, degree of specificity, and the need to reorganize existing data or collect new data. Some occupations may require different levels of specificity, and APDOT will consider varying the level of detail in different occupational areas. With automation, the DOT may be able to incorporate flexible levels of aggregation within one database.

7. Data collection for the DOT must be based on systematic sampling techniques.

This guiding principle addresses the issues of currency and accuracy which are major concerns to most DOT users inside and outside DOL. The call for systematic sampling techniques highlights the need for data collection methodologies that will maintain integrity and consistency throughout their applications. The sampling frame of occupations and industries used must reflect the reality of the contemporary labor market. Moreover, adequate coverage must be obtained of newly emerging industries and occupations. Data collection methodologies should help identify new occupations as they emerge. In addition, the DOT system must be flexible enough to include new occupations in the database as they meet criteria for constituting an occupation.

8. The Department of Labor should investigate the potential for dramatically decreasing the number of occupations to be detailed in the DOT.

Dramatically decreasing the number of occupations differentiated in the DOT appears to be consistent with the future direction of the American economy. Research suggests that occupational categories are collapsing and merging in today's labor market. Many companies are broadening their job classification categories, and drastically reducing the number of differentiated occupations. Current research also suggests that low-skill jobs require less differentiation than high-skill jobs. Therefore, generic descriptions for many jobs now differentiated in great detail in the DOT may be sufficient for users in the future, as long as specific or individual titles are included for sorting purposes. In addition, the broadening of occupational classification appears to be a world-wide trend, with examples emerging in Canada, the United Kingdom, and Australia. Finally, APDOT believes that the resources needed to keep some 12,000 occupations current, valid, and reliable are likely to remain beyond the funding capability of any government agency. No other country even attempts this level of detail.

9. The Department of Labor should explore the potential for contracting with other agencies/users that require data beyond that needed by DOL's core users.

Exploring the potential for contracting with other agencies/users may suggest that DOL develop a series of cost-sharing strategies or propose a fee for development of data that extend beyond core DOL needs. APDOT believes that setting priorities for meeting user needs is the only way to develop a fiscally responsible plan for revising the DOT. Cost-sharing strategies or charging fees for data development will help meet market demand, although APDOT does not believe that such approaches can ever be completely self-supporting.

10. APDOT will make recommendations that are fiscally responsible, but that also consider return on investment and cost/benefit analysis.

APDOT will give consideration to financial constraints as the panel addresses each of the guiding principles. APDOT recognizes that, in a time of limited resources, its recommendations must be fiscally responsible. In order to maximize resources, APDOT believes DOL should investigate the feasibility of incorporating job analysis data collected by others, such as the Office of Personnel Management and the Department of Defense, into the DOT database. All data accepted for inclusion in the DOT from outside sources would have to meet the standards of validity and reliability established by the Department of Labor. Moreover, because of financial constraints facing the U.S. Government and DOL, APDOT may need to recommend that the DOT be modified over a long-term, in several stages. Some changes may require the need for further research before they can be implemented. However, in making its final recommendations, APDOT will consider the larger picture of economic change in the workplace, as well as the benefits to DOL and to the nation of substantively revising the DOT to make it an occupational information tool truly useful for the 21st century. Clearly, whatever changes are made to the next edition, the DOT will need to become a dynamic database-flexible enough to accurately capture ongoing changes in the nation's economy and occupational structure.

V. Priority Ranking of Uses

One comment frequently heard about the DOT is that it tries to "be all things to all people." The Employment and Training Administration (ETA) management requested APDOT's help in defining the intended purpose and scope of a revise DOT, and in setting priorities for meeting specific user needs. The setting of priorities for meeting user needs appears to be the only way to develop a fiscally responsible plan for revising the DOT. APDOT decided to focus on uses rather than specific users, and to begin this analysis by reviewing the Department of Labor core uses of the DOT. DOL core uses include those of national officials as well as State and local grantees.

Because DOL has developed, maintained, and provided the funding for the DOT since it was first published in 1939, and because DOL continues to maintain responsibility for matching and placing workers, the Department clearly represents the top-priority constituency for DOT use. The Department also has sole or shared responsibility for many other functions in which the DOT is an important tool. These include employment and training program planning and evaluation, counseling, testing, alien labor certification, and developing labor market information.

APDOT hypothesized that identifying DOL core uses of the DOT would also accommodate many other DOT users, because the uses of other agencies and individuals will be similar. If additional uses are identified that lie outside of the DOL core uses, supplemental resources may be needed from other agencies/users to provide the funding needed for DOL to meet these lower priority needs. As stated in its guiding principles, APDOT believes that DOL should explore the potential for contracting with other agencies/users that require data beyond that needed by DOL's core users.

APDOT acknowledges that the discussion of DOT users and uses included in this Interim Report is based on preliminary data. Findings and/or suggestions offered in this report may be modified once the panel reviews the additional, empirically-based data resulting from a user survey to be conducted. At this time, staff interviewers found that the majority of DOT users at DOL are in the Employment and Training Administration (ETA), the Bureau of Labor Statistics (BLS) and the National Occupational Information Coordinating Committee (NOICC) system. Within ETA, the DOT is most extensively used by the Bureau of Apprenticeship and Training, Employment and Training Programs, Job Corps, Job Training Programs, Office of Regional Management, Office of Strategic Planning and Policy Development, and the United States Employment Service.

These results are not surprising considering that the major work of ETA, training and placement, is helping people find jobs, and that the major functions of BLS and NOICC include preparing basic data about the labor market and improving the dissemination of occupational information.

VI. DOT Users and Uses

In determining how the DOT can better respond to diverse user needs, APDOT is examining the uses of the DOT from the DOL perspective of improving the current and future workforce. Before a final report on DOT uses can be written, a thorough analysis of empirically-based data, gained through a comprehensive user survey, must be completed. As indicated earlier, in discussing the priority ranking of uses, this activity is currently under development, and will be completed later this year.

Preliminary Data Resources

This section of the Interim Report on DOT users and uses was compiled from: (1) The pretest results of a planned user survey; (2) informal discussions; (3) the National Academy of Sciences (NAS) report on the DOT (1980); (4) responses to the DOT concept paper published in the **Federal Register** in 1990; (5) public testimony at APDOT meetings by representative groups such as the Social Security Administration, the Employers' National Job Service Council, the Vocational Resource, the Vocational Evaluation and Work Adjustment Association, and National Career Development Association; (6) reports prepared by user groups, including "Use of the DOT by Career Information Delivery Systems (CIDS)" by the Association of Computer-Based Systems for Career Information and "Some Observations on the DOT as it Relates to Employment and to Required Training Time" by NOICC; and (7) preliminary draft reports on Purpose and Uses of the DOT as well as DOL Core Uses prepared by DOT Review staff. While caution is needed in analyzing information from these sources (for example, data in the pre-test user profiles was based on a very small sample and incompatibility of data elements among the various sources makes generalizing difficult), some patterns revealed will prove useful to APDOT. For example, tentative results suggest similar use patterns among varied constituencies.

Categories of DOT Use

To facilitate the study of diverse user needs, APDOT has found it beneficial to classify DOT users into 11 categories of DOT use. This grouping has helped APDOT identify similar patterns among diverse constituencies, and surface important issues for major categories of users. This listing is not exhaustive; it remains tentative and preliminary. Both the categories and the preliminary findings will be reassessed in light of the empirically-based user survey.

The 11 categories of DOT use listed in alphabetical order are as follows:

- Alien Labor Certification (includes attorneys for employers and clients, Federal certifying officers, State alien certification specialists, alien advocacy groups)
- Career and Vocational Counseling (includes high school and college counselors, public and private counselors, employment counselors)
- Curriculum Development (includes Job Corps, public and private vocational education providers, elementary, secondary, college and university decision makers/curriculum developers)
- DOL Officials (includes program functions at DOL, especially workforce development initiatives)
- Disability Determination (includes worker's compensation carriers, social security disability examiners, public and private disability attorneys)
- Employment Placement (includes JTPA, Job Service, private employment services)
- Human Resource Development/Human Resources Management (HRD/HRM) (includes local, State, Federal, public and private HRD and HRM practitioners)
- Labor Market Information (includes public and private labor market analysts and economists, State LMI experts)
- Occupational Information Development and Dissemination (includes public and private developers, publishers, and vendors, Federal and State government departments of education and labor, librarians)
- Research/Other (includes social science researchers, associations, unions)
- Vocational Rehabilitation (includes public and private rehabilitation agencies, insurance companies, private practice)

From the preliminary data, the 11 use categories appear to be consistent across agencies and organizations (with the exception of DOL Officials).

General Findings About DOT Use

From the preliminary information gathered, it appears that DOT users are both large in number and diverse. Even within a single use category, specific DOT use appears diverse. However, the DOT can be seen to perform three broad functions for users. It identifies, defines, and classifies occupations. In providing this information, the DOT helps users to develop and use the capabilities and skills of current and future workers. There are some 25 different components of the DOT. Although it is probably fair to say that most of the information published in the DOT is used by some group, the parts of the DOT used most extensively appear to be the DOT titles, codes, definitions, and some selected characteristics.

DOL Use of the DOT Components

In an effort to set priorities for meeting user needs, APDOT has identified DOL core users of the DOT, including national program staff as well as the Department's State and local grantees, as its top-priority constituency. In looking at the preliminary data on DOL use, APDOT organized DOL users into the 11 use categories described above. As hypothesized by APDOT in its priority ranking of DOT uses, DOL core uses appear to be similar to those of other agencies and individuals. DOL core users, like other identified user groups, use the DOT to identify, define, and classify occupations. Similar to the findings of other data sources, the parts of the DOT used most extensively by DOL users are the DOT titles, codes, and definitions. For example, some DOL users use the DOT definitions to understand job definitions in general terms, or to gain a basic understanding of the work activity. Others use the DOT definitions to understand the specific tasks performed, the machines and equipment used, or to aid them in determining skill transferability or training requirements.

Similarly, some DOL users use the "DOT Code" extensively and record the full nine-digit codes of the current DOT for specific occupations. Others group occupations at a higher level of detail, and may use only the first-digit of the code to describe, for example, all clerical work. Moreover, they may use the code at the two-digit level to describe, for example, all printing occupations, or at the three-digit level to describe, for example, all photoengraving occupations. As the above examples illustrate, the use of the DOT definition and codes are extensive, but diverse even within similar use categories.

In general, DOL users have more interest in tasks performed (described in the current DOT definition) than in occupational characteristics (described in the current Selected Characteristics of Occupations Defined in the Dictionary of Occupational Titles). However, there is a high level of interest in the Specific

Vocational Preparation (SVP) rating. DOL users requested changes in the presentation of SVP; specifically, they asked that education and training requirements be presented separately from experience requirements.

It is important to recognize that disability determination and vocational rehabilitation uses are not generally represented in DOL core use categories. These groups appear more interested in worker characteristics than the general DOL core constituency. Moreover, disability determination and vocational rehabilitation users are particularly interested in detailed physical demands.

APDOT believes that by improving the DOT's ability to meet the needs of DOL core users, the revised DOT database will also better meet the needs of other key constituencies. However, as DOL moves forward with plans to revise the DOT, strategies for funding data collection for agencies/users that require information beyond that needed by DOL's core users will need to be identified.

Preliminary DOT User Responses

The following generalizations about DOT users needs have emerged from APDOT's preliminary investigation of the data sources listed at the beginning of this section:

- Users want the DOT to be kept current and accurate.
- Users want an automated DOT with some hard-copy availability.
- Users want flexibility in accessing DOT data as needed for different purposes.
- Users want the DOT to reflect all the jobs in the economy, but do not want all jobs reflected in the same way. (Some users want broad, inclusive definitions for descriptions of low-skill jobs and specific, detailed definitions for descriptions of high-skill jobs.)
- Users are concerned particularly about the reliability and validity of the worker characteristic ratings. These are currently listed in Selected Characteristics of Occupations Defined in the Dictionary of Occupational Titles.
- Users want more information about basic and job-specific skills.
- Users want the capability to group "similar" occupations in order to examine or show transferability or mobility among occupations.
- Users differ in the level of detail they require for DOT codes and definitions.
- Users want better linkage with other classification systems and labor market information.
- Users disagree on priorities for data collection. Suggestions for data collection priorities include study of emerging industries, most prevalent occupations, and high-demand occupations.
- Users want improved information on basic and high-level skill requirements for occupations.
- Users want to retain (or improve) data on physical job requirements and work environment factors characterizing occupations.

VII. Skills and Other Occupational Characteristics

Users of the DOT such as employment placement specialists, vocational guidance counselors, and educational planners need to know what skills and skill levels are necessary for successful job performance. To identify relevant skill-related issues, APDOT reviewed staff papers on "The Changing World of Work," "Interim Skills Technical Report," and "Relationships Among DOT Terms and the 37 SCANS Skills" as well as "What Work Requires of Schools" developed by the Secretary's Commission on Achieving Necessary Skills (SCANS). APDOT also reviewed responses to the **Federal Register** communications from concerned individuals and groups, and prior reviews of the DOT including the National Academy of Science Report (1980). This section of the Interim Report presents preliminary recommendations on how skills information might be presented in a new DOT. The section initially describes a preliminary skills model, and then describes a number of related skills issues. Finally, this section identifies some additional occupational characteristics that should be considered for inclusion in a revised DOT.

Proposed Skills Domains

Review of the extensive literature on "skills" reveals that definitions for this term vary widely depending on the discipline, context, or application in which the term is used. Moreover, skill-related information may be described by worker-oriented descriptors (e.g., human attributes, worker functions) and/or job-oriented descriptors (e.g., tasks performed, tools or equipment used, and work products) depending on how the skill-related information is used.

In recognition of this "definitional diversity" and to avoid prematurely excluding important types of skills information from further consideration, APDOT has elected not to adopt a single definition of "skills." Rather, APDOT has proposed a structure of four domains for organizing and presenting skill-related information. The skill-related information categorized in these four domains varies in its degree of generality or specificity, and spans both worker-oriented and job-oriented content. The four domains, which are defined and described below, have been labeled: Basic Aptitudes and Abilities, Cross-Functional Skills, Generalized Work Behaviors, and Occupation-Specific Skills.

APDOT intends these four domains to provide a tentative framework for capturing most of the important types of skill-related information needed in a revised DOT. Although this framework will require further elaboration and specification of content, APDOT believes these four domains will provide a rich array of options for users. This framework should also lend itself to a range of specific applications that require skills information of different types and at different levels of aggregation or generality.

1. Basic Aptitudes and Abilities

This is the most general category of skill-related information. It is composed of classic aptitude/ability constructs within the following domains: cognitive (e.g., verbal, quantitative, and reasoning abilities), psychomotor (e.g., manual dexterity, finger dexterity, and eye-hand coordination), spatial/perceptual (e.g., spatial perception, perceptual speed), and physical (e.g., static strength, dynamic strength, and stamina). This category is analogous to the SCANS "basic" and "thinking" skills.

2. Cross-Functional Skills

This is a more specific category of skill-related information than basic aptitudes and abilities. Cross-functional skills represent applications of various aptitudes and abilities to the performance of broad types of activities that tend to occur across relatively wide ranges of occupations. Examples of cross-functional skills are: fact finding, evaluating information, organizing and planning, interpersonal skills, and negotiation skills. This domain is analogous to many of the SCANS "competencies."

3. Generalized Work Behaviors

This category of skill-related information is more specific than cross-functional skills. The components of this domain represent aggregations of similar occupation-specific skills into broad activity statements. (Occupation-specific skills are defined below). Generalized work behaviors do not include highly occupation-specific content, and they tend to occur across substantial numbers of different occupations. Examples of generalized work behaviors include: writing reports, reading blueprints, preparing budgets, and repairing electrical appliances. APDOT's rationale for including generalized work behaviors as one of the skill-related information domains for further investigation stems from the view that an intermediate level of skill description may be a particularly useful level for a number of purposes, including the evaluation of skills transferability across occupations in a revised DOT. For example, basic aptitudes and abilities and cross-functional skills may be too generic, and occupation-specific skills may be too specific, for optimally evaluating skills transferability.

4. Occupation-Specific Skills

This is the most specific category of skill-related information. This domain is composed of skills, knowledge, and machine, tool, and equipment proficiencies that tend to be relatively unique to specific occupations or homogeneous job families. Such information may be stated as occupation-specific tasks (e.g., "inspect and recharge mobile communications equipment," or "type and proofread statistical charts"), as terms denoting areas of specialized subject matter knowledge (e.g., organic chemistry, library indexing systems), or as lists of machines, tools, and equipment (e.g., printing press, micrometer, and facsimile machine).

Skills Issues

Although the treatment of skills in a new DOT may ultimately be contingent upon the resolution of related issues including the classification system selected, the job analysis methodology utilized, and the level of aggregation attempted, several other skills issues are also currently under investigation by APDOT. These skills issues include: type and level of skills, classifying/grouping by skills, skills transferability, and the treatment of skill-related information in the current DOT. These issues are discussed below.

Type and Level of Skills

In some cases, the number and type of skills desired by users and the capability that currently exists for measuring corresponding proficiency levels required are in conflict. For example, some users have requested detailed data about physical skills, with relevant scales about lifting, bending, and carrying. However, research suggests that a single, more general scale will more accurately measure and capture the same information about the job's physical skill requirements. APDOT wishes to retain data on physical requirements in a revised DOT, and will continue to investigate acceptable, cost-effective measures.

The 1980 review of the DOT by the National Academy of Sciences, Work, Jobs, and Occupations: A Critical Review of the Dictionary of Occupational Titles, suggested that at least some current ratings of occupational characteristics are redundant and unreliable. These occupational characteristics are worker-oriented and job-oriented descriptors. The report also found the validity of some of these characteristics in the fourth edition of the DOT to be dubious. The APDOT-proposed skills domains may incorporate the same type of worker-oriented and job-oriented descriptors used in the current occupational characteristics. However, the type of information about skills included in a new DOT will depend on DOL's ability to develop valid and reliable tools to measure them. Because other DOL initiatives such as SCANS and the National Advisory Commission on Work-Based Learning are both addressing skills issues, APDOT believes that changes to the DOT should be coordinated with these efforts.

Classifying/Grouping by Skills

Because of intense interest in skills on the part of policy makers and current DOT users, the idea of using skills as the conceptual framework for a new DOT classification system has been raised for APDOT consideration. The possibility of a new DOT being disseminated as an electronic and automated database may substantially reduce the importance of this issue. (See "Format and Dissemination Issues" section of this report.) With an electronic and automated DOT, users would be able to manipulate skill-related data and, in effect, create classification systems and/or job groupings (skill-based or otherwise) customized to their own needs and purposes.

Skills Transferability

Transferable skills are those skills that are common to more than one occupation. They enable individuals to move successfully from one occupation to another. Information about transferable skills plays a critical role in helping us to define and understand occupational mobility patterns both within (e.g., career ladders) and across (e.g., career lattices) occupational areas. Consequently, the identification of these skills and their determinants has been a focal point for educators and human resources professionals concerned with individual employability and training. Providing information relevant to the analysis and determination of transferable skills will be essential in a revised DOT.

Skills in the Current DOT

The current DOT contains information about a variety of skill-related descriptors (e.g., aptitudes, worker functions, tasks performed, and machines, tools, and equipment used). However, the skill-related information in the current DOT does not allow users to clearly extract or manipulate data. For example, some skills contained in the current DOT must be inferred from the definitions or interpreted from the worker function scales. Some users perceive that potentially important kinds of skills are not adequately represented in the DOT. DOT Review staff has also identified, in the preliminary data regarding skills (from the **Federal Register** response and informal discussion), a disparity between what respondents said about what they want in a revised DOT, and what users state that they actually use. While skills descriptions were high on the list of data desired in the DOT by many users, the skill-related components of the current DOT were not used extensively. This disparity may be explained in several ways: (1) Users may be unfamiliar with the DOT skill components, and unaware of how to use them; (2) users may be familiar with the DOT skill components, but find them inadequate for their needs, or too difficult or confusing to use; (3) users may be familiar with the DOT skill components, but unwilling to trust their reliability or validity; or (4) the user sample was limited/distorted.

Other Occupational Characteristics

Some users of the DOT need occupational information that is not readily described within the structure of the four domains presented above. In recognition of this fact, APDOT will examine current and alternative procedures for including DOT occupational characteristics other than skill-related information. These include, but are not limited to, education, experience, physical demands, work environment characteristics, interests, and temperaments.

Next Steps

APDOT will review responses to this Interim Report relevant to the proposed skills domains and skill-related issues. This information, in conjunction with the results of a comprehensive user survey and consultation with nationally recognized experts, will be used to modify and refine the proposed skills

domains as warranted, and to develop options for operationalizing them.

VIII. International Review

This section of the Interim Report highlights key issues and findings for the DOT Review resulting from a study of occupational analysis and/or classification systems in: Australia, France, Japan, Sweden, and the United Kingdom. The study was directed by Eivind Hoffmann of the International Labour Organization (ILO). Information on Germany and the Netherlands will be forthcoming at a later date. At this time, APDOT intends to pursue further study of the work underway in Australia, the United Kingdom, and the Netherlands; three countries that appear to be in the process of developing skill-based systems for classifying and describing occupations. Following the ILO-based summary, this section of the Interim Report also includes key information identified by Dr. David Stevens, University of Baltimore, regarding recent work in Canada that has direct application to the DOT Review.

Findings from the International Review

General findings from the ILO international studies relevant to the DOT Review may be summarized as follows:

- Several countries are in the process of developing skill-based systems for classifying and describing occupations. These include the United Kingdom, Australia, Canada, and the Netherlands. In general, skill as used in these systems refers to education or experience or a combination of such information. The Netherlands may be an exception.
- No other country studied appears to attempt comprehensive coverage in one document or database like the DOT. In other countries, the occupational information which appears in the classification system is used for statistical purposes. Other tools are used for job placement, vocational rehabilitation, and similar purposes.
- None of the countries reviewed has yet found a cost-effective, successful method for keeping its main occupational classification and dictionary accurate and current. Separate systems used for vocational guidance, however, are regularly updated; typically every year or two. However, the Netherlands has a regular program to keep *some* of the main system accurate and current.
- Because the systems reviewed are in development, and documentation has not yet been completed, information about the amount and quality of research supporting the development of occupational information was not readily available. As a result, APDOT remains unclear about the reliability or validity of measures used abroad.
- Information provided about costs of developing complete occupational descriptions suggests that cost is a major issue for other countries. (For example, France and Australia both greatly under-estimated the time and resource requirements for revising their systems.)
- Some work has been completed to illustrate transferability of skills between occupations in France and to a lesser extent, the Netherlands.

Canadian Occupational Information

In addition to commissioning the ILO Report, the Department of Labor asked Dr. David Stevens, Director, Regional Employment Dynamics Center, University of Baltimore, to look at recent changes to the Canadian occupational information system and report back to APDOT on lessons learned. Since Canada's economy is similar to that of the U.S., and since the Canadians are currently engaged in extensive revisions of their entire system, this review appeared to be particularly appropriate. Dr. Stevens' report, Canada's National Occupational Classification Taxonomy, identified a number of key points relevant to the DOT Review. They are as follows:

- Canada's occupational information system includes the National Occupational Classification System (NOC); JOBSCAN; and a yet-to-be developed career information system for worker attributes. The NOC, developed by Employment and Immigration Canada (EIC) in cooperation with Statistics Canada, will replace the Canadian Classification and Dictionary of Occupations (CCDO). The NOC is a systematic taxonomy of occupations that is intended for use in compiling, analyzing, and communicating information about occupations. The new career information system and an electronic version of the NOC will also be released through private vendors. Canada's intention is to provide a core product which will be available for vendor/user adaptation to particular market niches. This approach has also been advocated for the DOT.
- The NOC was designed to remedy problems identified in the CCDO. (The CCDO was based on the 3rd edition of the DOT.) The NOC illustrates transferable skills, occupational mobility, and typical patterns of upward progression. The criteria for classification and presentation in the NOC are skill levels and skill type except when occupational mobility is limited to a specific industry. In such cases, the basis for classification becomes the specific industry.
- In principle, all occupations in the economy are covered in the NOC. A key issue is the degree of resolution in coverage. In the NOC, the level of information provided varies depending on job complexity or the type of skills required. Canadian decision makers believe that all occupations do not need to be approached in the same way. Furthermore, Canadian officials believe that skills information and related occupational characteristics such as education and experience are the key factors needed by placement specialists and employers to make referral and hiring decisions. They felt that job descriptions covering groups of jobs were sufficient to replace the very specific definitions of the CCDO.
- In developing the revised NOC, Employment and Immigration Canada as well as Statistics Canada have focused on their own operational needs. The intended uses are counting, labor exchange, immigration, equity, employment, training, and projections. This approach corresponds to the APDOT recommendation of a priority ranking for DOL core uses.
- Although structured questionnaires were used extensively to collect data for the NOC, numerous, detailed, on-site interviews were also conducted to obtain relevant skills and other information.
- In addition to the fixed classification structure of the NOC, Canada has created JOBSCAN to replace the use of the CCDO for the matching and placement of workers. JOBSCAN is a job-worker matching system containing an inventory of worker skills and employer hiring criteria, with variables expressed in similar terms to permit job matching. According to Margaret Roberts, Chief, Occupational Information Development, EIC, integral to the concept of JOBSCAN is the system's ability to reflect dynamic changes inherent in the world of work.
- The use of checklists in JOBSCAN allows precise definition of a particular job or the sum total of a worker's skills without reference to occupational codes. In addition to matching worker's skills with employer requirements, checklists assist in defining areas of mobility and transferability of skills. Like other foreign countries studied, Canada has chosen to separate the sorting and statistical functions from matching and placement. It is probably fair to say that if the items in JOBSCAN were compiled into a database, they would be similar to the APDOT-proposed skill-related information domains of occupation-specific skills and generalized work behaviors.

IX. DOT Use in Federal Statutes, Regulations, and Legislation

In making its final recommendations, APDOT will consider the impact of changes in the DOT on Federal agencies whose use of the DOT is mandated by statute or regulation. A search of the LEXIS legal database revealed three references to the DOT in Federal statutes and seventy references in the Code of Federal Regulations. Staff also consulted the Legislative Guide for Labor Market Information produced by the Interstate Conference of Employment Security Agencies, Inc. (ICESA), to learn how Federal legislation requires the use of labor market information.

Although DOT use for many Federal agencies is either mandated or suggested in Federal regulations, this fact alone does not appear to restrict modifications to the DOT. Regulations evolved from DOT use; if the DOT is changed, APDOT believes that regulations can and should be changed. The DOT is used as an arbiter in some Federal activities such as social security disability determination and alien labor certification. Legal decisions regarding disability are sometimes based on DOT data. APDOT recognizes that as the DOT is modified or improved, laws, regulations, and operational practices may need to be changed. If major changes are recommended, APDOT may also recommend that an appropriate time-phased plan be used for implementation to lessen the potential for disruption.

X. Classification Issues

APDOT recommendations regarding possible changes to the classification system of the DOT represent a fundamental issue for the Department of Labor. The DOT Review is currently investigating an array of methods for classifying occupational information in a revised DOT. Options include classifying: (1) By skills; (2) by type of work performed; and/or (3) by some other method. It should be noted that these classification systems are not mutually exclusive. There is considerable interest, particularly on the part of the Bureau of Labor Statistics and the Office of Management and Budget, in coordinating proposed revisions of the Standard Occupation Classification (SOC) with the DOT to produce a system that better serves the needs of Federal agencies. The goal is to make the two classification systems more compatible. The feasibility of a coordinated approach to classification or the possible creation of a single system demands serious study.

APDOT tentatively recommends that the Secretary establish a single work group or other entity within the Department of Labor with responsibility for occupational classification systems. This group or entity should be responsible for both the development of the classification structure of the DOT and the Department's work on the revision of the Standard Occupational Classification. APDOT believes that assigning responsibility in this way will help ensure that the resulting classifications are both conceptually and technically compatible.

It must be noted that APDOT is not, at this time, also recommending that a revised SOC be used as the classification structure of the DOT. While this is an option, APDOT has not examined this option in detail and compared it with other options. In addition to the above recommendation, APDOT will make a recommendation concerning the classification structure of the DOT.

Readers should also be aware that, if a revised SOC is recomended as the classification structure for the DOT, this does not mean that the level of detail would necessarily be limited to that provided by the SOC. A revised SOC might be used as a framework for presenting the DOT. Such a framework can accommodate information at a level more detailed than represented by the current 4-digit SOC category.

Related to the issue of classification is the recommendation APDOT will need to make regarding the level of aggregation in a new DOT. Are general categories sufficient for most users or are very specific categories required? Can the revised DOT be developed in such a way that a specific categories can be rolled up into general categories as needed? Would the Canadian NOC model of general descriptions with specific titles be workable for the revised DOT? Finally, some DOT users have suggested that automation of the DOT lessens the importance of classification as an issue in the revised DOT. APDOT will review these concerns and other before making final recommendations on changes to the classification system of the DOT.

XI. Job Analysis Methodologies

APDOT's charter requires the panel to offer DOL recommendations, not just on the DOT, but also regarding the system that produces it. As a result, APDOT is undertaking a systematic examination of job analysis methodologies. "How, what kind, and how much information on occupations should be collected?" This was one of the five "Key DOT Issues" set forth in the DOT Review concept paper published in the **Federal Register**, August 10, 1990. Some respondents to the DOT concept paper raised concerns regarding the adequacy of the current job analysis methodology to collect occupational information that accurately reflects the current world of work.

In several segments of today's economy, work is becoming more flexible, problem-oriented, and organized in teams. Many occupations are increasingly knowledge-based, demanding more cognitively-oriented work skills. Such changes add new dimensions of interaction and complexity to work activities, and potentially change the traditional concept of a job or occupation. By contrast, the current DOT job analysis methodology was developed at a time when the nature of the work in many occupations was routinized, repetitive, and organized along hierarchical lines. Concern regarding the current job analysis methodology focuses on its adequacy in capturing occupational characteristics within increasingly dynamic work settings.

Even if the current DOT job analysis and data collection methodology remains viable, some methods or scales used in the system may need to be revised to improve the validity of some occupational characteristics. APDOT is undertaking research efforts directed at identifying and reviewing alternative job analysis methodologies and techniques that could replace and/or supplement the current system.

The current job methodology is inefficient in situations where fast, comprehensive, data collection is important. In order to keep abreast of rapidly changing technologies and their impact in the workplace, methodologies that lend themselves to fast, accurate, and comprehensive collection of occupational data are needed. Respondents to the DOT concept paper suggested several alternative, data collection possibilities. Some of the approaches include the use of: Technical committees, employer groups, associations, direct mailing surveys, graduate students, government workers, and private vendors to assist in the collection of occupational information. The goal is to identify, if possible, more cost-effective methods that will facilitate the collection and analysis of accurate, current, valid, and reliable occupational information.

In addition, a related area that will be reviewed by APDOT is the sampling design used for selecting occupations for study and inclusion in the DOT. The

focus will be to research and identify methods that will assure adequate coverage of the contemporary occupational spectrum.

XII. Format and Dissemination Issues

Current users of the DOT appear to be unanimous in their desire for an electronic, automated DOT database with some hard-copy availability. Users appear to desire the capability of conducting database searches of information with different variables. APDOT believes that automation will dramatically impact the format and dissemination of the DOT. Automation offers users increased flexibility in the way data are presented and accessed. For example, information presently included in the definition might be available as separate descriptors such as tasks, work behaviors, etc. These descriptors could be selected alone or grouped together to form new definitions. In giving both DOT developers and users a range of options not previously available, an automated, electronic database has the potential to drastically alter the way the DOT is developed and used.

Format

The use of an automated, electronic database will impact the design of major parts of the DOT including, for example, the code, the definition, and the selected characteristics. APDOT will address each of these issues:

DOT Code

Currently, the DOT has a nine-digit code. Although many users are unaware of it, information about worker functions is included in the code. The middle three-digits of the DOT code organize various work activities and requirements into what is termed "data, people, things." Today users frequently use the DOT code to perform a sorting function only. They view the DOT code merely as numbers rather than as information. In a future DOT, the coding system could be changed/simplified to serve the sorting function alone with information about "data, people, things" presented in a format that is more user-friendly.

DOT Definition

Currently, information about occupationally-specific skills and knowledge requirements are contained in the definition. Users draw their own inferences about skills requirements based on the descriptions of tasks performed. In addition, the current definitions have the same level of detail for all occupations. In a revised DOT, definitional information could be divided into components such as the four domains of skill-related information suggested earlier. Moreover, the level of detail provided for occupations could be varied depending upon the needs of the users. For example, one general definition could serve the purpose of similar occupations, with individual title and/or codes available when sorting is needed. The Canadian NOC/JOBSCAN might provide a viable model.

DOT Selected Characteristics

In the current DOT, information about what an occupation requires of workers is presented, in code form, in two different places. It is present in the DOT code and in the selected characteristics. In a future DOT, this information could be included as part of the narrative definition or profile. Most users would probably benefit from a simplification of the presentation.

Dissemination

One major resource issue confronting DOL is the development of a dissemination strategy for the DOT. Currently, numerous vendors have developed targeted programs for specific users. These entrepreneurs have taken the core DOT, added value to it, and charged their customers accordingly. Should this customizing continue to be a vendor function, with DOL producing a generic database? Should DOL make more specific and more costly versions of the DOT data? If DOL is to stick with the generic version, how can the Department assure adequate resources to maintain the occupational analysis program? Is some kind of fee-for-service or profit-sharing option viable? Before APDOT can make final recommendations regarding dissemination of a revised DOT, these questions will need to be addressed.

In considering dissemination issues, DOL will need to pay careful attention to marketing and training options. APDOT believes that DOL will need to assure that the interested public is adequately informed about the DOT and its components, and appropriately trained in how to use them. For example, in addition to developing the DOT database itself, if automation strategies are adopted, DOL will need to develop various "help menus," user manuals, and solid instructional programs to train people in using the database. In conducting its preliminary analysis of DOT users, APDOT discovered that many users, including those at the national office of the Department of Labor, were unaware of DOT-related information, including the existence of such core components as Selected Characteristics of Occupations Defined in the Dictionary of Occupational Titles, the Guide for Occupational Exploration, or a DOT data tape. To properly inform users, DOL will also need to consider developing reference documents and educational programs for the user community.

XIII. Toward Recommendations/ Questions for Reader Response

This Interim Report on the DOT Review is intended to clarify the approach and status of activities currently under development. In publishing this report in the **Federal Register**, the Department of Labor and the APDOT are soliciting comments on all critical issues under discussion. The specific questions that follow reflect the major issue sections of the Interim Report; respondents are invited to comment on all or some of the questions as appropriate. All responses will be carefully considered in the review process.

1. DOT Purpose Statement

APDOT believes that DOL must clearly define the purpose of the DOT, because all other issues of form and function follow purpose. The appropriate content, scope, classification system, and dissemination strategy of the new DOT will all be determined by the purpose. Does the new DOT Purpose Statement accurately express the mission of the DOT as an occupational information tool? Please explain the answer.

2. Ten Guiding Principles for DOT Review

Do the Ten Guiding Principles provide sufficient direction for APDOT's review of the DOT? Please discuss individual principles as appropriate.

3. Priority Ranking of Uses

Does APDOT's priority ranking of DOL cores uses appear to be workable? Is there a feasible, alternative criterion for differentiating among conflicting user interests and for allocating resources?

4. DOT Users and Uses

While acknowledging that a complete discussion of DOT "uses" must include the results of an empirically-based user survey, and the final APDOT Report on the DOT will do so, do the 11 use categories identified in the Interim Report appear comprehensive? Do the 12 generalizations about user needs/ requests adequately summarize key user issues regarding the DOT?

5. Skills and Other Occupational Characteristics

Do the four skill-related information domains described in the Interim Report capture the skills needed by today's workforce? Do methodologies exist that will allow DOL to measure these skills in a valid and reliable way? Are there other important skills issues that should be addressed in a revised DOT? Are the other occupational characteristics listed sufficiently inclusive for most DOT users?

6. International Review

Is the Canadian NOC/JOBSCAN an appropriate model for a revised DOT? Please explain why or why not. Are there other lessons to be learned from abroad that reflect directly on the DOT Review?

7. DOT Use in Federal Statutes, Regulations, and Legislation

Does the Interim Report section on DOT use in Federal statues, regulations, and legislation accurately reflect the position of user organizations and agencies?

8. Classification Issues

While the best classification structure for a new DOT depends on its uses, there is considerable interest in the U.S. in developing a classification structure which can serve the needs of "dictionary" users as well as statistical users. Is the recommendation to establish a single work group within the Department of Labor with responsibility for occupational classification systems a workable option?

9. Job Analysis Methodologies

Are the concerns raised about current DOT job analysis methodologies appropriate? Please describe alternative job analysis, data collection, or occupational sampling methodologies that could accomplish the objectives discussed in this section of the report.

10. Format and Dissemination Issues

While electronic and automated dissemination is essential for the next edition of the DOT, the extent to which DOL should go in creating a viable database for users remains open. Do users want programs that will organize the data for them in packages? Do they want instructional learning packages on the computer to assist them in searching the DOT? As with the previous questions, APDOT would like to hear from interested parties regarding the issues raised in this section.

Department of Housing and Urban Development

Office of the Assistant Secretary for Community Planning and Development

Moderate Rehabilitation Program for Single Room Occupancy Dwellings for Homeless Individuals; Funding Availability; Notice

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Community Planning and Development

[Docket No. N-92-3376; FR-3154-N-01]

Funding Availability for Moderate Rehabilitation Program for Single Room Occupancy Dwellings for Homeless Individuals

AGENCY: Assistant Secretary for Community Planning and Development, HUD.

ACTION: Notice of funding availability for Fiscal Year 1992.

SUMMARY: This Notice of Funding Availability (NOFA) announces HUD's funding for the Section 8 Moderate Rehabilitation Program for Single Room Occupancy (SRO) Dwellings for Homeless Individuals.

The Notice states the application, ranking, and selection procedures that will govern the use of the funds made available in Fiscal Year 1992 for use under this program.

DATES: The deadline for receipt of applications is 5:15 p.m. Eastern time on May 26, 1992 at HUD Headquarters. Two copies must also be sent at the same time to the local HUD office covering the jurisdiction in which the project is located. A list of field offices appears at the end of this NOFA. Applications transmitted by FAX will not be accepted. (While copies must be submitted to both the Headquarters and the appropriate HUD Field Office, the date and time of receipt in Headquarters will be used to determine whether the application has been submitted on time.)

FOR FURTHER INFORMATION CONTACT: James N. Forsberg, Director, Office of Special Needs Assistance Programs, room 7262, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, DC 20410, telephone (202) 708-4300. Hearing-or-speech-impaired individuals may call HUD's TDD number (202) 708-9300. (These are not toll-free telephone numbers).

SUPPLEMENTARY INFORMATION: The information collection requirements contained in this rule have been submitted to the Office of Management and Budget (OMB) for review under the Paperwork Reduction Act of 1980 and have been assigned OMB control number 2506-0131.

I. Purpose and Substantive Description

The purpose of the Section 8 Moderate Rehabilitation Program for Single Room Occupancy (SRO) Dwellings for homeless individuals is to provide rental assistance to homeless individuals in rehabilitated SRO housing. The assistance is in the form of rental assistance under the Section 8 Housing Assistance Payments Program. These payments equal the rent for the unit, including utilities, minus the portion of the rent payable by the tenant under the U.S. Housing Act of 1937. HUD will make the assistance available for 10 years.

HUD enters into annual contributions contracts (ACCs) with public housing agencies (PHAs). The ACC authorizes the PHA to enter into Housing Assistance Payments (HAP) Contracts with owners in connection with the moderate rehabilitation of residential properties in which some or all of the dwelling units may not contain either food preparation or sanitary facilities. Each of these single room occupancy (SRO) units is intended for occupancy by one eligible homeless individual.

The Stewart B. McKinney Homeless Assistance Act (42 U.S.C. 11401) requires that first priority for occupancy of SRO Moderate Rehabilitation units shall be given to homeless individuals. This requirement, however, is not meant to eliminate the rights of current tenants to remain in the building after it is rehabilitated. Due to limited resources and considerations of relative need, HUD will only accept, for this funding round, applications that propose assistance for people (described below) who are not currently residing in the building, and for individuals eligible for Section 8 assistance who are currently residing in the building. Nonresident applicants must be individuals who: (1) Lack the resources to obtain housing and who (a) have a primary nighttime residence that is a public or private place not designed for, or ordinarily used as, a regular sleeping accommodation for human beings; (b) have a primary nighttime residence that is a supervised publicly or privately operated shelter designed to provide temporary living accommodations (including welfare hotels, congregate shelters, and transitional housing but excluding prisons and other detention facilities); or (c) are at imminent risk of homelessness because they face immediate eviction and have been unable to identify a subsequent residence, which would result in emergency shelter placement; or (2) handicapped persons who are about to be released from an institution and are at risk of imminent homelessness because no subsequent residences have been identified and because they lack the resources and support networks needed to obtain access to decent housing. Applications will not be accepted under this funding round that propose assistance for individuals not residing in the building who are currently housed in overcrowded or substandard conditions but are not at imminent risk of becoming homeless for the reasons described in the previous sentence.

(a) Authority and Other Information

This program is authorized by section 441 of the Stewart B. McKinney Homeless Assistance Act (42 U.S.C. 11401), amended by the Stewart B. McKinney Homeless Assistance Amendments Act of 1988 (Pub. L. 100-628, approved November 7, 1988). On November 7, 1989, the Department published a final rule at 54 FR 46828, which sets forth at 24 CFR part 882, subpart H, the regulations for this program. The funds made available under this Notice are subject to these regulations.

Prior Notices of Fund Availability were published in Fiscal Years 1988, 1989, 1990, and 1991. The requirements of this Notice only apply to funds made available in Fiscal Year 1992 under section 441 of the Stewart B. McKinney Homeless Assistance Act. (The Fiscal Years 1988, 1989, 1990, and 1991 Notices continue in effect for the funds made available under section 441 for those Fiscal Years.)

Availability of Tax Credit

The Omnibus Revenue Reconciliation Act of 1990 (Pub. L. 101-508, Approved November 5, 1990) amended the Low Income Housing Tax Credit (LIHTC) (26 U.S.C. 42) to permit the use of Moderate Rehabilitation assistance in conjunction with the LIHTC if the assistance is being provided under the Stewart B. McKinney Homeless Assistance Act. After selection of proposals, the Department will review all selected SRO projects using the Administrative Guidelines published in the **Federal Register** on April 9, 1991 (56 FR 14436) to determine whether the level of housing assistance proposed for the project is appropriate when combined with the LIHTC.

Cost Limits—Maximum and Minimum

Under the Stewart B. McKinney Homeless Assistance Amendments of 1988 (Pub. L. 100-628, approved November 7, 1988), HUD is required to increase the SRO per unit rehabilitation cost limit each year to take into account increases in construction costs, starting with assistance provided on or after October 1, 1988. For purposes of Fiscal Year 1992 funding, the cost limitation is

raised from $15,000 to $15,500 per unit to take into account increases in construction costs during the past 12-month period. This amendment is made in accordance with 24 CFR 882.805(g), Initial contract rents.

The Department of Housing and Urban Development Reform Act of 1989 (Pub. L. 101-235, approved December 15, 1989) revised the minimum amount of rehabilitation required. A unit to be assisted must need a minimum expenditure of $3,000 of eligible rehabilitation, including the unit's prorated share of work to be accomplished on common areas or systems.

Indian Housing Authority (IHA) Participation

Under Section 835 of the Cranston-Gonzalez National Affordable Housing Act (Pub. L. 101-625, Approved November 28, 1990), an Indian Housing Authority may apply for the Moderate Rehabilitation SRO Program.

PHA-Owned Units

Section 548 of the Cranston-Gonzalez National Affordable Housing Act (Pub. L. 101-625, approved November 28, 1990) provides that a PHA may contract to make assistance payments to itself as the owner of dwelling units under the Section 8 programs. The PHA must be subject to the same program requirements as are applied to other owners. This provision removes the statutory prohibition against Section 8 assistance for units owned by the PHA which administers assistance under the ACC. However, the Department has determined that PHAs will not be authorized to enter Housing Assistance Payments (HAP) Contracts for PHA-owned units before the issuance of final regulations specifying the administrative requirements for PHA owned Section 8 units. 24 CFR 882.803(a)(2)(ii), which provides that units owned by the PHA administering the SRO program are not eligible for assistance under the SRO program, remains in effect. The Department does not anticipate issuance of final regulations under section 548 in time for the Fiscal year 1992 funding round for the SRO program. Thus, units owned by the administering PHA may not be selected or funded this round.

(b) Allocation Amounts

Approximately $105 million was appropriated for the program by the Departments of Veterans Affairs and Housing and Urban Development, and Independent Agencies Appropriation Act, 1992 (Pub. L. 102-139, Approved October 28, 1991). HUD estimates that this $105 million will assist approximately 2,000 units over the 10-year period. The statutory national competition procedures established for the program by section 441 of the Stewart B. McKinney Homeless Assistance Act (42 U.S.C. 11401) apply, rather than the "fair share" allocation procedures required for most assisted housing funds by section 213(d) of the Housing and Community Development Act of 1974 (42 U.S.C. 1439(d)).

(c) Eligibility

Interested PHAs, including IHAs, are invited to submit applications for this program. Under this program, HUD will provide assistance for a 10-year period to selected PHAs.

(d) Selection Criteria/Ranking Factors

1. Initial Screening

Applications will be reviewed by both HUD Headquarters and by HUD field offices. Field offices will be responsible for making review comments, but all selections will be made by Headquarters. To be considered for ranking and possible selection, applications must meet certain threshold requirements. The threshold review, which will apply to all applications, will determine whether the application is adequate in form, timeliness, and completeness, and whether the project is eligible to participate in the program.

2. Environmental Review Requirements

When ranking applications, HUD will complete environmental reviews required under 24 CFR part 50 on all applications. HUD may elect to eliminate a proposal from consideration where the application would require an Environmental Impact Statement, or the time necessary for the completion of the review process under an environmental law for structures identified in a particular application would make it difficult for the property to be rehabilitated and occupied within a reasonable period. In order to assist HUD in the timely completion of the Historic Preservation Review process, the applicant may contact the State Historic Preservation Office (SHPO) to determine if the proposed structure(s) requires Historic Preservation clearance. If Historic Preservation clearance is required, there should be early coordination (if possible, before the application deadline) with the HUD field office to provide all the necessary information required by the SHPO.

3. Ranking

Except for proposals eliminated for the above-mentioned environmental reasons or because the proposed site is ineligible, HUD will rank all applications from PHAs that contain all items required by 24 CFR 882.805(c) of the program regulations and the application package described in Part II of this NOFA that are received by the deadline date. Each application will be ranked based upon HUD's assessment of the ranking factors listed below. Each factor indicates the maximum number of points that may be assigned for that factor. Points may be awarded up to the maximum number allotted for each factor. Successful applicants must receive points under each factor.

(a) The need for assistance, as demonstrated by the PHA's analysis of the number and characteristics of the single homeless individuals to be served and the thoroughness of the analysis of the need presented. (100 points)

(b) The PHA's ability to undertake and carry out the program within the schedule proposed by the PHA, as demonstrated by:

(i) Whether the preliminary feasibility analysis clearly demonstrates that it appears likely that the proposed structure will be feasible within the Fair Market Rent (50 points);

(ii) Whether there is evidence of site control or other evidence that the site will be available for rehabilitation in accordance with the PHA's schedule (100 points);

(iii) The percentage of units proposed for assistance which are vacant (rehabilitation of vacant units generally will result in more units becoming available for the homeless; therefore, applications where all units to be assisted are vacant will be given the full 100 points for this criterion) (100 points);

(No person shall be displaced (as defined in 24 CFR 882.803(d)(2)(i)) from a dwelling for an assisted project. In addition to applicable sanctions under the agreement, a violation of this policy may trigger a requirement to provide relocation assistance at the levels described in the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, implementing regulation at 49 CFR part 24, and HUD Handbook 1378, Tenant Assistance, Relocation and Real Property Acquisition. Persons whose occupancy is terminated through a notice to vacate or the refusal to renew a lease in order to provide a vacant unit for the project qualify as "displaced persons" who are eligible for assistance.)

(iv) Whether it appears feasible, based on assessments of the capabilities of the PHA and the Owner, that the PHA and Owner will complete all steps necessary so that the HAP Contract may

be executed within 12 months of execution of the ACC (50 points);

(v) Whether the PHA has specified the resources available to provide necessary supportive services, targeted to the needs of the single homeless population identified, including the strength and length of the commitments to provide those resources and the methods by which the population to be served will be sought out and informed of the availability of assistance (300 points);

(vi) The availability of financing, both assisted and unassisted, as demonstrated by statements of intent or commitments from lenders, with the awarding of more points where the lender is legally committed to provide the financing and where the availability of assisted financing is documented (e.g., below market interest subsidies, grants) (100 points); and

(vii) The PHA's experience with, or demonstrated ability to operate rehabilitation programs, including past performance in placing Moderate Rehabilitation units under Agreement and Contract; the PHA's experience in working with homeless people; and the PHA's overall adminstrative capability, as evaluated by the HUD Field Office (e.g., results of reviews or audits of PHA performance or Field Office's most recent monitoring letter concerning the PHA's ability to carry out its Equal Opportunity Housing Plan) (200 points).

4. Selection of Applications

(a) HUD will select the highest ranking applications. However, no city or urban county may have projects receiving a total of more than 10 percent of the assistance to be provided under this program this fiscal year. In FY '92, this limit equals approximately $10,500,000 in budget authority for a city or urban county, which is the equivalent of up to $1,050,000 in adminstratively controlled contract authority per year. HUD anticipates that this will fund a maximum of approximately 200 units for any one city or urban county. In addition, no single proposal shall receive assistance for more than 100 units.

(b) HUD will notify each PHA whether or not its application has been selected.

II. Application Process

1. Where To Obtain Application Package

An application package containing all required forms and exhibits, detailed application instructions, and pertinent program guidance may be obtained from the HUD field offices listed in appendix A. Each prospective applicant should obtain and carefully review an application package before preparing an application for submission to HUD.

2. Deadline for Applications

The deadline for receipt of application is 5:15 p.m. Eastern time on May 26, 1992 at HUD Headquarters. Two copies must also be sent at the sime time to the local HUD office covering the jurisdiction in which the project is located. A list of field offices appears at the end of this NOFA. Applications transmitted by FAX will not be accepted. (While copies must be submitted to both the Headquarters and the appropriate HUD Field Office, the date and time of receipt in Headquarters will be used to determine whether the application has been submitted on time.)

The above-stated application deadline is firm as to date and hour. In the interest of fairness to all competing applicants, the Department will treat as ineligible for consideration any application that is received after the deadline. Applicants should take this practice into account and make early submission of their materials to avoid any risk of loss of eligibility brought about by unanticipated delays or other delivery-related problems.

3. Where to Submit Applications

An original application must be submitted to HUD Headquarters. Two copies must also be sent to the appropriate HUD field office for the jurisdiction of the submitting PHA.

Applications submitted to Headquarters shall be addressed to Department of Housing and Urban Development, Office of Special Needs Assistance, room 7262, 451 Seventh Street, SW., Washington, DC 20410, Attention: James N. Forsberg.

The addresses, locations and telephone numbers of each local HUD office are included in appendix A.

III. Checklist of Application Submission Requirements

The application must contain all items specified in the application package, including the application form, HUD–52515B, and must be in accordance with instructions in the application package. An application package may be obtained from HUD Headquarters or the appropriate field office in appendix A and must include all of the following:

(1) Description of the number and characteristics of single homeless individuals and, if the jurisdiction is experiencing the loss of SRO units, an explanation of why and what steps, if any, are being taken to address the problem.

(2) Description of supportive service plan and evidence of commitment or interest from service providers.

(3) Description of PHA's administrative capability, rehabilitation expertise, and experience with the homeless.

(4) A schedule for completion of all necessary steps of project development.

(5) Description of the site(s) proposed for assistance, including information on:

(a) Site control and owner interest in participation;

(b) Proposed financing of rehabilitation work;

(c) Proposed rehabilitation;

(d) Number of vacant units;

(e) Preliminary financial feasibility, as demonstrated by Appendix 31 rent calculation from Handbook 7420.3;

(f) Disclosure of Other Governmental Assistance. (Form 2880 Applicant Disclosure.)

(6) The following certifications (fully described in the application package and incorporated in the application, Form HUD–52515B):

(a) Comprehensive Housing Affordability Strategy (CHAS) Certification;

(b) Drug-Free Workplace Certification;

(c) Anti-Lobbying Certification;

(7) Section 213 Letter. The Section 213 letter is not required as part of the application; however, it may be submitted with the application. Upon receipt of an application that does not include a section 213 letter from the chief executive officer of the unit of general local government, HUD shall send the application to the appropriate chief executive officer in accordance with 24 CFR part 791. Where the review and comment process required under 24 CFR part 791 has not been completed by the time HUD is ready to make its own selections, it may tentatively select one or more applications subject to completion of the comment process required under part 791.

IV. Correction to Technically Deficient Applications

Before the application deadline, both Headquarters and field office staff will be available to provide advice and guidance to potential applicants on application requirements and program policies. In order to provide applicants the opportunity to submit a ratable application, while at the same time ensuring the fairness and integrity of the selection process, HUD Headquarters will initially screen applications for completeness and technical deficiencies. An application will be determined technically deficient if it contains all the items necessary for HUD review under the Selection Criteria/Ranking Factors but does not contain one or more of the following certifications listed in Section III of this NOFA or where the certification(s) has not been dated and signed by the appropriate person.

1. Comprehensive Housing Affordability Strategy (CHAS) Certification.
2. Drug-Free Workplace Certification.
3. Anti-lobbying Certification.

In cases where a certification(s) required by this rule is missing or incorrectly completed, the applicant will first be notified by telephone of the deficiency and then given 14 days from the date of written notification of the deficiency to subtmt the missing certification(s) necessary for completeness. The purpose of this process is to assist applicants in submitting ratable proposals and not to provide opportunity for an application to be substantively improved once the application deadline has passed. For this reason, HUD will contact applicants only where it is clear that the deficiencies are technical in nature.

Section 102 of HUD Reform Act of 1989

On March 14, 1991, the Department published in the **Federal Register** a final rule to implement section 102 of the Department of Housing and Urban Development Reform Act of 1989 (24 CFR part 12, 56 FR 11032). Section 102 contains a number of provisions that are designed to ensure greater accountability and integrity in the provision of certain types of assistance administered by the Department.

The following should be noted regarding the relationship of the Section 8 Moderate Rehabilitation Program for SRO Dwellings to part 12:

Documentation and Public Access Requirements

HUD will ensure that documentation and other information regarding each application submitted pursuant to this NOFA are sufficient to indicate the basis upon which assistance was provided or denied. This material, including any letters of support, will be made available for public inspection for a five-year period beginning not less than 30 days after the award of the assistance. Material will be made available in accordance with the Freedom of Information Act (5 U.S.C. 552) and HUD's implementing regulations at 24 CFR part 15. In addition, HUD will include the recipients of assistance pursuant to this NOFA in its quarterly **Federal Register** notice of all recipients of HUD assistance awarded on a competitive basis. (See 24 CFR 12.14(a) and 12.16(b), and the notice published in the **Federal Register** on January 16, 1992 (57 FR 1942), for further information on these documentation and public access requirements.)

Disclosures

HUD will make available to the public for five years all applicant disclosure reports (HUD Form 2880) submitted in connection with this NOFA. Update reports (also Form 2880) will be made available along with the applicant disclosure reports, but in no case for a period generally less than three years. All reports—both applicant disclosures and updates—will be made available in accordance with the Freedom of Information Act (5 U.S.C. 552) and HUD's implementing regulations at 24 CFR part 15. (See 24 CFR subpart C, and the notice published in the **Federal Register** on January 16, 1992 (57 FR 1942), for further information on these disclosure requirements.)

Subsidy-Layering Determinations

24 CFR 12.52 requires HUD to certify that the amount of HUD assistance is not more than is necessary to make the assisted activity feasible after taking account of other government assistance. HUD will make the decision with respect to each certification available to the public free of charge, for a three-year period. (See the notice published in the **Federal Register** on January 16, 1992 (57 FR 1942) for further information on requesting these decisions.) Additional information about applications, HUD certifications, and assistance adjustments, both before assistance is provided or subsequently, are to be made under the Freedom of Information Act (24 CFR part 15).

Section 103 HUD Reform Act of 1989

HUD's regulation implementing section 103 of the Department of Housing and Urban Development Reform Act of 1989 was published May 13, 1991 (56 FR 22088) and became effective on June 12, 1991. That regulation, codified as 24 CFR part 4, applies to the funding competition announced today. The requirements of the rule continue to apply until the announcement of the selection of successful applicants.

HUD employees involved in the review of applications and in the making of funding decisions are limited by part 4 from providing advance information to any person (other than an authorized employee of HUD) concerning funding decisions, or from otherwise giving any applicant an unfair competitive advantage. Persons who apply for assistance in this competition should confine their inquiries to the subject areas permitted under 24 CFR part 4.

Applicants who have questions should contact the HUD Office of Ethics (202) 708–3815. (This is not a toll-free number.) The Office of Ethics can provide information of a general nature to HUD employees, as well. However, a HUD employee who has specific program questions, such as whether particular subject matter can be discussed with persons outside the Department, should contact his or her Regional or Field Office Counsel, or Headquarters counsel for the program to which the question pertains.

Section 112 HUD Reform Act of 1989

Section 13 of the Department of Housing and Urban Development Act contains two programs dealing with efforts to influence HUD's decisions with respect to financial assistance. The first imposes disclosure requirements on those who are typically involved in these efforts—those who pay others to influence the award of assistance or the taking of a management action by the Department and those who are paid to provide the influence. The section restricts the payment of fees to those who are paid to influence the award of HUD assistance, if the fees are tied to the number of housing units received or are based on the amount of assistance received, or if they are contingent upon the receipt of assistance.

Section 13 was implemented by final rule published in the **Federal Register** on May 17, 1991 (56 FR 22912). If readers are involved in any efforts to influence the Department in these ways, they are urged to read the final rule, particularly the examples contained in appendix A of the rule.

Any questions regarding the rule should be directed to Arnold J. Haiman, Director, Office of Ethics, room 2158, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, DC 20410. Telephone: (202) 708–3815; TDD: (202) 708–1112. (These are not toll-free numbers.) Forms necessary for compliance with the rule may be obtained from the local HUD office.

Other Matters

Environmental Review

A Finding of No Significant Impact with respect to the environment has been made in accordance with HUD regulations at 24 CFR part 50, which implement section 102(2)(C) of the National Environmental Policy Act of 1969, 42 U.S.C. 4332. The Finding of No Significant Impact is available for public

inspection weekdays from 7:30 a.m. to 5:30 p.m. in the Office of the Rules Docket Clerk, Office of the General Counsel, Department of Housing and Urban Development, room 10276, 451 Seventh Street SW., Washington, DC 20410.

Executive Order 12612, Federalism

The General Counsel, as the Designated Official under Section 6(a) of the Executive Order 12612, Federalism, has determined that the policies contained in this NOFA do not have federalism implications and, thus, are not subject to review under the Order. The NOFA makes available, pursuant to an authorizing statute and an appropriation Act, housing assistance for homeless individuals through a mechanism that is already established between HUD, the PHA and the Owner under the Section 8 Housing Assistance Payments Program.

Executive Order 12606, the Family

The General Counsel, as the Designated Official under Executive Order 12606, the Family, has determined that this rule does not have a potential significant impact on family formation, maintenance, and general well-being, and, thus, is not subject to review under the Order. The purpose of the NOFA is to make available assistance for single room housing for homeless individuals.

Catalog of Federal Domestic Assistance

The Catalog of Federal Domestic Assistance Program number is 14.156, Lower Income Housing Assistance Program.

Authority: Secs. 401 and 441, Stewart B. McKinney Homeless Assistance Act, Pub. L. 100-77, approved July 22, 1987; secs. 481 and 485, Stewart B. McKinney Homeless Assistance Amendments Act of 1988, Pub. L. 100-628, approved November 7, 1988; sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

Dated: March 19, 1992.

Anna Kondratas,

Assistant Secretary for Community Planning and Development.

LIST OF PUBLIC LAWS

Note: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's **List of Public Laws.**

Last List March 25, 1992

Order Now!

The United States Government Manual 1991/92

As the official handbook of the Federal Government, the *Manual* is the best source of information on the activities, functions, organization, and principal officials of the agencies of the legislative, judicial, and executive branches. It also includes information on quasi-official agencies and international organizations in which the United States participates.

Particularly helpful for those interested in where to go and who to see about a subject of particular concern is each agency's "Sources of Information" section, which provides addresses and telephone numbers for use in obtaining specifics on consumer activities, contracts and grants, employment, publications and films, and many other areas of citizen interest. The *Manual* also includes comprehensive name and agency/subject indexes.

Of significant historical interest is Appendix C, which lists the agencies and functions of the Federal Government abolished, transferred, or changed in name subsequent to March 4, 1933.

The *Manual* is published by the Office of the Federal Register, National Archives and Records Administration.

Would you like to know...

if any changes have been made to the Code of Federal Regulations or what documents have been published in the Federal Register without reading the Federal Register every day? If so, you may wish to subscribe to the *LSA (List of CFR Sections Affected)*, the *Federal Register Index*, or both.

LSA • List of CFR Sections Affected

The LSA (List of CFR Sections Affected) is designed to lead users of the Code of Federal Regulations to amendatory actions published in the Federal Register. The LSA is issued monthly in cumulative form. Entries indicate the nature of the changes—such as revised, removed, or corrected.
$21.00 per year

Federal Register Index

The index, covering the contents of the daily Federal Register, is issued monthly in cumulative form. Entries are carried primarily under the names of the issuing agencies. Significant subjects are carried as cross-references.
$19.00 per year.

A finding aid is included in each publication which lists Federal Register page numbers with the date of publication in the Federal Register.

Note to FR Subscribers:
FR Indexes and the LSA (List of CFR Sections Affected) are mailed automatically to regular FR subscribers.

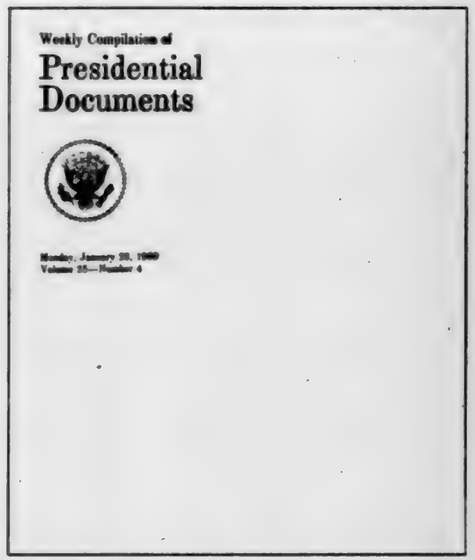
The authentic text behind the news . . .

The Weekly Compilation of **Presidential Documents**

Administration of George Bush



This unique service provides up-to-date information on Presidential policies and announcements. It contains the full text of the President's public speeches, statements, messages to Congress, news conferences, personnel appointments and nominations, and other Presidential materials released by the White House.

The Weekly Compilation carries a Monday dateline and covers materials released during the preceding week. Each issue contains an Index of Contents and a Cumulative Index to Prior Issues.

Separate indexes are published periodically. Other features include lists of acts approved by the President, nominations submitted to the Senate, a checklist of White House press releases, and a digest of other Presidential activities and White House announcements.

Published by the Office of the Federal Register, National Archives and Records Administration.

Briefings on How To Use the Federal Register
For information on briefings in Washington, DC and St. Louis, MO, see announcement on the inside cover of this issue.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 57 FR 12345.

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

Rules and Regulations

Federal Register
Vol. 57, No. 60
Friday, March 27, 1992

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Part 890

RIN 3206-AE90

Federal Employees Health Benefits Program: Limitation on Inpatient Hospital Charges and FEHB Program Payments

AGENCY: Office of Personnel Management.

ACTION: Interim regulation with request for comments.

SUMMARY: The Officer of Personnel Management (OPM) is issuing an interim regulation that implements section 7002(f) of the Omnibus Budget Reconciliation Act of 1990 (5 U.S.C. 8904(b)). The law sets a limit on the charges and Federal Employees Health Benefits (FEHB) Program benefit payments for certain inpatient hospital services received by a retired enrolled individual. This regulation defines a retired enrolled individual and sets forth the circumstances under which the limit on charges and FEHB Program benefit payments takes effect.

DATES: This interim regulation is effective January 1, 1992. Comments must be received on or before May 26, 1992.

ADDRESSES: Written comments may be sent to Andrea S. Minniear, Assistant Director for Retirement and Insurance Policy, Retirement and Insurance Group, Office of Personnel Management, P.O. Box 57, Washington, DC 20044, or delivered to OPM, room 4351, 1900 E Street, NW., Wasington, DC 20415.

FOR FURTHER INFORMATION CONTACT: Abby L. Block, (202) 606-0191.

SUPPLEMENTARY INFORMATION: The Omnibus Budget Reconciliation Act of 1990 (OBRA of 1990), Public Law 101-508, was enacted on November 5, 1990. Section 7002(f) of OBRA of 1990 amended the FEHB law to limit the charges and FEHB Program benefit payments for certain inpatient hospital services received by retired enrolled individuals.

The purpose of this interim regulation is to implement section 7002(f) of Public Law 101-508. The interim regulation defines a retired enrolled individual and specifies the inpatient hospital services covered by the limitation on charges and benefit payments.

The interim regulation explains how FEHB fee-for-service plans will determine benefit payments for inpatient hospital services covered by the limitation. The limit is the amount calculated by the FEHB plan as equivalent to the Medicare Part A payment under the diagnostic related group (DRG) based prospective payment system (PPS). The limit set by the law is not what the plan must pay but the most that the plan can pay. If a plan would pay a lower amount than the limit by following the payment procedure used for all its other FEHB enrollees, the plan also will pay the lower amount for services covered by the limitation.

The interim regulation explains that the FEHB plans will determine the amount which is equivalent to the Medicare Part A payment under the DRG-based PPS. FEHB plans will receive specific operating guidelines from OPM.

The interim regulation makes an exception to the policy regarding the continuation of benefits when an individual is confined in a hospital or other institution for care or treatment on the date his or her enrollment is changed from one plan to another, or from one option of a plan to another option of that plan. If the services provided during a change in enrollment from one plan to another, or from one option of a plan to another option of that plan, are covered by the limit on charges and benefit payments specified in this regulation, the individual is entitled to a continuation of the benefits of the prior plan or option until the end of the confinement. This exception accommodates the law by ensuring that the charge and benefit payment for the entire hospital confinement are determined in compliance with the limitation on charges and benefit payments specified in this regulation.

Waiver of Notice of Proposed Rulemaking

Pursuant to section 553(b)(3)(B) of title 5 of the U.S. Code, I find that good cause exists for waiving the general notice of proposed rulemaking and making this regulation effective in less than 30 days. The notice is being waived because the limitation enacted by Public Law 101-508 addressed in this regulation was effective with respect to the contract year beginning on January 1, 1992.

E.O. 12291, Federal Regulation

I have determined that this is not a major rule as defined under section 1(b) of E.O. 12291, Federal Regulation.

Regulatory Flexibility Act

I certify that these regulations will not have a significant economic impact on a substantial number of small entities because they primarily affect Federal annuitants, and former spouses.

List of Subjects in 5 CFR Part 890

Administrative practice and procedure, Government employees, Health insurance, Retirement.

Office of Personnel Management.

Constance Berry Newman,

Director.

Accordingly, OPM is amending 5 CFR part 890 as follows:

PART 890—FEDERAL EMPLOYEES HEALTH BENEFITS PROGRAM

1. The authority citation for part 890 is revised to read as follows:

Authority: 5 U.S.C. 8913; § 890.803 also issued under 50 U.S.C. 403p, 22 U.S.C. 4069c and 4069c-1; subpart L also issued under sec. 599C of Public Law 101-513, 104 Stat. 2064.

2. Section 890.401 is amended by adding paragraph (b)(3) to read as follows:

§ 890.401 Temporary extension of coverage and conversion.

* * * * *

(b) * * *

(3) *Exception.* The limit on the number of confinement days allowed to be covered under the continuation of benefits specified by paragraph (b)(2) of this subpart does not apply to confinements in a hospital or other institution when the charges and benefit payments for the services provided are covered by the limit specified in subpart

I of this part. In these cases, the benefits continue until the end of the confinement.

* * * * *

3. In part 890, a new subpart I, consisting of §§ 890.901 through 890.907, is added to read as follows:

Subpart I—Limit on Inpatient Hospital Charges and FEHB Benefit Payments

Sec.

890.901 Purpose.
890.902 Definition.
890.903 Covered hospital services.
890.904 Determination of FEHB benefit payment.
890.905 Effective dates.
890.906 End-of-year settlements.
890.907 Provider information.

Subpart I—Limit on Inpatient Hospital Charges and FEHB Benefit Payments

§ 890.901 Purpose.

This subpart identifies the individuals whose charges and FEHB benefit payments for inpatient hospital services may be limited and sets forth the circumstances of the limit.

§ 890.902 Definition.

For purposes of this subpart, *Retired enrolled individual* means an individual who:

(a)(1) Is covered by a Federal Employees Health Benefits plan (including individuals covered under 5 U.S.C. 8905a) described by 5 U.S.C. 8903(1), (2) and (3), or 5 U.S.C. 8903a and is:

(i) An annuitant as defined in 5 U.S.C. 8901(3); or

(ii) A former spouse as defined in 5 U.S.C. 8901(10) or enrolled for continued coverage under 5 U.S.C. 8905a(f); or

(2) Is a family member covered by the family enrollment of an annuitant or former spouse as defined in 5 U.S.C. 8901, or a former spouse enrolled for continued coverage under 5 U.S.C. 8905a(f); and

(b) Is not employed in a position which confers FEHB coverage; and

(c) Is age 65 or older or becomes age 65 while receiving inpatient hospital services; and

(d) Is not covered by Medicare part A.

§ 890.903 Covered hospital services.

The limitation on the charges and FEHB benefit payments for inpatient hospital services apply to inpatient hospital services which are:

(a) Covered under both Medicare part A and the retired enrolled individual's FEHB plan; and

(b) Provided by hospital providers who have in force participation agreements with the Secretary of Health and Human Services consistent with sections 1814(a) and 1866 of the Social Security Act, and receive Medicare part A payments in accordance with the diagnostic related group (DRG) based prospective payment system (PPS).

§ 890.904 Determination of FEHB benefit payment.

The FEHB benefit payment under this subpart is the lowest of the following:

(a) The amount calculated by the FEHB plan, using guidelines specified by OPM, as equivalent to the Medicare part A payment under the DRG-based PPS (that is, the amount payable before the Medicare deductible, coinsurance and lifetime limits are applied).

(b) The amount payable by the retired enrolled individual's FEHB plan under its benefit structure (that is, the amount payable before the FEHB plan's deductible, coinsurance, lifetime limits and other maximums are applied).

(c) The actual billed charges.

§ 890.905 Effective dates.

The limitation specified in this subpart applies to inpatient hospital admissions commencing on or after January 1, 1992.

§ 890.906 End-of-year settlements.

Neither OPM, nor the FEHB plans, will perform end-of-year settlements with, or make retroactive adjustments as a result of retroactive changes in the Medicare payment calculation information to, hospital providers who have received FEHB benefit payments under this subpart.

§ 890.907 Provider information.

The hospital provider information used to calculate the amount equivalent to the Medicare part A payment will be updated on an annual basis.

RIN 3206-AE44

Federal Employees Health Benefits Program: Continuation of Coverage During a Period of Military Furlough in Support of Operation Desert Shield and/or Desert Storm

AGENCY: Office of Personnel Management (OPM).

ACTION: Final rule.

SUMMARY: The Office of Personnel Management is issuing final regulations that waive the employee share of the health benefits premium for employees whose coverage under the Federal Employees Health Benefits (FEHB) Program continues while they are on leave without pay because of military service in support of Operation Desert Shield and/or Desert Storm. These regulations finalize interim regulations that were issued to make sure that employees who performed active military duty during this period would be able to leave their employment temporarily with the knowledge that their affairs were in order and their rights protected.

EFFECTIVE DATE: April 27, 1992.

SUPPLEMENTARY INFORMATION: On September 25, 1990, OPM issued interim regulations (55 FR 39131) that waived the employee share of the health benefits premium for employees who continue FEHB coverage while they are on military furlough (leave without pay) because of military service in support of Operation Desert Shield.

On August 22, 1990, the President signed Executive Order 12727, by which he ordered certain Armed Forces reservists to active military duty. Under OPM's regulations in effect at that time, Federal employees who entered on a leave-without-pay (LWOP) status could continue their FEHB coverage if they paid their share of the FEHB premium. By continuing FEHB coverage while in leave-without-pay status, employees can ensure that their families are able to maintain established relationships with health care providers for up to 12 months of LWOP.

The call to active military service initiated a difficult period in the lives of affected employees and their families. In order to make sure that employees who performed active military duty during this period would be able to leave their employment temporarily with the knowledge that their affairs were in order and their rights protected, OPM issued regulations waiving the employee's share of the FEHB premiums for employees who continued their FEHB coverage while in a LWOP status because they were performing active military service in support of Operation Desert Shield.

We received two written comments from Federal agencies and several telephone responses from agency personnel directors. We also received one written comment from an organization of health professionals, one from an employee-related organization, and five from health insurance carriers and organizations representing health insurance carriers.

One commenter stated that an employee who is in LWOP status may continue coverage only if he or she pays both the Government and employee's share of the premiums and asked a number of questions based on this premise. However, this is a misconception—the employing agency pays the Government's share under the interim regulations, just as it does when employees are on LWOP under more normal circumstances. Therefore, the commenter's questions based on this premise are not relevant.

Five commenters were concerned about the effect of waiving the employee share of the premium on the health insurance carriers since they would not be receiving the premiums they expected for these enrollees under their contracts with OPM. They were also concerned about the effect on future contract negotiations.

OPM does not anticipate any adverse effect on carriers to result from the interim regulations. The overall effect of waiving the employee's share of premiums for reservists is that there are potential cost reductions to balance out the reduction in revenue. Since the military provides health care for individuals on active military duty, FEHB enrollments affected by the regulations actually cover one less person than before the LWOP began. For self-only enrollments, no one actually receives benefits in most cases. At the same time, the plans continue to receive the Government share of the premium (approximately 70% of the total amount).

The difference in income per covered individual, if any, is not a problem for experience-rated plans because such differences are worked out in the normal rate-setting process. However, HMO's that pay capitation must make capitation payments even though the individual will not be seeking services while he or she is on active military duty. Therefore, we are looking at each HMO on an individual basis during the reconciliation process so that we can make appropriate adjustments.

During the reconciliation process, OPM is allowing a net adjustment for employees in LWOP status because of military service in support of Operations Desert Shield and/or Desert Storm, whereby plans may show losses or gains that the plan incurred due to the Operation Desert Shield/Storm absentees. To facilitate this process, OPM has informed affected plans of the number of their enrollees who were in this category in 1990 and, in early 1992, will provide 1991 information. Therefore, no FEHB plan will suffer a loss as a result of these regulations.

Two commenters said that under OPM's contracts with the carriers, OPM is obligated to obtain advance approval of FEHB carriers of any regulatory change that increases the liability of the carriers. However, the contract clause to which the commenter was referring does not apply in this case since there will be no liability, as explained in the preceding paragraphs.

One commenter cited the experience of an employee who was called up for two periods of active military service, each of which was limited to 30 days or less; therefore, neither period qualified for a waiver of the employee share of premiums under these regulations. The commenter suggested that we remove the requirement that the military service not be limited to 30 days or less. Periods of service that are limited to 30 days or less are usually intended for training purposes and are usually served while the individual is in a military leave status (which is paid leave). In addition, for the regulation waiving the employee premiums during LWOP to have any effect, the period of military service would have to result in at least one pay period during which there was insufficient pay to make the health insurance withholdings. Therefore, it is quite unusual for employees to be called into military service under circumstances that would meet the requirements of this regulation, except that the military service is limited to 30 days or less, and for the employees to actually experience at least one pay period without pay as a result. Isolated occurrences of this kind are not properly addressed by removing regulatory limitations that are appropriate to the vast majority of circumstances. While an employee with a brief period of LWOP might be inconvenienced by having to pay the employee share of the FEHB premium, the requirement would not constitute a hardship such as that experienced by employees who remain in military service for many months. It is this latter employee who needs the relief that this regulation was intended to bring.

Several callers asked whether the Government share of the FEHB premium was waived. The interim regulation amended the provisions related to the employee share of the premium. No changes were made to the provision related to the Government's share of the premiums. Therefore, the employing office continues to be responsible for paying the Government's share of the premiums for the individual affected by these regulations.

We are updating the regulations to include reference to Operation Desert Storm and additional sections in title 10, U.S. Code, that have been used in calling up employees to serve in connection with the Persian Gulf war.

E.O. 12291, Federal Regulation

I have determined that this is not a major rule as defined under section 1(b) of E.O. 12291, Federal Regulation.

Regulatory Flexibility Act

I certify that these regulations will not have a significant economic impact on a substantial number of small entities because they primarily affect Federal employees.

List of Subjects in 5 CFR Part 890

Administrative practice and procedure, Government employees, Health insurance.

Office of Personnel Management.

Constance Berry Newman,

Director.

Accordingly, the interim regulations under part 890 published by OPM on September 25, 1990, (55 FR 39131) are made final with the following change:

PART 890—FEDERAL EMPLOYEES HEALTH BENEFITS PROGRAM

1. The authority citation for part 890 is revised to read as follows:

Authority: 5 U.S.C. 8913; 890.803 also issued under 50 U.S.C. 403p, 22 U.S.C. 4069c and 4069c-1; subpart L also issued under sec. 599C of Pub. L. 101-513, 104 Stat. 2064.

2. In § 890.502, paragraph (g) is revised to read as set forth below:

§ 890.502 Employee withholdings and contributions.

* * * * *

(g) *Military furlough.* Payment of the employee's share of the cost of enrollment is waived in the case of an employee whose coverage continues under § 890.303(e) following furlough or placement on leave of absence in accordance with the provisions of part 353 of this chapter or other similar authority for the purpose of performing duty not limited to 30 days or less in a uniformed service, if ordered to active duty under section 672, 673, 673b, 674, 675, or 688 of title 10, United States Code, in support of Operations Desert Shield and/or Desert Storm.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 905

[Docket No. FV-92-006IR]

Oranges, Grapefruit, Tangerines, and Tangelos Grown in Florida; Relaxation of Handling Requirements for Valencia and Other Late Type Oranges and Honey Tangerines

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Interim final rule.

SUMMARY: This rule relaxes the minimum size requirement for export shipments of Valencia and other late type oranges to 2$^{11}/_{16}$ inches in diameter (size 163) from 2$^{9}/_{16}$ inches in diameter (size 125) through September 26, 1992. This action also relaxes the minimum grade requirement for domestic and export shipments of Honey tangerines to Florida No. 1 Golden from Florida No. 1 through August 23, 1992. This action is based on this season's current and prospective crop and market conditions, and on the grade, size, and maturity of the remaining supplies of these fruits.

DATES: This interim final rule becomes effective: March 23, 1992. Comments which are received by April 27, 1992 will be considered prior to any finalization of this interim final rule.

ADDRESSES: Interested persons are invited to submit written comments concerning this rule to: Docket Clerk, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, room 2525–S, Washington, DC 20090–6456. Three copies of all written material shall be submitted, and they will be made available for public inspection at the office of the Docket Clerk during regular business hours. All comments should reference the docket number, date, and page number of this issue of the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: Gary D. Rasmussen, Marketing Specialist, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, room 2525–S, Washington, DC 20090–6456; telephone: (202) 720–5331.

SUPPLEMENTARY INFORMATION: This interim final rule is issued under Marketing Agreement and Marketing Order No. 905, both as amended [7 CFR part 905], regulating the handling of oranges, grapefruit, tangerines, and tangelos grown in Florida. This order is effective under the Agricultural Marketing Agreement Act of 1937, as amended [7 U.S.C. 601–674], hereinafter referred to as the Act.

This interim final rule has been reviewed by the U.S. Department of Agriculture (Department) in accordance with Departmental Regulation 1512–1 and the criteria contained in Executive Order 12291 and has been determined to be a "non-major" rule.

This interim final rule has been reviewed under Executive Order 12778, Civil Justice Reform. This action is not intended to have retroactive effect. This interim final rule will not preempt any state or local laws, regulations, or policies, unless they present an irreconcilable conflict with this rule.

The Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 8c(15)(A) of the Act, any handler subject to an order may file with the Secretary a petition stating that the order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with law and requesting a modification of the order or to be exempted therefrom. A handler is afforded the opportunity for a hearing on the petition. After the hearing the Secretary would rule on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has his principal place of business, has jurisdiction in equity to review the Secretary's ruling on the petition, provided a bill in equity is filed not later than 20 days after date of the entry of the ruling.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this action on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are about 100 Florida citrus handlers subject to regulation under the marketing order covering oranges, grapefruit, tangerines, and tangelos grown in Florida, and about 10,200 producers of these citrus fruits in Florida. Small agricultural producers have been defined by the Small Business Administration [13 CFR 121.601] as those having annual receipts of less than $500,000, and small agricultural service firms are defined as those whose annual receipts are less than $3,500,000. A minority of these handlers and a majority of the producers may be classified as small entities.

The Citrus Administrative Committee (committee), which administers the marketing order locally, met January 21, 1992, and unanimously recommended this action. The committee meets prior to and during each season to review the handling regulations effective on a continuous basis for each citrus fruit regulated under the marketing order. Committee meetings are open to the public, and interested persons may express their views at these meetings. The Department reviews committee recommendations and information submitted by the committee and other available information and determines whether modification, suspension, or termination of the handling regulations would tend to effectuate the declared policy of the Act.

Section 905.306 [7 CFR 905.306] specifies minimum grade and size requirements for Florida citrus. Such requirements for domestic shipments are specified in that section in Table I of paragraph (a), and for export shipments in Table II of paragraph (b).

This action relaxes the minimum size requirement for export shipments of Valencia and other late type oranges to 2$^{11}/_{16}$ inches in diameter (size 163) from 2$^{9}/_{16}$ inches in diameter (size 125) through September 27, 1992. Relaxing the minimum size requirement for Valencia and other late type oranges as specified is expected to make smaller fruit available of acceptable maturity and flavor to meet consumer needs. The Valencia and other late type orange shipping season in Florida normally begins in January and ends with shipment of late-bloom fruit during the following September.

This action also relaxes the minimum grade requirement for domestic and export shipments of Honey tangerines to Florida No. 1 Golden from Florida No. 1 through August 23, 1992. This action allows slightly dryer fruit to be shipped to the fresh market, by permitting a one-quarter inch of dryness on the stem end of the fruit instead of the one-eighth inch currently permitted. This action recognizes the fact that this fruit tends to dry out during the latter part of the shipping season, which normally ends in April. This action will provide Florida shippers with the alternative of shipping Honey tangerines grading Florida No. 1 Golden to the fresh market, rather than diverting them to processing channels where returns would likely be lower than in the fresh market. This action

should make increased supplies of fresh Honey tangerines available to consumers from this season's remaining crop.

The committee recommended this action based on analysis of the grade and size composition of this season's remaining Valencia and other late type orange and Honey tangerine crops. The committee anticipates that the demand will be good for size 163 Valencia and other late type oranges in the export market, and for Florida No. 1 Golden grade Honey tangerines in both the domestic and export markets during the remainder of the 1991–92 season, and that the fruit will meet consumer acceptance.

The minimum grade and size requirements under the marketing order are designed to provide fresh markets with fruit of acceptable quality, thereby maintaining consumer confidence for fresh Florida citrus. This helps create buyer confidence and contributes to stable marketing conditions. This is in the interest of producers, packers, and consumers, and is designed to increase returns to Florida citrus growers.

Under the marketing order for Florida citrus, handlers may ship up to 15 standard packed cartons (12 bushels) of fruit per day, and up to two standard packed cartons of fruit per day in gift packages which are individually addressed and not for resale, under exemption provisions. Fruit shipped for animal feed is also exempt under specific conditions. In addition, fruit shipped to commerical processors for conversion into canned or frozen products or into a beverage base are not subject to the handling requirements.

This action reflects the committee's and the Department's appraisal of the need to make the grade and size relaxations hereinafter set forth. The Department's view is that this action will have a beneficial impact on producers and handlers since it will allow Florida citrus handlers to ship those grades and sizes of fruit available to meet consumer needs consistent with this season's crop and market conditions.

Paragraph (a), Table I, column 4 of § 905.306 of this rule sets forth the correct minimum diameter requirement for Honey tangerines as 2$^{9}/_{16}$ inches. That requirement was established for Honey tangerines shipped on and after August 18, 1986, by a rule published in the **Federal Register** [51 FR 1572, April 28, 1986]. The minimum diameter requirement for Honey tangerines of 2$^{11}/_{16}$ inches cited in 7 CFR 905.306(a), Table 1 is incorrect, and this rule corrects that error.

Based on the above, the Administrator of the AMS has determined that this action will not have a significant economic impact on a substantial number of small entities.

After consideration of all relevant matters presented, the information and recommendations submitted by the committee, and other information, it is found that the relaxations set forth below will tend to effectuate the declared policy of the Act.

Pursuant to 5 U.S.C. 553, it is also found and determined, upon good cause, that it is impracticable, unnecessary and contrary to the public interest to give preliminary notice prior to putting this rule into effect, and that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register** because: (1) This action relaxes requirements currently in effect for Valencia and other late type oranges and Honey tangerines; (2) Valencia and other late type orange and Honey tangerine shippers in Florida are aware of this action which was unanimously recommended by the committee at a public meeting, and they will need no additional time to comply with the relaxed requirements; (3) shipment of the 1991–92 season Valencia and other late type orange and Honey tangerine crop in Florida is currently in progress; and (4) the rule provides a 30-day comment period, and any comments received will be considered prior to any finalization of this interim final rule.

List of Subjects in 7 CFR Part 905

Grapefruit, Marketing agreements, Oranges, Reporting and recordkeeping requirements, Tangelos, Tangerines.

For the reasons set forth in the preamble, 7 CFR part 905 is amended as follows:

PART 905—ORANGES, GRAPEFRUIT, TANGERINES, AND TANGELOS GROWN IN FLORIDA

1. The authority citation for 7 CFR part 905 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. Section 905.306 is amended as follows:

Note: This section will appear in the annual Code of Federal Regulations.

A. In paragraph (a), Table I, the entry for "Honey tangerines" is revised to read as set forth below.

B. In paragraph (b), Table II, the entries for "Valencia and other late type oranges", and "Honey tangerines" are revised to read as follows:

§ 905.306 Orange, Grapefruit, Tangerine, and Tangelo Regulation.

Multijurisdictional Disclosure and Modifications to the Current Registration and Reporting System for Canadian Issuers; Correction

AGENCY: Securities and Exchange Commission.

ACTION: Correction to final rule.

SUMMARY: This document contains corrections to the final regulations which were published on July 1, 1991 (56 FR 30036).

EFFECTIVE DATE: July 1, 1991.

FOR FURTHER INFORMATION CONTACT: Anita Klein, Office of International Corporate Finance, Division of Corporation Finance at (202) 272–3246.

SUPPLEMENTARY INFORMATION: The Commission adopted the multijurisdictional disclosure system for Canadian issuers on July 1, 1991. As published, the final regulations contain errors which may prove to be misleading and are in need of clarification. In this release, authority citations, rules and forms containing such errors are being corrected.

Accordingly, the publication on July 1, 1991, of the final regulations relating to the multijurisdictional disclosure system for Canadian issuers which were the subject of FR Doc. 91–15402 is corrected as follows:

PART 200—[CORRECTED]

1. On page 30052, in the third column, the amendatory language for amendment 1 is corrected to read as follows:

"1. The general rulemaking authority for part 200, subpart A is revised and the following citations are added to read as follows:"

PART 229—[CORRECTED]

2. On page 30053, in the third column, the amendatory language for amendment 14 is corrected to read:

"14. The authority citation for part 229 is amended by adding the following citations."

3. On page 30054, in the third column, amendment 24(a) is added.

24(a). In § 230.428 paragraph (b)(2) and Instruction 2 are revised to read as follows:

§ 230.428 Documents constituting a section 10(a) prospectus for Form S–8 registration statement; requirements relating to offerings of securities registered on Form S–8.

* * * * *

(b) * * *

(2) The registrant shall deliver or cause to be delivered with the document(s) containing the information required by Part I of Form S–8, to each employee to whom such information is sent or given, a copy of any one of the following:

(i) The registrant's annual report to security holders containing the information required by Rule 14a–3(b) (§ 240.14a–3(b) of this chapter) under the Securities Exchange Act of 1934 (*Exchange Act*) for its latest fiscal year;

(ii) The registrant's annual report on Form 10–K (§ 249.310 of this chapter), U5S (§ 259.5s of this chapter), 20–F (§ 249.220f of this chapter) or, in the case of registrants described in General Instruction A.(2) of Form 40–F, 40–F (§ 249.240f of this chapter) for its latest fiscal year;

(iii) The latest prospectus filed pursuant to Rule 424(b) (§ 230.424(b) of this chapter) under the Act that contains audited financial statements for the registrant's latest fiscal year, *Provided that* the financial statements are not incorporated by reference from another filing, and *Provided further* that such prospectus contains substantially the information required by Rule 14a–3(b) or the registration statement was on Form S–18 (§ 239.28 of this chapter) or F–1 (§ 239.31 of this chapter); or

(iv) The registrant's effective Exchange Act registration statement on Form 10 (§ 249.210 of this chapter), 20–F or, in the case of registrants described in General Instruction A.(2) of Form 40–F, 40–F containing audited financial statements for the registrant's latest fiscal year.

Instructions

* * * * *

2. If the latest fiscal year of the registrant has ended within 120 days (or 190 days with respect to foreign private issuers) prior to the delivery of the documents containing the information specified by Part I of Form S–8, the registrant may deliver a document containing financial statements for the fiscal year preceding the last fiscal year, *Provided that* within the 120 or 190 day period a document containing financial statements for the latest fiscal year is furnished to each employee.

* * * * *

PART 239—[CORRECTED]

4. On page 30055, in the second column, the amendatory language for amendment 28 is corrected to read:

"28. The authority citation for part 239 is amended by revising the general rulemaking authority and adding the following citations."

§ 239.32 [Corrected]

5. On page 30057, in the first column, an amendment to Form F–2 (§ 239.32), General Instruction I.B.2. is added after General Instruction I.A. to read as follows:

B. * * *

2. The provisions of this paragraph (B)(1)(a) do not apply to any registrant if: (i) The aggregate market value worldwide of the voting stock of the registrant held by non-affiliates is the equivalent of $300 million or more, or if non-convertible debt securities that are "investment grade debt securities" as defined below, are being registered and (ii) the registrant has filed at least one Form 20–F, Form 40–F or Form 10–K that is the latest required to have been filed.

* * * * *

PART 240—[CORRECTED]

6. On page 30067, in the third column, the amendatory language for amendment 40 is corrected to read:

"40. The authority citation for part 240 is amended by revising the general rulemaking authority and adding the following citations."

7. On page 30068, in the third column, amendment 48(a) is added.

§ 240.13a–13 [Corrected]

48(a). In § 240.13a–13, amending the first sentence of paragraph (a) after the words "annual reports pursuant to section 13 of the Act" add the words ", and has filed or intends to file such reports" and after the parenthetical "(§ 259.5s of this chapter)" add a ",".

8. On page 30068, in the third column, § 240.13a–16(a) is corrected to read as follows:

§ 240.13a–16 Reports of foreign private issuers on Form 6–K (17 CFR 249.306.)

(a) Every foreign private issuer which is subject to Rule 13a–1 (17 CFR 240.13a–1) shall make reports on Form 6–K, except that this rule shall not apply to:

(1) Investment companies required to file reports pursuant to Rule 30b1–1 (17 CFR 270.30b1–1);

(2) Issuers of American depositary receipts for securities of any foreign issuer; or

(3) Issuers filing periodic reports on Forms 10–K, 10–Q and 8–K.

* * * * *

§ 240.14d–102 [Corrected]

9. On page 30072, in the second column, in the fifth line of General Instruction II. C. of Schedule 14D–1F (§ 240.14d–102), the citation "section 14(a)(3)" is corrected to read "section 14(g)(3)".

PART 249—[CORRECTED]

10. On Page 30075, in the second column, the amendatory language for amendment 60 is corrected to read:

"60. The authority citation for part 249 is amended by revising the general rulemaking authority and adding the following citation."

§ 249.310 [Corrected]

11. On page 30077, in the fourth line of the second column, the second sentence of General Instruction G. (3) of Form 10–K (§ 249.310) is corrected by adding "by virtue of Rule 3a12–3(b) under the Exchange Act" after "Commission" and before the comma.

§ 239.37 [Corrected]

12. On page 30081, Part II. (3) of Form F–7 (§ 239.37), column two, beginning on line twelve "rule 436 or 438" is corrected to read "Rule 436, 438 or 439".

§ 239.38 [Corrected]

13. On page 30085, Part II. (4) of Form F–8 (§ 239.38), column three, beginning on line thirty-nine "rule 436 or 438" is corrected to read "Rule 436, 438, or 439".

§ 239.39 [Corrected]

14. On page 30090, Part II. (5) of Form F–9 (§ 239.39), column one, beginning on line fourteen "Rule 436 or 438" is corrected to read "Rule 436, 438, or 439".

§ 239.40 [Corrected]

15. On page 30092, paragraph J. of General Instruction I. of Form F–10 (§ 239.40) is corrected by adding at the end of the fifth line of the first column "rights offering circular (in the case of exempt rights offerings) or".

§ 239.40 [Corrected]

16. On page 30094, Part II. (5) of Form F–10 (§ 239.40), column three, beginning on line thirty-one "Rule 436 or 438" is corrected to read "Rule 436, 438, or 439".

§ 239.41 [Corrected]

17. On page 30099, Part II. (4) of Form F–80 (§ 239.41), column two, beginning on line forty-eight "Rule 436 or 438" is corrected to read "Rule 436, 438, or 439".

§§ 239.42, 249.250 and 269.5 [Corrected]

18. On page 30102, in lines 21 and 22 of the third column, in General Instruction II.E.b. of Form F–X (§§ 239.42, 249.250, 269.5), remove the words "an exemption under Rule 4d–1" and add in place thereof "Rule 10a–5".

§§ 239.42, 249.250 and 269.5 [Corrected]

19. On page 30103, in the first column, Form F–X (§§ 239.42, 249.250, 269.5), Instruction 2 is corrected by removing the third sentence "Each copy shall be manually signed."

Dated: March 23, 1992.

Margaret H. McFarland,

Deputy Secretary.

[FR Doc. 92–7004 Filed 3–26–92; 8:45 am]

BILLING CODE 8010–01–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Parts 81, 176, 177, and 184

[Docket No. 92N–0089]

Food and Color Additives; Generally Recognized as Safe Substances; Technical Amendments

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the color additive, food additive, and generally recognized as safe (GRAS) regulations to correct certain typographical and other inadvertent errors.

EFFECTIVE DATES: March 27, 1991.

ADDRESSES: Written comments may be sent to the Dockets Management Branch (HFA–305), Food and Drug Administration, rm. 1–23, 12420 Parklawn Dr., Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Linda S. Kahl, Center for Food Safety and Applied Nutrition (HFF–333), Food and Drug Administration, 200 C Street SW., Washington, DC 20204, 202–254–9523.

SUPPLEMENTARY INFORMATION: FDA has discovered that certain errors have become incorporated into the agency's codified regulations on color additives, food additives, and GRAS substances. FDA is correcting these errors. These corrections are nonsubstantive, and therefore no new rulemaking is necessary. The following errors in the regulations are corrected in this document:

1. In 21 CFR 81.1 *Provisional lists of color additives*, the introductory text lists obsolete references to § 81.1(f), which was removed in the **Federal Register** of September 30, 1977 (42 FR 52393); § 81.1(g), which was removed in the **Federal Register** of July 28, 1981 (46 FR 38500 at 38501) and March 12, 1982 (47 FR 10804 at 10805); and 21 CFR 81.27, which was removed in the **Federal Register** of February 1, 1990 (55 FR 3516

at 3519). The agency is removing these obsolete references.

2. In 21 CFR 176.170 *Components of paper and paperboard in contact with aqueous and fatty foods*, in the table in paragraph (a)(5), an entry for poly (diallyldimethylammonium chloride) for use as a flocculent employed prior to sheet-forming operations is being restored. This entry, which was published in the **Federal Register** of October 1, 1982 (47 FR 43365), was inadvertently omitted from the 1988 and subsequent editions of the CFR. The agency is correcting this error.

3. In 21 CFR 177.1520 *Olefin polymers*, in the table in paragraph (c), item 3.2a the word "not" was inadvertently omitted from the phrase "* * * shall not exceed 0.051 millimeter * * *" when item 3.2a was redesignated from item 3.2 and revised at 54 FR 49079 and 49080, November 29, 1989. The agency is correcting this error.

4. In 21 CFR 184.1505 *Mono- and diglycerides*, in paragraphs (c) and (c)(1) "GRAS" and "stabilizer," respectively, were misspelled. The agency is correcting these errors.

FDA notice and public comment on these corrections is unnecessary. These corrections are wholly editorial and nonsubstantive in nature, and FDA is merely correcting these errors.

List of Subjects in 21 CFR

Part 81

Color additives, Cosmetics, Drugs.

Part 176

Food additives, Food packaging.

Part 177

Food additives, Food packaging.

Part 184

Food ingredients.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Director, Center for Food Safety and Applied Nutrition, 21 CFR parts 81, 176, 177, and 184 are amended as follows:

PART 81—GENERAL SPECIFICATIONS AND GENERAL RESTRICTIONS FOR PROVISIONAL COLOR ADDITIVES FOR USE IN FOODS, DRUGS, AND COSMETICS

1. The authority citation for 21 CFR part 81 continues to read as follows:

Authority: Secs. 701, 706 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 371, 376, 376 note).

2. Section 81.1 is amended in the introductory text by revising the last sentence to read as follows:

§ 81.1 Provisional lists of color additives.

* * * The color additives listed in paragraphs (a), (b), and (c) of this section are provisionally listed until the closing dates set forth therein.

* * * * *

PART 176—INDIRECT FOOD ADDITIVES: PAPER AND PAPERBOARD COMPONENTS

3. The authority citation for 21 CFR part 176 continues to read as follows:

Authority: Secs. 201, 402, 406, 409, 706 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321, 342, 346, 348, 376).

4. Section 176.170 is amended in paragraph (a)(5) by alphabetically adding a new entry in the table to read as follows:

§ 176.170 Components of paper and paperboard in contact with aqueous and fatty foods.

* * * * *

(a) * * *

(5) * * *

List of substances	Limitations
* * * * *	
Poly (diallyldimethylammonium chloride) (CAS Reg. No. 26062-79-3) produced by the polymerization of diallyldimethylammonium chloride so that the finished resin has a nitrogen content of 8.66± 0.4 percent on a dry basis and a minimum viscosity in a 15 weight-percent aqueous solution of 10 centipoises at 25 °C (77 °F), as determined by LVF Model Brookfield viscometer using a No. 1 spindle at 60 r/min (or equivalent method). The level of residual monomer is not to exceed 1 weight-percent of the polymer (dry basis)..	For use only as a flocculant employed prior to the sheet-forming operation in the manufacture of paper and paperboard, and used at a level not to exceed 10 mg/L (10 parts per million) of influent water.
* * * * *	

* * * * *

PART 177—INDIRECT FOOD ADDITIVES: POLYMERS

5. The authority citation for 21 CFR part 177 continues to read as follows:

Authority: Secs. 201, 402, 409, 706 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321, 342, 348, 376).

§ 177.1520 [Amended]

6. Section 177.1520 *Olefin polymers* is amended in the table in paragraph (c), in the "Olefin polymers" column, in item 3.2a by revising the phrase "shall exceed 0.051 millimeter" to read "shall not exceed 0.051 millimeter".

PART 184—DIRECT FOOD SUBSTANCES AFFIRMED AS GENERALLY RECOGNIZED AS SAFE

7. The authority citation for 21 CFR part 184 continues to read as follows:

Authority: Secs. 201, 402, 409, 701 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321, 342, 348, 371).

§ 184.1505 [Amended]

8. Section 184.1505 *Mono- and diglycerides* is amended in the second sentence of paragraph (c) by removing "(GARS)" and adding in its place "GRAS)" and in paragraph (c)(1) by removing "stabilizer" and adding in its place "stabilizer".

Dated: March 23, 1992.

Fred R. Shank,

Director, Center for Food Safety and Applied Nutrition.

Proposed Rules

Federal Register
Vol. 57, No. 60
Friday, March 27, 1992

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 92-NM-28-AD]

Airworthiness Directives; Boeing Model 747 Series Airplanes Equipped With General Electric CF6-45/50 Series Engines

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes the adoption of a new airworthiness directive (AD) that is applicable to certain Boeing Model 747 series airplanes equipped with General Electric CF6-45/50 series engines. This proposal would require repetitive inspections to detect cracking of the number 1 strut idler pulley support bracket assembly; inspections of all associated fasteners for tightness, and tightening of any loose fasteners found; and replacement of the bracket assembly. This proposal is prompted by recent reports of fatigue cracks found in the thrust control cable idler pulley support brackets on the number 1 strut. The actions specified by the proposed AD are intended to prevent the loss of engine thrust control.

DATES: Comments must be received by May 18, 1992.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM-103, Attention: Rules Docket No. 92-NM-28-AD, 1601 Lind Avenue SW., Renton, Washington 98055-4056. Comments may be inspected at this location between 9 a.m. and 3 p.m., Monday through Friday, except Federal holidays.

The service information referenced in the proposed rule may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124-2207. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. G. Michael Collins, Aerospace Engineer, Propulsion Branch, ANM-140S, Seattle Aircraft Certification Office, FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington 98055-4056; telephone (206) 227-2680; fax (206) 227-1181.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 92-NM-28-AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM-103, Attention: Rules Docket No. 92-NM-28-AD, 1601 Lind Avenue SW., Renton, Washington 98055-4056.

Discussion

There have been five recent reports of fatigue cracks found in the number 1 strut idler pulley support bracket on Boeing Model 747 series airplanes. A cracked pulley support bracket could lead to chafing of the "B" thrust control cable. If the "B" cable should break in reverse thrust, the tension in the "A" cable will cause the engine to go to full reverse thrust. If the "B" cable should break while in forward thrust, tension in the "A" cable will cause the engine to go idle. This condition, if not corrected, could result in the loss of engine thrust control.

The FAA has reviewed and approved Boeing Alert Service Bulletin 747-76A2083, dated December 18, 1991, that describes procedures for repetitive visual inspections to detect cracking of the number 1 strut idler pulley support bracket assembly; and inspections of all associated fasteners for tightness, and tightening of any loose fasteners found. The service bulletin also provides procedures for replacement of the existing aluminum pulley support bracket assembly with a pulley bracket made of Inconel 625 which, when accomplished, would eliminate the need for the repetitive inspections previously described.

Since an unsafe condition has been identified that is likely to exist or develop on other products of this same type design, the proposed AD would require repetitive inspections to detect cracking of the number 1 strut idler pulley support bracket assembly; inspections of all associated fasteners for proper tightness, and tightening of any loose fasteners found; and replacement of the bracket assembly with a bracket assembly made of Inconel 625. The actions would be required to be accomplished in accordance with the service bulletin described previously.

There are approximately 140 Model 747 series airplanes of the affected design in the worldwide fleet. The FAA estimates that 4 airplanes of U.S. registry would be affected by this proposed AD, that it would take approximately 12 work hours per airplane to accomplish the proposed actions, and that the average labor rate is $55 per work hour. Required parts would cost approximately $630 per airplane. Based on these figures, the total cost impact of the proposed AD on U.S. operators is estimated to be $5,160.

The regulations proposed herein would not have substantial direct effects

on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption "**ADDRESSES.**"

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

Boeing: Docket 92–NM–28–AD.

Applicability: Model 747 series airplanes; line positions 202 through 886, inclusive; equipped with General Electric CF6–45/50 series engines; certificated in any category.

Compliance: Required as indicated, unless accomplished previously. To prevent the loss of engine thrust control, accomplish the following:

(a) Prior to or upon the accumulation of 9,000 total flight hours on the airplane, or within 60 flight hours after the effective date of this AD, whichever occurs later, perform a visual inspection of the number 1 strut idler pulley support bracket assembly to detect cracks; and inspect all associated fasteners for proper tightness; in accordance with Boeing Alert Service Bulletin 747–76A2083, dated December 18, 1991.

(1) If a crack is found in the bracket assembly, prior to further flight, replace the bracket assembly in accordance with the service bulletin.

(2) If no cracks are found in the bracket assembly, return the airplane to service and repeat the inspections required by paragraph (a) of this AD at intervals not to exceed 600 flight hours.

(3) If any fasteners are found to be loose, prior to further flight, tighten those fasteners to within specified torque limits, in accordance with the service bulletin.

(b) Within 18 months after the effective date of this AD, replace the bracket assembly, in accordance with Boeing Alert Service Bulletin 747–76A2083, dated December 18, 1991.

(c) Replacement of the bracket assembly, as required by paragraph (b) of this AD, constitutes terminating action for the repetitive inspections required by paragraph (a)(2) of this AD.

(d) An alternative method of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Seattle Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate. The request shall be forwarded through an FAA Principal Maintenance Inspector, who may concur or comment and then send it to the Manager, Seattle ACO.

(e) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

Issued in Renton, Washington, on March 17, 1992.

James V. Devany,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 92–7099 Filed 3–26–92; 8:45 am]

BILLING CODE 4910–13–M

---

14 CFR Part 39

[Docket No. 92–NM–34–AD]

Airworthiness Directives; British Aerospace Model ATP Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes the adoption of a new airworthiness directive (AD) that is applicable to certain British Aerospace Model ATP series airplanes. This proposal would require installation of an intercompressor case (ICC) fire detector system. This proposal is prompted by reports of engine fires that originated from a bearing failure inside the ICC on Pratt and Whitney PW126 series engines. The actions specified by the proposed AD are intended to prevent severe structural damage to the airplane resulting from an engine ICC fire.

DATES: Comments must be received by May 18, 1992.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM–103, Attention: Rules Docket No. 92–NM–34–AD, 1601 Lind Avenue SW., Renton, Washington 98055–4056. Comments may be inspected at this location betwen 9 a.m. and 3 p.m., Monday through Friday, except Federal holidays.

The service information referenced in the proposed rule may be obtained from British Aerospace, PLC, Librarian for Service Bulletins, P.O. Box 17414, Dulles International Airport, Washington, DC 20041–0414. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. William Schroeder, Aerospace Engineer, Standardization Branch, ANM–113, FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington 98055–4056; telephone (206) 227–2148; fax (206) 227–1320.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 92–NM–34–AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM–103, Attention: Rules Docket No. 92–NM–34–AD, 1601 Lind Avenue SW., Renton, Washington 98055–4056.

Discussion

The United Kingdom Civil Aviation Authority (CAA), which is the airworthiness authority for the United Kingdom, recently notified the FAA that an unsafe condition may exist on certain British Aerospace Model ATP series airplanes. The CAA advises that there have been six reports of engine fires that originated from a bearing failure inside an intercompressor case (ICC) on Pratt and Whitney PW126 series engines. The fires were undetected until no longer contained by the ICC. An internal engine fire within the ICC may not be detectable in time to prevent severe structural damage to the airplane.

Although none of these fires have occurred on British Aerospace Model ATP series airplanes, these airplanes are equipped with Pratt and Whitney PW126 series engines and, therefore, are susceptible to such engine ICC fires.

The FAA's Engine and Propeller Directorate recently issued a proposal to require the installation of the engine portion of an ICC fire detector system in accordance with Pratt and Whitney Service Bulletin PW100–72–21097, dated November 9, 1991. This installation involves replacement of the existing switching valve-to-rear inlet case sealing air tube assembly with a similar tube assembly featuring an integral fire detector. The Engine and Propeller Directorate projects that all affected engines will be modified in accordance with that service bulletin by June 1, 1992.

Additionally, British Aerospace has issued Service Bulletin ATP–26–5–35225A, dated October 30, 1991, that describes procedures for installation of the airframe portion of an ICC fire detector system. Installation of this system will provide an early warning signal to the cockpit in the event of an internal engine fire within the ICC. The CAA classified this service bulletin as mandatory.

This airplane model is manufactured in the United Kingdom and is type certificated for operation in the United States under the provisions of § 21.29 of the Federal Aviation Regulations and the applicable bilateral airworthiness agreement. Pursuant to this bilateral airworthiness agreement, the CAA has kept the FAA informed of the situation described above. The FAA has examined the findings of the CAA, reviewed all available information, and determined the AD action is necessary for products of this type design that are certificated for operation in the United States.

Since an unsafe condition has been identified that is likely to exist or develop on other airplanes of the same type design registered in the United States, the proposed AD would require installation of an ICC fire detector system. The actions would be required to be accomplished in accordance with the British Aerospace service bulletin described previously.

This is considered interim action. Pratt and Whitney is currently developing a modification of the Pratt and Whitney PW126 series engine that will provide a more reliable bearing, and will effectively preclude an ICC fire resulting from a bearing failure. Once such modification is developed, approved, and available, the FAA may consider further rulemaking.

The FAA estimates that 10 airplanes of U.S. registry would be affected by this proposed AD, that it would take approximately 9 work hours per airplane to accomplish the proposed actions, and that the average labor rate is $55 per work hour. Required parts would cost approximately $985 per airplane. Based on these figures, the total cost impact of the proposed AD on U.S. operators is estimated to be $14,800, or $1,480 per airplane.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption "ADDRESSES."

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 Amended

2. Section 39.13 is amended by adding the following new airworthiness directive:

British Aerospace: Docket 92–NM–34–AD.

Applicability: Model ATP series airplanes; serial numbers 2001 through 2045, inclusive; which have been modified in accordance with Pratt and Whitney Service Bulletin PW100–72–21097, dated November 8, 1991; certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

To prevent severe structural damage to the airplane due to an internal engine fire within the intercompressor case, accomplish the following:

(a) Within 90 days after modification in accordance with Pratt and Whitney Service Bulletin PW100–72–21097, dated November 8, 1991, or within 90 days after the effective date of this AD, whichever occurs later: Install an intercompressor case (ICC) fire detector system, in accordance with British Aerospace Service Bulletin ATP–26–5–35225A, dated October 30, 1991.

(b) An alternative method of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Standardization Branch, ANM–113, FAA, Transport Airplane Directorate. The request shall be forwarded through an FAA principal Maintenance Inspector, who may concur or comment and then send it to the Manager, Standardization Branch, ANM–113.

(c) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

Issued in Renton, Washington, on March 17, 1992.

James V. Devany,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–M

DEPARTMENT OF COMMERCE

National Institute of Standards and Technology

15 CFR Ch. II

[Docket No. 920363-2063]

Request for Comments on a Proposal To Establish the Conformity Assessment Systems Evaluation Program (CASE)

AGENCY: National Institute of Standards and Technology, Commerce.

ACTION: Advance notice of proposed rulemaking; request for comments.

SUMMARY: This is to advise the public that the National Institute of Standards and Technology (NIST) is seeking public comments on a proposal to establish a voluntary Conformity Assessment Systems Evaluation (CASE) Program. The proposed program would enable the Department of Commerce, acting through NIST, to provide assurance of the competence of individual conformity assessment bodies, which should lead to enhancing acceptance of U.S. products in international markets.

NIST is proposing to offer, on a fee for service basis, a voluntary program for evaluating the competence or conformity assessment bodies and providing official recognition of those which qualify under established criteria. The program will include activities related to laboratory testing, product certification, and quality system registration.

This notice solicits comments from interested parties on the NIST proposal. In order to structure the proposed program to satisfy needs, NIST seeks specific comments regarding: (1) U.S. industry needs to satisfy foreign conformity assessment requirements (testing, certification, accreditation, quality assessment, etc.); (2) areas related to conformity assessment where industry would like to have NIST concentrate its efforts; and (3) the conformity assessment standards, criteria, or other factors required of industrial sectors of which NIST should be aware. After reviewing all comments received on these subjects, NIST will publish in the **Federal Register** further details and proposed codification of the planned procedures.

DATES: All persons who wish to present written remarks regarding this proposal must submit their comments on or before May 26, 1992. Commentors must include name, address, telephone/fax number(s), and affiliation.

ADDRESSES: Comments may be mailed to Dr. Stanley I. Warshaw, Director, Office of Standards Services, National Institute of Standards and Technology, Administration Building, room A-603, Gaithersburg, MD 20899.

FOR FURTHER INFORMATION CONTACT: Dr. Stanley I. Warshaw, telephone 301-975-4000, FAX 301-963-2871.

SUPPLEMENTARY INFORMATION: The written comments received will be on file after May 27, 1992 in the U.S. Department of Commerce Central Reference and Records Inspection Facility, room 6020, Hoover Building, Washington, DC 20230, (202-377-4115), for public perusal or copying.

Consistent with the growing importance of standardization and conformity assessment activities to international trade, NIST is soliciting views and recommendations regarding the establishment of a voluntary program by which the U.S. Government will recognize qualified conformity assessment bodies.

The qualifying criteria will follow those used internationally to the maximum feasible extent and help to ensure that U.S. conformity assessment activities lead to greater acceptance of U.S. products in world markets. The ultimate result will be the elimination of multiple testing of products and reducing the difficulties now encountered by U.S. industry having to conduct conformity assessment of products abroad.

Background

In keeping with the objectives stated in the joint communique issued by then Commerce Secretary Mosbacher and EC Commission Vice President Bangemann in June 1991, and as supported by related private sector testimony at hearings of the Department of Commerce, conducted by the International Trade Administration (ITA), in 1989 and the National Institute of Standards and Technology (NIST), in 1990, NIST proposes to establish a voluntary Conformity Assessment Systems Evaluation (CASE) Program. This program would enable NIST to evaluate the competency of requesting conformity assessment bodies and provide appropriate assurances.

Conformity assessment is used here in the sense of determining whether a product "conforms" to required standards, specifications, or other applicable descriptors, with the resultant attestation of such conformity. Of particular importance to CASE are the elements of laboratory testing, product certification, and third-party quality system registration.

The EC and the governments of other trading partners have indicated a desire to deal with a government entity which can provide assurance of the validity of U.S. conformity assessment activities pertaining to products regulated in foreign countries. To implement its regulations, the EC has established a harmonized conformity assessment approach based on "Notified Bodies" that are designated (notified) by a governmental body in each member state. The EC is soon expected to allow for Mutual recognition agreements (MRAs) with third country conformity assessment programs, such as those in the United States, if their respective Governments offer assurances that designated conformity assessment programs satisfy specified criteria.

In order to be prepared for action in this regard, NIST has analyzed the potential role for its services. Conformity assessment activities have been classified into three hierarchical levels which have been embodied in the CASE proposal.

The conformity level addresses activities that provide the actual conformity of a product or of an organization, i.e., the direct evaluation, by some entity, of a product, service, or quality system, against a standard or specification. The evaluating entity may be a testing laboratory, a product certifier, or a quality system registrar.

The accreditation level relates to entities that evaluate and accredit testing laboratories, certification bodies, or quality system registrars.

The recognition level relates to entities which provide evaluation and recognition to the accreditation level. For example, the Fastener Quality Act—Public Law 101-592 stipulates that NIST will provide recognition to qualifying laboratory accreditation bodies.

Proposal: Conformity Assessment Systems Evaluation (CASE)

NIST proposes to establish criteria and a system to evaluate and, when requested or directed, recognize specified conformity assessment activities. Program operation would be fully fee supported.

Scope

CASE would be prepared, when requested, to provide NIST accreditation to certification bodies and registration bodies, at the accreditation level. NIST already offers accreditation to testing laboratories through its National Voluntary Laboratory Accreditation Program (NVLAP).

CASE would also be prepared, when requested, to provide NIST recognition to laboratory accreditation bodies, accreditors of certification bodies, and accreditors of registrars at the recognition level.

NIST does not anticipate CASE operating at the conformity level.

Program Development

NIST proposes to devise a common procedural approach for all evaluation activities to be undertaken, relying on appropriate consensus standards and guides relating to conformity assessment.

Although the general approach will be similar, the specific criteria for each area of concern at each level will differ according to the nature of the activity to be evaluated.

The main initial concern of CASE will therefore be to develop separate, unique criteria for evaluating different kinds of conformity assesament activities, e.g., laboratory accreditation systems, certification systems, registration systems and, as necessary, for different technical or product areas. This activity will require substantial input from interested parties, supplied from public workshops or by industry sectoral committees, such as those currently serving (1) the information technology sector, represented by the Information Technology Steering Committee (ITSC) and (2) the pressure vessel sector represented by the Pressure Technology Sectoral Technology Advisory Committee (PT-STAC). A significant number of existing national and international documents as well as other model systems will be used as resources for this activity.

Procedure

The process will be initiated by voluntary application by an entity, payment of fees, quality system evaluation, quality documentation evaluation, on-site assessment, final evaluation, and approval decision. Participation will be voluntary and open to all entities which desire NIST recognition in the areas offered.

When an applicant fully demonstrates conformity with all program requirements, NIST will grant recognition in the form of a certificate of recognition and a document describing the specific scope of the recognition.

Dated: March 24, 1992.

John W. Lyons,

Director.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Chapter I

[Docket No. RM91-10-000]

Determination Not To Establish a Negotiated Rulemaking Committee

March 20, 1992.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Notice of determination not to establish a negotiated rulemaking committee.

SUMMARY: On December 12, 1991, the Federal Energy Regulatory Commission issued a notice of intent to establish a negotiated rulemaking committee. 56 FR 65863 (December 19, 1991); IV FERC Stats. & Regs. ¶ 35,021 (1991). The Commission indicated that the purpose of the negotiated rulemaking committee was to develop a uniform and comprehensive proposed regulation governing *ex parte* communications between persons outside the Commission and Commission officials and employees. After considering the comments and the applications for membership on the negotiated rulemaking committee, the Commission has decided not to establish a negotiated rulemaking committee.

FOR FURTHER INFORMATION CONTACT: Michael Schopf, Associate General Counsel, Enforcement and General & Administrative Law, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, Phone: (202) 208-0457.

SUPPLEMENTARY INFORMATION: In addition to publishing the full text of this document in the **Federal Register**, the Commission also provides all interested persons an opportunity to inspect and copy the contents of this document during normal business hours in room 3308, 941 North Capitol Street, NE., Washington, DC 20426.

The Commission Issuance Posting System (CIPS), an electronic bulletin board service, provides access to the text of formal documents issued by the Commission. CIPS is available at no charge to the user and may be accessed using a personal computer with a modem by dialing (202) 208-1397. To access CIPS, set communications software to use 300, 1200 or 2400 baud, full duplex, no parity, 8 data bits, and 1 stop bit. The full text of this notice will be available on CIPS for 30 days from the date of issuance. The complete text on diskette in WordPerfect format may also be purchased from the Commission's copy contractor, Dorn Systems Corporation, also located in room 3308, 941 North Capitol Street, NE., Washington, DC.

I. Introduction

On December 12, 1991, the Federal Energy Regulatory Commission (FERC or Commission) issued a notice of intent to establish a negotiated rulemaking committee (notice of intent). 56 FR 65863 (December 19, 1991); IV FERC Stats. & Regs. ¶ 35,021 (1991). The Commission indicated that the purpose of the negotiated rulemaking committee was to develop a uniform and comprehensive proposed regulation governing *ex parte* communications between persons outside the Commission and Commission officials and employees. IV FERC Stats. & Regs. ¶ 35,021 at 35,133. After considering the comments and the applications for membership on the negotiated rulemaking committee, the Commission has decided not to establish a committee. Instead, the Commission will convene a public conference to afford interested persons an opportunity to discuss with the Commission and the staff revision of its *ex parte* rules.

II. Discussion

A. Comments

The Commission received 12 comments in response to its Notice of Intent to Establish a Negotiated Rulemaking Committee.[1] The Commission also received letters from Chairman Dingell of the United States House of Representatives, Committee on Energy and Commerce and Chairman Synar of the United States House of Representatives, Committee on Government Operations, Subcommittee on Environment, Energy, and Natural Resources. These letters, which have been placed in the public file, raise questions as to whether a negotiated rulemaking is an appropriate vehicle to help formulate the Commission's new *ex parte* regulation. None of the other commenters opposed using negotiated rulemaking procedures in order to

[1] Comments were received from the American Gas Association (AGA), the American Public Gas Association (APGA), Associated Gas Distributors (AGD), CSA Energy Consultants (CSA), International Association of Fish and Wildlife Agencies (IAFWA), the National Association of Regulatory Utility Commissioners (NARUC), the National Association of State Utility Consumer Advocates (NASUCA), the National Rural Electric Cooperative Association (NRECA), United Distribution Companies (UDC), United States Department of Agriculture—Forest Service (DOA-FS), the United States Department of Energy (DOE), and the United States Department of the Interior (DOI).

review the Commission's *ex parte* rule.[2] Nine of the twelve comments filed were applications for membership on the committee.[3] The Commission proposed a 19-member committee in its notice of intent. See IV FERC Stats. & Regs. ¶ 35,021 at p. 34,134. Two comments supporting the Commission's notice came from associations that were included in the Commission's proposed list of committee members.[4] In addition, one commenter criticized the proposed committee as containing only members of the legal profession. However, the commenter did not nominate anyone for membership on the committee.[5]

B. Determination Not to Establish the Committee

Section 585 of the Negotiated Rulemaking Act of 1990 (NRA) provides that if an agency decides not to establish a negotiated rulemaking committee, the agency must publish notice of, and the reasons for, its decision. 5 U.S.C. 585(a)(2) (1988, as amended). The Commission has several reasons for not establishing the committee.

First, the NRA recognizes as a factor in determining whether "reg-neg" is appropriate, that there be a "limited number of identifiable interests" that will be significantly affected by a rule. The original Committee proposed by the Commission had 19 members and nine commenters have put in applications for membership in the Committee. In view of the comments and applications, we are concerned that the number of significant identifiable interests here may be too large to permit them to be represented by a balanced committee of workable size. A "reg-neg" committee may therefore be inefficient and ineffective.

In addition, effective alternative means are available to obtain early public participation. Specifically, we have decided to adopt an approach that will: (1) Retain a central benefit of the negotiated rulemaking process (*i.e.*, participation in the developmental phase of the rulemaking by interests significantly affected by the *ex parte* rules), and (2) eliminate the concerns of those opposed to use of negotiated rulemaking to revise the rules. Concurrent with the issuance of this notice, the Commission is issuing a Notice of Public Conference on the revision of the Commission's *ex parte* rules. Any interested person may attend the conference, may submit a request to speak at the conference, and may submit written comments. In the notice of Public Conference, the Commission has identified certain specific issues on which further Commission guidance may be warranted. However, the public conference is not limited to the identified topics and any interested person may comment on any aspect of the Commission's *ex parte* rules.

The use of a public conference will allow the Commission and the staff, before proposing a revised rule, to draw on the experience, expertise, and knowledge of the persons and entities who practice before it. Thus, the public conference (as with negotiated rulemaking) will allow for the early participation of affected interests in the development of an NOPR. After issuance of a NOPR, any interested person (including all participants in the public conference) will have the right to comment on the Commission's proposal pursuant to section 553 of the Administrative Procedure Act (APA). 5 U.S.C. 553 (1988 as amended).

III. Conclusion

For the reasons expressed herein, the Commission decides not to establish a negotiated rulemaking committee in this proceeding.

By direction of the Commission.

Lois D. Cashell,

Secretary.

18 CFR Chapter I

[Docket No. RM91-10-000]

Regulations Governing Ex Parte Communications; Public Conference

March 20, 1992.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Notice of public conference.

SUMMARY: The Federal Energy Regulatory Commission (Commission) is convening a public conference to afford interested persons an opportunity to discuss with the Commission and the staff revision of its *ex parte* regulations. The Commission is conducting a comprehensive review of the rules governing communications between persons outside the Commission and the Commission and its employees. The goal is to develop a new, uniform regulation that provides clearer guidance on the scope of permissible and prohibited off-the-record communications, and allows the maximum amount of information to be available to the Commission consistent with maintaining the full integrity of the Commission's decisionmaking process. The conference will allow early participation by all interested persons in the development of a proposed new rule.

DATES: The public conference will be held on Monday, April 20, 1992, at 10 a.m. Requests to participate should be received by the Commission on or before April 1, 1992. Written statements should be filed on or before April 1, 1992, and should include a one-page executive summary.

ADDRESSES: The conference will be held in the Commission's Hearing Room Number 1, 810 First Street, NE., Washington, DC. All requests to participate should identify the name of the speaker, the group represented, refer to Docket No. RM91-10-001 and be addressed to: Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426.

FOR FURTHER INFORMATION CONTACT: Michael Schopf, Associate General Counsel, Enforcement and General and Administrative Law, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, (202) 208-0597.

SUPPLEMENTARY INFORMATION: In addition to publishing the full text of this document in the **Federal Register** the Commission also provides all interested persons an opportunity to inspect and copy the contents of this document during normal business hours in room 3308, 941 North Capitol Street, NE., Washington, DC 20426.

The Commission Issuance Posting System (CIPS), an electronic bulletin board service, provides access to the text of formal documents issued by the Commission. CIPS is available at no charge to the user and may be accessed using a personal computer with a modem by dialing (202) 208-1397. To access CIPS, set communications software to use 300, 1200 or 2400 baud, full duplex, no parity, 8 data bits, and 1 stop bit. The full text of this notice will be available on CIPS for 30 days from the date of issuance. The complete text on diskette in WordPerfect format may also be purchased from the Commission's copy contractor, Dorn Systems Corporation, also located in room 3308, 941 North Capitol Street, NE., Washington, DC.

I. Introduction

The Commission is convening a public conference to afford interested persons an opportunity to discuss with the Commission and the staff its regulation governing *ex parte* communications between persons outside the Commission and members of the Commission and its employees. The Commission is undertaking a comprehensive review of its current *ex parte* regulations, codified in rule 1415 [1] and rule 2201 [2] of its Rules of Practice and Procedure. Rule 1415 applies to *ex parte* communications in oil pipeline proceedings. The Commission adopted this rule without substantive change from the rules of the Interstate Commerce Commission.[3] Rule 2201 applies generally to all proceedings, except oil pipeline proceedings,[4] pending before the Commission. The Commission adopted this rule without substantive change from the Rules of Practice and Procedure of the Federal Power Commission (FPC).[5] The FPC last revised its *ex parte* rule in 1977, in response to enactment of section 4 of the Government in the Sunshine Act.[6]

On December 12, 1991, the Commission issued notice of its intent to establish a negotiated rulemaking committee to develop a new, comprehensive *ex parte* regulation.[7] After considering the comments and applications filed in response to that notice, the Commission has decided not to establish this committee.[8] Instead, the Commission is convening a public conference. The conference will enable the Commission and the staff to receive information from the wide variety of interests and groups affected by its *ex parte* communications prohibitions prior to issuance of a Notice of Proposed Rulemaking.

II. Purpose of the Conference

The purpose of the conference is to allow interested persons to participate as fully as possible in the early stage of development of a new *ex parte* regulation. The Commission expects that after consideration of the comments made at the public conference and its own review, it will propose a new, comprehensive regulation governing *ex parte* communications. Any new rule will apply prospectively. The rulemaking process will not consider specific conduct or allegations involving *ex parte* communications in past or pending proceedings.

The Commission is interested in establishing clearer guidance as to the scope of the *ex parte* prohibitions in trial-type and adjudicatory proceedings. We encourage interested persons to present their views on how the Commission can fashion a new regulation on *ex parte* communications that achieves this goal. For example, clearer guidance is necessary on whether the *ex parte* prohibitions should apply to all Commission employees or be more limited, *e.g.*, only to Commissioners, their personal staff and/or other decisional employees. For example, clearer standards are necessary to govern informal consultations between the Commission and our environmental staff and other Federal or state agencies having environmental responsibilities or interests, as well as contacts by the Commission and our staff with applicants and other persons for the purpose of obtaining information necessary to the staff's environmental analysis.

There is likewise a need for a clearer definition to distinguish between general background discussions with the Commission and its employees, which are permitted by the Administrative Procedure Act (APA), and prohibited communications relevant to the merits of specific proceedings.[9]

There is a need for clearer definition to distinguish between permissible status inquiries or purely procedural communications and prohibited communications that are relevant to the merits of a specific proceeding.[10]

There is a need to define the extent of permissible communications with the Commission and its employees related to industry filings made in compliance with Commission orders. Parties often seek rehearing of orders in contested proceedings. Guidance is required as to the standards applicable to communications about compliance filings while the underlying proceeding is pending before the Commission on rehearing.

Also, while the *ex parte* prohibitions are not applicable to informal general policy rulemakings, additional guidance may be necessary to assure that significant off-the-record communications are reflected in the public rulemaking file so that they may be considered in the Commission's notice and comment decisional process. Since wide and diverse public participation in the formulation of general Commission policy is clearly desirable, the Commission favors procedures that will allow us to consider the viewpoints and information provided by persons outside the Commission in the decisional process of rulemakings. The Administrative Conference of the United States, for example, has recommended that agencies experiment "with procedures designed to disclose oral communications of significant information or argument respecting the mertis of proposed rules * * *." [11] The Commission is interested in considering such possible procedures.

At the public conference, interested persons are encouraged to address the issues listed in the Appendix to this Notice. They should also feel free to address any other issue relating to the adoption of a new, comprehensive *ex parte* regulation having prospective effect. The Commission strongly encourages comments on any aspect of its *ex parte* rules. The Commission's goal is to revise the rules to establish clear policy which, while maintaining the integrity of the decisionmaking process, will allow the Commission access to the broad range of information it needs to fulfill its statutory responsibilities.

III. Procedures

Persons wishing to participate in the conference must file a request to participate on or before April 1, 1992. The requests should be submitted to the Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426. Requests to speak should identify the name of the speaker and the group represented, and should refer to Docket No. RM91-10-001.

[10] *Id.*

[11] *Id.*

Participants are encouraged to address the questions in the Appendix and should be prepared for a full day of discussion. The Commission may not be able to accommodate all requests to participate in the conference. However, the Commission will seek to ensure that the various interests affected by its procedures are adequately represented. The Commission invites, but does not require, written statements from any interested persons on its *ex parte* regulations. Any such statement should include a one-page executive summary. An original and fourteen copies of the written statements should be filed with the Secretary on or before April 1, 1992.

By direction of the Commission.

Commissioner Trabandt concurred with a separate statement attached.

Lois D. Cashell,

Secretary.

Appendix to Notice of Public Conference

The Commission encourages those who wish to participate at the public conference to discuss any aspect of our regulations governing *ex parte* they believe is unclear or otherwise in need of revision. The Commission encourages those who wish to participate to come prepared to discuss the areas listed below. Participants should respond in light of the Commission's stated goal: To develop a new, uniform regulation that provides clearer guidance on the scope of permissible and prohibited off-the-record communications, and allows the maximum amount of information to be available to the Commission consistent with maintaining the full integrity of the Commission's decisionmaking process. Those submitting written statements are also encouraged to address the areas listed below.

I. Prefiling Meetings

A. Should the Commission [1] impose *ex parte* restrictions on prefiling meetings to explain and discuss a proposed filing?

B. If so, what procedures should be adopted to allow for such meetings? Should the scope of the Commission's existing regulations governing pre-filing consultations be broadened or narrowed?

C. Should prefiling meetings be required to be noticed? If so, how?

II. Pending Cases

A. When should the *ex parte* restrictions come into play? When an application or rate filing—

1. Is received by the Commission?
2. Is noticed by the Commission?
3. Is protested?
4. Is set for hearing?

B. Need for additional information

1. Once an application or rate filing is received by the Commission, should the Commission be permitted to meet with an applicant to seek supplemental information or data necessary for an understanding of the application or rate filing without the *ex parte* restrictions applying?

2. If so, should there be any limitation on what may be discussed at such a meeting?

3. Should the Commission be required to give public notice of any meeting seeking supplemental information or data?

4. How should the Commission define the difference between "supplemental information or data necessary for an understanding of an application" and a discussion relating to the merits of a pending application?

C. Information already in the record

1. Should the Commission be permitted to meet with an applicant or other party to discuss information that is already in the record of a pending case?

2. If so, should the Commission be required to give public notice of any such meeting or discussion?

D. Under what circumstances, if any, should the *ex parte* prohibitions bar consultation between the Commission and other federal agencies or state or local government agencies?

E. Should the prohibitions apply to all persons outside the Commission or only "interested persons" as under the APA provision (5 U.S.C. 577(d))? Should the same prohibitions apply to communications with nonparties as apply to communication with parties?

F. Should the Commission maintain a list of "decisional employees" for each proceeding?

G. To the extent the *ex parte* rules do apply, what procedures should be followed upon receipt of a prohibited communication?

III. Meeting NEPA Requirements

A. Should the Commission be permitted to meet with an applicant to seek supplemental information, or to understand data contained in an application, in order to meet the requirements of the National Environmental Policy Act of 1969 without the *ex parte* restrictions applying?

B. Should the Commission be permitted to meet with other governmental entities (other federal agencies, for example, or state or local government agencies) and other persons affected by the project in order to meet the requirements of NEPA without the *ex parte* restrictions applying?

C. If so, should the applicant or other parties be allowed to be present?

D. If so, should such a meeting be required to be noticed?

IV. Procedural Inquiries

A. Should the Commission provide an exemption from the *ex parte* restrictions for procedural inquiries or status reports?

1. If so, how should such an inquiry or status report be defined?

2. To whom would such an exemption apply?

3. Should a record of such an inquiry nonetheless be required to be put in the public file of the case?

B. How should the difference between a merits discussion and a procedural inquiry or status report be defined? What procedural matters are *not* relevant to the merits of a proceeding?

C. Under what circumstances, if any, should the *ex parte* prohibitions bar a party's inquiry as to the procedural status of a case or a request for prompt Commission action?

D. Under what circumstances, if any, should the *ex parte* prohibitions bar consultation between the Commission and other federal agencies or state or local government agencies?

E. Order No. 555, the proposed incentive rate policy statement and the Final Rule (Mega-NOPR) all posit a state of affairs where rate cases and other formal FERC proceedings will be less frequent. Thus, there will not be FERC staff counsel assigned to most cases. How will this change a number of the exceptions under existing part 2201(b)? What additional standards will be required to protect against *ex parte* communication for such procedures as the proposed reconciliation meetings under Order No. 555?

V. Informal Rulemakings

A. To what extent, if any, should the *ex parte* prohibitions apply to informal rulemakings when issues treated therein are before the Commission in adjudications or other contested proceedings?

B. Should the Commission adopt any guidelines or procedures governing disclosure of significant off-the-record communications that relate to a forthcoming or pending rulemaking? If so—

1. What should they be?

2. Should they apply to discussions with Congress, other federal agencies, or state or local government agencies?

VI. General Background Discussions

A. What is a general policy issue?

B. Should the Commission be prohibited from discussing a general policy issue with anyone?

C. What restrictions, if any, should apply if the policy issue under discussion is pending in an adjudication or other contested proceeding?

VII. Investigations

A. What changes, if any, need to be made to the regulations at section 1b to address procedures to be followed for investigations of allegations of *ex parte* communication?

B. Should the *ex parte* regulations set forth options for procedures to be used in addressing *ex parte* allegations? If so, what should these options be?

[1] In each case where the word Commission is used, it is intended to mean any Member of the Commission, or of his or her personal staff, or any employee of the Commission.

Regulations Governing Ex Parte Communications (Notice of Public Conference)

[Docket No. RM91-10-000]

Issued March 20, 1991.

TRABANDT, Commissioner, concurring:

I concur in the instant Notice of Public Conference and the companion Notice of Determination Not To Establish A Negotiated Rulemaking Committee contemporaneously issued in this docket. I write separately to discuss several issues related to these companion Notices.

First, I strongly support the Commission's determination not to establish a negotiated rulemaking committee. I have steadfastly opposed the establishment of a negotiated rulemaking committee for regulations governing *ex parte* communications for the reasons set forth in my separate opinion concurring in part and dissenting in part to the Commission's December 12, 1991, Notice of Intent to Establish a Negotiated Rulemaking Committee. Without belaboring those arguments, I believe the Commission has finally reached the right result in abandoning the negotiated rulemaking approach to *ex parte* regulations.

Second, I continue to have serious concerns about several of the subjects set for review in the forthcoming Public Conference, about which I wrote in the context of the previously proposed negotiated rulemaking. For the convenience of interested parties, I will simply repeat excerpts from that separate opinion.

1. Introduction

At the outset, I want to make three points very clear. First, I want to state categorically my deep respect for the views of Chairman Allday and my fellow Commissioners on this sensitive subject. I recognize fully that this is a matter of judgment that involves a number of factors in terms of fact, law and policy, as well as our own individual personal experiences on these matters. That I have a strong preference for a traditional NOPR does not by any measure suggest any lack of respect for my colleagues' own assessment of those factors or their conclusion.

Second, I am not opposed at all to clarifying the operation of the *ex parte* rules as they apply to adjudications. In fact, I agreed with Commissioner Moler's suggestion to that effect during the *Iroquois* proceeding (52 FERC ¶ 61,091) and *ex parte* investigation last year. As the discussion at the Commission meeting made clear, all five members of the Commission are willing to put in place such a clarification, and I strongly support that objective.

Third, I am not opposed to the use of the negotiated rulemaking procedure in our regulation of jurisdictional companies in the electric power, hydroelectric, natural gas and oil pipeline industries. In an appropriate case, the negotiated rulemaking procedure would provide a valuable alternative to the traditional NOPR, as the Environmental Protection Agency has found in the past and Congress established by statute in the Negotiated Rulemaking Act of 1990, 5 U.S.C. 581. I look forward with considerable enthusiasm to the initiation of a negotiated rulemaking in one of our regulatory program areas in the near future. And, I am confident that rules fashioned in a negotiated rulemaking procedure can provide the significant advantages over adversarial rulemakings that Congress contemplated, such as (1) increasing the acceptability and improving the substance of rules, (2) making it less likely that the affected parties will resist enforcement or challenge such rules in court, and (3) shortening the amount of time needed to issue final rules. But, at bottom, I am simply not persuaded that this is the appropriate case.

I also believe that it also bears repeating, as I wrote during the Iroquois *ex parte* review and subsequently informal correspondence to Chairman Dingell of the Committee on Energy and Commerce and Chairman Conyers of the Committee on Government Operations of the U.S. House of Representatives, that we should not let the *ex parte* rules be used as the basis for gagging, intimidating, mushrooming or muzzling us in the conduct of our official offices. I have maintained an "open door" policy since I took the oath of office as a Commissioner on November 4, 1985. Within the limitations of the *ex parte* rules and other applicable Commission regulations, I have met with literally hundreds of company officials, trade association representatives, consumer and environmental organization representatives, U.S. state and local officials, Canadian Federal and provincial officials and other interested groups. I also have attended and spoken at numerous meetings and conferences involving such groups and officials since November 1985.

As I have said before, I consider such communications to be an important function of the Commission and this office, in terms of both explaining Commission policies to interested parties and maintaining an up-to-date understanding of current industry conditions. It also is interesting to note that during the course of the Iroquois project proceedings over the past several years, I met in that fashion, subject to the aforementioned limitations, with various parties who also happened to be supporters or opponents of the project, including representatives of the project, equity owning utilities, various state officials, the Independent Petroleum Association of America and the New England Fuel Institute, among many others. There were no *ex parte* communications from any party related to Iroquois project proceedings in any such meetings or discussions, nor with regard to any other pending adjudication. (Footnote omitted.)

In regard to the Commission's need to have access to outside information, I was thoroughly heartened by the discussion of the *ex parte* issue in the *per curiam* opinion of the U.S. Court of Appeals for the District of Columbia Circuit in *Louisiana Association of Independent Producers and Royalty Owners* v. *FERC*, No. 91-1020, decided March 10, 1992, regarding the Iroquois/Tennessee Project. The Opinion states, as follows (slip op. at 18-20):

> The Coalitions' complaints about the meetings in April and May of 1990 also are without support in the record. Although the meetings took place during the pendency of this proceeding, there is no evidence in the record, other than a single, quickly reproached comment, of any discussion going to the merits of the Project applications. The meetings focused instead upon the impact of cases pending at that time before this court, upon general problems in the industry, and upon the procedural status of the Iroquois application. Such discussions are not prohibited by the mere fact an application is pending. The Administration Procedure Act bars *ex parte* communications only if they are "relevant to the merits of the proceeding." 5 U.S.C. 557(d)(1)(A). Other communications, including inquiries into the procedural status of the case or general background discussions, are not prohibited. *See, e.g., Professional Air Traffic Controllers Org.* v. *FLRA*, 685 F.2d 547, 563 (D.C. Cir. 1982).
>
> Moreover, acting upon the chance that the industry representatives were attempting subtly and indirectly to influence the outcome of this proceeding,[2] the Commission wisely placed summaries of these meetings in record. By doing so, it apprised the petitioners of any argument that may have been presented privately, thereby maintaining the integrity of the process and curing any possible prejudice that the contacts may have caused in this case. 5 U.S.C. 557(d)(1)(C) & (D); *PATCO* v. *FLRA*, 685 F.2d at 565 & n.36; *Sierra Club* v. *Costle*, 657 F.2d 298, 399-99 (D.C. Cir. 1981).
>
> [2] Representatives from the LDCs noted a cold snap the previous December, discussed the general supply-and-demand picture for the Northeast, and urged that Iroquois' application be processed in a timely or expedited manner. Considering all these factors together, one might infer a circuitous attempt to impress upon the Commission the urgency of approving the Iroquois/Tennessee Project. It is, however, important to note that none of the factors mentioned by the representatives were news to the Commission. Moreover, in public letters to the Commission during the same time period, the industry representatives presented a more complete and direct argument for expedited considerations and approval.

By the same token, the Commissioners involved in those meeting properly refused to disqualify themselves due to these contacts. Because the record reveals at best subtle and indirect attempts to influence Commission officials, no disinterested observer would infer that those officials had in any measure prejudged the applications. *Cinderella Career & Finishing School* v. *FTC*, 425 F.2d 583, 591 (D.C. Cir. 1970). It is expected that administrative officials will build up expertise through experience with recurring issues. *FTC* v. *Cement Inst.*, 333 U.S. 683, 702 (1984). Such expertise should not lightly be tossed aside. *Cf. Laird* v. *Tatum*, 409 U.S. 824, 837 (1972) (memorandum by Justice Rehnquist).

In short, while there were meetings between agency officials and Iroquois and other industry officials, the record supports the Commission's conclusion that there was nothing improper about those meetings. Agency officials may meet with members of the industry both to facilitate settlement and to maintain the agency's knowledge of the industry it regulates. As this court has noted before, "such informal contacts between agencies and the public are the 'bread and butter' of the process of administration and are completely appropriate so long as they do not frustrate judicial review or raise serious questions of fairness." *HBO* v. *FCC*, 567 F.2d at 57. Because we find no evidence in the record indicating that judicial review has been frustrated or that any serious questions of fairness have been presented, we sustain the Commission's finding that "the integrity

of the decisionmaking process has been fully maintained." Order No. 357 at 61,719.

I should note, as the court did in footnote 3 of the opinion, that the Court did not consider the report prepared by the General Accounting Office regarding the meetings covered by the General Counsel's memorandum, which was the subject of separate hearings earlier this year in the Subcommittee on Environment, Energy, and Natural Resources of the House Committee on Government Operations. My quotation of the court's opinion here does not serve to alter in any substantive way my testimony in those hearings. Rather, I quote this passage to highlight the emphasis the court again places on "such informal contacts between agencies and the public are the 'bread and butter' of the process of administration and are completely appropriate so long as they do not frustrate judicial review or raise serious questions of fairness." (Emphasis added.) I am pleased to see that emphasis in this most recent statement of the court and urge all parties to reflect it in the formulation of their comments.

The instant Notice states that, "while the *ex parte* prohibitions are not applicable to informal general rulemakings, additional guidance may be necessary to assure that significant off-the-record communications are reflected in the public rulemaking file so that they may be considered in the Commission's notice and comment decisional process." (Slip op. at 6.) I would reiterate the concerns expressed in my December 19, 1991 separate opinion, as attached.[1]

Finally, the Appendix to this Notice sets forth a comprehensive sentence outline of the many potential *ex parte* issues in existing regulations. I would suggest one additional issue for the consideration of interested parties, as I did at the March 11, 1992 Commission meeting. And, that issue is the relationship of the Commission's *ex parte* regulations to the Commission's separation of functions regulations. Based on recent experience, I am concerned that the clear functional lines between Commission employees serving as trial staff in adjudications and those serving as advisory staff for specific cases may be increasingly blurred under current Commission practice. With the advent of "paper hearings," preliminary determinations," enforcement settlement negotiations, and Commission directed "settlement conferences" (such as those under Order No. 528) in lieu of traditional, trial-type, evidentiary hearings in many adjudications today, advisory staff at various levels of authority from General Counsel/Office Director to less senior Commission staff now apparently participate in proceedings where they could be exposed to information that might constitute an *ex parte* communication under certain separation of function circumstances, but not necessarily under other such circumstances. I would invite interested parties to address this issue in the context of how the Commission should analyze refinement of the *ex parte* rules in this docket in the context of that perceived blurring of the separation of function lines, and whether the Commission should consider refinement or reform of the separation of function regulations, and if so, how, concurrently with this *ex parte* review.

For these reasons, I concur.

Charles A. Trabandt,

Commissioner.

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[FI-42-90]

RIN 1545-AO69

Bad Debt Reserves of Thrift Institutions; Correction

AGENCY: Internal Revenue Service, Treasury.

ACTION: Correction to notice of proposed rulemaking.

SUMMARY: This document contains corrections to the notice of proposed rulemaking (FI-42-90), which was published in the Federal Register on January 13, 1992 (57 FR 1232). The proposed regulations relate to the thrift institutions that become ineligible to use the reserve method of accounting for bad debts allowed by section 593 of the Internal Revenue Code (Code).

FOR FURTHER INFORMATION CONTACT: Bernita L. Thigpen, (202) 566-3297 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

The notice of proposed rulemaking that is the subject of these corrections provides guidance for thrift institutions that become ineligible to use the reserve method of accounting for bad debts allowed by Internal Revenue Code section 593. The proposed regulations set forth rules on changing from and returning to this method of accounting, and the proposed regulations provide procedures for complying with these rules. These proposed regulations are issued under the authority of Internal Revenue Code section 446 and 481.

Need for Correction

As published, the proposed regulations contain errors which may prove to be misleading and are in need of clarification.

Correction of Publication

Accordingly, the publication of proposed regulations (FI-42-90), which was the subject of FR Doc. 92-697, is corrected as follows:

§ 1.593-14 [Corrected]

1. On page 1242, column 3, § 1.593-14(d)(6), line 4 of paragraph (i) of *Example 1*, the language "Pursuant to § 1.593-13(c)(2), in 1992 R restates" is corrected to read "Pursuant to § 1.593-13(c)(2), in 1992 T restates".

§ 1.593-14 [Corrected]

2. On page 1243, column 1, § 1.593-14(d)(6), paragraph (ii) of *Example 3*, last line of that column, the language "Under the principles of § 1.593-14(d)(4)(iv)," is corrected to read "Under the principles of § 1.593-14(d)(4)(v),".

Dale D. Goode,

Federal Register Liaison Officer, Assistant Chief Counsel (Corporate).

BILLING CODE 4830-01-M

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

29 CFR Part 1625

Age Discrimination in Employment Act

AGENCY: Equal Employment Opportunity Commission.

ACTION: Request for comments.

SUMMARY: The Commission hereby publishes a request for comments regarding the Age Discrimination in Employment Act of 1967, as amended (ADEA), 29 U.S.C. 621 *et seq.*, relating to Titles I and II of the Older Workers Benefit Protection Act of 1990 (OWBPA), Pub. L. 101-433, 104 Stat. 978 (1990).

DATES: Comments should be submitted on or before July 27, 1992.

ADDRESSES: Comments should be submitted, in quadruplicate if possible, to: Executive Secretariat, EEOC, 1801 L Street, NW., Washington, DC 20507.

FOR FURTHER INFORMATION CONTACT: Joseph N. Cleary, Director, ADEA Division, Paul E. Boymel (Title I questions) or John K. Light (Title II questions), Office of Legal Counsel, EEOC, 1801 L Street, NW., Sixth Floor, Washington, DC 20507, (202) 663-4690.

SUPPLEMENTARY INFORMATION: As the result of the decision of the United States Supreme Court in *Public Employees Retirement System of Ohio* v. *Betts*, 492 U.S. 158 (1989), Congress amended the ADEA in 1990 to clarify the prohibitions against discrimination on the basis of age in employee benefits (Title I of OWBPA). Additionally, in Title II of OWBPA Congress addressed waivers of rights and claims under the ADEA. The Commission wishes to receive comments on certain OWBPA provisions, and to obtain information on certain technical issues under OWBPA.

Title I of OWBPA

Section 4(a)(1) of the ADEA sets forth the employer conduct that is prohibited (unlawful discrimination by employment agencies and labor organizations is covered by sections 4(b) and 4(c) of the ADEA, respectively):

> (a) It shall be unlawful for an employer—
> (1) To fail or refuse to hire or to discharge any individual or otherwise discriminate against any individual with respect to his compensation, terms, conditions, or privileges of employment, because of such individual's age.

However, Congress fashioned an exception to the general prohibitions in section 4(a)(1). Prior to the passage of OWBPA, that exception, in section 4(f)(2), provided:

> It shall not be unlawful for an employer, employment agency, or labor organization—
> (2) To observe the terms of a bona fide seniority system or any bona fide employee benefit plan such as a retirement, pension, or insurance plan, which is not a subterfuge to evade the purposes of this Act, except that no such employee benefit plan shall excuse the failure to hire any individual and no such seniority system or employee benefit plan shall require or permit the involuntary retirement of any individual specified by section 12(a) of this Act because of the age of such individual.

On June 21, 1969, the Department of Labor (DOL), which at that time had jurisdiction over the ADEA, published in the Federal Register an interpretative Bulletin on employee benefit plans under section 4(f)(2), 34 FR 9709, 29 CFR 860.120. After the ADEA was amended in 1978 to preclude the mandatory retirement of covered employees under an employee benefit plan, and to raise the upper age limit under the ADEA from 65 to 70, DOL issued an amended Interpretative Bulletin (1979 I.B.), 44 FR 30648 (May 25, 1979). The 1979 I.B. provided more detailed guidance on employee benefit plans covered under the ADEA and provided special rules for pension plans. The 1979 I.B. reiterated DOL's 1969 interpretation of section 4(f)(2), the so-called "equal cost or equal benefit" test:

> The legislative history (of section 4(f)(2)) indicates that its purpose is to permit age-based reductions in employee benefit plans where such reductions are justified by significant cost considerations * * *. Where employee benefit plans do meet the criteria in section 4(f)(2), benefit levels for older workers may be reduced to the extent necessary to achieve approximate equivalency in cost for older and younger workers. A benefit plan will be considered in compliance with the statute where the actual amount of payment made, or cost incurred, in behalf of an older worker is equal to that made or incurred in behalf of a younger worker, even though the older worker may thereby receive a lesser amount of benefits or insurance coverage.
> 44 FR 30650 (May 25, 1979).

The Commission continued the I.B. in effect when it took over jurisdiction of the ADEA on July 1, 1979. On July 1, 1987, the I.B. was redesignated as 29 CFR 1625.10. With a few exceptions, the rules in the 1979 I.B. remained intact until June 23, 1989, the date of the *Betts* decision.

In *Betts*, the Supreme Court determined, among other things, that the "equal cost or equal benefit" interpretation set forth in the I.B. was not consistent with the ADEA, and was an incorrect interpretation of the ADEA's "subterfuge" provision. The Court further declared that employee benefit plans were exempt from the purview of the ADEA as long as such plans were not a method for discriminating in non-fringe benefit aspects of employment.

Congress decided that the ruling in *Betts* warranted a legislative response. On October 16, 1990, President Bush signed OWBPA which amended section 4 of the ADEA in significant detail. In principal part, Title I of OWBPA took the following steps:

(1) OWBPA amended section 11 of the ADEA to make it clear that "employee benefits" would be included in the definition of "compensation, terms, conditions, or privileges of employment" in section 4(a)(1) of the ADEA.

(2) OWBPA amended section 4(f)(2) to incorporate the equal cost or equal benefit principle embodied in the regulations at 29 CFR 1625.10, as in effect on June 22, 1989.

(3) OWBPA provided exceptions and "safe harbors" for voluntary early retirement plans, severance pay plans, and long-term disability plans.

(4) OWBPA addressed special concerns of State and local governments regarding potential cost increases in two ways: (a) By providing for a two-year delayed effective date; and (b) by allowing current employees to elect to retain their present long-term disability coverage when a new plan is implemented even though such present coverage may not comply with the ADEA.

Regarding State and local governments, the Commission wishes to emphasize that the interpretative guidance in 29 CFR 1625.10, and specifically referenced in section 4(f)(2)(B)(i) of the ADEA, is intended to assist State and local governments as well as the private sector in complying with the Act. The Commission welcomes inquiries from State and local governments in need of additional assistance with OWBPA. Such inquiries may be directed to the ADEA Division, Office of Legal Counsel (see p. 1).

Title II of OWBPA

Title II of OWBPA amends section 7 (29 U.S.C. 626) of the ADEA by adding a subsection (f) concerning waivers of rights or claims under the Act. Title II expressly provides that unsupervised waivers may be valid and enforceable if they meet certain enumerated requirements and are otherwise knowing and voluntary.

The amendment made by Title II "shall not apply with respect to waivers that occur before the date of enactment" of the Older Workers Benefit Protection Act. (Section 202(a)).

In light of the foregoing amendments to the ADEA, the Commission seeks specific information relating to any or all of the questions listed below, but also welcoms comments on other areas of concern under OWBPA. While the Commission welcomes technical comments, it is requested that such technical input also be summarized in layperson's terms.

Questions for public comment:

Title I of OWBPA

I. In General

a. Do state and local governments have special concerns in prividing employee benefit plans and in complying with the OWBPA amendments? What assistance, if any, do state and local governments need in identifying and securing independent technical advice to comply with OWBPA? (See section 105(c)(3) of OWBPA). See also questions A1 and 2 in section III below.

b. Do private sector employers have special concerns in providing employee benefit plans and complying with the OWBPA amendments?

c. What, if any, changes are required or advisable in the present benefit package approach described in § 1625.10(f)(2) as a result of OWBPA?

d. Does OWBPA affect so-called "cafeteria plans" which provide employees with a choice of benefits or benefit plans. If so, how?

e. In light of the 1986 OBRA amendments to ERISA section 202(a)(2) and IRC section 410(a)(2) removing such an exclusion, is there any basis for continuing to allow the exclusion of individuals from non-ERISA defined benefit pension plans on account of their

age at hire? See 29 CFR 1625.10(f)(1)(iii)(A).

f. Should the Commission provide "safe harbors" (specific examples of permissible plans) with respect to the employee benefit plans discussed in section 1625.10? Please give examples and provide supporting data.

II. Specific Types of Employee Benefit Plans

A. Severance Pay Plans

1. Can benefits other than those described in section 4(1)(2) of the ADEA (additional pension benefits and retiree health benefits) be integrated with severance pay under the ADEA?

2. Does the ADEA as amended by OWBPA allow an employer to require pension-eligible employees to delay the receipt of pension payments until severance payments expire, If so, under what rationale,

3. Section 4(1)(2)(A) of the ADEA permits two deductions from severance pay, one for the value of retiree health benefits and the other for the value of additional pension amounts. If an employee elects not to receive either or both of the two benefits, is the employer permitted to deduct either or both of the amounts from severance pay? If so, under what rationale?

4. How should the deduction for the value of additional pension benefits be calculated? Should the value be based upon a single-life annuity value for all employees? What is the effect of the Internal Revenue Code provision that requires survivor annuities in some circumstances?

5. What is intended by the requirement in section 4(1)(2)(D) that the package of retiree health benefits "be at least comparable" to benefits provided under Title XVIII of the Social Security Act?

6. What was Congress' intent in using the language "the value for each individual" in paras. 4(1)(2)(E) (i)–(iv)?

B. Long-Term Disability (LTD) Plans

The preamble to the § 1625.10 interpretation regarding long-term disability benefits contains a reference to the following plan design:

Age at disablement	Duration of benefits (in years)
61 or younger	To age 65
62	3½ years.
63	3
64	2½
65	2
66	1¾
67	1½
68	1¼
69	1

See 44 FR 30655 (May 25, 1979). The preamble discussion does not refer to this plan as a safe-harbored plan. Rather, it notes that such a plan would be in compliance with the law under a benefit-by-benefit analysis if based on reasonable actuarial data and reasonable extrapolations therefrom. *Id.* The actual safe-harbor, found in § 1625.10(f)(1)(ii), provides that the government will not assert a violation where the level of benefits is not reduced and the duration of benefits is reduced in the following manner:

(A) With respect to disabilities which occur at age 60 or less, benefits cease at age 65.

(B) With respect to disabilities which occur after age 60, benefits cease 5 years after disablement.

1. Is valid data currently available to support use of the above described "preamble plan" as a safe-harbor? Is valid data currently available to support the continued use of the safe harbor in § 1625.10(f)(1)(ii)? Is valid data currently available to develop additional safe harbors? If so, please give examples and provide supporting data.

2. Section 4(1)(3) of the ADEA provides that in certain circumstances pension amounts paid or made available to employees on LTD can serve to reduce the amount of LTD to be paid. How should the value of such pension amounts be calculated (see above at II A 4.)

3. Does section 4(1)(3) include social security payments (retirement payments) as an offset against LTD?

C. Early Retirement Plans

1. Section 4(f)(2)(B)(ii) of the ADEA provides that it is not unlawful to observe the terms of a bona fide employee benefit plan "consistent with the relevant purpose or purposes of this Act." Give examples of plans that you believe would be consistent with the relevant purpose or pusposes of the Act, and provide the rationale for your view.

2. Does OWBPA allow the reduction of elimination of an early retirement benefit in correlation wtih increasing age or increasing years of service? If so, under what circumstances?

3. How should the provision in section 4(1)(1)(B)(i) of the ADEA, "payments that consitute the subsidized portion of an early retirement benefit," be defined?

4. Can the safe-harbored early retirement plans in section 4(1)(1)(B) be offered as lump sum amounts?

5. Is an early retirement plan permitted to combine the safe-harbors listed in section 4(1)(1)(B) of the ADEA, e.g., by offering an incentive package containing a social security supplement and a waiver of actuarial reduction to the same person or group of persons?

6. How is the amount of the social security supplement properly calculated? Is the amount limited to each employee's social security entitlement? Is the employer permitted to calculate an approximate average for the entire workforce or that portion of the workforce affected by the plan?

7. Should the Commission develop a safe-harbor relating to the amount of the social security supplement payment contained in section 4(1)(1)(B)(ii) (e.g., permitting a plan to offer X dollars per month for plans terminating at age 62 or Y dollars per month for plans terminating at age 65), thus relieving employers of the obligation of calculating the amount of such benefits for each employee? How should this amount be calculated?

8. Can an employer that is exempt from Social Security Act coverage offer such a plan? If so, can the plan only be offered to employees who have accrued a social security benefit through other employment?

9. Are social security supplement plans permitted to cut off benefits at ages other than the ages referenced in Title II of the Social Security Act for receiving reduced or unreduced benefits? (E.g., could a plan provide such benefits until the age of 55? 68?) Please provide your reasoning.

D. Life Insurance Plans

1. Does adequate data exist that would allow the Commission to develop a satisfactory safe harbor relating to a specific decrease in benefits based upon age (e.g., a safe harbor could provide that a life insurance plan providing 100 units of coverage for persons in the 55–59 age bracket need only provide 90 units of coverage for persons in the 60–64 age bracket)? Please explain and provide supporting data. Should the Commission attempt to develop such a safe harbor?

2. What, if any, obligation does the employer have to older workers if life insurance is not generally available because of age?

E. Health Insurance Plans

1. Did the OWBPA amendments give rise to health insurance plan issues? If so, describe these issues.

III. Effective Date Issues

A. State and Local Governmental Plans

1. While a delayed effective date applies to many such plans (until October 16, 1992), if a plan is amended prior to that date, when does OWBPA apply?

2. If a plan can be amended either legislatively or by executive action (e.g., by the Governor or Mayor), is such a plan entitled to the delayed effective date?

B. Collectively Bargained Plans

1. If any part of a plan covered by the delayed effective date in section 105(b) of OWBPA is amended prior to the end of the collective bargaining agreement term, is such plan immediately covered by OWBPA?

2. Does the extension of the term of a collective bargaining agreement extend the effective date of OWBPA?

3. In a case in which an employee benefit plan covers both union and non-union employees, is the entire plan entitled to the delayed effective date specified in section 105(B) of OWBPA?

C. Continued Benefit Payments

1. Section 105(e) of OWBPA exempts a series of benefit payments that began prior to the effective date and that continue after the effective date pursuant to an arrangement that was in effect on the effective date (with other conditions not pertinent to this question). Would a verbal agreement constitute "an arrangement that was in effect" under this section?

2. What actions in providing a substantial modification of a stream of benefits would constitute intent to evade the purposes of the ADEA under section 105(e) of OWBPA?

Title II of OWBPA

a. What is meant by the subparagraph (D) language allowing waivers "only in exchange for consideration in addition to anything of value to which the individual already is entitled?" May an employer who has previously given benefits without requiring a waiver of ADEA rights now change its policy or practice to require such a waiver in exchange for these benefits?

b. What, if any, restrictions are there on using fringe benefits, or certain kinds of fringe benefits, as consideration for a release?

c. What is the legal status of the consideration paid for a waiver if EEOC finds that the waiver is invalid?

d. Does the language in subparagraph (F)(ii) and (H)—"other employment termination program offered to a group or class of employees"—include involuntary terminations such as reductions-in-force?

e. Are the requirements for 21-days, 45-days and 7-days specified in Title II intended to be calendar days or work days? Can these periods be shortened by mutual consent of the parties? Please provide your reasoning.

f. What number of employees is needed to comprise a "group" or "class" as used in subparagraphs (F)(ii) and (H) of Title II?

g. How should the following terms, as used in subparagraph (H) of Title II, be defined: "program;" "group or class of employees;" "class, unit, or group of individuals;" "job classification or organizational unit"?

h. Does OWBPA allow the employer to make the information described in subparagraph (H) available for examination in, for example, its personnel office?

i. What is meant in section 7(f)(2) by the language "in settlement of a charge filed with the Equal Employment Opportunity Commission * * * under section * * * 15?" Does this include all complaints filed by federal sector employees with their employing agencies or is it limited to settlements with ADEA waivers after notice of suit letters are sent by federal employees to the EEOC?

j. Are state Fair Employment Practices (FEP) agencies that have worksharing agreements with the EEOC covered by the requirements of section 7(f)(2)?

k. What are the minimal requirements of knowing and voluntary where an employer and employee privately and independently settle a charge that has been filed with EEOC?

l. Section 7(f)(3) states that "the party asserting the validity of a waiver shall have the burden of proving a court of competent jurisdiction that a waiver was knowing and voluntary." Would the same burden of proof apply in an arbitration proceeding?

Signed on behalf of the Commission this 18th day of March 1992, at Washington, DC.

Evan J. Kemp, Jr.,

Chairman, Equal Employment Opportunity Commission.

[FR Doc. 92-6999 Filed 3-26-92; 8:45 am]

BILLING CODE 6570-06-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 261

[SW-FRL-4117-5]

Hazardous Waste Management System; Identification and Listing of Hazardous Waste; Proposed Exclusion

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule and request for comment.

SUMMARY: The Environmental Protection Agency (EPA or Agency) today is proposing to grant a petition submitted by MAHLE, Incorporated, Morristown, Tennessee, to exclude certain solid wastes generated at its facility from the list of hazardous wastes contained in 40 CFR 261.31 and 261.32. This action responds to a delisting petition submitted under 40 CFR 260.20, which allows any person to petition the Administrator to modify or revoke any provision of Parts 260 through 265 and 268 of title 40 of the Code of Federal Regulations, and under 40 CFR 260.22, which specifically provides generators the opportunity to petition the Administrator to exclude a waste on a "generator-specific" basis from the hazardous waste lists. Today's proposed decision is based on an evaluation of waste-specific information provided by the petitioner.

The Agency is also proposing the use of a fate and transport model to evaluate the potential impact of the petitioned waste on human health and the environment, based on the waste-specific information provided by the petitioner. The model has been used to evaluate the petition to predict the concentration of hazardous constituents that may be released from the petitioned waste, once it is disposed of.

DATES: EPA is requesting public comments on today's proposed decision and on the applicability of the fate and transport model used to evaluate the petition. Comments will be accepted until May 11, 1992. Comments postmarked after the close of the comment period will be stamped "late."

Any person may request a hearing on this proposed decision by filing a request with the Director, Characterization and Assessment Division, Office of Solid Waste, whose address appears below, by April 13, 1992. The request must contain the information prescribed in 40 CFR 260.20(d).

ADDRESSES: Send three copies of your comments to EPA. Two copies should be sent to the Docket Clerk, Office of Solid Waste (OS–305), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460. A third copy should be sent to Jim Kent, Delisting Section, Waste Identification Branch, CAD/OSW (OS–333), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460. Identify your comments at the top with this regulatory docket number: "F–91–MIEP–FFFFF."

Requests for a hearing should be addressed to the Director, Characterization and Assessment Division, Office of Solid Waste (OS–

333), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460.

The RCRA regulatory docket for this proposed rule is located at the U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460, and is available for viewing (room M2427) for 9 a.m. to 4 p.m., Monday through Friday, excluding Federal holidays. Call (202) 260–9327 for appointments. The public may copy material from any regulatory docket at a cost of $0.15 per page.

FOR FURTHER INFORMATION CONTACT: For general information, contact the RCRA Hotline, toll free at (800) 424–9346, or at (703) 920–9810. For technical information concerning this notice, contact Narendra K. Chaudhari, Office of Solid Waste (OS–333), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460, (202) 260–4787.

SUPPLEMENTARY INFORMATION:

I. Background

A. Authority

On January 16, 1981, as part of its final and interim final regulations implementing Section 3001 of RCRA, EPA published an amended list of hazardous wastes from non-specific and specific sources. This list has been amended several times, and is published in 40 CFR 261.31 and 261.32. These wastes are listed as hazardous because they typically and frequently exhibit one or more of the characteristics of hazardous wastes identified in subpart C of part 261 (*i.e.*, ignitability, corrosivity, reactivity, and toxicity) or meet the criteria for listing contained in 40 CFR 261.11 (a)(2) or (a)(3).

Individual waste streams may vary, however, depending on raw materials, industrial processess, and other factors. Thus, while a waste that is described in these regulations generally is hazardous, a specific waste from an individual facility meeting the listing description may not be. For this reason, 40 CFR 260.20 and 260.22 provide an exclusion procedure, allowing persons to demonstrate that a specific waste from a particular generating facility should not be regulated as a hazardous waste.

To have wastes excluded, petitioners must show that wastes generated at their facilities do not meet any of the criteria for which the wastes were listed. See 40 CFR 260.22(a) and the background documents for the listed wastes. In addition, the Hazardous and Solid Waste Amendments (HSWA) of 1984 require the Agency to consider any factors (including additional constituents) other than those for which the waste was listed, if there is a reasonable basis to beleive that such additional factors could cause the waste to be hazardous. Accordingly, a petitioner also must demonstrate that the waste does not exhibit any of the hazardous waste characteristics (*i.e.*, ignitability, reactivity, corrosivity, and toxicity), and must present sufficient information for the Agency to determine whether the waste contains any other toxicants at hazardous levels. See 40 CFR 260.22(a), 42 U.S.C. 6921(f), and the background documents for the listed wastes. Although waste which are "delisted" (*i.e.*, excluded) has been evaluated to determine whether or not they exhibit any of the characteristics of hazardous waste, generators remain obligated under RCRA to determine whether or not their waste remains non-hazardous based on the hazardous waste characteristics.

B. Approach Used to Evaluate This Petition

This petition requests a delisting for a listed hazardous waste. In making the initial delisting determination, the Agency evaluated the petitioned waste against the listing criteria and factors cited in 40 CFR 261.11 (a)(2) and (a)(3). Based on this review, the Agency agreed with the petitioner that the waste is non-hazardous with respect to the original listing criteria. (If the Agency had found, based on this review, that the waste remained hazardous based on the factors for which the waste was originally listed, EPA would have proposed to deny the petition.) EPA then evalutated the waste with respect to other factors or criteria to assess whether there is a reasonable basis to believe that such additional factors could cause the waste to be hazardous. The Agency considered whether the waste is acutely toxic, and considered the toxicity of the constituents, the concentration of the constituents in the waste, their tendency to migrate and to bioaccumulate, their persistence in the environment once released from the waste, plausible and specific types of management of the petitioned waste, the qualities of the waste generated, and waste variability.

For this delisting determination, the Agency used such information to identify plausible exposure routes (*i.e.*, ground-water, surface water, air) for hazardous constituents present in the petitioned waste. The Agency determined that disposal in a landfill is the most reasonable, worst-case disposal scenario for MAHLE's petitioned waste, and that the major exposure route of concern would be ingestion of contaminated ground-water. Therefore, the Agency is proposing to use a particular fate and transport model to predict the maximum allowable concentrations of hazardous constituents that may be released from the petitioned waste after disposal and to determine the potential impact of the unregulated disposal of MAHLE's petitioned waste on human health and the environment. Specifically, the Agency used the maximum estimated waste volume and the reported leachate concentrations as inputs to estimate the constituent concentrations in the ground water at a hypothetical receptor well downgradient from the disposal site. The calculated receptor well concentrations (referred to as compliance-point concentrations) were then compared directly to the health-based levels used in delisting decision-making for the hazardous constituents of concern.

EPA believes that this fate and transport model represents a reasonable worst-case waste scenario for disposal of the petitioned waste in a landfill, and that a reasonable worst-case scenario is appropriate when evaluating whether a waste should be relieved of the protective management constraints of RCRA subtitle C. The use of a reasonable worst-case scenario results in conservative values for the compliance-point concentrations and ensures that the waste, once removed from hazardous waste regulation, will not pose a threat to human health or the environment if the petitioner chooses to dispose of the waste in accordance with subtitle D requirements. Because a delisted waste is no longer subject to hazardous waste control, the Agency is generally unable to predict and does not control how a waste will be managed after delisting. Therefore, EPA currently believes that it is inappropriate to consider extensive site-specific factors when applying the fate and transport model. For example, a generator may petition the Agency for delisting of a metal hydroxide sludge which is currently being managed in an on-site landfill and provide data on the nearest drinking water well, permeability of the aquifer, dispersivities, etc. If the Agency were to base its evaluation solely on these site-specific factors, the Agency might conclude that the waste, at that specific location, cannot affect the closest well, and the Agency might grant the petition. Upon promulgation of the exclusion, however, the generator is under no obligation to continue to manage the waste at the on-site landfill. In fact, it is likely that the generator will either choose to send the delisted waste off-site immediately, or will eventually

reach the capacity of the on-site facility and subsequently send the waste off-site to a facility which may have very different hydrogeological and exposure conditions.

The Agency also considers the applicability of ground-water monitoring data during the evaluation of delisting petitions. In this case, the Agency determined that, because MAHLE sends the petitioned waste to an off-site, commercial disposal facility (Ohm Corporation, Morrow, Georgia) that receives wastes from numerous other generators, the ground-water monitoring data would not be meaningful for an evaluation of this specific effect of the petitioned waste on ground-water. Therefore, the Agency did not request ground-water monitoring data.

Finally, the Hazardous and Solid Waste Amendements of 1984 specifically require the Agency to provide notice and an opportunity for comment before granting or denying a final exclusion. Thus, a final decision will not be made until all public comments (including those at hearings, if any) on today's proposal are addressed.

II. Disposition of Petition

MAHLE, Incorporated, Morristown, Tennessee.

A. Petition for Exclusion

MAHLE, located in Morristown, Tennessee, operates an aluminum piston manufacturing facility. MAHLE petitioned the Agency to exclude its wastewater treatment sludge filter cake resulting from the treatment of wastewater originating from the chemical conversion coating of aluminum. MAHLE's petition is for EPA Hazardous Waste No. F019—"Wastewater treatment sludges from the chemical conversion coating of aluminum except from zirconium phosphating in aluminum can washing when such phosphating is an exclusive conversion coating process." The listed constituents of concern for the above waste are: hexavalent chromium and cyanide (complexed) (see 40 CFR 261, appendix VII).

MAHLE petitioned the Agency to exclude its wastewater treatment sludge filter cake because it does not believe it contains appreciable amounts of the hexavalent chromium and complexed cyanide for which it was listed. MAHLE also believes that the waste does not contain any other constituents that would render it hazardous. Review of this petition included consideration of the original listing criteria, as well as the additional factors required by the Hazardous and Solid Waste Amendments (HSWA) of 1984. See section 222 of HSWA, 42 U.S.C. 6921(f), and 40 CFR 260.22 (d)(2)–(4). Today's proposal to grant this petition for delisting is the result of the Agency's evaluation of MAHLE's petition.

B. Background

On March 23, 1990, MAHLE petitioned the Agency to exclude its wastewater treatment sludge filter cake from the list of hazardous wastes contained in 40 CFR 261.31 and 261.32, and subsequently provided additional information to complete its petition. In support of its petition, MAHLE submitted:

(1) Descriptions of its manufacturing and waste treatment processes, including schematic diagrams; (2) A list of the raw materials and Material Safety Data Sheets (MSDS) for all trade name products used in the manufacturing and waste treatment processes;

(3) Results from total constituent analyses for the eight Toxicity Characteristics (TC) metals listed in 40 CFR 261.24, nickel, sulfide, cyanide, formaldehyde, and toluene; (4) results from the Toxicity Characteristic Leaching Procedure (TCLP, as described in 40 CFR part 261, appendix II) analyses for the TC constituents (except for the herbicides 2,4-D, and 2,4,5-TP), nickel, cyanide, formaldehyde, and methylene chloride;

(5) Results from analyses for total oil and grease;

(6) Results from the Oily Wastes Extraction Procedure (OWEP; SW–846 Method 1330) analyses for the TC metals, nickel, and cyanide; and

(7) Test results and information regarding the hazardous characteristics of ignitability, corrosivity, and reactivity.

MAHLE's piston manufacturing process involves the chemical conversion coating of the aluminum pistons. Pistons are degreased with a non-ionic surfactant containing alkaliphosphates and alkali carbonates; rinsed with water; coated in a galvanizing solution of mineral oil; and then allowed to dry. The manufacturing process operates continuously, five days each week.

There are two sources of wastewater: (1) The galvanizing bath solution which generally becomes spent after about two weeks of use, at which time it is discharged to the treatment system; and (2) the water used to rinse the pistons after being dipped in the galvanizing tanks, which is continuously discharged to the treatment system. Both the spent galvanizing bath and the spent rinse water are collected in a sump in order to accumulate a sufficient volume of wastewater for treatment. Once a sufficient volume of wastewater is accumulated, the wastewater is pumped to a neutralization tank where the wastewater is neutralized to a pH between 8.0 and 8.5 (using sulfuric acid and sodium hydroxide as necessary). The neutralized wastewater than is pumped to a settling tank where the solids are allowed to settle for at least four hours. The supernatant from the settling tank is decanted and discharged to a Publicly Owned Treatment Works (POTW). The settled sludge is dewatered in a plate and frame press. The resulting filter cake (approximately 35–40 percent solids) is stored in 55-gallon drums for off-site disposal. The filtrate from the filter press is returned to the sump for treatment.

To collect representative samples from a filter press like MAHLE's, petitioners are normally requested to collect composite samples comprised of independent grab samples collected over a period of time (*e.g.*, grab samples collected every hour and composited by shift) sufficient to represent the variability or uniformity of the waste. See "Test Methods for Evaluating Solid Wastes: Physical/Chemical Methods," U.S. EPA, Office of Solid Waste and Emergency Response, Publication SW–846 (third edition), November 1986, and "Petitions to Delist Hazardous Wastes—A Guidance Manual," U.S. EPA, Office of Solid Waste, (EPA/530–SW–85–003), April 1985.

MAHLE collected a total of fourteen composite (and one duplicate) samples of its wastewater treatment sludge filter cake. Eight of the composite samples, and the one duplicate, were collected during an eight week period between September 1989 and November 1989. The other six composite samples were collected during a five week period between March 1991 and April 1991.

During the first sampling event, each composite sample consisted of four grab samples of filter cake collected over a period of six days from the filter press using a plastic trowel. During the second event, each composite sample consisted of four, eight-inch core samples collected over a period of four days from the daily filter cake storage drum using a stainless steel pipe. The first set of eight composite samples was analyzed for the total concentrations (*i.e.*, mass of a particular constituent per mass of waste) of the TC metals, nickel, sulfide, cyanide, formaldehyde, and toluene; TCLP concentrations of the TC metals, nickel, and cyanide; total oil and grease content; and the hazardous characteristics of ignitability and reactivity. In lieu of pH analyses, MAHLE provided a detailed explanation

of how the treatment system ensures that the waste does not exhibit the hazardous characteristic of corrosivity. The one duplicate sample had a total oil and grease content greater than one percent; therefore, this sample was analyzed using the OWEP to determine the leachable concentrations of the TC metals, nickel, and cyanide.

Of the second set of six composite samples, five were analyzed for the TCLP concentrations of the TC metals and nickel; and all six of the samples were analyzed for the TCLP concentrations of all the TC organic constituents (except for the herbicides 2,4-D and 2,4,5-TP), mercury, formaldehyde, and methylene chloride.

MAHLE claims that due to the consistent manufacturing and treatment process, the analytical data obtained from both sets of samples are representative of any variation in the wastewater treatment sludge filter cake constituent concentrations (including those caused by the bi-weekly discharge of the spent galvanizing solution).

C. Agency Analysis

MAHLE used SW–846 Method Numbers 3050, 6010, and 7471 through 7740 to quantify the total constituent concentrations of the TC metals, nickel and mercury; and SW–846 Method 1311 (TCLP, as described in 40 CFR part 261, appendix II) to quantify the leachable concentrations of the TC metals, nickel, and cyanide (using distilled water in the cyanide extraction). MAHLE also used the Oily Waste Extraction Procedure (SW–846 Method Number 1330) to quantify the leachable concentrations of the TC metals, nickel, and cyanide for one composite sample. MAHLE used SW–846 Method Numbers 9010 and 9030 to quantify the total constituent concentration of reactive cyanide and sulfide, respectively. (Analysis for TC leachable concentrations of sulfide, reactive sulfide, or reactive cyanide are not necessary because the Agency's level of regulatory concern is based on the total concentration of reactive sulfide and reactive cyanide.)

MAHLE used the spectrophotometric method described in § 31.203 of the Association of Official Analytical Chemists (AOAC) Official Methods of Analysis (14th edition) in an attempt to quantify the total concentration of formaldehyde in the first set of eight composite samples and SW–846 draft Method Number 8315 to attempt quantification of formaldehyde in the TCLP extract from the second set of six composite samples. MAHLE used SW–846 Method Number 9071 to quantify the total oil and grease (TOG) in the waste. MAHLE used SW–846 Method Numbers 8020 and 8240 to quantify the total concentration of toluene. Lastly, MAHLE used SW–846 Method Numbers 8240, 8270, and 8080 to quantify the volatile organics, semi-volatile organic, and pesticide TC constituents, respectively.

Table 1 presents the maximum total concentrations of all the TC metals, nickel, reactive cyanide, and reactive sulfide in MAHLE's waste. Table 2 presents the maximum TCLP concentrations of each of the TC metals, nickel, and cyanide.

Analysis for organic constituents were largely negative, except for low levels in the waste for total levels of formaldehyde (1 ppm in two out of seven samples) and toluene (0.002 to 0.026 ppm in five out of seven samples), and traces of chloroform, formaldehyde, and methylene chloride in some of the TCLP samples. MAHLE claimed that these detected levels were analytical artifacts due to laboratory contamination (especially in the first two TCLP analyses performed in the second set of six samples). MAHLE submitted analytical data for TCLP method blanks showing that all of the detected organic constituents were also found in the method blanks at comparable concentrations. After the apparent laboratory contamination was discovered in the first two TCLP samples (of the second set of six), the remaining four samples were sent to another laboratory for methylene chloride analysis; no methylene chloride was detected in these four samples.

The petitioner also submitted statements from the laboratory indicating that the reliability of the method used to analyze for the total concentration of formaldehyde was severely limited at the reported levels of 1 ppm.

MAHLE did not analyze the waste for the characteristics of corrosivity. MAHLE, however, believes that the waste does not exhibit the characteristic of corrosivity, because the wastewater is neutralized with sulfuric acid and/or sodium hydroxide in the pretreatment system to a pH between 8.0 and 8.5 prior to its being dewatered.

TABLE 1.—Maximum Total Concentrations [ppm]

[Wastewater Treatment Sludge Filter Cake]

Constituents	Concentrations
Arsenic	<25.9
Barium	4.8
Cadmium	0.18
Chromium	4.9
Lead	<16.1
Mercury	0.05
Selenium	<24.8
Silver	26.3
Nickel	10.7
Reactive Cyanide	<2
Reactive Sulfide	<1
Total Percent Solids	40%

< Denotes that the constituent was not detected at the detection limit specified in the table.

TABLE 2.—Maximum TCLP Leachate Concentrations [mg/1] [1]

[Wastewater Treatment Sludge Filter Cake]

Constituents	Concentrations
Arsenic	0.11
Barium	0.97
Cadmium	0.01
Chromium	0.05
Lead	0.01
Mercury	0.0007
Selenium	<0.22
Silver	0.01
Nickel	0.57
Total Cyanide	0.05

< Denotes that the constituent was not detected at the detection limit specified in the table.

[1] None of the maximum concentrations were detected using the Oily Waste Extraction Procedure.

The detection limits reported above represent the lowest concentrations quantifiable by MAHLE when using the appropriate SW–846 analytical methods to analyze its waste. Detection limits may vary according to the waste and waste matrix being analyzed, *i.e.*, the "cleanliness" of waste matrices varies and "dirty" waste matrices may cause interferences, thus raising the detection limits.

While none of the samples exhibited a total oil and grease (TOG) content above one percent (range, 0.13 to 0.76 percent), a duplicate of sample seven yielded a TOG content of 1.66 percent. The Oily Waste Extraction Procedure (OWEP) methodology was used to determine the leachable concentration of the TC metals and nickel in the one duplicate sample, instead of the TCLP methodology. This method was used to ensure that significant concentrations of the metals of concern are not in the oil phase, which may not be assessed using the standard TCLP methodology (*e.g.*, the concentration of oil and grease may be sufficient to coat the solid phase of the sample and interfere with the leaching of metals from the sample). See SW–846 Method Number 1330.

Lastly, on the basis of test results and explanations provided by the petitioner, none of the analyzed samples exhibited the characteristics of ignitability, corrosivity, or reactivity. See 40 CFR 261.21, 261.22, and 261.23.

MAHLE submitted a signed certification stating that its maximum annual generation rate of wastewater treatment sludge filter cake is 24 tons per year (approximately 33 cubic yards per year). The Agency may review a petitioner's estimates and, on occasion, has requested a petitioner to re-evaluate estimated waste volume. EPA accepts MAHLE's certified estimate of 33 cubic yards/year of wastewater treatment filter cake sludge.

EPA does not generally verify submitted test data before proposing delisting decisions, and has not verified the data upon which it proposes to grant MAHLE's exclusion. The sworn affidavit submitted with this petition binds the petitioner to present truthful and accurate results. The Agency, however, has maintained a spot-check sampling and analysis program to verify the representative nature of the data for some percentage of the submitted petitions. A spot-check visit to a selected facility may be initiated before finalizing a delisting petition or after granting a final exclusion.

D. Agency Evaluation

The Agency considered the appropriateness of alternative waste management scenarios for MAHLE's wastewater treatment sludge filter cake and decided, based on review of information provided in the petition, that disposal in a landfill is the most reasonable, worst-case scenario for this waste. Under this disposal scenario, the major exposure route of concern for any hazardous constituents would be ingestion of contaminated ground water. The Agency, therefore, evaluated the petitioned waste using the modified EPA composite model for landfills (EPACML) which predicts the potential for ground-water contamination from wastes that are landfilled. See 56 FR 32993 (July 18, 1991), 56 FR 67197 (December 30, 1991), and the RCRA public docket for this notice for a detailed description of the EPACML model, the disposal assumptions, and the modifications made for delisting. This model, which includes both unsaturated and saturated zone transport modules, was used to predict reasonable worst-case contaminant levels in ground water at a compliance point (*i.e.*, a receptor well serving as a drinking-water supply). Specifically, the model estimates the dilution/attenuation factor (DAF) resulting from subsurface processes such as three-dimensional dispersion and dilution from ground-water recharge for a specific volume of waste. The Agency requests comments on the use of the EPACML model as applied to the evaluation of MAHLE's waste.

For the evaluation of MAHLE's petitioned waste, the Agency used the EPACML to evaluate the mobility of the hazardous inorganic and organic constituents detected in the TCLP extract of MAHLE's wastewater treatment sludge filter cake. The Agency's evaluation, using an annual maximum waste volume estimate of 33 cubic yards and the maximum reported leachate concentrations (see Table 2), yielded compliance-point concentrations for the inorganic constituents (see Table 3) that are below the health-based levels used in delisting decision-making. The Agency did not evaluate the mobility of selenium from MAHLE's waste because it was not detected in the TCLP extract using the appropriate SW–846 analytical methods (see Table 2). The Agency believes that it is inappropriate to evaluate non-detectable concentrations of a constituent of concern in its modeling efforts if the non-detectable value was obtained using the appropriate analytical method. If a constituent cannot be detected (when using the appropriate analytical method with an adequate detection limit), the Agency assumes that the constituent is not present and therefore does not present a threat to either human health or the environment.

TABLE 3.—EPACML MODEL: CALCULATED COMPLIANCE-POINT CONCENTRATIONS [PPM] LISTED AND NON-LISTED INORGANIC CONSTITUENTS

[Wastewater Treatment Sludge Filter Cake]

Constituents	Compliance-point concentrations	Levels of regulatory concern [1]
Arsenic	0.0011	0.05
Barium	0.0097	1.00
Cadmium	0.0001	0.005
Chromium	0.0005	0.10
Cyanide	0.0005	0.20
Lead	0.0001	0.015
Mercury	0.000007	0.002
Nickel	0.0057	0.010
Silver	0.0001	0.05

[1] See "Docket Report on Health-Based Levels and Solubilities Used in the Evaluation of Delisting Petitions," July, 1991, located in the RCRA public docket.

The wastewater treatment sludge filter cake exhibited arsenic, barium, cadmium, chromium, cyanide, lead, mercury, nickel, and silver levels at the compliance point below the health-based levels used in delisting decision-making.

As noted previously in today's notice, MAHLE claimed that the few organics detected in TCLP extracts of the waste were analytical artifacts, and provided data indicating that the only three organic constitutents detected were also found at comparable levels in the method blanks. While formaldehyde (1 ppm) and toluene (maximum level of 0.026 ppm) were reported in the waste itself (before leaching), the contamination reported in the TCLP method blanks call these levels into question. Furthermore, the reported level of 1 ppm for formaldehyde is also at the detection level for the method used.

In any case, the Agency believes that, even if formaldehyde and toluene were present, the maximum levels in the waste (1 ppm and 0.026 ppm, respectively) would be well below levels of concern. Specifically, if it is assumed that all of these constituents were extracted by the TCLP method, the maximum levels in the TCLP extract would be about one-twentieth (five percent) of the maximum levels in the waste, due to the use of an extraction volume that is equivalent to twenty times the mass of the waste (see the TCLP method as described in SW–846). Therefore, the maximum TCLP levels would be 0.025 ppm for formaldehyde and 0.0013 ppm for toluene. Both of these levels are below the health-based levels used in delisting decisions (See "Docket Report on Health-Based Levels and Solubilities Used in the Evaluation of Delisting Petitions," July 1991, located in the RCRA public docket), and use of the EPACML-derived DAF of 100 would yield compliance-point concentrations that are even lower.

The total constituent concentrations of reactive cyanide and reactive sulfide are below the Agency's interim standards of 250 ppm and 500 ppm, respectively. See "Interim Agency Thresholds for Toxic Gas Generation," July 12, 1985, internal Agency memorandum in the RCRA public docket. Lastly, on the basis of test results and explanations provided by the petitioner, pursuant to 40 CFR 260.22, the Agency concludes that the waste does not exhibit any of the characteristics of ignitability, corrosivity, or reactivity. See 40 CFR 261.21, 261.22, and 261.23.

E. Conclusion

The Agency believes that MAHLE's wastewater treatment system can render the filter cake waste non-hazardous. The Agency believes that the sampling procedure used by MAHLE

was adequate, and that the samples are representative of the day-to-day variations in constituent concentrations found in the wastewater treatment sludge filter cake.

The Agency, therefore, considers MAHLE's filter cake waste as a non-hazardous waste, as it should not present a hazard to either human health or the environment based on the above evaluation. The Agency proposes to grant an exclusion to MAHLE, Incorportaed, located in Morristown, Tennessee, for its F019 wastewater treatment sludge filter cake resulting from the treatment of wastewater generated through the chemical conversion coating of aluminum. If the proposed rule becomes effective, the wastewater treatment sludge filter cake would no longer be subject to regulation under 40 CFR parts 262 through 268 and the permitting standards of 40 CFR part 270.

F. Annual Testing

If a final exclusion is granted, the petitioner will be required to demonstrate, on an annual basis, that the characteristics of the petitioned waste remain as originally described. In order to confirm that the characteristics of the waste do not change significantly, the facility must, on an annual basis sample and test for the constituents listed in 40 CFR 261.24 using the TCLP method. The annual analytical results (including quality control information) must be compiled, certified according to 40 CFR 260.22(i)(12), maintained on-site for a minimum of five years, and made available for inspection upon request by representatives of EPA or the State of Tennessee. Failure to maintain the required records on-site will be considered by EPA, at its discretion, sufficient basis to revoke the exclusion to the extent directed by EPA.

The purpose of this testing requirement is to ensure that the quality of the petitioned waste remains as originally described by the petitioner. The Agency believes that the data obtained from the annual recharacterization of the petitioned waste will assist EPA (*e.g.*, RCRA facility inspectors) in determining whether the petitioner's manufacturing or waste treatment processes have been significantly altered, or if the waste is more variable than originally described by the petitioner. The Agency also believes that the annual recharacterization of the petitioned waste is not overly burdensome to the petitioner, and notes that these data will assist the petitioner in complying with 40 CFR 262.11(c) which requires generators to determine whether their waste is hazardous, as defined by the Toxicity Characteristic (see 40 CFR 261.24).

If made final, the proposed exclusion will only apply to the processes and waste volume (a maximum of 33 cubic yards generated annually) covered by the original demonstration. The facility would require a new exclusion if either its manufacturing or treatment processes are significantly altered such that an adverse change in waste composition (*e.g.*, if levels of hazardous constituents increased significantly) or increase in waste volume occurred. Accordingly, the facility would need to file a new petition for the altered waste. The facility must treat waste generated either in excess of 33 cubic yards per year or from changed processes as hazardous until a new exclusion is granted.

Although management of the waste covered by this petition would be relieved from subtitle C jurisdiction upon final promulgation of an exclusion, the generator of a delisted waste must either treat, store, or dispose of the waste in an on-site facility, or ensure that the waste is delivered to an off-site storage, treatment, or disposal facility, either of which is permitted, licensed, or registered by a State to manage municipal or industrial solid waste. Alternatively, the delisted waste may be delivered to a facility that beneficially uses or reuses, or legitimately recycles or reclaims the waste, or treats the waste prior to such beneficial use, reuse, recycling, or reclamation.

III. Effective Date

This rule, if finally promulgated, will become effective immediately upon such final promulgation. The Hazardous and Solid Waste Amendments of 1984 amended section 3010 of RCRA to allow rules to become effective in less than six months when the regulated community does not need the six-month period to come into compliance. That is the case here, because this rule, if finalized, would reduce the existing requirements for persons generating hazardous wastes. In light of the unnecessary hardship and expense that would be imposed on this petitioner by an effective date six months after promulgation and the fact that a six-month deadline is not necessary to achieve the purpose of section 3010, EPA believes that this exclusion should be effective immediately upon final promulgation. These reasons also provide a basis for making this rule effective immediately upon promulgation under the Administrative Procedure Act, 5 U.S.C. 553(d).

IV. Regulatory Impact

Under Executive Order 12291, EPA must judge whether a regulation is "major" and therefore subject to the requirement of a Regulatory Impact Analysis. This proposal to grant an exclusion is not major, since its effect, if promulgated, would be to reduce the overall costs and economic impact of EPA's hazardous waste management regulations. This reduction would be achieved by excluding waste generated at a specific facility from EPA's lists of hazardous wastes, thereby enabling this facility to treat its waste as non-hazardous. There is no additional impact, therefore, due to today's proposed rule. This proposal is not a major regulation; therefore, no Regulatory Impact Analysis is required.

V. Regulatory Flexibility Act

Pursuant to the Regulatory Flexibility Act, 5 U.S.C. 601–612, whenever an agency is required to publish a general notice of rulemaking for any proposed or final rule, it must prepare and make available for public comment a regulatory flexibility analysis which describes the impact of the rule on small entities (*i.e.*, small businesses, small organizations, and small governmental jurisdictions). The Administrator or delegated representative may certify, however, that the rule will not have a significant economic impact on a substantial number of small entities.

This amendment, if promulgated, will not have an adverse economic impact on small entities since its effect would be to reduce the overall costs of EPA's hazardous waste regulations and would be limited to one facility. Accordingly, I hereby certify that this proposed regulation, if promulgated, will not have a significant economic impact on a substantial number of small entities. This regulation, therefore, does not require a regulatory flexibility analysis.

VI. Paperwork Reduction Act

Information collection and record-keeping requirements associated with this proposed rule have been approved by the Office of Management and Budget (OMB) under the provisions of the Paperwork Reduction Act of 1980 (Pub. L. 96–511, 44 U.S.C. 3501 *et seq.*) and have been assigned OMB Control Number 2050–0053.

List of Subjects in 40 CFR Part 261

Hazardous waste, Recycling, and Reporting and recordkeeping requirements.

Authority: Sec. 3001(f) RCRA, 42 U.S.C. 6921(f).

Dated: March 16, 1992.

Jeffery D. Denit,

Deputy Director, Office of Solid Waste.

For the reasons set out in the preamble, 40 CFR part 261 is proposed to be amended as follows:

PART 261—IDENTIFICATION AND LISTING OF HAZARDOUS WASTE

1. The authority citation for part 261 continues to read as follows:

Authority: 42 U.S.C. 6905, 6912(a), 6921, 6922, and 6938.

2. In Table 1 of appendix IX of part 261, add the following wastestream in alphabetical order:

Appendix IX—Wastes Excluded under §§ 260.20 and 260.22

TABLE 1.—WASTES EXCLUDED FROM NON-SPECIFIC SOURCES

Facility	Address	Waste description
MAHLE, Inc.	Morristown, TN.	Wastewater treatment sludge filter cake (EPA Hazardous Waste No. F019) generated from the chemical conversion coating of aluminum (generated at a maximum annual rate of 33 cubic yards). In order to confirm that the characteristics of the waste do not change significantly, the facility must, on an annual basis, test a representative composite sample for the constituents listed in 40 CFR 261.24 using the method specified therein. The annual analytical results, including quality control information, must be compiled, certified according to 40 CFR 260.22(i)(12), maintained on-site for a minimum of five years, and made available for inspection upon request by any employee or representative of EPA or the State of Tennessee. Failure to maintain the required records on-site will be considered by EPA, at its discretion, sufficient basis to revoke the exclusion to the extent directed by EPA.

Notices

Federal Register
Vol. 57, No. 60
Friday, March 27, 1992

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

ADMINISTRATIVE CONFERENCE OF THE UNITED STATES

Committee on Judicial Review; Public Meeting

Pursuant to the Federal Advisory Committee Act (Pub. L. 92–463), notice is hereby given of a meeting of the Committee on Judicial Review of the Administrative Conference of the United States. The meeting will be held at 9:30 a.m., on Friday, April 10, 1992, at the Adminstrative Conference of the United States, suite 500, 2120 L Street NW., Washington, DC (Library, 5th floor).

The Committee will meet for discussion of a study by Harold Krent, Assistant Professor at the University of Virginia Law School, of the operation of the Equal Access to Justice Act.

For further information concerning this meeting, contact Mary Candace Fowler, Office of the Chairman, Administrative Conference of the United States, 2120 L Street NW., suite 500, Washington, DC (Telephone: 202–254–7065.)

Attendance is open to the interested public, but limited to the space available. Persons wishing to attend should notify the Office of the Chairman at least one day in advance. The committtee chairman, if he deems it appropriate, may permit members of the public to present oral statements at the meeting. Any member of the public may file a written statement with the committee before, during, or after the meeting. Minutes of the meeting will be available on request.

Dated: March 25, 1992.

Jeffrey S. Lubbers,

Research Director.

[FR Doc. 92–7185 Filed 3–26–92; 8:45 am]

BILLING CODE 6110–01–M

Committee on Rulemaking; Public Meeting

Pursuant to the Federal Advisory Committee Act (Pub. L. 92–463), notice is hereby given of the meeting of the Committee on Rulemaking of the Administrative Conference of the United States.

Committee on Rulemaking

Date: Monday, March 30, 1992
Time: 3 p.m.
Location: Administrative Conference of the United States, 2120 L Street, NW., suite 500, Washington, DC 20037 (Library, 5th Floor)
Agenda: The Committee will meet to discuss: (1) Procedural rule exemption project, and (2) Professor Robert Anthony's study of non-rule rulemaking
Contact: Kevin L. Jessar, 202–254–7020.

Attendance at the committee meeting is open to the interested public, but limited to the space available. Persons wishing to attend should notify the Office of the Chairman at least one day in advance. The committee chairman, if he deems it appropriate, may permit members of the public to present oral statements at the meeting. Any member of the public may file a written statement with the committee before, during, or after the meeting. Minutes of the meeting will be available on request. The contract person's mailing address is: Administrative Conference of the United States, 2120 L Street, NW., suite 500, Washington, DC 20037. Telephone: 202–254–7020.

Dated: March 25, 1992.

Jeffrey S. Lubbers,

Research Director.

BILLING CODE 6110–01–M

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service

Food Stamp Program: Employment and Training Demonstrations

AGENCY: Food and Nutrition Service, USDA.

ACTION: Notice of intent.

SUMMARY: This notice announces the intention of the United States Department of Agriculture (the Department), pursuant to section 1756 of the Mickey Leland Memorial Domestic Hunger Relief Act (title XVII, Pub. L. 101–624), to enter into cooperative agreements with selected State agencies to assist such agencies in the conduct of a demonstration project to test conformance between the Food Stamp Employment and Training (E&T) Program, operated by the Department's Food and Nutrition Service (FNS), and the Job Opportunities and Basic Skills (JOBS) Program operated by the United States Department of Health and Human Services (DHHS) for recipients of Aid to Families with Dependent Children (AFDC). The Department is also encouraging conformance activities involving programs operated under the Job Training Partnership Act (JTPA), administered by the United States Department of Labor (DOL), and education and training programs operated by the United States Department of Education(ED).

This demonstration project will operate under the authority of section 17(b)(3) of the Food Stamp Act of 1977, as amended (7 U.S.C. 2011–2032). The purpose of the project is to improve consistency and cooperation among employment and training programs, reduce costs and barriers to appropriate services, and enhance current E&T services to recipients. The Secretary will assist selected project areas in conducting demonstration projects to increase the coordination between the E&T Program and other similar Federal programs, in order to improve the self-sufficiency of food stamp recipients and decrease their dependence on assistance programs. The intent of this notice is to solicit proposals from State and/or local agencies wishing to conduct conformance demonstrations during the project. This notice establishes the terms and conditions for the project and institutes uniform criteria for evaluating proposals and selecting participating project areas.

State/local agencies interested in participating in this project are invited to request a Cooperative Agreement Package, which contains detailed information and instructions on preparing and submitting demonstration proposals. Local agency proposals must be submitted through and approved by the State agency, which will be responsible for overall control of the demonstration(s) conducted within its boundaries and for coordination with the Department. Each proposal must contain signed agreements from the appropriate State officials authorizing the demonstration. The Department will not negotiate or enter into any contractual arrangements with agencies below the State level.

DATES: Requests for cooperative agreement packages must be received by May 26, 1992. During this period, the Department welcomes public comment concerning the terms and conditions of the project. Any changes made as a result of comments received shall be incorporated in the Cooperative Agreement Package, which will be mailed to applicants no later than June 8, 1992. From the release date of the Cooperative Agreement Packages applicants will have approximately 45 days in which to submit their completed demonstration project proposals.

ADDRESSES: Interested agencies should submit a written request for a cooperative agreement package (and include four self-addressed labels) to the address listed below: USDA, Food and Nutrition Service, Contract Management Branch, ASD, Attn: Ronald R. Rouse 3101 Park Center Drive, room 914, Alexandria, Virginia 22302–1594.

FOR FURTHER INFORMATION CONTACT: Ronald R. Rouse, Contract Specialist, at the address listed above or telephone (703) 305–2250.

SUPPLEMENTARY INFORMATION:

Classification

Executive Order 12291 and Department Regulation 1512–1

This notice has been reviewed under Executive Order 12291 and Department of Agriculture Regulation No. 1512–1 and has been classified by the Department as nonmajor. The annual effect of this notice on the economy will be less that $100 million. This notice will not result in major increases in costs or prices for consumers, individual industries, Federal, State of local government agencies, or geographic regions. It will not have significant adverse effects on competition, investment, productivity and innovation or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export martkets. This notice will have a beneficial effect on employment in that it will improve the operations of the Food Stamp E&T Program, thereby improving efforts to assist food stamp recipients obtain and retain employment.

Executive Order 12372

The Food Stamp Program is listed in the Catalog of Federal Domestic Assistance under No. 10.551. For the reasons set forth in the final rule and related notice to 7 CFR part 3015, subpart V (48 FR 29115, June 24, 1983), this program is excluded from the scope of Executive Order No. 12372 which requires intergovernmental consultation with State and local officials.

Regulatory Flexibility Act

This notice has been reviewed with regard to the requirements of the Regulatory Flexibility Act of 1980 (5 U.S.C. 601—612). Betty Jo Nelsen, Administrator of the Food and Nutrition Service, has certified that the demonstration project described in this notice will not have a significant economic impact on a substantial number of small entities because the demonstrations will be conducted in limited areas. State and local welfare agencies will be affected to the extent that they administer the demonstration project. Those food stamp recipients participating in the demonstration project will be affected by this action in that the provisions of the Food Stamp Act affecting the rights of recipients may be waived to the extent necessary to conform to the provisions of section 402, and sections 481 through 487, of the Social Security Act (42 U.S.C. 402, 481–487).

Paperwork Reduction Act

This notice does not contain reporting or recordkeeping requirements subject to approval by the Office of Management and Budget under the Paperwork Reduction Act of 1980.

Background

There is an emerging consensus that the fragmentation of income maintenance, social services, and employment and training programs is a major barrier to the efficient and effective delivery of services intended to increase self-sufficiency and reduce dependency. This employment and training demonstration is part of a government-wide effort to simplify welfare programs and coordinate their administration. Among the ongoing activities related to this demonstration are: Efforts by DOL, DHHA, and ED to improve coordination in the JOBS Program; the Service Integration Working Group of the Economic Empowerment Task Force; and the Department's Welfare Simplification and Coordination Advisory Committee. Groups such as the National Commission on Employment Policy and the American Public Welfare Association have been active in these welfare reform activities.

The Federal government's goal in establishing the various study groups, task forces and demonstrations is to provide more effective services to welfare recipients more efficiently.

In the case of employment assistance, the three largest service providers (JTPA, JOBS, and E&T) serve target groups with similar needs. Indeed, current JOBS and E&T programs rely heavily on JTPA for employment services. The intake, screening and assessment procedures for the three programs are also very similar. Moreover, in most States JOBS and E&T are administered by the same agency and services are often provided by the same staff.

However, differences between the two programs with respect to eligibility and participation requirements, availability of services, and penalties for non-compliance add administrative complexity to both programs.

The demonstration described in this notice offers the opportunity to develop and test consistent policies and procedures in the three employment and training programs. A more coordinated approach to providing employment services will result in greater effectiveness and efficiency among these programs. Ultimately, the Federal Government will seek consistency with other programs like JTPA and Vocational Education in the context of the Job Training 2000 initiative.

The E&T/JOBS Conformance Demonstration Project

In 1990, the Department completed a national evaluation of the E&T Program. The results of this evaluation (which was based on data collected in 55 sites across the country) indicated that E&T had no effect on participants' employment and earnings in its first full year of operation (1988). These results were discouraging. Only about half of the persons eligible for E&T participated in the program. Moreover, E&T participants did no better than nonparticipants in obtaining employment services and employment or increasing their earnings. No definitive explanation for these disappointing results are available, but possible reasons for the outcome include lack of intensive employment services, shortage of funding for staff and facilities, and inadequate coordination with other employment programs, such as JOBS and JTPA, resulting in competition for available resources.

The Department is committed to the operation of effective, high quality employment and training programs which efficiently provide services to those who need them. The Department believes this can be achieved, in part, by enhanced utilization of the employment, training, and educational services available through JOBS. Since E&T and JOBS serve a large common population and promote similar goals, increased consistency and coordination between the two programs would be more efficient, more cost effective, and would enhance service to recipients.

However, the substantial differences in the legislation authorizing the E&T and JOBS programs, along with differing regulatory policies, impede, and in some instances prevent, coordination. Congress—concerned about these differences—included in section 1756 of the Mickey Leland Memorial Domestic Hunger Relief Act (title XVII, Pub. L. 101–624] a provision which authorizes the Secretary of Agriculture to conduct a demonstration project to test conforming the E&T and JOBS programs. This provision, along with section 17(a)(1) of the Food Stamp Act (7 U.S.C. 2026(a)(1)) will allow the Secretary to assist selected State and local agencies in conducting research on the administration of the Food Stamp E&T Program by means of a demonstration project.

Under section 1756 the Secretary will assist States in conducting this demonstration project in up to 60 project areas, or parts of project areas, for a period not to exceed four years. A project area is defined at 7 CFR 271.2 as the political subdivision designated by a State agency as the administrative unit for Food Stamp Program operations. A city, Indian reservation, welfare district, or any other entity with clearly defined boundaries, or any combination of such entities, may be designated as a project area, or a State as a whole may be designated as a single project area. In order to achieve demonstration results that typify the national scope of the E&T Program, the Department will, in the proposal selection process, place special emphasis on choosing sites that area broadly representative of the Program, including urban, rural, and suburban areas and large and small areas. Project boundaries in effect on January 1, 1990 will be used. Current project areas will not be redefined for demonstration purposes.

To conduct the project, the Secretary is authorized to waive the employment and training requirements under section 6(d) of the Food Stamp Act (7 U.S.C. 2015(d)). This waiver will permit a participating project area, with the approval of the State agency, to operate its E&T Program on the same terms and conditions under which it operates its JOBS Program, i.e. in accordance with the State JOBS plan approved by the Secretary of Health and Human Services as meeting all of the requirements of part F, sections 481 through 487, and section 402(a)(19) of the Social Security Act.

Additionally, this waiver will allow a participating project area to provide child care services and work-related supportive services in accordance with the State Supportive Services plan mandated by JOBS Program regulations at 45 CFR 255.1.

However, the provision of transitional child care benefits under clauses (ii) through (vii) of section 202(g)(1)(A) of the Social Security Act (42 U.S.C 402 (g)(1)(A)) is not authorized for the demonstration project.

The Department will not adopt the DHHS funding structure for the JOBS Program. JOBS matching rates, and JOBS target group and participation rate rules affecting Federal matching rates, will not apply to food stamp funding in project areas participating in the project. Additionally, the payment of supplemental funds made to prevent a net loss of cash income to a household—caused when a JOBS Program participant is required by the State agency to accept a job—will not be authorized during the project.

Although the Department is primarily interested in demonstration proposals which conform most closely to JOBS—the thrust of this entire project is toward true E&T/JOBS conformance—project areas wishing to waive specific requirements of the Food Stamp Act in order to test limited conformance may submit proposals. During the proposal evaluation process, greater emphasis will be placed on those proposals offering more extensive conformance. However, limited conformance proposals which promise to provide demonstration results of particular or significant interest to the E&T Program will receive careful consideration.

Waiver Exceptions.

Although the goal of this project is to enhance conformance between the two programs, certain regulatory requirements placed upon State agencies by the Department are critical to the successful nationwide operation of the E&T Program and may not be waived. These requirements are discussed below.

(1) State E&T Plans

A State agency's receipt of its E&T grant is contingent upon FNS approval of the State agency's E&T plan. Thus, the requirement that each State agency prepare and submit an E&T plan and provide regular updates must be met.

(2) Financial Reporting

Employment and training services in the participating project areas will continue to be funded through the E&T Program, in accordance with current funding procedures, and State agencies will remain responsible for financial reporting requirements.

(3) Program Monitoring

It is essential that State agencies continue to report consistent and reliable information to assure that its E&T program is accurately monitored, evaluated, and funded. Participating project areas must comply with E&T Program reporting requirements during the entire life of the project.

(4) Peformance Standards

State agencies must continue to satisfy applicable E&T Program performance standards.

(5) Quality Control

In ordrr to meet their responsibility for monitoring Food Stamp Program administration and operations, as required by the Food Stamp Act, participating project areas shall continue the quality control reveiw process during the project.

JTPA Coordination

Section 483 of the Social Security Act (42 U.S.C. 683) requires JOBS coordination with JTPA. Components of the State agency's JOBS plan related to job training and work preparation must be consistent with the coordination requirements of section 121 of JTPA. JTPA requires that AFDC recipients be served in at lease equal proportion to their numbers in the JTPA eligible population. The Department is especially interested in those demonstration proposals which emphasize the use JTPA programs. Coordination with education and training programs operated by ED is also encouraged.

Scope of Project

This notice will result in the negotiation of cooperative agreements with participating State agencies for the design, operation, and evaluation of the demonstration project. Cooperative agreements were chosen as the funding mechanism because the principal purpose of the transaction is to assist State and local agencies in achieving conformity among employment and training programs and the Department envisions working closely with the participating State agencies in the development and oversight of the project. Participating State agencies must contribute funds, manpower, facilities, and/or other assets to the project.

Subject to the availability of funds, the Department has authorized a one-time allocation of $3 million in Fiscal Year (FY) 1992 to support the demonstrations and evaluations over the life of the project. The Department is not obligated to award the entire $3 million. The Department will limit the maximum amount awarded under any one cooperative agreement to $600,000. Participating State agencies shall be responsible for conducting the demonstrations and for securing independent evaluators to evaluate the project using evaluation measures established under the cooperative ageement.

It is important for prospective participants to understand that (1) no cost to the JOBS program shall be incurred as a result of this demonstration project, and (2) any increased expense arising as a result of implementing costlier JOBS components for E&T participants during the demonstration project may be paid from the State agency's regular E&T operating budget. However, other expenses incurred as a result of the operation of this demonstration project shall not be met by State agency E&T grants, participant reimbursement funds, or 50% matches of other administrative costs. Costs incurred during the project over and above the normal expenses budgeted by the participating project area for regular E&T program operation—as detailed in its State E&T Plan—are to be met with cooperative agreement funds made available for the demonstrations and with State funds. For example, child care reimbursements up to $160 per month per child, and transportation costs up to $25 per month per person, are to be paid from the project area's normal E&T operating budget. Any costs above those amounts incurred as a result of conforming to JOBS shall be paid from the project area's cooperative agreement funds and/or from State funds not earmarked for regular E&T operation. The exact ratio between cooperative agreement funds and State funds will be determined during negotiations with State agencies. State agencies with project areas submitting demonstration proposals shall attach to the proposal, as an addendum, a request for modification of its State plan relating to the demonstration. The modification request shall contain information about anticipated changes in the participating project area's E&T Program, including different components, increased reimbursements and administrative expenses etc., and the expected cost of these changes versus the normal operating costs of the E&T Program.

The Department is currently conducting an evaluation of E&T operations and funding involving 15 E&T programs nationwide. Project areas involved in this study are not eligible to participate in the E&T/JOBS Conformance Demonstration Project because we believe that such participation will affect the results of the study, and/or, that the study will affect the outcome of the demonstration.

After selecting the project participants, FNS will provide technical assistance to each project area through an independent contractor. Project operators and/or their evaluators will have access to the contractor on an as-needed basis to obtain assistance in evaluating their demonstrations. The contractor will also synthesize the individual evaluation reports into one overall evaluation document. The purpose of this technical assistance is to ensure the continuity and realibility of evaluation information collected from all project participants. It is intended to supplement—not replace—the required independent evaluations secured with cooperative agreement funds.

Public Comment

Those project areas selected to participate in this conformance demonstration must make their proposals available to the general public in order to provide adequate notice of potential changes in its E&T Program.

Demonstration Proposal Contents

Prospective participants shall submit a demonstration proposal containing specific information regarding their planned project. Applicants should include in their proposals any additional information which they feel would enhance their prospects for approval. Each demonstration proposal must contain the following:

(1) Conformance Guarantee

Conformance with JOBS requirements will mean significant variation from E&T procedures, with major deviations possibly occurring in such areas as participation criteria, the provision of child care, and sanctions for nonparticipation. Proposals must contain the applicant project area's guarantee that, with the exceptions noted above, its demonstration will meet the requirements of section 402 (a)(19) and (g) (42 U.S.C. 36002 (a)(19) and (g)) (but not including the provision of transitional child care) and sections 481 through 487 of the Social Security Act (42 U.S.C. 681–687). Each reference to 'aid to families with dependent children' in these sections shall be considered a reference to 'food stamps' for purposes of the demonstration. As previously explained, limited conformance proposals will be considered. However, applicants submitting such proposals must cite the barriers they face which prevent them from guaranteeing full conformance. The provisions of the Food Stamp Act affecting the rights of recipients may be waived to the extent necessary to conform to the provisions of these sections. Following is a brief description of the contents of section 402(a)(19) and 402(g) (42 U.S.C. 602 (a)(19) and (g)), including comparisons and contrasts with existing E&T requirements.

(a) Section 402(a)(19) (42 U.S.C. 602(a)(19)) contains State plan requirements for operation of the JOBS Program:

Mandatory participation. JOBS Program participation is mandatory—State resources permitting—for all non-exempt AFDC recipients living in an area covered by the JOBS Program for whom child care is guaranteed by the State agency.

Under section 6(d) (7 U.S.C. 2015(d)) of the Food Stamp Act, the Food Stamp Program requires all nonexempt, able-bodied recipients to register for employment as a condition of eligibility for participation. The State agency then screens each work registrant for potential participation in its E&T program.

Priority participation for volunteers. In the E&T Program, State agencies may allow individuals exempt from work registration or E&T requirements to participate as volunteers. In the JOBS Program, a State agency may allow voluntary participation—of both exempt and nonexempt individuals—so long as such participation does not prevent the State agency from expending 55 percent of its funds on certain specific target groups. Within these target groups, however, the State agency must give consideration to volunteers.

Exemption criteria. As with mandatory participation requirements, there is a two-tiered system of exemptions for work registered/E&T participants in the Food Stamp Program. Generally, JOBS Program and food

stamp work registration exemptions are similar. However, State agencies, in their E&T plans, can request approval of specific exemptions for individuals and categories of individuals for whom E&T requirements would be impracticable. If their State plans do not contain such exemptions, which would more closely conform the two programs, participating project areas must exclude certain individuals from their demonstration who may be currently participating in its E&T Program. These individuals include persons who reside in such remote locations that effective participation is precluded and women in their second or third trimester of pregnancy.

Conversely, because of differing participation requirements, certain individuals now exempt from participation in a project area's E&T Program may be required to participate in the demonstration. These individuals include: Persons receiving unemployment compensation and applicants for unemployment compensation; regular participant in a drug addiction or alcoholic treatment and rehabilitation program; and persons caring for a child under six, if the State agency guarantees child care and limits participation to no more than 20 hours per week. In addition, in two parent households, both parents may be required to participate if child care is guaranteed.

Mandatory education requirements. Depending on the requirements of their State JOBS plan, participating project areas must require custodial parents who have not reached 20 years of age, have not completed a high school education or its equivalent, and are not otherwise exempt, to pursue a high school education or education designed to qualify persons for a high school equivalency certificate. Participating project areas must assign individuals 20 years of age or older who have not earned a high school diploma or its equivalent to an education component unless the individual demonstrates a basic literacy level or the individual's long-term employment goal does not require a high school diploma.

Self-initiated education or training. Depending on the restrictions placed on postsecondary education or training by their State agency's JOBS plan, participating project areas must allow an individual who is already attending an institution of higher education or participating in a program of vocational or technical training at least part time to continue to attend, as long as the individual meets criteria established in the JOBS regulations and in State agency guidelines. The costs of day care, transportation, and other services necessary for attendance (as determined by the State agency) which exceed the allowable amounts for E&T participant reimbursements must be met by cooperative agreement funds or State funds, as explained previously.

Sanctions. Participating project areas must enforce JOBS Program sanctions during the demonstration. Unlike E&T program sanctions which are limited to a maximum of two months, and which affect the entire household if the noncompliant individual is the head of household, JOBS Program sanctions are imposed on the noncompliant individual only, with the severity of the sanction dependent upon the number of times the individual fails to comply. The maximum JOBS sanction is six months, or until the sanction is cured, whichever is longer. A complete description of the JOBS sanctioning process is provided at a later point in this notice.

Job acceptance. A JOBS Program participant is required to accept a job only if the State agency assures that the participant's household experiences no net loss of cash income resulting from acceptance of the job. State agencies are authorized to issue supplemental payments to the JOBS household in order to prevent such a net loss. An E&T Program participant is required to accept a job unless the wage is less than the higher of either the applicable State or Federal minimum wage.

For purposes of the demonstration, E&T participants shall have the option of refusing any job which represents a net loss of cash income to their household. However, as previously noted, the issuance of supplemental funds to E&T participants will not be authorized during the project.

(b) Section 402(g) (42 U.S.C. 602(g)) contains State plan requirements for JOBS Program supportive services. State agencies must provide such services, identified in their Supportive Services Plan, to allow eligible families to participate in employment, State approved education, or training. The demonstration project will operate in accordance with the participating State's Supportive Services plan, except for the provision of transitional child care, which is excluded from the project. The cost of supportive services in excess of the normal operating budget determined in the State's E&T plan must be met through cooperative agreement funds or State funds.

State agencies must also comply with sections 481 through 487 of the Social Security Act (42 U.S.C. 681–687). These sections are summarized below:

Section 481 (42 U.S.C. 681) states the purpose of JOBS and provides the definition of terms used.

Section 482 (42 U.S.C. 682) details the establishment and operation of the JOBS Program, including State plan requirements, assessment and employability plans for JOBS participants, the provision of program and employment information, services and activities provided under the program, dispute resolution procedures and special provisions relating to Indian tribes.

Note: Any work experience program conducted as part of the project must be conducted in conformity with subsection 482(f) (42 U.S.C. 682(f)), which contains provisions for community work experience programs.

Section 483 (42 U.S.C. 683) contains JOBS coordination requirements.

Section 484 (42 U.S.C. 684) lists the provisions generally applicable to program services.

Section 485 (42 U.S.C. 685) details State agency contracting authority.

Section 486 (42 U.S.C. 686) provides instructions for initial State evaluations of the JOBS Program.

Section 487 (42 U.S.C. 687) specifies the requirements for development of program performance standards.

(2) Scope

Proposals must contain an analysis of the scope of the demonstration. How many work registrants and volunteers will be affected by altered exemption criteria? Will the demonstration encompass the project area's entire E&T mandatory population or will participation be limited? If limited participation is planned, what segment of the population will be targeted for inclusion? Why? How many volunteer participants are anticipated?

(3) Cash Conversion Guarantee

Section 17(b)(3)(D) of the Food Stamp Act (7 U.S.C. 2026(b)(3)(D)) specifies that participation in a training activity where food stamp benefits are converted to cash shall occur only with the consent of the participant. The Department interprets this to mean wage subsidy programs. At this time, the Department is not interested in pursuing programs which convert food stamp benefits to cash in exchange for participation in a work program, and does not anticipate approving proposals in this area.

(4) Work Plan

Demonstration proposals must incorporate a detailed work plan, including the timetable for implementation, the length of operation, and the time period allotted for evaluation.

(5) Staffing

The proposal must contain information about the E&T staff who will conduct the demonstration: The number and qualifications of front line staff members, administrative support personnel and management; staff experience with JOBS; the amount and type of training anticipated in order to prepare staff for the demonstration.

(6) Evaluation

FNS's major evaluation goals are to obtain information on the kind and extent of coordination between E&T, JOBS, JTPA, and other employment assistance activities undertaken by the demonstrations, to determine whether service to participants has improved as a result of this coordination, and to discover any unanticipated barriers to conformance. The proposal must contain the State agency's methodology for evaluating its demonstration; its plans for contracting for an independent evaluation of its demonstration; and the anticipated cost of evaluation. Additionally, the proposal must contain a description of services to participants which will be made available during the demonstration.

Criteria for Evaluating Demonstration Proposals

FNS will evaluate each proposal using a two-step process. First, the technical aspects will be evaluated by a Technical Review Panel. The Panel will evaluate the technical merit of each proposal according to the evaluation criteria listed below (with relative weights shown in parentheses). Panel members will evaluate each proposal independently and assign it a numerical score for each evaluation criterion. The Panel will average the scores assigned to each proposal and rank the proposals on their technical merit according to their mean scores. Based on this technical review, the Panel will recommend a competitive range for proposals. Competitive range is defined as all proposals with a reasonable chance of being selected for negotiation of a cooperative agreement under the terms of this notice. FNS may conduct negotiations with applicants in the competitive range, and after negotiations, may ask for "best and final offers." FNS does, however, reserve the right to go into an agreement with the applicant based on the original proposal and its evaluation. Therefore, proposals submitted in response to this notice should be on the most favorable terms from both technical and cost standpoints.

Second, FNS will consider the proposed costs associated with each proposal in the competitive range. The cost will be reviewed independently from the technical evaluation.

FNS will give the technical merit of proposals primary consideration over cost, which will serve as tiebreaker when decisions must be made among proposals that are similar or equal in technical merit. Awards will be made in such situations to those applicants whose offers are most financially advantageous to FNS.

Technical Evaluation Criteria

The following criteria will be used in the technical evaluation of proposals submitted in response to this notice. The weight of each criterion is given in parentheses. Maximum possible score is 100 points. Although not to be considered as weighted criteria in the selection process, emphasis will be placed on representative project areas and on close JOBS conformance, as previously noted.

(1) Potential for Program Improvement

Does the proposal appear to have the potential to make a significant contribution, as determined by the Technical Review Panel, to improving the effectiveness of the E&T Program. Is it likely to provide results which could improve the coordination among the E&T Program, the JOBS Program, JTPA, and other Federal training programs? How fully does the proposal merge E&T into JOBS? What promise does it hold for improving recipient service? (30 Points)

(2) The Proposal

Is the proposal well organized and complete? Does it present the goals and objectives of the proposed demonstration clearly? Are the demonstration activities well thought out? Have agreements been entered into with cooperative agencies? Is the reporting of demonstration progress and activities adequate? Is the schedule realistic? (20 Points)

(3) Staffing

Does the proposed demonstration staff have sufficient skill and experience to conduct the proposed demonstration? Are sufficient staff resources allocated to conduct the work? Does the management plan allow for satisfactory control of task performance and response to problems that may arise during the course of the study? (20 Points)

(4) The Evaluation Plan

Is the evaluation plan well defined? Are specific research questions to be addressed included in the proposal along with their related evaluation methods? Are these research questions good ones—are they capable of extracting significant information from the data collected during the demonstration? Are data collection and analysis plans included? Does the State agency's criteria for contracting an independent evaluator appear sufficient? (20 Points)

(5) Level of Resource Contribution

Has the applicant proposed a contribution of resources—including staff, facilities, funds, and evaluation? (10 Points)

Following is a description and comparison of the Food Stamp E&T Program and the AFDC JOBS Program.

The E&T Program

On December 31, 1986 the Department published in the **Federal Register** (51 FR 47378) the final rules implementing the Food Stamp E&T Program. The Program has been in operation since April 1987, providing E&T services to able-bodied, nonexempt food stamp recipients and selected volunteers. Comparatively low funding levels and the need to serve a large population impelled the E&T Program to evolve into broad-based, relatively inexpensive treatments, aimed at involving participants in work-related activities which lead to paid employment and a decreased dependency on assistance programs. All States are required to operate the E&T Program. They have the flexibility to do so in a manner best suited to their unique situation, subject to approval by the Secretary of Agriculture.

Each State agency must include one or more of the following components in its program: Job search, job search training, workfare, education, or any other approved program designed to improve the employability of participants through actual work experience and/or training.

Participation

The State agency determines the number of components to which each E&T participant will be assigned. The State agency also determines the number of months the individual will be required to participate in a component, unless the component is job search. Participation in a job search component is statutorily limited to an initial period of eight weeks from the time a food stamp application is filed and eight weeks in each 12 month period

following the initial eight week period. Mandatory participation in any work component cannot exceed the number of hours equal to the value of the household's food stamp allotment divided by the higher of the applicable State or Federal minimum wage. Total hours in any component cannot exceed 120 hours a month.

Under section 6(d) of the Food Stamp Act (7 U.S.C. 2015(d)) food stamp recipients are exempt from E&T if they are:

—Under age 16 or age 60 and above;
—Physically or mentally unfit;
—Age 16 or 17 and not the head of a household and attending school at least part time or enrolled in an employment training program;
—Subject to an complying with the work requirements of title IV of the Social Security Act (42 U.S.C. 602);
—A parent or other household member responsible for the care of a dependent child under 6 or someone who is incapacitated;
—A person receiving unemployment compensation or an applicant for unemployment compensation who is complying with the local employment office's work requirements;
—A regular participant in a drug addiction or alcoholic treatment and rehabilitation program;
—Employed at least 30 hours per week or receiving weekly wages equal to the Federal minimum wage multiplied by 30 hours;
—Students in compliance with food stamp eligibility rules which apply to them.

The State agency may exempt, with prior approval of the Secretary, otherwise mandatory individuals and categories of individuals whose participation in E&T activities would be impracticable; persons whose participation in the Food Stamp Program is not expected to exceed 30 days; and persons who do not commence an assigned E&T component and are determined to have good cause for not participating, if that good cause will last for 60 days or longer (7 U.S.C. 2015(d)(4)(D).

Both exempt and mandatory individuals are allowed to volunteer to participate in E&T activities. State agencies are encouraged, to the extent possible, to permit volunteers to participate in any E&T activity it offers.

Mandatory individuals who fail to compy with E&T requirements are sanctioned—removed from the food stamp grant—for two months or until the individual complies with E&T requirements, whichever is shorter (7 U.S.C. 2015(d)(1)(ii)). If the individual is head of the household (the household member who was the greatest source of earned income in the two months prior to the month of noncompliance), the entire household is sanctioned. Prior to imposing a sanction the State agency must initiate approved conciliation procedures, which include determining if the individual had good cause for noncompliance and attempting to resolve any disputes concerning noncompliance, and the State agency must provide the opportunity for a fair hearing if the dispute cannot be resolved.

Funding

The Department provides financial support to each State agency to operate its E&T Program. This support is in three forms: A 100 percent grant based on the size of the State's food stamp work registrant population and on E&T performance by the State; a 50 percent match of State funds for additional program costs; and a 50 percent match of State reimbursements to participants who incur expenses—including dependent care—while fulfilling an E&T requirement. For transportation and similar work, training, or education related expenses, a maximum State agency reimbursement of $25 per person per month is matched at the 50 percent rate. State agencies may reimburse amounts over $25 but do not receive Federal matching funds. For dependent care expenses, a maximum State agency reimbursement of $160 per dependent per month is matched at the 50 percent rate.

Reporting Requirements

Each State agency is required to submit a quarterly report no later than 45 days after the end of each quarter. This report must contain the number of the State's new work registrants, work registrants who are exempt from E&T participation, volunteers, participants who commence a component, and the number of NOAAs issued. On its first quarterly report, the State agency must include the number of its food stamp recipients who are work registered as of October of the year. On the final quarterly report, the State agency must identify the total number of individuals exempted, the reasons for the exemptions, and the total number of participants in each component of its E&T Program.

In FY 1992 the Secretary is authorized to distribute $75 million in 100 percent funds. In FY 1991 the Department distributed $50.4 million in 50 percent matching funds, and $16.1 million in participant reimbursements. Approximately 1.6 million food stamp recipients participated in E&T in FY 1991.

The JOBS Program

On October 13, 1989 DHHS published in the **Federal Register** (54 FR 42146) final rules to implement titles II and III of the Family Support Act of 1988 (Pub. L. 100–485).

Title II (42 U.S.C. 602) established the JOBS Program to assure that needy families with children obtain the education, training, and employment that will help them avoid long-term welfare dependence. The JOBS Program replaces, consolidates, and expands current authority for welfare education, training, and work programs contained in title IV–A (AFDC) and title IV–C (Work Incentive (WIN) and WIN Demonstration Programs) of the Social Security Act.

Title III (42 U.S.C. 602) of the Family Support Act provides for child care and other services in support of employment, education, and training activities.

All States were required to implement the JOBS Program by October 1, 1990, and to make it available on a statewide basis, where feasible, by October 1, 1992.

Each State agency must offer four mandatory components: education, job readiness, job skills training, and job development. Each State agency must also offer two of the following optional components: Group/individual job search, on-the-job training, work supplementation, or community work experience.

Participation

To the extent possible, a custodial parent—the parent who lives with the child—under age 20, who has not completed high school, must participate in educational activities unless otherwise exempt. Custodial parents 18 and 19 may participate in training or work activities instead of educational activities if they fail to make good progress in completing the educational activities or if their participation in educational activities is deemed inappropriate.

Individuals 20 years of age or older who have not earned a high school diploma or its equivalent must be assigned to an education component unless the individual demonstrates a basic literacy level or the individual's long-term employment goal does not require a high school diploma.

The State agency may refer participants to post-secondary education provided the education is determined to be necessary to meet the individual's employment goal and the employment is in a recognized occupation. The State agency may also allow participants who are already pursuing a course of education or training at least half-time to continue with the course of study.

Any other JOBS activities in which the student participates may not be permitted to interfere with the education or training activity.

Prior to assigning an individual to a component, the State agency must assess the individual's education, work experience, skills, and family circumstances. On the basis of this assessment, and with input from the participant, an employability plan is developed. This plan must contain an employment goal for the participant, describe child care and other supportive services to be provided, describe JOBS activities that will be undertaken by the participant to achieve the employment goal, and describe any other needs of the family that might be met by JOBS.

Participants in the JOBS Program do not have to meet a certain level of effort as is required in the E&T Program. With the exception of statutory participation requirements in Unemployed Parent cases—which will not go into effect until FY 1994—a participant's level of effort is determined as part of his/her employability plan. Participants in educational activities or training programs must make "good" and "satisfactory" progress in order to continue in the component activity.

The JOBS Program requires that each State agency target those individuals who are most in need of assistance to avoid long-term welfare dependency. This targeted population consists of individuals who are currently receiving or have received AFDC for 36 of the previous 60 months; custodial parents under age 24 who have not completed or are not enrolled in high school or who have had little or no work experience in the preceding year; and individuals whose youngest child is within two years of being ineligible for AFDC due to age.

The exemptions for JOBS are generally the same as for E&T. However, for JOBS the age limit for providing care for a child is under age 3, or, at the State's option, under age 1. Furthermore, a recipient who is providing care for a child under age 6 may be required to participate for no more than 20 hours a week if the State agency guarantees child care. Recipients who reside in a remote area, pregnant women in their second and third trimester, and VISTA volunteers are statutorily exempt from participation in the JOBS Program.

The second parent in an Unemployed Parent household is not exempt because the other parent is a mandatory participant in the JOBS Program. Exemption is allowed only if she/he meets another exemption criterion. Thus, the second parent may be exempt for the care of a young child.

State agencies must allow both exempt and mandatory individuals to participate in the JOBS Program on a voluntary basis, to the extent that the program is available and resources otherwise permit, with first consideration going to volunteers belonging to a targeted population.

Mandatory JOBS individuals are sanctioned on the basis of how many times they fail to comply: For the first occurrence, the noncompliant individual is removed from the AFDC grant until the failure to comply ceases. For the second occurence, the individual is sanctioned until the failure to comply ceases, or three (3) months, whichever is longer. For any subsequent failure to comply, the individual is sanctioned until the failure to comply ceases, or six (6) months, whichever is longer. Prior to imposing the sanction the State agency must establish whether or not good cause for the noncompliance existed, attempt to resolve disputes related to an individual's noncompliance, and provide the opportunity for a fair hearing if the dispute cannot be resolved.

Funding

Each State agency's maximum annual funding level for its JOBS Program is established by combining an amount equal to its WIN/WIN Demonstration allotment for FY 1987 with an amount based on its average monthly number of adult recipients. From the State agency's total annual entitlement, Federal Financial Participation (FFP) is available at a rate of 90 percent for an amount equal to its FY 87 WIN/WIN Demonstration allotment level. For the balance of the State agency's entitlement, FFP is available at the higher of its Medicaid matching rate or 60 percent for personnel costs (salaries and benefits) for full-time staff working full-time in any capacity in the JOBS Program, and at 50 percent for other, indirect personnel costs.

Those State agencies which do not expend at least 55 percent of their JOBS funds on the hard-to-serve targeted population receive FFP of 50 percent, rather than the enhanced rates described.

Each State agency must guarantee child care for a dependent child who is under age 13 or physically or mentally incapable of self care to the extent that the child care is necessary to permit a participant to accept employment or remain employed or to engage in an approved education or training activity under JOBS. The State agency must reimburse participants, or use an income disregard, for the actual cost of child care up to the statewide limit established by the State IV–A agency in its Supportive Services Plan which is at least $200 monthly for childern under two, and $175 monthly for childern two and over. FFP for child care is at the Medicaid matching rate and is included in the title IV–A general program entitlement except for Puerto Rico, Guam, the Virgin Islands, and American Samoa. In those areas the FFP rate is 75 percent and is included in the annual JOBS limit of entitlement.

State agencies can provide transportation or reimburse individuals for transportation and all other costs related to participation in the JOBS Program. FFP is available at the 50 percent matching rate and is subject to the JOBS limit of entitlement.

To receive the enchanced FFP for a fiscal year, each State must meet a specified participation level in the preceding year: 7 percent in FY 1991, 11 percent in FY 1992 and FY 1993, 15 percent in FY 1994, and 20 percent in FY 1995. Failure to meet the required level will result in a FFP rate of 50 percent.

Beginning in FY 1994 States must also achieve a specified participation level in their Unemployed Parent cases. Failure to achieve that level will result in a FFP of 50 percent.

Reporting Requirements

State agencies must maintain an individual case record for each JOBS participant, and provide to DHHS a monthly sample of specified case record data. The sample must be transmitted to DHHS electronically, no later than 45 days after the end of the month in which the sample is taken.

For the purpose of determining participation rates, the State agency must also submit a quarterly report of the aggregate number of individuals required to participate in the JOBS Program.

For the purpose of calculating the amount of funds spent on target groups, and determining the amounts spent per family by component and activity, the State agency must submit a yearly report which may consist of a table of its average total JOBS cost per participant per month of participation for the previous fiscal year.

For FY 1991, $1 billion was made available for the JOBS Program. DHHS has not yet obtained concrete data on the number of JOBS participants. One estimate is that JOBS would serve

approximately 1.56 million participants in FY 1991.

Dated: March 23, 1992.

Betty Jo Nelsen,

Administrator.

[A-570-502]

Final Results of Antidumping Duty Administrative Review: Certain Iron Construction Castings From the People's Republic of China

AGENCY: International Trade Administration, Import Administration, Commerce.

EFFECTIVE DATE: March 27, 1992.

FOR FURTHER INFORMATION CONTACT: Michael Ready, Office of Antidumping Investigations, Import Adminstration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 377-2613.

Final Results

Background

On August 2, 1991, the Department of Commerce (the Department) published in the **Federal Register** the preliminary results of this administrative review of the antidumping duty order on certain iron construction castings from the PRC. The Department has now completed this administrative review in accordance with section 751 of the Tariff Act of 1930, as amended (the Act).

One exporter, Guangdong Metals and Minerals Import and Export Corporation (Minmetals Guangdong), was examined during this review. We verified this company's data during the period December 2-13, 1991. None of the other named exporters responded to the Department's questionnaire. The period of review (POR) is May 1, 1989 through April 30, 1990.

Scope of Review

Imports covered by this review are shipments of certain iron construction castings, limited to: Manhole covers, rings and frames; catch basin grates and frames; cleanout covers and frames used for drainage or access purposes for public utility, water and sanitary systems; and valve, service and meter boxes which are placed below ground to encase water, gas, or other valves, or water or gas meters. These articles must be of cast iron, not alloyed, and not malleable. Until January 1, 1989, iron construction castings were classifiable under items 657.0950 and 657.0990 of the Tariff Schedules of the United States Annotated (TSUSA). Certain iron construction casting are currently classifiable under subheadings 7325.10.00.00 and 7325.10.00.50 of the Harmonized Tariff Schedule (HTS). Although the HTS and TSUSA subheadings are provided for convenience and customs purpose, our written description of the scope of this proceeding is dispositive.

Use of Best Information Available

We have determined, in accordance with section 776(c) of the Act, that the use of best information available is appropriate for entries of the subject merchandise from exporters who did not respond to the Department's questionnaire.

In deciding what to use as best information available, § 353.37(b) of the Department's regulations provides that the Department may take into account whether a party refused to provide requested information. Thus, the Department determines on a case-by-case basis what is best information available. When a company refuses to provide the information requested in a timely manner, or otherwise significantly impedes the Department's review, the Department will normally assign to that company the highest of: (a) The highest rate for any company in any previous review or the originial investigation; or (b) the highest margin for any respondent for the current review. In this case, the highest margin is the margin we have calculated for Minmetals Guangdong in the current review. Accordingly, we will assign to all other exporters for the PRC, as best information available, the margin we calculated for Minmetals Guangdong.

United States Price

We based the United States Price on purchase methodology as set forth in our preliminary results (56 FR 37074, August 2, 1991).

Foreign Market Value

We calculated foreign market value (FMV) as set forth in our preliminary results with the following exception. Where possible, we valued the factors of production using information obtained by the U.S. consulate in Calcutta, India, from an Indian manufacturer of castings. We valued items for which the Consulate was unable to obtain values based on average import prices into India from market-economy countries, which we derived from the government of India's offical imports statistics. In the case of a relatively minor material, bentonite (used as a binder in the foundry sand), the value we calculated from the Indian import statistics was thirty-six times higher than the price in Pakistan as reported by the U.S.C Embassy there. Also, the quantities of bentonite imported into India were quite low—26 metric tons for an entire year, the largest shipment no larger than 6 metric tons. According to information from the U.S. Department of the Interior, Bureau of Mines, the three predominant uses of bentonite are for pelletizing iron ore, as a binder in foundry sand, and drilling mud. The Burear of Mines advised that the quantities imported into India were insufficient for any of these uses and therefore the bentonite imported into India must be of a special grade not suitable for the production of iron castings. We therefore valued bentonite based on price in Pakistan provided by the U.S. Embassy.

We were unable to develop sufficient information in India concerning factory overhead or packing expense. We therefore valued these two items based on information gathered by the U.S. Embassy in Pakistan.

Analysis of Comments Received

We gave interested parties an opportunity to comment on the preliminary results. We received comments from petitioner, importers and Minmetals Guangdong.

Comment 1: Minmetals Guangdong and five importers argue that the values for pig iron and scrap iron not be based upon the prices reported by an Indian producer. They contend that Indian pig iron and scrap iron prices are set by the Indian government rather than by free market conditions. They further conter.d that their prices have not been verified. These parties suggest as an alternative that we value pig iron and scrap iron based on import prices into India using Indian government statistics.

Petitioner argues that the price reported by the Indian producer is probably market-driven because it is comparable to prices reported by producers in Pakistan and the Philippines (alternative surrogate countries). Petitioner submits that the price reported by the Indian producer is higher than the average import price because the reported price may be for a more expensive grade of pig iron, reflect a purchase of a relatively small quantity, and include costs (duty, freight, taxes, etc.) incurred by an importer to get the pig iron to its foundry door. Petitioner further argues that if we do reject the Indian price, we should value pig iron based on a price reported by a Pakistani producer rather than Indian import statistics.

Department's Position: We continue to use the Indian price to value pig iron and scrap iron. To value a NME producer's factor of production, section 773(c)(4) of the Act requires that the Department utilize, to the extent possible, the prices or costs of factors of production in one or more market-economy countries. The Department has interpreted this provision to mean that only prices or costs of factors produced in a market-economy country can be used for factor evaluation purposes (see, *e.g.*, Final Determination of Sales at Less Than Fair Value: Refined Antimony Trioxide from the PRC (57 FR 6801, February 28, 1992)) ("Antimony"). We recognize the Department's responsibility to "avoid using any prices which it has reason to believe or suspect may be dumped or subsidized prices." H.R. Rep. No. 576, 100th Cong., 2d Sess. 590-91 (1988). The Department has consistently refused to base FMV upon surrogate countries' prices for exports if those exports may benefit from subsidies or are being dumped. (See *Technoimportexport* v. *United States* Slip Op. 92-4, at 9 (CIT January 23, 1992). The situation in this case is clearly different, however. There is no foundation in the statute, regulations, or in Departmental practice for rejecting domestic prices in a market economy on the basis that the government somehow influences those prices. (*See* Final Determination of Sales at Less Than Fair Value: Generic Cephalexin Capsules From Canada, 54 FR 26820, 26822 (1989)). Given that we have information on the price for pig iron and scrap iron by an Indian castings producer, we have no reason to consider alternative valuation sources.

Comment 2: Respondents argue that to value inland freight, the Department should convert per-kilometer freight rates from flat to "zone" rates supplied by our diplomatic posts in India by dividing the zone rates by the maximum distance to which they apply. Petitioner argues that since the zone method is apparently used in India, we should continue to use the zone rates to value inland freight.

Department's Position: We agree with petitioner. Indian freight rates were quoted on a zone basis. There is no evidence that realistic per-kilometer rates could be calculated by dividing the zone rates by the maximum number of kilometers to which each zone rate applies.

Comment 3: Respondent argues we should revise downward the percentage we add for factory overhead costs because we calculated the percentage from data supplied by a large Pakistani foundry with a capacity much higher than the Chinese foundries under review.

Petitioner argues that the Chinese foundries are more comparable to the large foundries in Pakistan than to the small ones. Petitioner further argues that the factory overhead rate we calculated, because it is based on detailed cost data, is more accurate than the data available pertaining to small foundries.

Department's Position: Our embassy in Pakistan provided factory overhead perecentage ranges for large and small foundries, as well as a detailed cost breakdown for a large foundry. We used the cost-breakdown to calculate the percentage for the preliminary results. The percentage we calculated, 23.75 percent, was in the range the embassy reported for small foundries.

We have used the same methodology for the final results because it is based on actual costs, rather than estimates.

Comment 4: Respondent argues that the Department should use the statutory minimum profit rather than the percentage reported by the Indian foundry. Respondent bases it argument on the assertion that the Indian producer's profit percentage bears no relationship to either the actual costs incurred by Chinese casting producers, or to the surrogate prices (from a mixture of sources) used by the Department to value Chinese factors of production.

Petitioner counters that the statute requires that the Department value profit is a surrogate country.

Department's Position: We agree with petitioner. Section 773(c)(1) of the Act, which references section 773(e)(1)(B), requires that we value profit in a surrogate country, provided that the surrogate's profit percentage exceeds the statutory minimum of eight percent. In this instance, the surrogate producer's profit was reported to be 10 percent of total costs. We used this figure since it exceeded the statutory minimum.

Comment 5: A sixth importer argues that the "All Others" rate should not apply to China National Machinery Import & Export Coropration (Machimpex), Liaoning Branch, because this branch was not named in the petitioner's review request or the Department's initiation notice for this review. Therefore, the importer argues that entries from this country sould be liquidated at its current deposit rate of 11.66 percent.

Petitioner argues that they named China National Machinery Import & Export Corporation in their review request with the intent that all of the company's branches be included within the scope of the review.

Department's Position: We have continued to assign this company the "All Others" rate. In publishing initiations of administrative review, the Department does not follow a policy of listing every branch company. While we attempt to include the names of headquarters companies, the Department's failure to list Machimpex in its July 6, 1990, initiation notice (55 FR 27880) was an oversight. This omission constituted harmless error, however. The company had notice that its exports were subject to review under the antidumping order. As with other reviews, the petitioners specifically requested that Machimpex be included within this review period. Therefore, the importer is incorrect in claiming that any portion of Machimpex's exports should be liquidated at the deposit rate. See 19 CFR 353.22(e). The Department listed the company in both notices of initiation for the previous two reviews. More importantly, in the current review, we sent Machimpex a questionnaire without designating a particular branch. In a letter dated August 17, 1991, that company stated that "all of its former branches were now independent entities," and that it "had forwarded the questionnaire to Liaoning Machinery & Export Corporation" (formerly China National Machinery Import & Export Corporation, Liaoning Branch). Therefore, we consider this company to be non-cooperative and deserving of the BIA rate in accordance with section 776(c) of the Act.

Comment 6: Petitioner argues that the Department should calculate margins on a foundry-specific basis because (1) the foundries are apparently independent from the exporter, (2) the foundries are aware of the destination of the merchandise they make, and (3) each foundry negotiates separate prices with the exporter.

Department's Position: In the preliminary results, we calculated a single FMV for each foundry. We then weight-averaged the FMVs to arrive at a single FMV which we compared with each of the exporter's (Minmetals Guangdong) sales to the United States. The record contains no U.S. dollar-denominated price data on castings shipped from the factories to Minmetals Guangdong.

Since United States price is based on Minmetals Guangdong's export prices, foreign market value should be based on all castings sourced by Minmetals Guangdong for export to the United States (*i.e.*, foreign market value should

reflect input utilization rates for all factories that supplied Minmetals).

Comment 7: Petitioner argues that the Department should use as BIA for the non-responding firms the highest margin found for any one sale in this review, or, at a minimum, the highest average margin found for any of the four foundries. Petitioner's argument is based on the assertion that the companies failed to respond because, based on the preliminary results of previous reviews, they anticipated their calculated margins would be higher than the margin of the sole responding company, Minmetals Guangdong. Therefore, petitioner argues, to use the margin that we calculate for Minmetals Guangdong is insufficiently punitive.

Department's Position: We consider these non-responding parties to be non-cooperative. Therefore, we have followed our normal BIA policy for non-cooperative parties which states that we will generally assign the higher of: (a) The highest rate for any firm for any previous review or the original less-than-fair-value investigation, or (b) the highest rate found for any firm in the current review. See, Final Results of Antidumping Duty Administrative and Partial Termination: Roller Chain, Other than Bicycle, From Japan (57 FR 6806, February 28, 1992).

Comment 8: Petitioner argues that the Department should value the factors of production by using the average of the Indian and Pakistani values. Petitioner prefers such an approach to the methodology the Department employed for the preliminary results in which we relied on Indian values as our first choice with the resort to Pakistani values only for items for which Indian values were not available.

Department's Position: The July 24, 1991, memorandum in the public file, from Mark P. Lunn to Michael Ready indicates that Indian and Pakistan are both comparable to the PRC in terms of GNP per capital, GNP per capita growth rate, and the distribution of labor between agriculture and industry. India is, however, slightly more comparable in terms of per capita GNP and the distribution of labor. It is the Department's preference to value factors in one surrogate country when possible. (See, Antimony.) Therefore, we have valued the PRC factors of production in India when possible. As stated previously, with respect to bentonite, the data concerning India could not be relied upon and we valued the factor of production in Pakistan. Likewise, for packing and factory overhead, we were unable to find values for India and we used data from Pakistan obtained from our diplomatic post.

Comment 9: Petitioner argues that for items valued using prices gathered by the American Consulate in Calcutta, no inflation adjustment should be made due to ambiguity as to the effective date of prices submitted by the American consulate in Calcutta.

Department's Position: We have continued to make the inflation adjustment. We have confirmed with Calcutta that our information about the effective date of the prices in question was correct; therefore, our inflation adjustment was warranted.

Comment 10: Petitioner argues the Department used an incorrect value to calculate the cost for scrap steel based on data from the American embassy in Pakistan. Respondent argues we should continue to use the price from Pakistan but make deductions for drawback of customs duty and other taxes.

Department's Position: For the final results we have valued scrap steel based on the average import value into India, our primary surrogate country, according to the hierarchy stated in the Foreign Market Value section of this notice.

Comment 11: Petitioner argues the Department failed to value all direct materials used by the Chinese foundries. Specifically, petitioner argues we should consider limestone, clay powder, fluorite, bentonite, kaolin clay, graphite, and talcum powder as direct materials and assign them values. Respondent argues these items are indirect materials and should be considered factory overhead because they are not incorporated in the final product.

Department's Position: We agree with petitioner. In our preliminary results, we calculated a factory overhead rate based on a cost breakdown obtained from a castings producer located in Pakistan. In making that calculation, we treated the items in question as indirect materials. We have since learned that for purposes of the cost breakdown, the Pakistani producer considers these items direct materials.

Comment 12: Petitioner argues that the Department should reject the price for coke reported by the American Consulate in Calcutta because the price is unreasonably low, compared to the price in Pakistan and the United States.

Department's Position: For the preliminary results, we valued coke based on the price the American Consulate in Calcutta provided of 1,800 rupees per metric ton. As a result of petitioner's comment, we asked the consulate to confirm the accuracy of the price quote. In response, the consulate advised that the correct price was 1,100 rupees per metric ton.

In consideration of this information, we based the valuation of coke on the confirmed price of 1,100 Indian rupees.

Comment 13: Petitioner argues that the Department should make circumstance of sale adjustments for after-sale warehousing and credit costs.

Department's Position: In recent NME cases, we havre declined to make circumstance of sale adjustments. To make such an adjustment to FMV would require arbitrary divisions of surrogate country producers' expenses into amounts for direct, indirect, and other general and administrative expenses. See *e.g.*, DOC Position on Comment 21 in Antimony.

Comment 14: Petitioner argues that the Department should make an adjustment for bank charges and letter of credit charges.

Department's Position: No bank or letter of credit charges were reported by the respondent. Nor were any such charges found at verification. Therefore, no basis for making such an adjustment exists.

Comment 15: Petitioner argues that the price as shown in the sales listing for two observations disagrees with the price quoted in correspondence between Minmetals Guangdong and the customer.

Department's Position: We verified one of the two observations and found no discrepancy. We have no reason to doubt the accuracy of the price listed for the other observation. Also, the model number for the observations cited by petitioner is different than the model number to which the price quote applies. Therefore, we accept respondent's data as submitted for these observations.

Comment 16: Since the Department did not follow all of petitioner's many verification suggestions, petitioner contends that we should determine one consolidated rate for all exporters, rather than consider Minmetals Guangdong an independent entity.

Respondent argues that it is up to the Department and not the petitioner to determine the nature and extent of the verification. Respondent further argues Minmetals Guangdong established at the verification that the company possessed authority to sign export contracts without the approval of outside entities and that the company keeps the proceeds from its sales.

Department's Position: We agree with respondent that the Department determines the extent of verification. Nevertheless, we did address some of petitioner's verification concerns and found them without merit. Other suggestions were irrelevant with respect to the criteria for separate rates laid out in our recent final determination regarding sparklers from the PRC (see, Final Determination of Sales at Less Than Fair Value: Sparklers from the People's Republic of China (56 FR 20588, May 6, 1991)) in which we stated:

> We have determined that exporters in nonmarket economy countries are entitled to separate, company-specific margins when they can demonstrate an absence of central government control, both in law and in fact, with respect to exports. Evidence supporting, though not requiring, a finding of *de jure* absence of central control includes: (1) An absence of restrictive stipulations associated with an individual exporter's business and export licenses; (2) any legislative enactments decentralizing control of companies; or (3) any other formal measures by the government decentralizing control of companies. *De facto* absence of central government control with respect to exports is based on two prerequisites: (1) Whether each exporter sets its own export prices independently of the government and other exporters; and (2) whether each exporter can keep the proceeds from its sales.

At the verification we found no restrictive stipulations associated with the company's business license. We also verified that the company keeps the proceeds from its sales. We found the proceeds were deposited into the respondent's account. Furthermore, we did not find any withdrawals that would indicate that any portion of the proceeds was transferred to a government agency. Minmetals Guangdong submitted customer correspondence as evidence of its ability to set its own prices. The evidence included correspondence showing negotiation of prices between Minmetals Guangdong and its customers.

We therefore determine that Minmetals has met the Sparklers criteria and qualifies for a separate rate

Comment 17: Petitioner argues that the Department should correct certain sales prices incorrectly overstated by Minmetals Guangdong.

Minmetals Guangdong advised that the overcharges were adjusted for by deductions on subsequent invoices. By examining the sales listing, petitioner also suggests that overcharging may have also occurred on two additional observations. Respondent has since confirmed that overcharging did occur in these additional observations.

Department's Position: We agree with petitioner and corrected these four observations for the final results. Of many observations checked at verification, only these four were incorrect.

Comment 18: Petitioner argues that the Department should include a factor for scrap wood for the Guangzhou factory because the verification revealed that the factory did use scrap wood to light the fire in the cupola and in the kitchen. Respondent claims it was unable to allocate scrap wood consumption between the cupola and the kitchen.

Department's Position: Since respondent did not allocate scrap wood consumption between uses, for the purpose of these final results we have allocated all scrap wood consumption to the cupola as best information available.

Comment 19: Petitioner argues that we should allocate the Guangzhou factory's consumption of asphalt and turpentine over the castings produced for export to the United States, rather than over total production. The argument is based on Minmetals Guangdong's statement at verification that asphalt and turpentine were applied only to the U.S. castings.

Department's Position: We agree. Since these materials were only used for production exported to the United States, the correct allocation methodology is to divide consumption by exports to the United States, rather than by total production.

Comment 20: Petitioner argues that the Department should adjust the Guangzhou factory's factors of production for labor hours, electricity, and factory overhead to account for production that was contracted out to other foundries. Respondent argues no adjustment is warranted because the contracted-out production was not included in the total production used to calculate the pen ton usage of labor and electricity.

Department's Position: We disagree with respondent. The verification documents indicate that the contracted-out quantity of castings was included in the total production figure. We disagree with petitioner's calculation methodology for making this adjustment, however, because it is based on extremely fragmentary data. Petitioner has imputed its adjustment factor based on only a single category of merchandise (merchandise delivered for export), and for a year-long period which overlaps but that does not coincide with the period of review. Since we lack the data to recalculate these factors, we used, as best information available, the highest factors for labor and electricity submitted by any of the four factories, for the Guangzhou factory also. With respect to petitioner's argument that we also increase the factory overhead costs (for indirect materials, indirect labor, and other factory assets), we do not value these items independently. Rather, we calculate a factory overhead percentage for a surrogate producer and apply that percentage to the sum of the NME producer's direct material, labor and energy costs. Increasing the Guangzhou factory's labor and electricity factors increases the base against which the factory overhead percentage is applied and therefore results in an increase in the amount added for factory overhead.

Comment 21: Petitioner argues that the Department should increase the electricity factor for the Guangzhou factory to include self-generated electricity. Respondent argues that no adjustment is warranted because the self-generated electricity was used only for lighting and not for production, and that the costs for self-generated electricity are included in factory overhead expense.

Department's Position: The matter of self-generated electricity for this factory was not addressed at verification. We therefore accept respondent's assertion that self-generated electricity was not used for production. As noted above, we based the electricity factor of production for this factory on best information available (the highest factor submitted for any other factory).

Comment 22: Petitioner argues we should revise the calculation of freight costs for pig iron and coke used by the Guangzhou factory.

Department's Position: We agree with respect to pig iron. With respect to coke, however, which we found to be supplied from a source 45 kilometers from the factory (instead of 15 kilometers which was reported in the questionnaire response), no revision is necessary because we used a freight rate for the preliminary results applicable to distances up to 50 kilometers.

Comment 23: Petitioner argues that the Department should increase factors of production for labor, electricity, and factory overhead for the Dongguan factory to account for production contracted out to other factories.

Department's Position: We agree with respect to labor and electricity. However, petitioner's recalculation is based on only a single month's production. Since data on contracted-out production is lacking for the entire period of review, we have based the labor and electricity factors for the Dongguan factory on the highest factors reported by any of the factories as best information otherwise available.

Comment 24: The petitioner argues that the Department should add to the constructed value for the Dongguan factory the cost for a bolt assembly included with model L–2286 which was not reported in the questionnaire response. Petitioner has provided U.S. market values for a brass bolt and

washer for purposes of making this adjustment. Respondent argues we should reject the U.S. prices put forward by petitioner because the prices are untimely under 19 CFR 353.31(a)(2), are unverified, and did not come from a public source. Respondent argues that the Department should independently obtain cost information for the bolt assembly.

Department's Position: We agree with respondent. We have valued these items based on average import prices into India, as calculated from official import statistics of the Indian government.

Comment 25: Petitioner argues that the Department should determine whether the Dongguan factory uses an exceptionally costly grade of pig iron. This argument is based on the fact that of the four factories, only Dongguan does not use ferrosilicon and ferromanganese in the production of castings. Dongguan factory personnel advised at verification that these items were not needed because the pig iron contains adequate amounts of silicon and manganese. Therefore, petitioner argues that Dongguan must use a different, more costly grade of pig iron which the Department must value accordingly. Respondent argues that the specified range for silicon and manganese content for the Chinese pig iron grade Z–18 is sufficiently wide so that no additional input of these elements is needed.

Department's Position: We disagree with petitioner. In requesting values for the PRC factors of production from our diplomatic posts in surrogate countries, we made clear the purpose for which we intended to use the requested information. We believe that the pig iron prices which the posts provided are for a grade of pig iron adequate to produce these castings.

Comment 26: Petitioner argues that the Department should add scrap wood, limestone, peralite, and talcum powder to the Shaoguan factory's list of raw material factors of production. These items were not included in the questionaire response. Respondent argues that the factors for peralite and talcum powder are so small (.8 KG. per MT and six KG per MT, respectively) that they would have no material effect on the calculation of foreign market value.

Department's Position: We agree with petitioner. For the final results we have valued each of these materials with the exception of peralite for which we were unable to find a value. We have determined that the omission of this minor material will not have any significant effect on these final results.

Comment 27: The petitioner argues that the Department should reject the electricity factor production submitted by the Shaoguan factory because the factory allocated electricity consumed to various products based on sales value.

Department's Position: We have accepted respondent's allocation methodology. The Shaoguan factory had only one electric meter and received a single bill for the entire factory. While a sales-value-based allocation is not as preferable as a direct allocation based on usage, we have accepted the methodology because there is no evidence that casting production is significantly more energy intensive than the factory's other products and Shaoguan did not have any records to allocate the costs on another basis.

Final Results of the Review

Based on our final analysis, we determine that the following weighted-average margins exist for the period May 1, 1989, through April 30, 1990:

Exporters	Margin (percent)
Guangdong Metal & Minerals Import & Export Corporation	92.74
All others	92.74

The Department shall determine, and the Customs Service shall assess, antidumping duties on all appropriate entries. Individual differences between United States price and foreign market value may vary from the percentage stated above. The Department will issue appraisement instructions directly to the Customs Service.

Further, as provided in section 751(a)(1) of the Act, a cash deposit of estimated antidumping duties based on the above margins shall be required. These deposit requirements are effective for all shipments of certain iron construction castings from the PRC entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice and will remain in effect until the final results of the next administrative review.

This notice also serves as a final reminder to importers of their responsibility under 19 CFR 353.26 to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

This administrative review and notice are in accordance with section 751(a)(1) of the Act (19 U.S.C. 1675(a)(1)) and 19 CFR 353.22(c)(5).

Dated: March 23, 1992.

Marjorie A. Chorlins,

Acting Assistant Secretary for Import Administration.

National Institute of Standards and Technology

Advanced Automotive Technology Conference

AGENCY: National Institute of Standards and Technology, Commerce.

ACTION: Notice of open conference.

SUMMARY: An amendment, dated December 18, 1991, to the Stevenson-Wydler Innovation Act requires that the Secretary of Commerce, through the Under Secretary for Technology, convene a conference of domestic motor vehicle manufacturers, parts suppliers, Federal Laboratories, and motor vehicle users to explore ways in which cooperatively they can improve the competitiveness of the Untied States motor vehicle industry by developing new technologies which will enhance the safety and energy savings, and lessen the environmental impact, of domestic motor vehicles. Notice is hereby given that the specified conference will take place on May 5, 1992, from 8:30 a.m. to 5 p.m. Presentation topics will include: The technology needs and barriers of the automotive industry; technological innovations from the parts suppliers; capabilities and collaborative support from the Federal Laboratories; automotive market analysis from a technological viewpoint; and the Department of Commerce's Strategic Partnership Initiative.

DATES: The conference will be held on May 5, 1992, from 8:30 a.m. to 5 p.m.

ADDRESSES: The conference will be held in the Green Auditorium, Administration Building, National Institute of Standards and Technology, Gaithersburg, Maryland 20899.

FOR FURTHER INFORMATION CONTACT: Lori Phillips, Conference Coordinator, Public Affairs Division, National Institute of Standards and Technology, Administration Building, room A903, Gaithersburg, Maryland 20899, telelephone: (301) 975–4513.

Dated: March 22, 1992.

John W. Lyons,

Director.

BILLING CODE 3510–CW–M

National Oceanic and Atmospheric Administration

Coastal Zone Management: Federal Consistency Appeal by Carlos A. Cruz Colón (Appellant) From an Objection by the Commonwealth of Puerto Rico Planning Board

AGENCY: National Oceanic and Atmospheric Administration, Commerce.

ACTION: Notice of appeal and request for comments.

By letter dated August 26, 1991, Mr. Carlos A. Cruz Colón (Appellant) filed with the Secretary of Commerce (Secretary) a notice of appeal. The Appellant is appealing to the Secretary under section 307(c)(3)(A) of the Coastal Zone Management Act (CZMA) and the Department's implementing regulations, 15 CFR part 930, subpart H. The appeal is taken from an objection by the Commonwealth of Puerto Rico Planning Board (PRPB) to the Appellant's consistency certification that its proposal to construct an "L" shaped pier 36 feet by six feet and 30 feet by six feet, or, in the alternative, a boardwalk, in the Torrecilla Lagoon in Carolina, Puerto Rico, for which a U.S. Army Corps of Engineers permit must be obtained, is consistent with the PRPB's coastal zone management program.

The CZMA provides that a timely objection by a state (including Puerto Rico) to a consistency certification precludes any Federal agency from issuing licenses or permits for the activity unless the Secretary of Commerce finds that the activity is either "consistent with the objectives" of the CZMA (Ground I) or "necessary in the interest of national security" (Ground II). Section 307(c)(3) (A) or (B). To make such a determination, the Secretary must find that the proposed project satisfies the requirements of 15 CFR 930.121 or 930.122.

The Appellant requests that the Secretary override the PRPB's consistency objections based on Ground I. To make the determination that the proposed activity is "consistent with the objectives" of the CZMA, the Secretary must find that: (1) The proposed activity furthers one or more of the national objectives or purposes contained in sections 302 or 303 of the CZMA, (2) the adverse effects of the proposed activity do not outweigh its contribution to the national interest, (3) the proposed activity will not violate the Clean Air Act or the Federal Water Pollution Control Act, and (4) no reasonable alternative is available that would permit the activity to be conducted in a manner consistent with the PRPB's coastal management program. 15 CFR 930.121.

Public comments are invited on the findings that the Secretary must make as set forth in the regulations at 15 CFR 930.121. Comments are due within 30 days of the publication of this notice and should be sent to Ms. Margo E. Jackson, Assistant General Counsel for Ocean Services, National Oceanic and Atmospheric Administration, U.S. Department of Commerce, 1825 Connecticut Avenue, NW., suite 603, Washington, DC 20235. Copies of comments should also be sent to Ms. Patria G. Custodio, Chairperson, Puerto Rico Planning Board, Minillas Governmental Center, North Building, De Diego Avenue, Stop 22, P.O. Box 41119, San Juan, Perto Rico, 00940–1119.

All nonconfidential documents submitted in this appeal are available for public inspection during business hours at the offices of the Commonwealth of Puerto Rico Planning Board and the Office of the Assistant General Counsel for Ocean Services, NOAA.

FOR ADDITIONAL INFORMATION CONTACT: Ms. Margo Jackson, Assistant General Counsel for Ocean Services, National Oceanic and Atmospheric Administration, U.S. Department of Commerce, 1825 Connecticut Avenue, NW., suite 603, Washington, DC 20235, (202) 606–4200.

(Federal Domestic Assistance Catalog No. 11.419 Coastal Zone Management Program Assistance)

Dated: March 20, 1992.

Thomas A. Campbell,

General Counsel.

[FR Doc. 92–7091 Filed 3–26–92; 8:45 am]

BILLING CODE 3510–08–M

Intent To Grant Exclusive License

SUMMARY: The Government's undivided interest in a jointly owned invention described in U.S. Application No. 07/515,487, now U.S. Patent No. 5, 028,929, and entitled "Icing Hazard Detection for Aircraft," is available for licensing in accordance with 35 U.S.C. 207. Applications may be sent to John Raubitschek, Patent Counsel, Department of Commerce, room H–4610, Washington, DC 20230. His telephone number if (202) 377–5394.

If a satisfactory license application is not received within 3 months, NOAA intends to grant an exclusive license under its undivided interest to the other co-owner, the University Corporation for Atmospheric Research (UCAR) of Boulder, Colorado. The prospective exclusive license will be royalty bearing and will comply with the terms and conditions of 35 U.S.C. 209 and 37 CFR 404.7. However, the license will not be granted if, within 3 months, NOAA receives written evidence and argument which establishes that the grant of the license would not be consistent with the requirements of 35 U.S.C. 209 and 37 CFR 404.7.

William H. Hooke,

Acting Chief Scientist, National Oceanic and Atmospheric Administration.

[FR Doc. 92–7097 Filed 3–26–92; 8:45 am]

BILLING CODE 3510–13–M

Marine Mammals

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

ACTION: Issuance of permits (P66G) and (P66I).

On February 11, 1992, notice was published in the **Federal Register** (57 FR 4990) that applications had been filed by the Alaska Department of Fish and Game, Division of Wildlife Conservation, P.O. Box 3–222, Juneau, AK 99802, for the following permits:

Permit No. 770 (P66G) authorizes, with certain conditions: (1) Up to 100 harbor seals (*Phoca vitulina*) and 50 spotted seals (*Phoca largha*) to be captured, restrained, blood sampled, flipper tagged, equipped with satellite-linked platform transmitter terminals (PTTs) and/or VHF telemetry and released; (2) the same activities to be conducted on an additional 100 harbor seals and 50 spotted seals, except that this control group will not be electronically tagged; (3) up to ten (10) harbor seals and five (5) spotted seals to be unintentionally killed during the conduct of the authorized research activities; and (4) up to 500 harbor seals and 500 spotted seals to be unintentionally harassed while conducting the authorized activities. These acitvities will occur over a four-year period.

Permit No. 771 (P66I) authorizes, with certain conditions: (1) Up to 50 sea lions to be chemically immobilized, blood sampled, measured, weighed, tooth extracted, swabbed, blubber biopsied, equipped with satellite-linked platform transmitter terminals (PTTs) and/or VHF radio tags; (2) up to 10 sea lions to be unintentionally killed during the

course of developing and testing effective chemical immobilization protocols; and (3) up to 1000 sea lions to be unintentionally disturbed during the course of the research activities. These activities may be carried out over a two-year period in Alaska.

Notice is hereby given that on March 20, 1992, as authroized by the provisions of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407) and the Endangered Species Act of 1973 (16 U.S.C. 1531–1543), the National Marine Fisheries Service issued two Permits for the above takings, subject to certain conditions set forth therein.

Issuance of the Steller sea lion Permit, as required by the Endangered Species Act of 1973, is based on the finding that such Permit: (1) Was applied for in good faith; (2) will not operate to the disadvantage of the endangered species which is the subject of the Permit; and (3) is consistent with the purposes and policies set forth in section 2 of the Act. This Permit was also issued in accordance with and is subject to parts 220–222 of title 50 CFR, the National Marine Fisheries Service regulations governing endangered species permits.

The Permits and supporting documentation are available for review in the following offices:

By appointment: Permits Division, Office of Protected Resources, National Marine Fisheries Service, 1335 East-West Hwy., suite 7324, Silver Spring, MD 20910; and

Director, Alaska Region, National Marine Fisheries Service, Fed. Bldg., 709 W. 9th Street, Juneau, Alaska 99802 (907/586–7221).

Dated: March 20, 1992.

Nancy Foster,

Director, Office of Protected Resources.

[FR Doc. 92–7069 Filed 3–26–92; 8:45 am]

BILLING CODE 3510–23–M

Marine Mammals

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

ACTION: Issuance of a Scientific Research Permit (P475).

On December 30, 1991, notice was published in the **Federal Register** (56 FR 67287) that an application had been filed by Ms. Dena R. Matkin, Gustavus, AK 99826 for a Permit to harass annually, up to five times each, up to 150 killer whales (*Orcinus orca*) during photo-identification studies. The purposes of the proposed research are to: Continue the applicant's long-term photo-identification of killer whales that utilize the southeastern Alaska ecosystem; determine pod composition and cohesiveness; define within-pod affiliations; and assess the effects of the Prince William Sound oil spill on habitat use by killer whales in southeastern Alaska.

Location of activity: The proposed activities will be conducted year-round in southeastern Alaskan waters.

Notice is hereby given that on March 20, 1992, as authorized by the provisions of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407), the National Marine Fisheries Service issued a Permit to the above applicant to inadvertently harass the marine mammals described above subject to certain conditions set forth therein. To provide a standard, quantifiable measure of approach effort, approaches <100 yards and those animals showing signs of being disturbed no matter the distance are considered "taken" by harassment and counted against the number of animals authorized in the Permit. The Permit became effective upon the date of signature.

In light of a planned review by the National Marine Fisheries Service of North Pacific humpback whale/killer whale research during 1992, Permit 772 has been issued only through December 31, 1992.

Issuance of this Permit is based on a finding that the proposed taking is consistent with the purposes and policies of the Marine Mammal Protection Act. The Service has determined that this research satisfies the issuance criteria for scientific research permits. The taking is required to further a *bona fide* scientific purpose and does not involve unnecessary duplication of research.

The Permit and associated documents are available for review in the following offices:

By appointment: Office of Protected Resources, National Marine Fisheries Service, 1335 East-West Hwy., room 7324, Silver Spring, MD 20910 (301/773–2289);

Director, Alaska Region, National Marine Fisheries Service, NOAA, 709 West 9th Street, Federal Bldg., Juneau, AK 99802 (907/586–7221); and

Director, Northwest Region, National Marine Fisheries Service, NOAA, 7600 Sand Point Way, NE., BIN C15700, Seattle, WA 98115 (206/526–6150).

Dated: March 20, 1992.

Nancy Foster,

Director, Office of Protected Resources, National Marine Fisheries Service.

[FR Doc. 92–7070 Filed 3–26–92; 8:45 am]

BILLING CODE 3510–23–M

Marine Mammals

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Application for Public Display Permit, Zoo Parquesan, Parques de Fuengirola Malaga, Malaga, Spain (P508).

SUMMARY: Notice is hereby given that an applicant has applied in due form for a Public Display Permit to obtain the care and custody of marine mammals as authorized by the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407), and the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR part 216).

1. *Applicant:* Zoo Parquesan, Parques de Fuengirola, Camino Jose Cela, s.n., 29640 Fuengirola, Malaga, Malaga, Spain 29640.

2. *Type of Permit:* Public Display.

3. *Name and Number of Animals:* Two (2) male California sea lions (*Zalophus californianus*).

4. The applicant requests authorization to obtain and maintain two male California sea lions, from captive stock, currently in the custody of The Marine Mammal Center, Sausalito, CA.

Duration of Activity: The animals are to be maintained indefinitely at Zoo Parquesan in Malaga, Spain, with the applicant having full responsibility for the care and maintenance of the animals as certified by the Spanish Government.

Concurrent with the publication of this notice in the **Federal Register**, the Secretary of Commerce is forwarding copies of this application to the Marine Mammal Commission and the Committee of Scientific Advisors.

Written data or views, or requests for a public hearing on this application should be submitted to the Assistant Administrator for Fisheries, NMFS, U.S. Department of Commerce, 1335 East-West Highway, SSMC#1, room 7330, Silver Spring, MD 20910, within 30 days of the publication of this notice. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular application would be appropriate. The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries. All statements and opinions contained in this application are summaries of those of the applicant and do not necessarily reflect the views of NMFS.

Documents submitted in connection with the above application are available for review by interested persons in the following office:

Permits Division, Office of Protected Resources, NMFS, 1335 East-West Highway, SSMC#1, room 7330, Silver Spring, MD 20910 (301/713–2289); and

Director, Southwest Region, NMFS, NOAA, 501 W. Ocean Boulevard, suite 4200, Long Beach, CA 90802–4213 (310/980–4001).

Dated: March 23, 1992.

Charles Karnella,

Acting Director, Office of Protected Resources, National Marine Fisheries Service.

[FR Doc. 92–7071 Filed 3–26–92; 8:45 am]

BILLING CODE 3510–23–M

COMMITTEE FOR PURCHASE FROM THE BLIND AND OTHER SEVERELY HANDICAPPED

Procurement List Additions

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Additions to procurement list.

SUMMARY: This action adds to the Procurement List fiberboard wood boxes to be furnished by a nonprofit agency employing persons who are severely disabled.

EFFECTIVE DATE: April 27, 1992.

ADDRESSES: Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 5, suite 1107, 1755 Jefferson Davis Highway, Arlington, Virginia 22202–3509.

FOR FURTHER INFORMATION CONTACT: Beverly Milkman, (703) 557–1145.

SUPPLEMENTARY INFORMATION: On January 6, 1992, the Commitee for Purchase from the Blind and Other Severely Handicapped published a notice (57 FR 400) of the proposed addition of these wood boxes to the Procurement List.

Comments were received from the current contractor for these boxes. The commenter indicated that loss of its contracts would constitute a severe adverse impact on it. It also indicated that the nature of the manufacturing process made it unsuitable for workers with severe disabilities, and that the use of workers without disabilities would merely displace its workers. It also indicated that the result of this action would be an increase in the prices paid by the Government.

Based on the data the commenter submitted, the Committee has determined that the impact on the current contractor would not be severe. The boxes would be produced almost entirely by workers with severe disabilities, so the contractor's workers would not be displaced by other workers without disabilities. The Committee's statute requires that items on the Procurement List be supplied to the Government at a fair market price. Consequently, any increase above the current contract price would be minimal and would be within the range of prices offered by the commercial market.

After consideration of the material presented to it concerning capability of qualified nonprofit agencies to produce the commodities at a fair market price and impact of the addition on the current or most recent contractors, the Committee has determined that the commodities listed below are suitable for procurement by the Federal Government under 41 U.S.C. 46–48c and 41 CFR 51–2.4.

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action wil not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the commodities to the Government.

2. The action will not have a severe economic impact on current contractors for the commodities.

3. The action will result in authorizing small entities to furnish the commodities to the Government.

4. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 46–48c) in connection with the commodities proposed for addition to the Procurement List.

Accordingly, the following commodities are hereby added to the Procurement List:

Box, Wood, Fiberboard

8115–00–L01–0679
8115–00–L01–0680
8115–00–L01–0681
8115–00–L01–0682
8115–00–L01–0684
8115–00–L85–0005

(Requirements of the Navy Ships Parts Control Center, Mechanicsburg, Pennsylvania only)

This action does not affect contracts awarded prior to the effective date of this addition or options exercised under those contracts.

E.R. Alley, Jr.,

Deputy Executive Director.

BILLING CODE 6820–33–M

Procurement List Additions

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Additions to procurement list.

SUMMARY: This action adds to the Procurement List commodities and a service to be furnished by nonprofit agencies employing persons who are blind or have other severe disabilities.

EFFECTIVE DATE: April 27, 1992.

ADDRESSES: Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 5, suite 1107, 1755 Jefferson Davis Highway, Arlington, Virginia 22202–3509.

FOR FURTHER INFORMATION CONTACT: Beverly Milkman, (703) 577–1145.

SUPPLEMENTARY INFORMATION: On November 8, 1991, January 10 and 31, 1992 the Committee for Purchase from the Blind and Other Severely Handicapped published notices (56 FR 57323, 57 FR 1147 and 3750) of proposed additions to the Procurement List.

After consideration of the material presented to it concerning capability of qualified nonprofit agencies to produce the commodities and provide the services at a fair market price and impact of the addition on the current or most recent contractors, the Committee has determined that the commodities and services listed below are suitable for procurement by the Federal Government under 41 U.S.C. 46–48c and 41 CFR 51–2.4.

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the commodities or service to the Government.

2. The action will not have a severe economic impact on current contractors for the commodities or service.

3. The action will result in authorizing small entities to furnish the commodities or service to the Government.

4. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 46–48c) in connection with the commodities or service proposed for addition to the Procurement List.

Accordingly, the following commodities and service are hereby added to the Procurement List:

Commodities

Skid, Wood
3990–00–NSH–0065
(Requirements for the Government Printing Office, Washington, DC)
Scraper, Ice
7920–01–323–0793
Coveralls, Men's
8405–00–037–9184
8405–00–037–9234
8405–00–037–9274
8405–00–037–9280
8405–00–037–9281
8405–01–173–7438
8405–01–173–7439
8405–01–173–7440

Service

Janitorial/Custodial
Fort Shafter Buildings 200, 214, 230, T–1, T–128, T–223, T–1544, T–1571
Tripler Army Medical Center Building 127 Oahu, Hawaii

This action does not affect contracts awarded prior to the effective date of this addition or options exercised under those contracts.

E.R. Alley, Jr.,
Deputy Executive Director.

BILLING CODE 6820–33–M

Procurement List Proposed Additions

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.
ACTION: Proposed additions to procurement list.

SUMMARY: The Committee has received proposals to add to the Procurement List commodities and a service to be furnished by nonprofit agencies employing persons who are blind or have other severe disabilities.

COMMENTS MUST BE RECEIVED ON OR BEFORE: April 27, 1992.

ADDRESSES: Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 5, suite 1107, 1755 Jefferson Davis Highway, Arlington, Virginia 22202–3509.

FOR FURTHER INFORMATION CONTACT: Beverly Milkman (703) 557–1145.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 47(a)(2) and 41 CFR 51–2.3. Its purpose is to provide interested persons an opportunity to submit comments on the possible impact of the proposed actions.

If the Committee approves the proposed additions, all entities of the Federal Government (except as otherwise indicated) will be required to procure the commodities and a service listed below from nonprofit agencies employing persons who are blind or have other severe disabilities.

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the commodities and service to the Government.
2. The action does not appear to have a severe economic impact on current contractors from the commodities and service.
3. The action will result in authorizing small entities to furnish the commodities and service to the Government.
4. There are no know regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 46–48C) in connection with the commodities and service proposed for addition to the Procurement List.

Comments on this certification are invited. Commenters should identify the statement(s) underlying the certification on which they are providing additional information.

It is proposed to add the following commodities and service to the Procurement List:

Commodities

Enema Administration Kit
6530–00–117–8991
Microfiche, FAA Airworthiness Documents
7690–00–NSH–0021 (Program C684–S)
(Requirements for the Government Printing Office, Washington, DC only)

Service

Mail and Messenger Service, U.S. Army Corps of Engineers, Huntsville, Alabama.

E.R. Alley, Jr.,
Deputy Executive Director.

BILLING CODE 6820–33–M

Procurement List; Addition

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.
ACTION: Addition to Procurement List.

SUMMARY: This action adds to the Procurement List a multi-loop line to be furnished by a nonprofit agency employing persons who are severely disabled.

EFFECTIVE DATE: April 27, 1992.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 5, suite 1107, 1755 Jefferson Davis Highway, Arlington, Virginia 22202–3509.

FOR FURTHER INFORMATION CONTACT: Beverly Milkman (703) 557–1145.

SUPPLEMENTARY INFORMATION: On December 2, 1991, the Committee for Purchase from the Blind and Other Severely Handicapped published a notice (56 FR 61234) of the proposed addition of this multi-loop line to the Procurement List.

No comments were received during the public comment period. However, late in the rulemaking process, comments were received from the current contractor and a State rehabilitation counselor addressing the issues of impact on the current contractor and its employment of people with disabilities. The comments indicated that as many as twelve employees with disabilities could be displaced if the contractor could no longer supply multi-line loops to the Government.

The Committee understands that the multi-loop line being added to the Procurement List by this rulemaking is one of 61 such lines in the Government supply system, 26 of which are being currently procured. This line is the fourth to be added to the Procurement List, leaving at least 22 available for the contractor to compete on suppling to the Government. The contractor has admitted that loss of this one line would not impact it severely. The Committee has taken this into account, as well as the impact of two other lines added to the Procurement List for which this contractor was the current contractor, in concluding that this rulemaking will not constitute severe adverse impact on the contractor. The Committee believes that the creation of employment for persons with severe disabilities under its program, which requires that a large percentage of direct labor be performed by persons with these disabilities, outweighs a possible loss of employment for a small number of persons with disabilities who may be discharged by their employer for other reasons.

After consideration of the material presented to it concerning capability of qualified nonprofit agencies to produce the commodity at a fair market price and impact of the addition on the current or most recent contractors, the Committee has determined that the commodity listed below is suitable for procurement by the Federal Government under 41 U.S.C. 46–48c and 41 CFR 51–2.4.

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the commodity to the Government.
2. The action will not have a severe economic impact on current contractors for the commodity.
3. The action will result in authorizing small entities to furnish the commodity to the Government.
4. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 46–48c) in connection with the commodity proposed for addition to the Procurement List.

Accordingly, the following commodity is hereby added to the Procurement List:

Line, Multi-Loop
1670–01–062–8308

This action does not affect contracts awarded prior to the effective date of this addition or options exercised under those contracts.

E. R. Alley, Jr.,
Deputy Executive Director.

DEPARTMENT OF DEFENSE

Department of the Army

Army Science Board; Closed Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), announcement is made of the following Committee Meeting:

Name of the Committee: Army Science Board (ASB).
Dates/Time of Meeting: 10 April 1992.
Time: 0800–1100 hours.
Place: Pentagon, Washington, DC.
Agenda: The members of the Army Science Board Issue Group Study on Longbow for the Comanche and Apache will meet with representatives from the Army Materiel Systems Analysis Activity (AMSAA) and representatives of Harry Diamond Labs (HDL) to review the sensitivity analysis conducted by AMSAA for the Longbow Fire Control Radar Stationary Target Indications. The members will review available technical documentation, and review radar and missile requirements given the physical specifications of the missile and radar. This meeting will be closed to the public in accordance with section 552b(c) of title 5, U.S.C., specifically subparagraph (1) thereof, and title 5, U.S.C., appendix 2, subsection 10(d). The classified and unclassified matters to be discussed are so inextricably intertwined so as to preclude opening any portion of the meeting. The ASB Administrative Officer, Sally Warner, may be contacted for further information at (703) 695–0781/0782.

Sally A. Warner,
Administrative Officer, Army Science Board.

Army Science Board; Closed Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), announcement is made of the following Committee Meeting:

Name of the Committee: Army Science Board (ASB).
Dates/Time of Meeting: 13–14 April 1992.
Time: 0900–1700 hours.
Place: Picatinny Arsenal, Dover, New Jersey.
Agenda: The Army Science Board Systems Issue Group will meet with government and contractor representatives to discuss results of the test firings at Yuma Proving Grounds, review pressure oscillation analysis, and discuss the latest design of the Regenerative Liquid Propellant Gun. This meeting will be closed to the public in accordance with section 552b(c) of title 5, U.S.C., specifically subparagraph (1) thereof, and title 5, U.S.C., appendix 2, subsection 10(d). The classified and unclassified matters to be discussed are so inextricably intertwined so as to preclude opening any portion of the meeting. The ASB Administrative Officer, Sally Warner, may be contacted for further information at (703) 695–0781/0782.

BILLING CODE 3710–8–M

DEPARTMENT OF ENERGY

USDOE Field Office, Oak Ridge (OR); Notice

AGENCY: Department of Energy (DOE).
ACTION: Notice.

SUMMARY: DOE announces that pursuant to 10 CFR 600.7(b)(2), it intends to issue on a noncompetitive basis a new grant to the University of Florida to conduct a training course for the period May 3–June 13, 1992 under the sponsorship of the International Atomic Energy Agency (IAEA). The course is the 1992 U.S.-Hosted Inter-Regional Training Course for IAEA, entitled "Use of Isotopes and Radiation in Insect Control and Entomology." The period of performance will be from the date of award through September 30, 1992. The estimated amount is $67,000.

Procurement Request No.: 05–92IE11099.000.

Project Scope: This new grant is to conduct a course that has been held at the University of Florida every other year since 1963. The primary pupose is to provide technical training for research entomologists world wide as part of an international effort to increase food supplies through controlling pests that cause significant losses. The course promotes peaceful uses of atomic energy as well as public interest in disseminating knowledge about techniques to control insect pests harmful to the United States. The University of Florida has the unique availability and access to major Federal, State, and University entomology laboratories that are all located within the Gainesville, FL commuting area. Their location enables the course to enhance lectures by including site visits and hands-on laboratory work. Eligibility for this award is, therefore, restricted to the University of Florida.

FOR FURTHER INFORMATION CONTACT: Barbara Thomas, Division of Nuclear Non-Proliferation Policy, Office of International Affairs, USDOE, Washington, DC 20585, (202) 586–6188.

Issued in Oak Ridge, Tennessee, on March 18, 1992.

Willis Davis,
Acting Director, Procurement and Contracts Division, USDOE Field Office, Oak Ridge (OR).
[FR Doc. 92–7144 Filed 3–26–92; 8:45 am]
BILLING CODE 6450–01–M

Financial Assistance Award; Intent To Award Grant to Hyberport, Inc.

AGENCY: U.S. Department of Energy.
ACTION: Notice of unsolicited financial assistance award.

SUMMARY: The Department of Energy announces that pursuant to 10 CFR 600.6(a)(2), it is making a discretionary financial assistance award based on acceptance of an unsolicited application meeting the criteria of 10 CFR 600.14(e)(1) to Hyberport, Incorporated under Grant No. DE–FG01–92CE15536. The proposed grant will provide funding in the estimated amount of $83,791 for Hyberport, Inc., to save energy by developing and commercially demonstrating their Electronic Control for Thermostatic Expansion Valves (ECTXV). The ECTXV is a device that extends the range of efficient operation of refrigeration, heat pump, and air-conditioning systems.

In accordance with 10 CFR 600.14(e)(1), it has been determined that this represents a unique idea that would not be eligible for financial assistance under a recent, current or planned solicitation.

The co-inventors, Joseph Marsala and Melvin M. Winters, both have considerable experience with refrigeration systems and associated control systems.

The proposed project is not eligible for financial assistance under a recent, current or planned solicitation because the funding program, the Energy-Related Inventions Program (ERIP), has been structured since its beginning in 1975 to operate without competitive solicitations because the authorizing legislation directs ERIP to provide support for worthy ideas submitted by the public. The proposed technology has a strong possibility allowing for future reductions in the energy consumption of the United States. The program has never issued and has no plans to issue a competitive solicitation.

The anticipated term of the proposed grant is 18 months from the effective date of award.

FOR FURTHER INFORMATION CONTACT: U.S. Department of Energy, Office of Placement and Administration, Attn: Bernard G. Canlas, PR-322.2, 1000 Independence Avenue, SW., Washington, DC 20585.

Thomas S. Keefe,

Director, Operations Division "B", Office of Placement and Administration.

[FR Doc. 92-7145 Filed 3-26-92; 8:45 am]

BILLING CODE 6450-01-M

Intent To Award a Grant to Pennsylvania State University for Advanced Thermally Stable Coal-Derived Jet Fuels Research Program

AGENCY: U.S. Department of Energy, Pittsburgh Energy Technology Center.

ACTION: Intent to make a noncompetitive financial assistance award.

SUMMARY: The Department of Energy (DOE), Pittsburgh Energy Technology Center announces that pursuant to 10 CFR 600.7(b)(2)(i) criteria (A) and (D), it intends to make a noncompetitive financial assistance award (grant) to Pennsylvania State University (PSU).

SUPPLEMENTARY INFORMATION: This financial assistance award is intended to support a long-term R&D effort (including both basic and applied research) with the primary objectives to: (1) Investigate the quantitative degradation chemistry of fuels, (2) characterize solid gums, sediments, and carbonaceous deposits, (3) conduct coal-based fuel stabilization studies, and (4) conduct exploratory conversion studies of coal to high thermal stability jet fuels.

In accordance with 10 CFR 600.7(b)(2)(i) criteria (A) and (D), Pennsylvania State University has been selected as the grant recipient. DOE support the activity would enhance the public benefits in that the technology developed under the program will also eventually have direct future applications for the development of improved commercial aviation jet fuels. This noncompetitive financial assistance is an extension of a previous subprogram funded by the Department of Defense and is justified as a logical extension of the research that PSU began under prior DoD agreements. Competition would have a significant adverse effect on the continuity and completion of the research. Therefore, the Department of Energy has determined that a competitive solicitation would be inappropriate. Furthermore, PSU is uniquely qualified and situated to conduct the research which would satisfy the needs of DOE's Fossil Fuel Energy R&D Program.

The term of the grant is for a one (1) year period, with an estimated value of $2,000,000.00. For further information contact: U.S. Department of Energy, Pittsburgh Energy Technology Center, Acquisition and Assistance Division, P.O. Box 10940, MS 921-118, Pittsburgh, PA 15236-0940, Attn: John N. Augustine, Telephone: AC (412) 892-4524.

Issued in Washington, DC on March 18, 1992.

Richard D. Rogus,

Contracting Officer, Acquisition and Assistance Division, Pittsburgh Energy Technology Center.

[FR Doc. 92-7146 Filed 3-26-92; 8:45 am]

BILLING CODE 6450-01-M

Bonneville Power Administration

Columbia Power Cooperative Association, Antelope-Fossil Rebuild Project; Floodplain and Wetland Involvement Notification

AGENCY: Bonneville Power Administration (BPA), Department of Energy (DOE).

ACTION: Notice of floodplain and wetland involvement, Wheeler and Wasco Counties, Oregon.

SUMMARY: BPA proposes to amend an existing lease agreement with Columbia Power Cooperative Association (CPCA) to upgrade a transmission line between the Antelope Substation and the BPA Fossil Substation in Wasco and Wheeler Counties, Oregon. The project involves rebuilding and reconductoring 23.2 miles of transmission line, including modification from 69kV to 115kV. This project represents our extension of similar modifications undertaken in 1987 along adjacent portions of the transmission line by Columbia Power Cooperative and Wasco Electric. This rebuild will be constructed along the existing right-of-way for the present transmission line and consists essentially of the same line upgraded for future loads. The existing line route crosses riparian wetlands and the floodplains of the John Day River, plus several minor tributaries. No alternative routes have been identified for the transmission line.

DATES: Any comments are due on or before April 13, 1992.

FOR FURTHER INFORMATION AND/OR TO MAKE COMMENTS, CONTACT: John Taves—EFBG, Bonneville Power Administration, P.O. Box 3621, Portland, Oregon, 97208.

SUPPLEMENTARY INFORMATION: A 100-year floodplain exists along portions of the the John Day River, which will be crossed by the project. This floodplain occurs along the Wheeler County-Wasco County boundary and includes sections 3, 4, and 5 in Township 8 South, Range 19 East. The floodplain also involves sections 32, 33, 34, 35, and 36 within Township 7 South, Range 19 East along the John Day River, the lower portion of which includes Hancock and Indian Canyons bordering Pine Creek and Cove Creek tributaries. Near the community of Fossil the project route also crosses the 100-year floodplain of Cottonwood Creek within section 8, Township 7 South, Range 21 East. All of the proposed facilities will be located within the Cooperative's existing right-of-way with powerline structures positioned to minimize impact on wetlands and other environmental considerations. It will be necessary to locate some structures within the 100-year floodplain along the John Day River and associated tributaries.

Limited riparian and seasonal wetlands also occur within the 100-year floodplain of the John Day River within previously cited sections. Additional isolated pockets of seasonally moist areas occur within section 34 of Township 7 South, Range 17 East, section 3, Township 8 South, Range 17 East, and section 34, Township 7 South, Range 19 East. The proposed project also crosses several minor seasonally flooded drainages and small creeks along the proposed route.

In accordance with DOE regulations for compliance with floodplain and wetland environmental review requirements (10 CFR part 1022), BPA will prepare a floodplain/wetland assessment on this proposed action. This floodplain/wetland assessment will be included in the Environmental Assessment and the Floodplain Statement of Findings will be included in a Finding of No Significant Impact or Final Environmental Impact of Statement. Maps and further information are available from BPA at the address shown above.

Issued in Portland, Oregon, on March 13, 1992.

Jack S. Robertson,

Acting Administrator, Bonneville Power Administration.

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket Nos. QF91-23-001, et al.]

EEA I, L.P., et al.; Electric Rate, Small Power Production, and Interlocking Directorate Filings

Take notice that the following filings have been made with the Commission:

1. EEA I, L.P.

[Docket No. QF91-23-001]

March 18, 1992.

On March 11, 1992, EEA I, L.P. (Applicant), of 1275 K Street, NW., suite 900, Washington, DC 20005-4005, submitted for filing an application for certification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's Regulations. No determination has been made that the submittal constitutes a complete filing.

The topping-cycle cogeneration facility will be located in Union County, New Jersey. The facility will consist of a combustion turbine generator, a heat recovery boiler, and an extraction/condensing steam turbing generator. Thermal energy recovered from the facility will be provided to the United States Gypsum Company for process use. The primary energy source will be natural gas. The net electric power production capacity of the facility will be approximately 148.9 MW. Installation of the facility is scheduled to begin in June, 1992, with commercial operation scheduled to begin in January, 1994.

Comment date: April 27, 1992, in accordance with Standard Paragraph E at the end of this notice.

2. The AES Corporation

[Docket No. QF83-145-001]

March 19, 1992.

On March 6, 1992, the AES Corporation (Applicant), of 1001 North 19th Street, Arlington, Virginia 22209, filed with the Federal Energy Regulatory Commission an application for certification of a facility as a qualifying small power production facility pursuant to § 292.207 of the Commission's Regulations. No determination has been made that the submittal constitutes a complete filing.

The facility is located in Pasadena, Texas and is currently operating as a qualified topping-cycle cogeneration facility pursuant to an order issued by the Commission on April 11, 1983, 23 FERC ¶ 62,030 (1983). Applicant now requests that the facility be certified as a small power production facility. The facility consists of a single steam boiler fired by petroleum coke and a condensing steam turbine generator. The maximum net electric output of the facility is 143MW. Natural gas is used for start-up and flame stabilization. In addition, the ownership of the facility has changed from the AES Corporation to AES Deepwater, Inc.

Comment date: April 27, 1992, in accordance with Standard Paragraph E at the end of this notice.

3. Kansas City Power & Light Company

[Docket No. ES92-34-000]

March 19, 1992.

Take notice that on March 16, 1992, Kansas City Power & Light Company filed an application with the Federal Energy Regulatory Commission under § 204 of the Federal Power Act requesting authority to issue not more than $750 million of short-term debt instruments on or before June 30, 1994, with a final maturity date no later than June 30, 1995.

Comment date: April 15, 1992, in accordance with Standard Paragraph E at the end of this notice.

4. Pacific Gas & Electric Company

[Docket No. ER91-505-002]

March 20, 1992.

Take notice that on February 28, 1992, Pacific Gas & Electric Company (PG&E) tendered for filing its refund report in the above referenced docket.

Comment date: April 2, 1992, in accordance with Standard Paragraph E at the end of this notice.

5. Central Power and Light Company

[Docket No. ER92-349-000]

March 20, 1992.

Take notice that on March 4, 1992, Central Power and Light Company (CPL) tendered for filing the Second Amendment, dated December 19, 1991, to the Capacity Sale Agreement between CPL and Tex-La Electric Cooperative, Inc. (Tex-La) dated January 29, 1990, as amended.

The Second Amendment extends the term of the Capacity Sale Agreement from December 31, 1994 to December 31, 1995. It also decreases the contract capacity effective as of October 1, 1992 from 46 W to 6 MW, and increases the annual capacity charge for the 1995 contract year.

Copies of this filing were served upon Tex-La and the Public Utility Commission of Texas.

Comment date: April 2, 1992, in accordance with Standard Paragraph E at the end of this notice.

6. Central Louisiana Electric Company, Inc.

[Docket No. ER90-36-009]

March 19, 1992.

Take notice that on February 21, 1992, Central Louisiana Electric Company (CLECO) tendered for filing its compliance filing in the above-referenced docket.

Comment date: April 3, 1992, in accordance with Standard Paragraph E at the end of this notice.

7. Kalaeloa Partners, L.P.

[Docket No. QF89-198-001]

March 20, 1992.

On March 18, 1992, Kalaeloa Partners, L.P. (Applicant) tendered for filing an amendment to its filing in this docket.

The amendment provides additional information pertaining to certain technical information. No determination has been made that the submittal constitutes a complete filing.

Comment date: April 8, 1992, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraphs

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in

determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 92-7078 Filed 3-26-92; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. CI92-15-000, et al.]

Amerada Hess Corporation, et al.; Natural Gas Certificate Filings

Take notice that the following filings have been made with the Commission:

1. Amerada Hess Corp.

[Docket No. CI92-15-000]

March 18, 1992.

Take notice that on December 5, 1991, as supplemented on February 18, 1992, Amerada Hess Corporation (AHC) of P.O. Box 2040, Tulsa, Oklahoma 74102, filed an application pursuant to section 7 of the Natural Gas Act and the Federal Energy Regulatory Commission's (Commission) regulations thereunder for a blanket certificate to authorize jurisdictional sales of gas under contracts to which AHC is or becomes a successor-in-interest prior to the effective date of total decontrol under the Natural Gas Wellhead Decontrol Act of 1989, all as more fully set forth in the application which is on file with the Commission and open for public inspection. AHC also requests that the Commission waive its regulations regarding the submission of successor-in-interest filings, establishment of rate schedules and filing of blanket affidavits to cover collection of allowable prices.

Comment date: April 7, 1992, in accordance with Standard Paragraph J at the end of this notice.

2. Texas Gas Transmission Corp.

[Docket No. CP92-409-000]

March 18, 1992.

Take notice that on March 12, 1992, Texas Gas Transmission Corporation (Texas Gas), 3800 Frederica Street, Owensboro, Kentucky 42301, filed in Docket No. CP92-409-000 a request pursuant to §§ 157.205 and 157.212 of the Commission's Regulations under the Natural Gas Act for authorization to transfer an existing delivery point for Ohio Valley Gas, Inc. (Ohio Valley) to Southern Indiana Gas and Electric Company (SIGECO) along with eighty-eight (88) existing "farm" tap customers under its blanket certificate issued in Docket No. CP82-407-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Texas Gas states that Ohio Valley and SIGECO (both existing sales customers of Texas Gas) entered into a sales agreement dated June 21, 1991, whereby SIGECO agreed to acquire the portion of the Wagner Sales Meter Station (Wagner SMS) currently owned by Ohio Valley along with eighty-eight (88) existing "farm" tap customers. Texas Gas indicates that the Wagner SMS is located in Warrick County, Indiana and the "farm" tap customers are located in the same general area in Gibson, Vanderburgh and Warrick Counties, Indiana.

Texas Gas states that the proposed annual maximum quantity of natural gas to be delivered to SIGECO through the transferred Wagner SMS and "farm" taps is 22,500 MMBtu, with a daily maximum quantity of 500 MMBtu. Texas Gas states that service to SIGECO can be accomplished through the proposed transferred delivery point within its current contract demand and quantity entitlement and Ohio Valley's contract demand and quantity entitlement will also remain unchanged.

Comment date: May 4, 1992, in accordance with Standard Paragraph G at the end of this notice.

3. Colorado Interstate Gas Co.

[Docket No. CP92-410-000]

March 18, 1992.

Take notice that on March 13, 1992, Colorado Interstate Gas Company (CIG), P.O. Box 1087, Colorado Springs, Colorado 80944, filed in Docket No. CP92-410-000 an application pursuant to section 7(b) of the Natural Gas Act for permission and approval to abandon one 825-horsepower compressor engine at the Fuller Reservoir Field Compressor Station (Fuller) located in Fremont County, Wyoming, all as more fully set froth in the application which is on file with the Commission and open to public inspection.

CIG states that the 825-horsepower unit installed at Fuller in 1990 has been determined to have excess capacity for the volumes being produced in the Fuller Reservoir area of Wyoming. CIG states further that the unit proposed to be abandoned would be replaced by a 400-horsepower unit to be installed at the existing site pursuant to CIG's blanket certificate issued in Docket No. CP83-21-000.

Comment date: April 8, 1992, in accordance with Standard Paragraph F at the end of this notice.

4. Michigan Consolidated Gas Co.

[Docket No. CP92-02-408-000]

March 18, 1992.

Take notice that on March 11, 1992, Michigan Consolidated Gas Company (MichCon), pursuant to sections 3 and 7(c) of the Natural Gas Act and parts 157 and 385 of the Commission's Regulations, filed for: (1) An amendment to MichCon's section 3 authorization with respect to the St. Clair Pipeline (the "Section 3 Order") authorizing, with one exception, the unrestricted use of that pipeline in foreign and interstate commerce; and (2) either a declaratory order to the effect that MichCon may operate its St. Clair Pipeline in interstate commerce under its Order No. 63 blanket certificate, or, in the alternative, a limited jurisdiction blanket certificate under section 7(c) of the Natural Gas Act authorizing MichCon to operate the St. Clair Pipeline in interstate commerce subject to the same terms and conditions as are contained in its Order No. 63 blanket certificate.

Comment date: April 8, 1992, in accordance with Standard Paragraph F at the end of this notice.

5. Yukon Pacific Corp.

[Docket No. CP88-105-001]

March 18, 1992.

Take notice that on March 9, 1992, Yukon Pacific Corporation (Yukon Pacific) filed in Docket No. CP88-105-001, its Application to Amend its prior application filed in Docket No. CP88-105-000 on December 3, 1987. The purpose of this Amendment filing is to substitute "Yukon Pacific Company L.P." for "Yukon Pacific Corporation" as the applicant in this proceeding. On December 3, 1987, Yukon Pacific filed an application pursuant to the Commission's delegated Natural Gas Act section 3 Authority requesting an order aproving Anderson Bay, Alaska as the place of export for its Trans-Alaska Gas System (TAGS) project. Yukon Pacific was formed to construct, operate and maintain TAGS and to market LNG transported through TAGS in the Asian Pacific Rim countries of the Republic of China (Taiwan), and the Republic of Korea and Japan.

Yukon Pacific states that it and CSX [1] decided to implement a business form different than the corporate structure utilized in the TAGS project's initial stages. CSX and Yukon Pacific formed Yukon Pacific Company L.P. (YPLP), a Delaware limited partnership, by an agreement entered into on October 31, 1991, to serve as the future management and financing vehicle for the TAGS project. Yukon Pacific is the sole managing partner of YPLP and, as such, will be responsible for the day-to-day operations of the TAGS project. Starr of Alaska, Inc. (Starr), a wholly-owned subsidiary of CSX, is the sole limited partner and holds all of the limited partnership interests of YPLP.

As part of its decision to form YPLP, Yukon Pacific agreed to contribute all or substantially all of the State and Federal authorizations it holds that relate to the operation and development of the TAGS project, including the place of export authorization sought from the Commission in this proceeding. On behalf of YPLP, Yukon Pacific requests that the Applicant in this docket be redesignated by the Commission or its delegatee as "Yukon Pacific Company L.P.".

Comment date: April 8, 1992, in accordance with the first subparagraph of Standard Paragraph F at the end of this notice.

[1] CSX holds a controlling interest in both Yukon Pacific and in Starr of Alaska, Inc.

6. Kern River Gas Transmission Co.

[Docket No. CP92-198-001]

March 19, 1992.

Take notice that on March 12, 1992, Kern River Gas Transmission Company (Kern River), P.O. Box 2511, Houston, Texas 77252-2511, filed pursuant to section 7 of the Natural Gas Act, as amended, and subpart A of part 157 of the Regulations of the Federal Energy Regulatory Commission, an amendment to its pending application of November 19, 1991, for a certificate of public convenience and necessity in Docket No. CP92-198-000. Kern River states that the purpose of the amendment is to reinstate its request in its application for authority to construct, own and operate the "Primary Case" facilities described in the application. The amendment states that the Primary Case in the application included facilities on Kern River's wholly-owned pipeline system and on the "Common Facilities" in California that Kern River owns jointly with Mojave Pipeline Company (Mojave) to expand the capacity of Kern River's system by 451,756 Mcf per day, based on the assumption that Mojave concurrently would expand its pipeline system's capacity by 200,000 Mcf per day.

Kern River states that the Director of the Office of Pipeline and Producer Regulation, by letter dated February 5, 1991, rejected the primary case without prejudice on the ground that Mojave had not then filed an application to expand its system in conjunction with the Primary Case expansion proposed by Kern River. On February 28, 1992, Kern River states, Mojave filed in Docket No. CP92-370 an application for authority to, *inter alia*, expand its system by 260,000 Mcf per day in conjunction with Kern River's Primary Case expansion. Kern River therefore amends its application in Docket No. CP92-198-000 to reincorporate its request for certification of the Primary Case.

Kern River states that it has submitted with its amendment a revised Exhibit G flow diagram illustrating operation of the Primary Case facilities and a revised Exhibit Z-1 illustrating operation of the Alternative Case facilities described in Kern River's application. These flow diagrams differ slightly from the corresponding flow diagram exhibits in the application, Kern River states, because of changes made to reflect more current information on contemplated deliveries from the Common Facilities and for consistency with the assumptions used by Mojave to prepare the flow diagrams contained in its application in Docket No. CP92-376-000. Kern River states that these changes do not alter the facilties in, or the estimated costs of, either the Primary Case or the Alternative Case as they were described in Kern River's application of November 19, 1991.

Comment date: April 9, 1992, in accordance with the first subparagraph of Standard Paragraph F at the end of this notice.

7. Colorado Interstate Gas Co.

[Docket No. CP92-412-000]

March 19, 1992.

Take notice that on March 16, 1992, Colorado Interstate Gas Company (CIG), Post Office Box 1087, Colorado Springs, Colorado 80944, filed in Docket No. CP92-412-000 an application pursuant to section 7(b) of the Natural Gas Act for permission and approval to abandon a transportation and exchange of natural gas service between CIG and Northwest Pipeline Corporation (Northwest), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

CIG proposes to abandon the transportation and exchange service provided under a systemwide transportation and exchange agreement (agreement) between CIG and Northwest dated March 11, 1980, under CIG's Rate Schedule X-39 to be effective upon Commission approval. CIG states that CIG transports, pursuant to the agreement, up to 25,000 Mcf of natural gas per day delivered by Northwest at various points on CIG's system to a point of interconnect near Green River in Sweetwater County, Wyoming. CIG and Northwest provide reciprocal gathering for each other, it is stated. The agreement has a primary term of 20 years and thereafter as long as either party is delivering gas to the other party, it is stated. Since the agreement is only being used for minor volumes, CIG and Northwest entered into a termination agreement dated June 30, 1991, to terminate the agreement under CIG's Rate Schedule X-39 and to implement appropriate replacement gathering and transportation agreements, it is indicated. CIG states that CIG has been informed that Northwest has filed its companion application for abandonment authorization under Northwest's Rate Schedule X-66 in Docket No. CP92-253-000.

No facilities are proposed to be abandoned herein.

Comment date: April 9, 1992, in accordance with Standard Paragraph F at the end of this notice.

8. Trident NGL, Inc. and Oryx Energy Co.

[Docket No. CP92-416-000]

March 19, 1992.

Take notice that on March 13, 1992, Trident NGL, Inc. (Trident), 10200 Grogans Mill Road, the Woodlands, Texas 77380, and Oryx Energy Company, (Oryx) P.O. Box 2880, Dallas, Texas 77251-2880 (hereinafter collectively referred to as Trident/Oryx), filed in Docket No. CP-92-416-000 a petition under Rule 207 of the Commission's Rules of Practice and Procedure (18 CFR 385.207) for a declaratory order finding that the facilities of and services performed by, the Rodman Gathering System, the MacKellar Gathering System and the Rodman-Enid 8-inch lateral pipeline located in Major, Garfield, Blaine and Kingfisher Counties, Oklahoma, will be exempt from the Commission's jurisdiction under section 1(b) of the Natural Gas Act, following the purchase of such facilities from Williams Natural Gas Company (WNG). Trident/Oryx also request that the declaratory state that it may change its rates under the blanket filing authority of § 154.94(h) of the Commission's Regulations, all as more fully set forth in the petition which is on file with the Commission and open to public inspection. Pursuant to Rule 212 of the Commission's Rules of Practice and Procedure (18 CFR 385.212), Trident/Oryx request that the petition be consolidated with WNG's abandonment application in Docket No. CP92-351-000, and considered together for approval with that docket.

Trident/Oryx state that the Rodman Gathering System consists of 750 miles of pipe, ranging in size from two to twenty inches, all portions of which are located behind the Rodman Plant, which is owned by Trident/Oryx. It is stated that 647 miles of the Rodman system are owned by WNG and the remainder by Trident/Oryx and that Trident is the operator of the Rodman Plant. Gas gathered in the Rodman system is processed at the Rodman Plant and then delivered to WNG. In addition, it is stated that field compression is provided by Trident/Oryx, and WNG provides no compression services upstream of the Rodman Plant. Trident/Oryx state that the field compression is used to increase the typical well delivery pressure in the Rodman system from 20–30 psig to approximately 300 psig. This field compression is used to increase line pressures to permit deliveries of gas at the operating pressure of the Rodman Plant, where the gas is processed, dehydrated and recompressed for residue delivery to WNG. The secondary compression provided by the Rodman Plant increases the gas pressure to meet WNG's delivery standard of 700 psig.

It is stated that the MacKellar Gathering System consists of approximately 18 miles of 4-inch plastic pipe which overlays, but is not physically connected to, the Rodman System. Trident/Oryx state that a single producer owns the approximately 400 Mcf per day (Mcfd) of natural gas production attached to the MacKellar system. Gas is gathered from approximately nineteen points along the MacKellar system and is presently delivered to the Phillips Kingfisher Plant for processing and redelivered to WNG at the tailgate.

Trident/Oryx state that Rodman-Enid 8-inch line is one of two 8-inch lines that connect the Rodman Plant with WNG's Enid Compressor Station. Trident/Oryx propose to incorporate the Rodman-Enid 8-inch line into the operations of the Rodman Gathering System and, therefore, the line will no longer deliver pipeline quality gas to WNG. It is stated that the line's current pressure of 700 psig will be reduced to approximately 300 psig and numerous wells located along the Rodman-Enid line could be connected.

Following transfer of the facilities, Trident/Oryx state that WNG will enter into agreements with it for the use of the facilities as may be necessary to WNG. Trident/Oryx state that it will charge WNG no greater price than the lowest price it charges for similar services to similarly situated parties.

In addition, it is stated that WNG and Trident will enter into a new gas purchase contract for the sale of gas at the Rodman Plant tailgate. WNG will assign all its existing gas purchase contracts behind the plant to Trident to support the new tailgate purchase agreement. According to Trident/Oryx, the new tailgate sales agreement will maintain the current deliverability committed to WNG on the Rodman system for WNG's supply requirements. Trident/Oryx state that it stands ready to off gathering, processing and marketing services to all producers on the Rodman Gathering System and that its rates, terms and conditions will be no less favorable than those presently provided by WNG.[3]

It is stated that WNG presently provides natural gas to right-of-way grantors through approximately fifteen sales taps located on the Rodman system and the Rodman-Enid line. Further, approximately 1,258 Mcf per year of these sales are made to Kansas Power and Light Company which, in turn, sells to the right-of-way grantors. Trident/Oryx state that it will assume WNG's obligations to provide gas service to these right-of-way grantors who wish to receive continued service. It is estimated that the Rodman system provides approximately 11 Mcf per month. Since service to these right-of-way grantors is minor in nature, Trident/Oryx requests that the declaratory order state that Trident/Oryx may change its rate under the blanket filing authority of § 154.94(h) of the Commission's regulations.[3]

Trident/Oryx state that the facilities meet the physical criteria of the *Farmland* [4] test and should be declared exempt gathering facilities. It is stated that 95 percent of the facilities in the Rodman system have a diameter of 8 inches or less. The remaining segments, one 3.1-mile segment of 10-inch pipe, one 20-mile segment of 12-inch pipe, one 27-mile segment of 16-inch pipe and one 5.3-mile segment of 20-inch pipe are all low pressure lines which deliver gas to the Rodman Plant.

It is stated that the Rodman and MacKellar Gathering Systems spread out in a network-like configuration basically revolving around the Rodman and Kingfisher Plants, and consist of numerous lines of various diameter. It is also stated that the relatively short length and small diameter of both the gathering systems and the Rodman-Enid 8-inch line is consistent with their gathering function. Also, there are wells connected throughout the Rodman and MacKellar systems and along the Rodman-Enid line.

Trident/Oryx state that compression on the Rodman system is necessary to boost wellhead pressures to meet the plant inlet specifications of 300 psig. Secondary compression at the plant is necessary to meet WNG's system pressure of 700 psig. Therefore, it is stated that the compression is consistent with a gathering function. In addition, it is stated that the MacKellar system and the Rodman-Enid line will also be operated at pressures dictated by the operating pressure of the Rodman Plant.

Finally, Trident/Oryx state that they are not affiliated with WNG and will be providing only gathering and processing services. It is stated that the purpose of the facilities is solely to provide such gathering and processing services. Thus, Trident/Oryx state that its general business activity is consistent with treating the facilities as gathering.

Comment date: April 9, 1992, in accordance with the first subparagraph of Standard Paragraph F at the end of this notice.

Standard Paragraphs

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

G. Any person or the Commission's staff may, within 45 days after the issuance of the instant notice by the Commission, file pursuant to rule 214 of the Commission's Procedural rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefore, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

Standard Paragraph

J. Any person desiring to be heard or make any protest with reference to said filings should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426 a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, .214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party in any proceeding herein must file a petition to intervene in accordance with the Commission's rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

Lois D. Cashell,

Secretary.

[FR Doc. 92-7079 Filed 3-26-92; 8:45 am]

BILLING CODE 6717-01-M

[3] Trident/Oryx state that it is aware of one situation involving a single producer of natural gas which has contracted directly with WNG for gathering services without contracting with Trident/Oryx for necessary field compression services. Without waiving any past, present or future claims for relief against such producer associated with nonpayment for field compression, Trident/Oryx states it will assume WNG's obligation to provide gathering services to such producer on rates, terms and conditions no less favorable than those presently offered by WNG.

[3] See, *Zenith Natural Gas Company*, 56 FERC ¶ 61,056 (1991).

[4] *Farmland Industries, Inc.*, 23 FERC ¶ 61,063 (1983).

[Docket No. JD92-04471T; Colorado-49 Addition 3]

State of Colorado; NGPA Determination by Jurisdictional Agency Designating Tight Formation

March 20, 1992.

Take notice that on March 11, 1992, the Oil and Gas Conservation Commission of the State of Colorado (Colorado), submitted the above-referenced notice of determination pursuant to § 271.703(c)(3) of the Commission's regulations, that two portions of the Niobrara Formation in Boulder and Weld Counties, Colorado, qualify as a tight formation under section 107(b) of the Natural Gas Policy Act of 1978 (NGPA). The area of application is described as follows:

Township 2 North

Ranges 66, 67, 68, and 69 West, 6th P.M.
Sections 1–36: All

Township 1 North

Ranges 66 and 67 West, 6th P.M.
Sections 1–36: All

Township 1 South

Range 69 West, 6th P.M.
Sections 25–36: All
Range 70 West, 6th P.M.
Sections 1–36: All

The notice of determination also contains Colorado's findings, as amended on March 19, 1992, that the referenced portions of the Niobrara Formation meet the requirements of the Commission's regulations set forth in 18 CFR part 271.

The application for determination is available for inspection, except for material which is confidential under 18 CFR 275.206, at the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426. Persons objecting to the determination may file a protest, in accordance with 18 CFR 275.203 and 275.204, within 20 days after the date this notice is issued by the Commission.

Lois D. Cashell,

Secretary.

[FR Doc. 92-7080 Filed 3-26-92; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP92-343-000]

Phillips 66 Natural Gas Co.; Technical Conference

March 20, 1992.

Take notice that on April 7, 1992, the staff of the Federal Energy Regulatory Commission will convene a technical conference in the captioned proceeding to examine certain issues raised by the Phillips 66 Natural Gas Company (Phillips)'s application to abandon an exchange service with Transwestern Pipeline Company (Transwestern). Transwestern protested Phillips' application.

Action on this proceeding has been deferred, at the parties' request, while they attempted to resolve their differences. On February 19, 1991, Phillips advised staff that settlement wasn't reached and requested action on its abandonment request.

The issues to be addressed at the technical conference include:

- Whether the information in the record reflects the current conditions;
- The amount of the current gas imbalance owed to Transwestern;
- Whether the agreement is a gathering and processing service rather than an exchange; and
- Proposals for a possible settlement.

Attendance at the technical conference will be limited to parties to the proceeding and the Commission staff. The conference will be held at 10 a.m. at 810 First Street, NE., Washington, DC. The room number where the conference will be held will be posted on the first floor in that building on the day of the conference. For further information, contact Daniel Plumb at 202-208-0110.

BILLING CODE 6717–01–M

Office of Fossil Energy

[FE Docket No. 92–14–NG]

EMC Gas Transmission Co.; Application for Blanket Authorization To Export Natural Gas to Canada

AGENCY: Department of Energy, Office of Fossil Energy.

ACTION: Notice of application for blanket authorization to export natural gas to Canada.

SUMMARY: The Office of Fossil Energy (FE) of the Department of Energy (DOE) gives notice of receipt on February 6, 1992, of an application filed by EMC Gas Transmission Company (EMC) requesting blanket authorization to export up to a maximum of 15 Bcf of natural gas to Canada over a two-year period beginning on the date of first exportation. EMC states it would use existing facilities to implement the proposed exports, and would submit quarterly reports detailing each transaction.

The application is filed under section 3 of the Natural Gas Act and DOE Delegation Order Nos. 0204–111 and 0204–127. Protests, motions to intervene, notices of intervention, and written comments are invited.

DATE: Protests, motions to intervene or notices of intervention, as applicable, requests for additional procedures, and written comments are to be filed at the address listed below no later than 4:30 p.m., eastern time, April 27, 1992.

ADDRESSES: Office of Fuels Programs, Fossil Energy, U.S. Department of Energy, Forrestal Building, room 3F–056, FE–50, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–9478.

FOR FURTHER INFORMATION CONTACT:

C. Frank Duchaine, Jr., Office of Fuels Programs, Fossil Energy, U.S. Department of Energy, Forrestal Building, room 3G–087, FE–53, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586–8233.

Diane Stubbs, Office of Assistant General Counsel for Fossil Energy, U.S. Department of Energy, Forrestal Building, room 6E–042, GC–14, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586–6667.

SUPPLEMENTARY INFORMATION: EMC, an Oklahoma corporation with its principal place of business in Detroit, Michigan, requests authority to export gas for its own account, as well as for the accounts of others. The specific terms of each export, including price and volume, would be negotiated at arms length in response to market conditions.

The export application will be reviewed under section 3 of the Natural Gas Act and the authority contained in DOE Delegation Order Nos. 0204–111 and 0204–127. In deciding whether the proposed export is in the public interest, domestic need for the natural gas will be considered, and any other issue determined to be appropriate, including whether the arrangement is consistent with DOE policy of promoting competition in the natural gas marketplace by allowing commercial parties to freely negotiate their own trade arrangements. Parties, especially those that may oppose this application, should comment on these matters as they relate to the requested export authority. The applicant asserts there is no current need for the domestic gas that would be exported under the proposed arrangement. Parties opposing this arrangement bear the burden of overcoming this assertion.

NEPA Compliance

The National Environmental Policy Act (NEPA), 42 U.S.C. 4321, *et seq.*, requires DOE to give appropriate consideration to the environmental effects of its proposed actions. No final decision will be issuesd in this proceeding until DOE has met its NEPA responsibilities.

Public Comment Procedures

In response to this notice, any person may file a protest, motion to intervene or notice of intervention, as applicable, and written comments. Any person wishing to become a party to the proceeding and to have their written comments considered as the basis for any decision on the application must, however, file a motion to intervene or notice of intervention, as applicable. The filing of a protest with respect to this application will not serve to make the protestant a party to the proceeding, although protests and comments received from persons who are not parties will be considered in determining the appropriate action to be taken on the application. All protests, motions to intervene, notices of intervention, and written comments must meet the requirements that are specified by the regulations in 10 CFR part 590. Protests, motions to intervene, notices of intervention, requests for additional procedures, and written comments should be filed with the Office of Fuels Programs at the above address.

It is intended that a decisional record will be developed on the application through responses to this notice by parties, including the parties' written comments and replies thereto. Additional procedures will be used as necessary to achieve a complete understanding of the facts and issues. A party seeking intervention may request that additional procedures be provided, such as additional written comments, an oral presentation, a conference, or trial-type hearing. Any request to file additional written comments should explain why they are necessary. Any request for an oral presentation should identify the substantial question of fact, law, or policy at issue, show that it is material and relevant to a decision in the proceeding, and demonstrate why an oral presentation is needed. Any request for a conference should demonstrate why the conference would materially advance the proceeding. Any request for a trial-type hearing must show that there are factual issues genuinely in dispute that are relevant and material to a decision and that a trial-type hearing is necessary for a full and true disclosure of the facts.

If an additional procedure is scheduled, notice will be provided to all parties. If no party requests additional procedures, a final opinion and order may be issued based on the official record, including the application and responses filed by parties pursuant to this notice, in accordance with 10 CFR 590.316.

A copy of EMC's application is available for inspection and copying in the Office of Fuels Programs Docket Room, 3F–056 at the above address. The docket room is open between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, March 23, 1992.

Charles F. Vacek,

Deputy Assistant Secretary for Fuels Programs, Office of Fossil Energy.

BILLING CODE 6450–01–M

[FE Docket No. 92–07–NG]

Ledco, Inc.; Application for Blanket Authorization To Import and Export Natural Gas and Liquefied Natural Gas

AGENCY: Department of Energy, Office of Fossil Energy.

ACTION: Notice of application for blanket authorization to import and export natural gas and liquefied natural gas.

SUMMARY: The Office of Fossil Energy (FE) of the Department of Energy (DOE) gives notice of receipt on January 31, 1992, of an application filed by LEDCO, Inc. (LEDCO), for blanket authorization to import and to export a combined total of up to 200 Bcf of natural gas, including liquefied natural gas (LNG), from and to any foreign country. LEDCO requests that the authorization be granted for a period of two years beginning on the date of the first delivery of gas or LNG after May 22, 1992, when its current blanket import/export authorization expires. LEDCO intends to use existing pipeline and LNG facilities for the processing and transportation of the volumes to be imported and exported and would continue to file quarterly reports detailing each transaction.

The application is filed under section 3 of the Natural Gas Act and DOE Delegation Order Nos. 0204–111 and 0204–127. Protests, motions to intervene, notices of intervention and written comments are invited.

DATES: Protests, motions to intervene or notices of intervention, as applicable, requests for additional procedures and written comments are to be filed in Washington, DC, at the address listed below no later than 4:30 p.m., eastern time, April 27, 1992.

ADDRESSES: Office of Fuels Programs, Fossil Energy, U.S. Department of Energy, Forrestal Building, room 3F–056, FE–50, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–9478.

FOR FURTHER INFORMATION CONTACT:

Thomas Dukes, Office of Fuels Programs, Fossil Energy, U.S. Department of Energy, Forrestal Building, Room 3F–070, FE–53, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–9590

Lot Cooke, Office of Assistant General Counsel for Fossil Energy, U.S. Department of Energy, Forrestal Building, Room 6E–042, GC–14, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–0503.

SUPPLEMENTARY INFORMATION: LEDCO, a Louisiana corporation with its principle place of business in Houston, Texas, is a marketer of natural gas. LEDCO is currently authorized to import up to 175 Bcf and export up to 175 Bcf of natural gas through May 22, 1992, under DOE/FE Opinion and Order No. 395 (Order 395), issued May 22, 1990 (1 FE Para. 70,318). LEDCO's prior quarterly reports filed with FE pursuant to Order 395's reporting requirements indicate that approximately 6,750 MMcf of gas was imported under Order 395 through December 31, 1991. No gas was exported during that time.

LEDCO requests authorization to import and export natural gas, including LNG, on a short-term or spot-market basis for its own account, as well as for the accounts of others for which LEDCO may agree to act as agent. LEDCO is interested in importing and exporting natural gas from and to any foreign country. The proposed imports would be sold on a short-term basis to a wide range of end-users in the United States including pipelines, local distribution companies, and commercial and industrial customers. The proposed export authorization would enable LEDCO to make natural gas available on a short-term or spot-market basis to various purchasers. The specific pricing terms of each import and export arrangement would be determined by competitive factors in the markets served through arms-length negotiations between the parties.

The decision on LEDCO's application for import authority will be made consistent with DOE's natural gas import policy guidelines, under which the competitiveness of an import arrangement in the markets served is the primary consideration in determining whether it is in the public interest (49 FR 6684, February 22, 1984). In reviewing natural gas export applications, domestic need for the gas to be exported is considered, and any other issue determined to be appropriate in a particular case, including whether the arrangement is consistent with DOE policy of promoting competition in the natural gas marketplace by allowing commercial parties to freely negotiate their own trade arrangements. Parties, especially those that may oppose this application, should comment in their responses on these matters as they relate to the requested import and export authority. LEDCO asserts that the proposed imports would be competitive and there is no current need for the domestic gas that would be exported. Parties opposing this application bear the burden of overcoming these assertions.

NEPA Compliance

The National Environmental Policy Act (NEPA), 42 U.S.C. 4321, *et. seq.*, requires DOE to give appropriate consideration to the environmental effects of its proposed actions. No final decision will be issued in this proceeding until DOE has met its NEPA responsibilities.

Public Comment Procedures

In response to this notice, any person may file a protest, motion to intervene or notice of intervention, as applicable, and written comments. Any person wishing to become a party to the proceeding and to have the written comments considered as the basis for any decision on the application must, however, file a motion to intervene or notice of intervention, as applicable. The filing of a protest with respect to this application will not serve to make the protestant a party to the proceeding, although protests and comments received from persons who are not parties will be considered in determining the appropriate action to be taken on the application. All protests, motions to intervene, notices of intervention, request for additional procedures, and written comments must meet the requirements that are specified by the regulations in 10 CFR part 590. Protests, motions to intervene, notices of intervention, requests for additional procedures, and written comments should be filed with the Office of Fuels Programs at the above address.

It is intended that a decisional record will be developed on the application through responses to this notice by parties, including the parties' written comments and replies thereto. Additional procedures will be used as necessary to achieve a complete understanding of the facts and issues. A party seeking intervention may request that additional procedures be provided, such as additional written comments, an oral presentation, a conference, or trial-type hearing. Any request to file additional written comments should explain why they are necessary. Any request for an oral presentation should identify the substantial question of fact, law, or policy at issue, show that it is material and relevant to a decision in the proceeding, and demonstrate why an oral presentation is needed. Any request for a conference should demonstrate why the conference would materially advance the proceeding. Any request for a trial-type hearing must show that there are factual issues genuinely in dispute that are relevant and material to a decision and that a trial-type hearing is necessary for a full and true disclosure of the facts.

If an additional procedure is scheduled, notice will be provided to all parties. If no party requests additional procedures, a final opinion and order may be issued based on the official record, including the application and responses filed by parties pursuant to this notice, in accordance with 10 CFR 590.316.

A copy of LEDCO's application is available for inspection and copying in the Office of Fuels Programs Docket Room, 3F–056 at the above address. The docket room is open between the hours

of 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, March 23, 1992.

Charles F. Vacek,

Deputy Assistant Secretary for Fuels Programs, Office of Fossil Energy.

BILLING CODE 6450-01-M

Office of Hearings and Appeals

Issuance of Decisions and Orders During the Week of February 3 Through February 7, 1992

During the week of February 3 through February 7, 1992, the decisions and orders summarized below were issued with respect to applications for relief filed with the Office of Hearings and Appeals of the Department of Energy. The following summary also contains a list of submissions that were dismissed by the Office of Hearings and Appeals.

Refund Applications

A.H. Smith Associates, 2/5/92; RF272-67329, RD272-67329.

The DOE issued a Decision and Order granting an Application for Refund submitted in the subpart V crude oil proceeding by A.H. Smith Associates (AHSA). The refund was granted for petroleum products purchased during the crude oil price control period (August 19, 1973 through January 27, 1981) by the predecessor firm of AHSA, a sole proprietorship. Between the time the price control period ended and the time the Application for Refund was filed, the proprietorship was reorganized as AHSA, a partnership. The DOE determined that the partnership agreement, which gave the former proprietor substantial control over the operations of the partnership and a majority ownership in it, implicitly transferred the right to the refund from the proprietorship to the partnership. Consequently, the DOE found that AHSA was the appropriate recipient of the refund for crude oil overcharges incurred by the proprietorship. The DOE also denied a Motion for Discovery submitted by a group of States and Territories of the United States.

Elf Aquitaine Asphalt, Inc., 2/7/92; RF272-25151, RD272-25151.

The DOE issued a Decision and Order denying an Application for Refund filed by Elf Aquitaine Asphalt, Inc. (Elf Aquitaine) in the Subpart V crude oil refund proceeding. A group of States and Territories (the States') of the United States objected to Elf Aquitaine's claim. The firm's application was based on its purchase of 2,365,159,327 gallons of liquid asphalt which it used in the manufacture and sale of asphalt emulsions. The DOE found that the emulsion manufacturing process did not substantially alter the liquid asphalt component of the emulsion. Consequently, Elf Aquitaine was a reseller of a "covered product" and was not eligible to receive a refund without a demonstration of injury. Because the firm submitted no reasoned argument or specific information demonstrating that it was unable to pass through the effects of crude oil overcharges, the DOE denied its Application. The States' related Motion for Discovery was denied as moot.

Texaco Inc./Deal & Sullivan's Texaco, et al., 2/4/92; RF321-2801, et al.

The DOE issued a Decision and Order concerning 20 Applications for Refund filed in the Texaco Inc. subpart V special refund proceeding. Each applicant purchased directly from Texaco and was a reseller whose allocable share is less than $10,000, or an end-user. The DOE determined that each applicant was eligible to receive a refund equal to its full allocable share. Two of the applicants did not establish that they owned their outlets during the entire period for which they requested refunds. Accordingly, both received refunds only for those portions of the refund period for which they submitted ownership information. The total of the refunds granted in this Decision is $40,627, representing $31,441 in principal and $9,186 in interest.

Texaco Inc./Johnson's Texaco, et al., 2/4/92; RF321-10006, et al.

The DOE issued a Decision and Order concerning 20 Applications for Refund filed in the Texaco Inc. subpart V special refund proceeding. All the applicants were indirect purchasers of Texaco products and submitted all of the information required of applicants in the Texaco proceeding. One applicant's supplier, Lehigh Gas & Oil Company (Lehigh), did not purchase exclusively from Texaco during the refund period, but maintained separate inventory accounting and cost banks. Because Lehigh sold only Texaco branded products to its Texaco customers, the OHA determined that the applicant, Melo Zanolini Garage (RF321-13365), should receive a refund based on the full volumetric amount established in the Texaco proceeding. The 20 applicants were granted $41,679 ($32,254 principal plus $9,425 interest).

Texaco Inc./Niles Oil Co., Inc., 2/4/92; RF321-17953.

The DOE issued a Decision and Order concerning an Application for Refund that was filed on behalf of Niles Oil Co., Inc. (Niles Oil) by Robert C. Rolley in the Texaco Inc. subpart V special refund proceeding. In his application, Mr. Rolley claimed that he purchased Niles Oil from John Niles in 1979 and sold the stock back to Mr. Niles in 1980. Mr. Rolley asserted that although he sold the stock of Niles Oil in 1980, the right to refund remained with him because he never received full payment for the stock. John Niles and Niles Oil filed for bankruptcy in 1987 and the company was liquidated. As a creditor in the bankruptcy proceedings, Mr. Rolley received $54,104.29. The OHA determined that Mr. Rolley's application should be denied because he failed to show that ownership of the stock reverted to him as a result of Mr. Niles' failure to complete payment, and because the payment that Mr. Rolley received in the bankruptcy proceeding extinguished any interest in Niles Oil that Mr. Rolley may have retained.

Refund Applications

The Office of Hearings and Appeals issued the following Decisions and Orders concerning refund applications, which are not summarized. Copies of the full texts of the Decisions and Orders are available in the Public Reference Room of the Office of Hearings and Appeals.

BILLING CODE 6450-01-M

Objection to Proposed Remedial Order Filed During the Week of March 9 Through March 13, 1992

During the week of March 9 through March 13, 1992 the notice of objection to proposed remedial order listed in the appendix to this Notice were filed with the Office of Hearings and Appeals of the Department of Energy.

Any person who wishes to participate in the proceeding the Department of Energy will conduct concerning the proposed remedial order described in the appendix to this Notice must file a request to participate pursuant to 10 CFR 205.194 within 20 days after publication of this Notice. The Office of Hearings and Appeals will then determine those persons who may participate on an active basis in the proceeding and will prepare an official service list, which it will mail to all persons who filed requests to participate. Persons may also be placed on the official service list as non-participants for good cause shown.

All requests to participate in these proceedings should be filed with the Office of Hearings and Appeals, Department of Energy, Washington, DC 20585.

Dated: March 20, 1992.

Thomas O. Mann,

Acting Director, Office of Hearings and Appeals.

OXY USA, Inc, Washington, DC, LRO-0003

Notices of Objection were filed by a group of States on March 12, 1992, and by OXY USA, INC. (OXY), a wholly-owned subsidiary of Occidental Petroleum Corporation, on March 16, 1992, to a Proposed Remedial Order (PRO) which the DOE's Economic Regulatory Administration (ERA) issued to the firm on February 21, 1992. In the PRO, the ERA found that during October 1979 to April 1980, and September 1980 to December 1980, Cities Service Company (Cities), a predecessor to OXY, violated 10 CFR 211.66(b), (h), 211.67(j), and 205.202. Specifically, the ERA found that crude oil that Cities reported to the Entitlements Program as exempt crude oil was actually price-controlled crude oil, and that the alleged misreporting resulted in $253,766,849.54 in excessive entitlements benefits.

BILLING CODE 6450-01-M

ENVIRONMENTAL PROTECTION AGENCY

[FRL-4117-9]

Clean Air Act; Contractor Access to Confidential Business Information

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of intended transfer of confidential business information to contractors.

SUMMARY: The Environmental Protection Agency (EPA) intends to transfer confidential business information (CBI) collected from the pulp, paper, and paperboard manufacturing industry to two new contractors. Transfer of the information will allow the contractors to assist EPA in developing air emission guidelines and standards under the Clean Air Act (CAA) and in developing effluent limitations guidelines and standards under the Clean Water Act (CWA). The information being transferred was collected or will be collected under the authority of section 308 of the CWA and/or section 114 of the CAA. Interested persons may submit comments on this intended transfer of information to the addresses noted below.

DATES: Comments on the transfer of data are due April 6, 1992.

ADDRESSES: Comments on transfer of data collected under section 114 of the CAA may be sent to Penny Lassiter, Chemicals and Petroleum Branch, Emission Standards Division (MD-13), Office of Air Quality Planning and Standards, U.S. EPA, Research Triangle Park, NC 27711. Comments on transfer of data collected under section 308 of the CWA may be sent to George Heath, Commodities Branch, Engineering and Analysis Division (WH-552), Office of Science and Technology, U.S. EPA, 401 M Street, SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: Penny Lassiter at (919) 541-5396 or at the above address for information regarding uses of CBI under CAA authority. For information regarding uses of CBI under CWA authority contact George Heath at (202) 260-7165 or at the above address.

SUPPLEMENTARY INFORMATION: The EPA intends to transfer information, including CBI, to two new contractors: Research Triangle Institute (RTI), Post Office Box 12194, Research Triangle Park, NC 27709 and Midwest Research Institute (MRI), 401 Harrison Oaks Boulevard, suite 350, Cary, NC 27513.

The information being transferred consists primarily of information previously collected by EPA to support the development of air emission guidelines and standards under the CAA and to support the development of effluent limitations guidelines under the CWA for the pulp, paper, and paperboard manufacturing industry.

More specifically, the information being transferred to the contractors includes the following information collected under the authority of section 114 of the CAA or section 308 of the CWA: Information collected through questionnaires and surveys of the industry; all joint EPA-industry studies; site visit reports; monitoring and test data; test reports and sampling episode reports; and analytical summaries of this information and data.

EPA also intends to transfer to RTI and MRI all information listed above (including CBI) that may be collected or developed in the future under the authorities listed above. This information is necessary to enable RTI and MRI to carry out the work required by their contracts to support EPA's development of regulations for the pulp, paper, and paperboard industry.

EPA Office Receiving Support	Contractor	Contract No.	Type of Support
OAR/OAQPS/ESD	RTI, Research Triangle Park, NC	68-D1-0118	Technical
OAR/OAQPS/ESD	RTI, Research Triangle Park, NC	68-D1-0143	Economic
OAR/OAQPS/ESD	MRI, Cary, NC	68-D1-0115	Technical
OAR/OAQPS/TSD	MRI, Cary, NC	68-D1-0123	Technical

In the case of information claimed to be proprietary and, therefore, confidential, all regulations and confidentiality agreements apply. This transfer would not affect the status of this information as information claimed to be proprietary. The relevant contracts contain all confidentiality provisions required by EPA's confidentiality regulations (40 CFR 2.301(h)(2-3) and 40 CFR 2.302(h)(2-3)). Persons under contract to EPA to perform work for EPA may be designated authorized representatives if such designation is necessary for the contractor to carry out the work required by the contract. The following conditions apply when information claimed to be confidential is provided to a designated contractor:

(1) The authorized contractor representative and its employees (a) may use such confidential information only for the purposes of carrying out the work required, (b) must refrain from disclosing the information to anyone other than EPA without having received from EPA prior written approval of each affected business or of an EPA legal office, and (c) must return to EPA all copies of the information (and any abstracts or excerpts therefrom) upon request or whenever the information is no longer required for the performance of the work.

(2) The authorized contractor representative must obtain a written agreement from each of its employees who will have access to the information to honor the above-noted limitations. A copy of each such agreement must be furnished to EPA before access is permitted.

(3) The authorized contractor representative must agree that the conditions in the contract concerning the use and disclosure of confidential business information are included for the benefit of, and shall be enforceable by both EPA and any affected business having a proprietary interest in the information.

In accordance with those regulations, companies who have submitted information claimed to be confidential have until April 6, 1992, to comment on EPA's proposed transfer of this information to RTI, Research Triangle Park, NC and MRI, Cary, NC, for the purposes outlined above (40 CFR 2.301(h)(2-3) and 40 CFR 2.302(h)(2-3)). The EPA welcomes comment on this proposed transfer to these designated EPA contractors.

Dated: March 22, 1992.

Michael Shapiro,

Acting Assistant Administrator for Air and Radiation.

BILLING CODE 6560-50-M

[ER-FRL-4118-3]

Environmental Impact Statements and Regulations; Availability of EPA Comments

Availability of EPA comments prepared March 9, 1992 through March 13, 1992 pursuant to the Environmental Review Process (ERP), under section 309 of the Clean Air Act and section 102(2)(c) of the National Environmental Policy Act as amended. Requests for copies of EPA comments can be directed to the Office of Federal Activities at (202) 260-5076.

An explanation of the ratings assigned to draft environmental impact statements (EISs) was published in FR dated April 5, 1991 (56 FR 14096).

Draft EISs

ERP No. D-AFS-L65160-ID Rating EO2, Lockwood and North Round Valley Timber Sales and Road Construction, Implementation, Payette National Forest, New Meadows Ranger District, Adams County, ID.

Summary

EPA expressed environmental objections because of potential impacts of the sales on water quality and fisheries. Existing degraded habitat may be further damaged by timber harvest, particularly in the North Round Valley sale area. Additional information is needed on monitoring, fishery and water quality effect and air quality.

ERP No. D-BOP-G81004-OK Rating LO, Federal Transfer Center (FTC), Construction and Operation, Site Specific, Southeast corner of MacArthur and Southwest 74th Street, West of the Will Rogers World Airport, Oklahoma County, OK.

Summary

EPA had no objection to this project.

ERP No. D-FRC-L03005-00 Rating EC2, Northwest Natural Gas Pipeline Expansion Project, Construction and Operation, Licensing, from points in Canada and the United States to Washington, Oregon, Idaho, Wyoming, Nevada and California, WA, OR, ID, WY, NV and CA.

Summary

EPA expressed concerns based on potential adverse effects on water quality, fish and wetlands. The EIS needs to explore alternatives to the proposed action and alternative alignments to avoid wetlands. This proposal warrants detailed analysis. The high quality streams and rivers crossed by a pipeline require a detailed antidegradation analysis. Additional information is needed to describe mitigation measures, salmon spawning areas at the proposed crossing sites, and how trench dewatering and test water discharges will be handled. Clarification is needed about environmental inspectors.

ERP No. DB-NOA-L64015-AK Rating EC2, Groundfish Fishery of the Bering Sea and Aleutian Islands, Fishery Management Plans, Updated Information, Amendment 18/23 Inshore/Offshore Allocation Alternative Approval and Implementation, AK.

Summary

EPA expressed concerns based on adverse effects on a federally listed threatened species, the Steller sea lion. Additional information is needed on water and air quality. The supplemental final EIS should include economic information received and developed during the EIS and regulatory review processes. The Biological Opinion for the Steller sea lion, and mitigating measures to protect it, must be included in the supplemental final EIS.

Final EISs

ERP No. F-CDB-C80012-NY
City of Rochester School No. 25 and School No. 36 Replacement, CDBG, Rochester, Monroe County, NY.

Summary

EPA had no objection to the implementation of the proposed project.

Dated: March 24, 1992.

Richard E. Sanderson,

Director, Office of Federal Activities.

[FRL-4118-1]

Science Advisory Board; Drinking Water Committee, Open Meeting

April 13-14, 1992.

Pursuant to the Federal Advisory Committee Act, P.L. 92-463, notice is hereby given that the Science Advisory Board's (SAB) Drinking Water Committee (DWC) will meet on April 13-14, 1992 at the Howard Johnsons Hotel, 2650 Jefferson Davis Highway, Arlington, Virginia 22202. The meeting will begin at 9 a.m. on April 13th and 8:30 a.m. on April 14th, and will end no later than 5 p.m. on each day. The meeting is open to the public and seating is on a first-come basis.

The purpose of the meeting is for the Committee to review the Agency's Drinking Water Criteria Documents for Chlorine and for Chloramines. The Committee will also receive an update presentation on a chemical and microbial risk comparison model. Copies of these documents are NOT available from the Science Advisory Board. For more information concerning these documents and their availability, please contact: Ms. Lynn Papa, U.S. EPA, Environmental Criteria and Assessment Office (ECAO), Cincinnati, Ohio, Telephone: (513) 569-7587. The tentative charge to the Committee is to provide comments on the technical merit of the Criteria Documents and the proposed risk assessments for the compounds addressed in the documents, and to provide comment on the draft model and the assumptions for comparing microbial risk with chemical risk.

The Committee will also review guidance documents that the EPA and the states of the Great Lakes Basin have developed to meet the requirements of the Great Lakes Critical Programs Act. The documents were developed under the Great Lakes Water Quality Initiative and are intended to establish a consistent approach to water quality criteria for aquatic life, wildlife and human health for the states within the Great Lakes Basin The EPA has asked the SAB to review these documents and comment on the scientific validity of the proposed methods for water quality criteria, the calculations of wildlife criteria, the assumptions and databases used for risk assessments, and the development and use of bioaccumulation factors for the wildlife and human health criteria. The human health criteria are the focus of this meeting. The other issues were the subject of an SAB review conducted on February 18-20, 1992 by the Great Lakes Water Quality Subcommittee of the Ecologcial Processes and Effects Committee (EPEC). The DWC and the EPEC will produce coordinated report(s) on this issue. Copies of background documents and the charge to the SAB for this review are available from Mr. Kenneth Fenner, U.S. EPA, Region V, 77 West Jackson Boulevard, Chicago, IL 60604-3590 (Phone: (312) 886-6777).

For details concerning this meeting, including a draft agenda, please contact Mr. Robert Flaak, Assistant Staff Director, Science Advisory Board (A-101F), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460. Telephone: (202) 260-6552 and FAX: (202) 260-7118. Members of the public who wish to make a brief oral presentation to the Comittee must contact Mr. Flaak no later than Tuesday, April 7, 1992 in order to be included on the Agenda. Written statements of any length (at least 35 copies) may be provided to the Committee up until the meeting. The Science Advisory Board expects that public statements presented at its meetings will not be repetitive of previously submitted oral or written statements. In general, each individual or group making an oral presentation will be limited to a total time of five minutes.

Dated: March 13, 1992.

Robert Flaak,

Assistant Staff Director, Science Advisory Board.

Certain Chemicals; Premanufacture Notices

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5(a)(1) of the Toxic Substances Control Act (TSCA) requires any person who intends to manufacture or import a new chemical substance to submit a premanufacture notice (PMN) to EPA at least 90 days before manufacture or import commences. Statutory requirements for section 5(a)(1) premanufacture notices are discussed in the final rule published in the **Federal Register** of May 13, 1983 (48 FR 21722). In the **Federal Register** of November 11, 1984, (49 FR 46066) (40 CFR 723.250), EPA published a rule which granted a limited exemption from certain PMN requirements for certain types of polymers. Notices for such polymers are reviewed by EPA within 21 days of receipt. This notice announces receipt of 2 such PMN(s) and provides a summary of each.

DATES: Close of review periods:

Y 92-104, March 22, 1992.

Y 92-105, April 5, 1992.

FOR FURTHER INFORMATION CONTACT: David Kling, Acting Director, Environmental Assistance Division (TS-799), Office of Pollution Prevention and Toxics, Environmental Protection Agency, rm. E-545, 401 M St., SW., Washington, DC. 20460, (202) 554-1404, TDD (202) 554-0551.

SUPPLEMENTARY INFORMATION: The following notice contains information

extracted from the nonconfidential version of the submission provided by the manufacturer on the PMNs received by EPA. The complete nonconfidential document is available in the TSCA Public Docket Office, NE–G004 at the above address between 8 a.m. and noon and 1 p.m. and 4 p.m., Monday through Friday, excluding legal holidays.

Y 92–104

Manufacturer. Confidential.

Chemical. (S) Conjugated linoleic acid; styrene; acrylic acid; methyl methacrylate.

Use/Production. (S) Polymer for enamel coating. Prod. range: 100,000–250,000 kg/yr.

Y 92–105

Manufacturer. Reichhold Chemicals, Inc.

Chemical. (G) Polyester resin.

Use/Production. (G) Resin for coatings. Prod. range: Confidential.

Dated: March 23, 1992.

Douglas W. Sellers,

Acting Director, Information Management Division, Office of Pollution Prevention and Toxics.

FEDERAL RESERVE SYSTEM

Country Bankers, Inc., et al.; Formations of; Acquisitions by; and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than April 20, 1992.

A. Federal Reserve Bank of Minneapolis (James M. Lyon, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. Country Bankers, Inc., Blooming Prairie, Minnesota; to become a bank holding company by acquiring 100 percent of the voting shares of Citizens State Bank of Hayfield, Hayfield, Minnesota, and at least 95 percent of the voting shares of Farmers and Merchants State Bank of Blooming Prairie, Blooming Prairie, Minnesota.

B. Federal Reserve Bank of Kansas City (John E. Yorke, Senior Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. J & L Holdings Limited Partnership, San Marcos, Texas; to become a bank holding company by acquiring 52 percent of the voting common shares of Plainview Holding Company, Plainview, Nebraska, parent of the following banks: The Nebraska Security Bank, Deshler, Nebraska; Cones State Bank, Pierce, Nebraska; Farmers National Bank, Pilger, Nebraska; and Plainview National Bank, Plainview, Nebraska.

2. MidAmerican Corporation, Shawnee Mission, Kansas; to acquire 100 percent of the voting shares of Jayhawk Bancshares, Inc., Kansas City, Missouri, parent of Lawrence National Bank, Lawrence, Kansas.

Board of Governors of the Federal Reserve System, March 23, 1992.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210–01–F

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Agency for Toxic Sustances and Disease Registry

Committees; Establishment Renewal, Termination; Scientific Counselors Board

ACTION: Notice of establishment—Subcommittee on Great Lakes Human Health Effects Research of the Board of Scientific Counselors, Agency for Toxic Sustances and Disease Registry.

The Agency for Toxic Substances and Disease Registry (ATSDR) announces the establishment of the following subcommittee of the Board of Scientific Counselors, ATSDR:

DESIGNATION: Subcommittee on Great Lakes Human Health Effects Research.

PURPOSE: The subcommittee will advise the Board of Scientific Counselors on the scientific aspects of a program of human health effects research relevant to pollution of the Great Lakes.

Members of the subcommittee will be composed solely of members of the Board of Scientific Counselors, ATSDR. The subcommittee will seek advice from special consultants, where appropriate. The subcommittee will meet approximately once a year.

SUPPLEMENTARY INFORMATION: The Great Lakes Critical Programs Act of 1990 mandates the Environmental Protection Agency, in consultation with ATSDR, to prepare a report by 1994 that describes the impact on human health of water pollutants in the Great Lakes. In support of this directive, Congress earmarked $2 million for ATSDR in fiscal year 1992 to support human health effects studies in the Great Lakes region.

CONTACT PERSON FOR ADDITIONAL INFORMATION: Additional information concerning this subcommittee may be obtained from Charles Xintaras, Sc.D., Executive Secretary, Board of Scientific Counselors, ATSDR, (MS E–28), 1600 Clifton Road, NE, Atlanta, Georgia 30333, telephone 404/639–0708 or FTS 236–0708.

Dated: March 23, 1992.

Elvin Hilyer,

Associate Director for Policy Coordination.

BILLING CODE 4160–70–M

Food and Drug Administration

[Docket No. 92N–0146]

Drug Export; Florinef Acetate 0.1 MG Tablets

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that Bristol-Myers Squibb Co. has filed an application requesting approval for the export of the human drug Florinef Acetate 0.1 mg Tablets to Canada.

ADDRESSES: Relevant information on this application may be directed to the Dockets Management Branch (HFA–305), Food and Drug Administration, rm. 1–23, 12420 Parklawn Dr., Rockville, MD 20857, and to the contact person identified below. Any future inquiries concerning the export of human drugs under the Drug Export Amendments Act of 1986 should also be directed to the contact person.

FOR FURTHER INFORMATION CONTACT: James E. Hamilton, Division of Drug Labeling Compliance (HFD–313), Center for Drug Evaluation and Research, Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–295–8073.

SUPPLEMENTARY INFORMATION: The drug export provisions in section 802 of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 382) provide that FDA may approve applications for the export of drugs that are not currently approved in the United States. Section 802(b)(3)(B) of the act sets forth the requirements that must be met in an application for approval. Section 802(b)(3)(C) of the act requires that the agency review the application within 30 days of its filing to determine whether the requirements of section 802(b)(3)(B) have been satisfied. Section 802(b)(3)(A) of the act requires that the agency publish a notice in the **Federal Register** within 10 days of the filing of an application for export to facilitate public participation in its review of the application. To meet this requirement, the agency is providing notice that Bristol-Myers Squibb Co., P.O. Box 4000, Princeton, NJ 08543–4000, has filed an application requesting approval for the export of the human drug Florinef Acetate 0.1 mg Tablets to Canada. This drug is indicated for use as a partial replacement therapy for primary and secondary adrenocortical insufficiency in Addison's disease. The application was received and filed in the Center for Drug Evaluation and Research on February 18, 1992, which shall be considered the filing date for purposes of the act.

Interested persons may submit relevant information on the application to the Dockets Management Branch (address above) in two copies (except that individuals may submit single copies) and identified with the docket number found in brackets in the heading of this document. These submissions may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

The agency encourages any person who submits relevant information on the application to do so by April 6, 1992, and to provide an additional copy of the submission directly to the contact person identified above, to facilitate consideration of the information during the 30-day review period.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (sec. 802 (21 U.S.C. 382)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Center for Drug Evaluation and Research (21 CFR 5.44).

Dated: March 20, 1992.

Sammie R. Young,

Deputy Director, Office of Compliance, Center for Drug Evaluation and Research.

BILLING CODE 4160-01-M

Advisory Committee; Meeting

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: This notice announces a forthcoming meeting of a public advisory committee of the Food and Drug Administration (FDA). This notice also summarizes the procedures for the meeting and methods by which interested persons may participate in open public hearings before FDA's advisory committees.

Meeting: The following advisory committee meeting is announced:

Veterinary Medicine Advisory Committee

Date, Time, and Place

April 29 and 30, 1992, 8:30 a.m., Embassy III Conference Rm., Ramada Hotel and Conference Center, 8400 Wisconsin Ave., Bethesda, MD.

Type of Meeting and Contact Person

Open committee discussion, April 29, 1992, 8:30 a.m. to 10 a.m.; open public hearing, 10 a.m. to 1 p.m., unless public participation does not last that long; open committee discussion, 1 p.m. to 1:30 p.m.; open public hearing, 1:30 p.m. to 2 p.m., unless public participation does not last that long; open committee discussion, 2 p.m. to 3 p.m.; open public hearing, 3 p.m. to 4 p.m., unless public participation does not last that long; open committee discussion, 4 p.m. to 4:30 p.m.; open committee discussion, April 30, 1992, 8:30 a.m. to 9 a.m.; open public hearing, 9 a.m. to 11 a.m., unless public participation does not last that long; open committee discussion, 11 a.m. to 11:30 a.m.; Gary E. Stefan, Center for Veterinary Medicine (HFV-244), 7500 Standish Pl., Rockville, MD 20855, 301-295-8769.

General Function of the Committee

The committee reviews and evaluates available data concerning the safety and effectiveness of marketed and investigational new animal drugs, feeds, and devices for use in the treatment and prevention of animal disease and increased animal production.

Agenda—Open Public Hearing

Interested persons requesting to present data, information, or views, orally or in writing, on issues pending before the committee, should communicate with the contact person.

Open Committee Discussion

The committee will discuss extra-label use of animal drugs, availability of poison antidotes, Center for Veterinary Medicine guideline revisions, and aquaculture drug approvals and drug use.

FDA public advisory committee meetings may have as many as four separable portions: (1) An open public hearing, (2) an open committee discussion, (3) a closed presentation of data, and (4) a closed committee deliberation. Every advisory committee meeting shall have an open public hearing portion. Whether or not it also includes any of the other three portions will depend upon the specific meeting involved. There are no closed portions for the meetings announced in this notice. The dates and times reserved for the open portions of each committee meeting are listed above.

The open public hearing portion of each meeting shall be at least 1 hour long unless public participation does not last that long. It is emphasized, however, that the 1 hour time limit for an open public hearing represents a minimum rather than a maximum time for public participation, and an open public hearing may last for whatever longer period the committee chairperson determines will facilitate the committee's work.

Public hearings are subject to FDA's guideline (subpart C of 21 CFR part 10) concerning the policy and procedures for electronic media coverage of FDA's public administrative proceedings, including hearings before public advisory committees under 21 CFR part 14. Under 21 CFR 10.205, representatives of the electronic media may be permitted, subject to certain limitations, to videotape, film, or otherwise record FDA's public administrative proceedings, including presentations by participants.

Meetings of advisory committees shall be conducted, insofar as is practical, in accordance with the agenda published in this **Federal Register** notice. Changes in the agenda will be announced at the beginning of the open portion of a meeting.

Any interested person who wishes to be assured of the right to make an oral presentation at the open public hearing portion of a meeting shall inform the contact person listed above, either orally or in writing, prior to the meeting. Any person attending the hearing who does not in advance of the meeting request an opportunity to speak will be allowed to make an oral presentation at the hearing's conclusion, if time permits, at the chairperson's discretion.

The agenda, the questions to be addressed by the committee, and a current list of committee members will be available at the meeting location on the day of the meeting.

Transcripts of the open portion of the meeting will be available from the Freedom of Information Office (HFI-35), Food and Drug Administration, rm. 12A-16, 5600 Fishers Lane, Rockville, MD 20857, approximately 15 working days after the meeting, at a cost of 10 cents per page. The transcript may be viewed at the Dockets Management Branch (HFA-305), Food and Drug Administration, rm. 1-23, 12420 Parklawn Dr., Rockville, MD 20857, approximately 15 working days after the meeting, between the hours of 9 a.m. and 4 p.m., Monday through Friday. Summary minutes of the open portion of the meeting will be available from the Freedom of Information Office (address above) beginning approximately 90 days after the meeting.

This notice is issued under section 10(a) (1) and (2) of the Federal Advisory Committee Act (5 U.S.C. app. 2), and FDA's regulations (21 CFR part 14) on advisory committees.

Dated: March 23, 1992.

Michael R. Taylor,

Deputy Commissioner for Policy.

BILLING CODE 4160-01-M

Health Resources and Services Administration

Advisory Council; Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Public Law 92-463), announcement is made of the following National Advisory body scheduled to meet during the month of June 1992:

Name: Maternal and Child Health Research Grants Review Committee.

Date and Time: June 10-12, 1992, 9 a.m.

Place: Conference Room P, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857. Open on June 10, 1992, 9 a.m.—10 a.m. Closed for remainder of meeting.

Purpose: To review research grant applications in the program area of maternal and child health administered by the Maternal and Child Health Bureau.

Agenda: The open portion of the meeting will cover opening remarks by the Director, Division of Systems, Education and Science, Maternal and Child Health Bureau, who will report on program issues, congressional activities and other topics of interest to the field of maternal and child health. The meeting will be closed to the public on June 10, at 10 a.m. for the remainder of the meeting for the review of grant applications. The closing is in accordance with the provisions set forth in section 552b(c)(6), title 5 U.S.C. Code, and the Determination by the Administrator, Health Resources and Services Administration, pursuant to Public Law 92-463.

Anyone requiring information regarding the subject Council should contact Gontran Lamberty, Dr. Ph.H., Executive Secretary, Maternal and Child Health Research Grants Review Committee, room 9-12, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, Telephone (301) 443-2190.

Agenda Items are subject to change as priorities dictate.

Dated: March 23, 1992.

Jackie E. Baum,

Advisory Committee Management Officer, HRSA.

BILLING CODE 4160-15-M

Public Health Service

Agency Forms Submitted to the Office of Management and Budget for Clearance

Each Friday the Public Health Service (PHS) publishes a list of information collection packages it has submitted to the Office of Management and Budget (OMB) for clearance in compliance with the Paperwork Reduction Act (44 U.S.C. chapter 35). The following requests have been submitted to OMB since the list was last published on Friday, March 13, 1992.

(Call PHS Reports Clearance Officer on 202-245-2100 for copies of package)

1. Cosmetic Product Experience Reports (21 CFR part 730)—0910-0047—Experience data, when correlated with cosmetic product ingredient data, gives FDA scientists valuable insight into potentially unsafe cosmetic ingredients thereby improving FDA's ability to accomplish its mission of protecting consumers from injuries resulting from harmful ingredients in cosmetics. *Respondents:* Businesses or other for-profit, Small businesses or organizations. *Number of Respondents:* 125; *Number of Responses per Respondent:* 1 (1 Form FDA 2708 @1 hr. and 16 Form FDA 2704 @.2 hr. each); *Average Burden per Response:* 4.2 hours; *Estimated Burden Hours:* 525.

2. Registration of Cosmetic Product Establishment—21 CFR part 710—0910-0027—The registration of cosmetic manufacturers and repackers supplies FDA with current locations for on-site inspection, addresses for information and regulatory mailings, business trading names supplying product distribution sources, and aids FDA in responding to Freedom of Information requests. *Respondents:* Businesses or other for-profit; Small businesses or organizations. *Number of Respondents:* 50; *Number of Responses Per Respondent:* 1; *Average Burden Per Response:* 0.4 hrs.; *Estimated Burden Hours:* 20.

3. Surveillance of Hazardous Substances Emergency Event—New—The purpose of this activity is to maintain a state-based surveillance system for hazardous substance emergency events. The Agency for Toxic Substances and Disease Registry will use this information to analyze and describe risk factors associated with morbidity and mortality with reference to first responders, employers and the general public. *Respondents:* State or local governments; *Number of Respondents:* 19; *Number of Responses Per Respondent:* 108; Average Burden Per Response 1 hr.; *Estimated Burden Hours:* 2052.

Desk Officer: Shannah Koss-McCallum.

Written comments and recommendations for the proposed information collections should be sent within 30 days of this notice directly to the OMB Desk Officer designated above at the following address: Human Resources and Housing Branch, New Executive Office Building, room 3002, Washington, DC.

Dated: March 23, 1992.

Phyllis M. Zucker,

Acting Deputy Director, Office of Health Planning and Evaluation.

[FR Doc. 92-7132 Filed 3-26-92; 8:45]

BILLING CODE 4160-17-M

Indian Health Service; Method for Evaluating and Establishing Reimbursement Rates for Health Care Services Authorized Under the Indian Health Service Contract Health Service Regulations-Portland Area

AGENCY: Indian Health Service, PHS, HHS.

ACTION: Extension of project date.

SUMMARY: The termination date for the pilot project now being conducted in the Portland Area to determine whether an alternative method of evaluating and establishing reimbursement rates for contract health services has been changed from March 31, 1992 to March 31, 1993.

EFFECTIVE DATE: March 27, 1992.

FOR FURTHER INFORMATION CONTACT: Ronald G. Freeman, Director, Division of Health Care Administration, Contract Health Services, rm. 4B-17, 5600 Fishers Lane, Rockville, MD 20857, (301) 443-8373. This is not a toll free number.

SUPPLEMENTARY INFORMATION: The Indian Health Service (IHS) issued a notice on March 13, 1991, 56 FR 10566, to inform the public that IHS was conducting a pilot project in the Portland Area, IHS, to determine whether an alternative method of evaluating and establishing reimbursement rates for contract health services would result in greater participation by health care providers and lower costs to IHS. Providers within the Portland Area were invited to submit their most favorable rate quotations. The response was far greater than the expectations of the IHS. As a result of the size of the response and the complexity of the development of rate quotation analyses methodologies for facilities, outpatient and professional providers and the development of preferred provider lists from these analyses, the length of time for this portion of the pilot project has taken longer than expected. A formal evaluation process will be performed during the final two months of the project by an outside entity selected by IHS and the Portland Area Tribes. We are, therefore, changing the termination date of this pilot project from March 31,1992 to March 31, 1993.

The Pilot project does not change the current IHS payment policy requirement

that health care services be procured at rates which do not exceed prevailing Medicare rates.

Dated: March 21, 1992.

Everett R. Rhoades,

Assistant Surgeon General, Director.

[FR Doc. 92-7111 Filed 3-26-92; 8:45 am]

BILLING CODE 4160-16-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Community Planning and Development

[Docket No. N-92-1917; FR-2934-N-71]

Federal Property Suitable as Facilities To Assist the Homeless

AGENCY: Office of the Assistant Secretary for Community Planning and Development, HUD.

ACTION: Notice.

SUMMARY: This Notice identifies unutilized, underutilized, excess, and surplus Federal property reviewed by HUD for suitability for possible use to assist the homeless.

ADDRESSES: For further information, contact James N. Forsberg, room 7262, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, DC 20410; telephone (202) 708-4300; TDD number for the hearing- and speech-impaired (202) 708-2565 (these telephone numbers are not toll-free), or call the toll-free Title V information line at 1-800-927-7588.

SUPPLEMENTARY INFORMATION: In accordance with 56 FR 23789 (May 24, 1991) and section 501 of the Stewart B. McKinney Homeless Assistance Act (42 U.S.C. 11411), as amended, HUD is publishing this Notice to identify Federal buildings and other real property that HUD has reviewed for suitability for use to assist the homeless. The properties were reviewed using information provided to HUD by Federal landholding agencies regarding unutilized and underutilized buildings and real property controlled by such agencies or by GSA regarding its inventory of excess or surplus Federal property. This Notice is also published in order to comply with the December 12, 1988 Court Order in *National Coalition for the Homeless* v. *Veterans Administration*, No. 88-2503-OG (D.D.C.).

Properties reviewed are listed in this notice according to the following categories: Suitable/available, suitable/unavailable, suitable/to be excess, and unsuitable. The properties listed in the three suitable categories have been reviewed by the landholding agencies, and each agency has transmitted to HUD: (1) Its intention to make the property available for use to assist the homeless, (2) its intention to declare the property excess to the agency's needs, or (3) a statement of the reasons that the property cannot be declared excess or made available for use as facilities to assist the homeless.

Properties listed as suitable/available will be available exclusively for homeless use for a period of 60 days from the date of this notice. Homeless assistance providers interested in any such property should send a written expression of interest to HHS, addressed to Judy Breitman, Division of Health Facilities Planning, U.S. Public Health Service, HHS, room 17A-10, 5600 Fishers Lane, Rockville, MD 20857; (301) 443-2265. (This is not a toll-free number.) HHS will mail to the interested provider an application packet, which will include instructions for completing the application. In order to maximize the opportunity to utilize a suitable property, providers should submit their written expressions of interest as soon as possible. For complete details concerning the processing of applications, the reader is encouraged to refer to the interim rule governing this program, 56 FR 23789 (May 24, 1991).

For properties listed as suitable/to be excess, that property may, if subsequently accepted as excess by GSA, be made available for use by the homeless in accordance with applicable law, subject to screening for other Federal use. At the appropriate time, HUD will publish the property in a Notice showing it as either suitable/available or suitable/unavailable.

For properties listed as suitable/unavailable, the landholding agency has decided that the property cannot be declared excess or made available for use to assist the homeless, and the property will not be available.

Properties listed as unsuitable will not be made available for any other purpose for 20 days from the date of this Notice. Homeless assistance providers interested in a review by HUD of the determination of unsuitability should call the toll free information line at 1-800-927-7588 for detailed instructions or write a letter to James N. Forsberg at the address listed at the beginning of this Notice. Included in the request for review should be the property address (including zip code), the date of publication in the **Federal Register**, the landholding agency, and the property number.

For more information regarding particular properties identified in this Notice (*i.e.*, acreage, floor plan, existing sanitary facilities, exact street address), providers should contact the appropriate landholding agencies at the following addresses: *Corps of Engineers:* Gary B. Paterson, Chief, Base Realignment and Closure Office, Directorate of Real Estate, 20 Masachusetts Ave., NW, rm. 4133, Washington, DC 20314-1000; (202) 272-0520; *U.S. Air Force:* John Carr, Realty Specialist, HQ-AFBDA/BDR, Pentagon, Washington, DC 20330-5130; (703) 693-0674; *U.S. Navy:* John J. Kane, Deputy Division Director, Dept. of Navy, Real Estate Operations, Naval Facilities Engineering Command, 200 Stovall Street, Alexandria, VA 22332-2300; (202) 325-0474; (These are not toll-free numbers).

Dated: March 20, 1992.

Paul Roitman Bardack,

Deputy Assistant Secretary for Economic Development.

TITLE V, FEDERAL SURPLUS PROPERTY PROGRAM; FEDERAL REGISTER REPORT FOR 03/27/92

Arizona—Williams Air Force Base

Williams Air Force Base is located in Mesa, Arizona, 85240-5000. All the properties will be excess to the needs of the Air Force on or about September 30, 1993. Properties shown below as suitable/available will be available at that time. The Air Force has advised HUD that some properties may be available for interim lease for use to assist the homeless prior to that date.

The Base consists of approximately 4,072 acres, 179 Government-owned buildings and 700 residential buildings that have been reviewed by HUD for suitability for use to assist the homeless. The properties that HUD has determined suitable and which are available include various types of housing; office and administrative buildings; recreational, maintenance, and storage facilities; and other more specialized structures.

Suitable/Available Properties

Property Number: 199210096.
Type Facility: Housing—700 units of military family housing; 1-story with 2 to 5 bedrooms.
Property Number: 199210097.
Type Facility: Temporary Living Quarters—15 buildings; 1, 2, and 3-story structures including dorms and lodging.
Property Number: 199210098.
Type Facility: Support and Service Facilities—5 buildings; one 3-story fire station, one 1-story brick chapel, a gate house, a post office and an education center.

Property Number: 199210089.
Type Facility: Miscellaneous Facilities—24 buildings; 1 and 2-story structures including a library, bowling center, gym, child care, youth and recreation centers, theater, commissary and stores.
Property Numbers: 199210100-199210101.
Type Facility: Recreation—20 facilities including golf club bldgs., bathhouses, swimming pools, baseball, softball and soccer fields, tennis courts, track, golf course, driving range and a camp.
Property Number: 199210102.
Type Facility: Medical Facilities—6 buildings; 1-story block and concrete structures including a hospital, clinics and pharmacy.
Property Number: 199210103.
Type Facility: Laboratories—9 buildings; eight 1-story and one 3-story metal and concrete/block structures.
Property Number: 199210104.
Type Facility: Flight Training and Admin. Facilities—36 buildings; 1 to 3-story concrete block, wood and metal structures including law centers, offices, classrooms and flight training facilities.
Property Number: 199210105.
Type Facility: Warehouse and Storage Facilities—12 buildings; 1-story concrete, wood and steel structures including warehouses and storage bldgs.
Property Number: 199210106.
Type Facility: Base Support and Flight Maintenance Facilities—52 buildings; 1-story concrete/steel, concrete/block and steel structures including hangars, maintenance and jet engine shops.
Property Number: 199210107.
Type Facility: Hazardous and Explosive Storage—14 buildings; 1-story concrete and concrete/metal structures.

Illinois—Chanute Air Force Base

Chanute Air Force Base is located in Champaign, Illinois, 61868. All the properties will be excess to the needs of the Air Force on or about September 30, 1993. Properties shown below as suitable/available will be available at that time. The Air Force has advised HUD that some properties may be available for interim lease for use to assist the homeless prior to that date.

The Base consists of approximately 2,174 acres, 164 Government-owned buildings and 463 residential buildings that have been reviewed by HUD for suitability for use to assist the homeless. The properies that HUD has determined suitable and which are available include various types of housing; office and administrative buildings; recreational, maintenance, and storage facilities; and other more specialized structures.

Suitable/Available Properties

Property Number: 199210139.
Type Facility: Housing—463 houses with 1 to 8 units, brick and wood structure, possible asbestos.
Property Number: 199210140.
Type Facility: Temporary Living Quarters—24 buildings; 1 to 4-story dormitories and temporary living facilities, possible asbestos.
Property Number: 199210141.
Type Facility: Medical Facilities—2 buildings; 4-story concrete hospital and a 1-story concrete dental clinic, possible asbestos.
Property Number: 199210142.
Type Facility: Storage/Warehouses—28 buildings; concrete block, brick, metal and wood structures including supply and training bldgs., need repairs.
Property Number: 199210143.
Type Facility: Maintenance Bldgs.—15 buildings; 1-story maintenance facilities and shops, possible asbestos.
Property Number: 199210144.
Type Facility: Engine Test Cells/Warehouse—2 buildings; 1-story concrete storage/maintenance facilities, possible asbestos.
Property Number: 199210145.
Type Facility: Gas Stations—2 buildings; 1-story gas stations.
Property Number: 199210146.
Type Facility: Training Facilities—22 buildings; 1 to 4-story structures including training bldgs., classrooms, and labs, possible asbestos.
Property Number: 199210147.
Type Facility: Retail Stores—5 buildings; 1-story brick and wood structures including 4 branch exchanges and 1 commissary, possible asbestos.
Property Number: 199210148.
Type Facility: Chapel/Chapel Center—3 buildings; one 2-story brick chapel center and two 1-story wood chapels, possible asbestos.
Property Number: 199210149.
Type Facility: Fire Station—1 building; 2-story brick fire station, possible asbestos.
Property Number: 199210150-199210151.
Type Facility: Recreation—49 facilities; including gym, library, theater, golf bldgs., youth, child, bowling and recreation centers, track, softball fields, tennis courts, golf course and driving range.
Property Number: 199210152.
Type Facility: Administration—26 facilities; wood, brick and concrete structures including a band center, an education center, admin. bldgs. and offices, needs rehab, possible asbestos.
Property Number: 199210153.
Type Facility: Bldg. 386/Band Bldg.—31803 sq. ft., 2-story concrete block/wood band center, needs rehab.

Indiana—Fort Benjamin Harrison

Fort Benjamin Harrison is located northeast of Indianapolis in the City of Lawrence 46216-5000. All the properties will be excess to the needs of the Army Corps of Engineers on or about September 1995. Properties shown below as suitable/available will be available at that time. The Army Corps of Engineers has advised HUD that some properties may be available for interim lease for use to assist the homeless prior to that date.

The base covers 2501 acres and has 4.7 million square feet of facilities. The properties that HUD has determined suitable and which are available include family housing residences, temporary living quarters, office/administration buildings, various types of recreational facilities, child care centers and chapels, dining halls, a hospital, warehouses, miscellaneous and other specialized structures. More specific information concerning properties at the base can be obtained by contacting Commander, U.S. Army Soldier Support Center, Attn: ATZI-CG-BR (Colonel John A. Peck), Fort Benjamin Harrison, Indiana 46216-5000.

Suitable/Available Properties

Property Numbers: 329210068-329210069.
Type Facility: Housing—80 family residences, 1 and 2 story brick frame; 29 temporary living quarters (barracks), brick or concrete frame.
Property Number: 329210070.
Type Facility: Office/Administration—26 buildings; wood, brick, concrete or concrete block frame; includes personnel and general purpose building.
Property Number: 329210071.
Type Facility: Recreational Facilities—28; wood, brick, concrete or concrete block frame; includes gym, canteen, golf course, swimming pool, riding stable, tennis court, bowling center, recreation buildings, basketball and handball courts, baseball fields, track, and playgrounds.
Property Number: 329210072.
Type Facility: Child Care Centers—2 buildings; brick frame; 5,818 & 14, 457 sq. ft.
Property Number: 329210073.
Type Facility: Dining Halls—4; brick frame; 11,075 to 31,439 sq. ft.
Property Number: 329210074.
Type Facility: Stores/Services—12 buildings; 140 to 68,899 sq. ft.; brick, wood, concrete or concrete block frame; includes restaurant, commissary, sales stores, exchange branches, and service outlet.

Property Number: 329210075.
Type Facility: Hospital, brick frame.
Property Number: 329210076.
Type Facility: 2 Chapels; 3,747 & 16,587 sq. ft., brick and aluminum frame.
Property Number: 329210078.
Type Facility: 2 Fire Facilities; 2,243 & 3,835 sq. ft.; includes fire station and hose house.
Property Number: 329210079, 329210083.
Type Facility: 2 Vehicle Shops and Fuel Facility; concrete/asbestos frame; 1 gas station building, 327 sq. ft.
Property Number: 329210080.
Type Facility: Maintenance Engineering—6 buildings; 168 to 14,074 sq. ft.; wood, brick or concrete block frame.
Property Number: 329210081, 329210082.
Type Facility: Explosives/Munitions and Hazardous Storage—10 buildings; 103 to 1,138 sq. ft.; brick, steel, concrete or wood frame; includes ammo magazines and flammable materials storage.
Property Number: 329210084.
Type Facility: 23 Warehouses; 960 to 56,650 sq. ft.; brick, concrete or steel frame.
Property Number: 329210085.
Type Facility: 150 Miscellaneous Buildings; 31 to 211,364 sq. ft.; includes headquarters & general instruction buildings; training centers and detached garages.
Property Number: 329210086.
Type Facility: 5 Multipurpose Buildings.

Land

Property Number: 329210077.
Type Facility: 2 Aircraft/Airport Facilities; 938 sq. yds.

Unsuitable Properties

Property Number: 329210087.
Type Facility: 1 Recreational Facility; within a floodway.

BILLING CODE 4210–29–M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[UT–080–02–4410–03]

Book Cliffs Resource Area, UT; Resource Management Plan

AGENCY: Bureau of Land Management, DOI.

ACTION: Notice of intent to amend the 1984 Book Cliffs Resource Management Plan.

SUMMARY: This Notice of Intent is to advise the public of a possible amendment to the Book Cliffs Resource Area Management Plan of 1984. The plan includes land located within Uintah County in northeastern Utah.

The purpose of the amendment would be to consider whether a new transportation corridor should be established that would allow granting the applicant's preferred alternative for a right-of-way for the Uintah County portion of the proposed Ouray to Cisco Highway. The highway is a joint proposal of the Uintah Country Special Services District and the Grand County Roads Special Service District #1. The proposed highway is intended to serve energy development in the area and provide a more direct north-south route through the eastern part of the State of Utah.

The Book Cliffs Resource Management Plan (RMP) provides for a transportation corridor following the alignment of the present Seep Ridge Road. However, the alignment preferred by the Uintah County Special Services District would deviate from that corridor by turning west down Pine Springs Canyon, crossing Main Canyon, and then going south for about five miles through the Winter Ridge Wilderness Study Area (WSA). Another alternative would go up Main Canyon and tie into existing roads that would avoid the WSA. Both of these two alternatives would require amendment of the RMP to establish new transportation corridors.

Congressional action would be required before a right-of-way could be approved through the Winter Ridge WSA. Without such Congressional action, the RMP would not be amended to establish a transportation corridor through the WSA.

An Environmental Impact Statement (EIS) is being prepared for the entire highway project. This EIS will also serve as the National Environmental Policy Act Compliance Document for amending the 1984 Book Cliffs Resource Management Plan.

Existing planning documents are available at the Book Cliffs Resource Area Office, 170 South 500 East, Vernal, Utah 84078.

FOR FURTHER INFORMATION CONTACT: Paul Andrews, Book Cliffs Area Manager, (801) 789–1362.

Dated: March 19, 1992.

[OR–050–4410–08:GP2–188]

Brothers-LaPine Resource Management Plan Amendment, Prineville District, Deschutes County, OR

March 19, 1992.

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of intent to prepare a Category I Amendment to the Brothers-LaPine Resource Management Plan.

1. Description of the Proposed Planning Action

To amend the Brothers-LaPine Resource Management Plan (RMP) completed in July 1989. The category I planning amendment will be based upon existing statutory requirements and policies and will carry the requirements of the Federal Land Policy and Management Act of 1976 (FLPMA). The RMP and Environmental Assessment (EA) to be prepared will provide the basis for modifying the Land Tenure section of the Resource Management Plan to provide specific direction for land exchanges and classifications involving the Recreation and Public Purposes Act. Specific issues involve the consideration to locate a shooting range on public lands and numerous other competing proposals such as a church/school complex, a performing arts center, a VFW Post, golf course, municipal effluent disposal area and parks.

The amendment will consider off-road vehicle use area designations and evaluate the direction of long-term grazing management in specific allotments.

In addition, the amendment will consider special management designations of unique ecological, geological and historical areas including old growth juniper woodlands throughout the planning area.

2. Identification of the Geographic Area Involved

The planning area involved within the Brothers-LaPine RMP is located in a

portion of northern Deschutes County. It involves about 80,000 acres of public lands in the Urban Interface around the communities of Bend, Redmond and Sisters.

3. General Types of Issues Anticipated

The proposed amendment would address changes in the following sections of the RMP: Land tenure, recreation, range, mineral materials and woodland forestry.

4. Disciplines to be Represented and Used to Prepare the RMP Amendment and Environmental Assessment Will be the Following

Lands, wildlife, botany, recreation, range, geology and forestry.

5. The Kind and Extent of Public Opportunities Provided

The public has been involved in an initial scoping meeting and has participated in the identification of issues. Public comments are being solicited during the development of the draft plan amendment with the scoping of issues and alternatives at this time. A public meeting will be held upon completion of the draft amendment. Comment periods will be announced in the **Federal Register** and in local newspapers. Oregon State and local government notification is being initiated.

6. Times, dates and locations scheduled or anticipated for public meetings, hearings, conferences or gatherings will be published in the local newspapers. All public input will be considered through written comments. The draft RMP amendment will be available for a 60-day public review period in the fall of 1992.

7. Name, Title, Address and Telephone Number of the Bureau of Land Management Official who may be Contacted for Further Information

Jim Kenna, Area Manager, 185 E. Fourth St., Prineville, Oregon 97754, phone 503–447–8757.

8. Location and Availability of Documents Relevant to the Planning Process

Documents will be available for public review at the Prineville District Office, 185 E. Fourth St., Prineville, Oregon 97754.

Dated: March 19, 1992.

James L. Hancock,

District Manager, Prineville District Office.

Colorado: Filing of Plats of Survey

March 17, 1992.

The plats of survey of the following described land, will be officially filed in the Colorado State Office, Bureau of Land Management, Lakewood, Colorado, effective 10 a.m., March 17, 1992.

The plat representing the dependent resurvey of a portion of the north boundary, the subdivisional lines, and certain claim lines, the subdivision of section 5, the metes-and-bounds survey of lot 16, section 5, and the remonumentation of certain corners, T. 6 N., R. 95 W., Sixth Principal Meridian, Colorado, Group Nos. 595 and 945, was accepted January 16, 1992.

This survey was executed to meet certain administrative needs of this Bureau.

The plat representing the dependent resurvey of a portion of the line between sections 23 and 24 and a portion of the center line of Soda Ridge Road, a metes-and-bounds survey of a portion of the center line of Soda Ridge Road in section 23, and a metes-and-bounds survey between certain lots in section 23 and 24, T. 5 S., R. 77 W., Sixth Principal Meridian, Colorado, Group No. 968, was accepted January 17, 1992.

The plat representing the dependent resurvey of the subdivisional line between sections 35 and 36 and a portion of Mineral Survey Number 6345 B, Polar Star Millsite and the east and west center line of section 35, T. 1 N., R. 72 W. Sixth Principal Meridian, Colorado, Group No. 992, was accepted January 21, 1992.

These surveys were executed to meet certain administrative needs of the U.S. Forest Service.

The plat representing the retracement of the north two miles of the west boundary, the dependent resurvey of a portion of the north boundary of the Southern Ute Indian Reservation (south boundary of the Ute Ceded Lands), the south boundary, portions of the east and west boundaries, the subdivisional lines, and the subdivision of certain sections, T. 34 N., R. 11 W. (South of the Ute Line), New Mexico Principal Meridian, Colorado, Group Nos. 922 and 948, was accepted January 30, 1992.

This survey was executed to meet certain administrative needs of the Bureau of Reclamation and the Bureau of Indian Affairs.

All inquiries about this land should be sent to the Colorado State Office, Bureau of Land Management, 2850 Youngfield Street, Lakewood, Colorado, 80215.

Gary L. Gibson,

Acting Chief, Cadastral Surveyor for Colorado.

[NV–940–02–4212–22]

Filing of Plats of Survey; NV

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The purpose of this notice is to inform the public and interested State and local government officials of the latest filing of Plats of Survey in Nevada.

EFFECTIVE DATES: Filing was effective at 10 a.m. on March 16, 1992.

FOR FURTHER INFORMATION CONTACT: John S. Parrish, Chief, Branch of Cadastral Survey, Bureau of Land Management (BLM), Nevada State Office, 850 Harvard Way, P.O. Box 12000, Reno, Nevada 89520, 702–785–6543.

SUPPLEMENTARY INFORMATION: 1. The Plats of Survey of lands described below were officially filed at the Nevada State Office, Reno, Nevada on March 16, 1992:

Mount Diablo Meridian, Nevada

T. 13 N., R. 39 E.—Supplemental Plat of Survey, Section 34, SW¼.
T. 30 N., R. 48 E.—Supplemental Plat of Survey, Section 32.

2. These surveys were accepted February 24, 1992, and February 26, 1992, and were executed to meet certain administrative needs of the Bureau of Land Management.

3. The above-listed surveys are now the basic record for describing the lands for all authorized purposes. These surveys will be placed in the open files in the BLM Nevada State Office and will be available to the public as a matter of information. Copies of the surveys and related field notes may be furnished to the public upon payment of the appropriate fees.

Robert G. Steele,

Deputy State Director, Nevada.

Fish and Wildlife Service

Meeting, Klamath Fishery Management Council

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of meeting.

SUMMARY: Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C. app. I), this notice announces a meeting of the Klamath Fishery Management Council, established under the authority of the Klamath River Basin Fishery Resources Restoration Act (16 U.S.C. 460ss et seq.). The meeting is open to the public.

DATES: The Klamath Fishery Management Council will meet from 1 p.m. to 9 p.m. on Sunday, April 5, 1992.

ADDRESSES: The meeting will be held at the Clarion Hotel (Sausalito B Conference Room), 401 E. Millbrae Avenue, Millbrae, California.

FOR FURTHER INFORMATION CONTACT: Dr. Ronald A. Iverson, Project Leader, U.S. Fish and Wildlife Service, P.O. Box 1006 (1215 South Main, Suite 212), Yreka, California 96097–1006, telephone (916) 842–5763.

SUPPLEMENTARY INFORMATION: For background information on the Management Council, please refer to the notice of their initial meeting that appeared in the **Federal Register** on July 8, 1987 (52 FR 25639). The principal agenda item will be providing comment to the Pacific Fishery Management Council on options for 1992 ocean salmon management. The Klamath Fishery Management Council will review the 1992 harvest plans impacting spring chinook and hear updates on water management in the Klamath and Trinity Rivers. Public comment will be received at 4 p.m.

Dated: March 18, 1992.

David L. McMullen,

Acting Regional Director, U.S. Fish and Wildlife Service.

INTERNATIONAL TRADE COMMISSION

[Invs. Nos. 701–TA–309 and 731–TA–528 and 529 (Final)]

Revised Schedule; Magnesium From Canada and Norway

AGENCY: United States International Trade Commission.

ACTION: Revised schedule for the subject investigations.

EFFECTIVE DATE: March 11, 1992.

FOR FURTHER INFORMATION CONTACT: Fred Fischer (202–205–3179), Office of Investigations, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000.

SUPPLEMENTARY INFORMATION: On February 18, 1992, the Commission instituted the subject antidumping investigations and issued a revised schedule to be followed in the subject countervailing duty investigation.[1] Subsequently, the U.S. Department Commerce (Commerce) extended the date for its final determinations in these investigations from April 27, 1992.[2] The Commission, therefore, is revising its schedule in these investigations to conform with Commerce's new schedule.

The Commission's new schedule for the investigation is as follows: The prehearing staff report will be placed in the nonpublic record on April 30, 1992; requests to appear at the hearing must be filed with the Secretary to the Commission not later than May 11, 1992; the deadline for filing prehearing briefs is May 13, 1992; the prehearing conference will be held at the U.S. International Trade Commission Building at 9:30 a.m. on May 15, 1992; the hearing will be held at the U.S. International Trade Commission Building at 9:30 a.m. on May 19, 1992; and the deadline for filing posthearing briefs is May 28, 1992. Section 735(b)(2) of the Tariff Act of 1930[3] directs the Commission to make final determinations within 120 days after notification of Commerce's preliminary determinations or within 45 days after notification of Commerce's final determinations, whichever date is later, which in this case is July 1, 1992.

For further information concerning the conduct of these investigations, hearing procedures, and rules of general application, consult the Commission's Rules of Practice and Procedure, part 201, subparts A through E,[4] and part 207, subparts A and C.[5]

Authority: These investigations are being conducted under authority of the Tariff Act of 1930, title VII. This notice is published pursuant to § 207.12 of the Commission's rules.

Issued: March 23, 1992.

Secretary.

[FR Doc. 92–7085 Filed 3–26–92; 8:45 am]

BILLING CODE 7020–02–M

[Investigation No. 337–TA–336; Order No. 6]

Certain Single In-Line Memory Modules and Products Containing Same

On March 10, 1992, respondents filed a joint motion to designate the investigation more complicated for the purpose of adjudicating complainant's motion for temporary relief (Motion No. 336–6). The motion is opposed by the complainant but supported by the Commission investigative attorneys.

The part of the investigation involving temporary relief is designated more complicated on the basis of the complexity of issues relating to whether there is reason to believe that the respondents have violated section 337 and whether temporary relief is appropriate. A number of complex issues have been raised in this proceeding that were not litigated in the district court proceeding, such as the issue relating to JEDEC and equitable estoppel, the express and implied licensing defenses, and the separate patent infringement defenses of each respondent. Respondents indicate that depositions will have to be heard at the rate of four or more a day if the investigation is not designated more complicated. This pace would make the proof of even simple issues complex.

It is proposed that the hearing commence on April 27. The parties can submit proposed schedules for deadlines before the hearing and indicate how much time each party would like to have to present its own case and to cross-examine opposing witnesses at the hearing. Respondents will be asked to join together to present their cases relating to validity, enforceability and equitable estoppel.

It is ordered that proposed schedules for the hearing and deadlines before the hearing be submitted to this office by March 18, 1992.

Motion 336–6 is granted.

The Secretary is requested to publish this Order in the **Federal Register**.

Issued: March 16, 1992.

Janet D. Saxon,

Administrative Law Judge.

This is to provide notice as required by 49 U.S.C. 10524(b)(1) that the named corporations intend to provide or use compensated intercorporate hauling operations as authorized in 49 U.S.C. 10524(b).

A. 1. Parent corporation and address of principal office: Brunswick Corporation, a Delaware corporation, One Brunswick Plaza, Skokie, Illinois 60077.

2. Wholly owned subsidiary which will participate in the operations: Sea Ray Boats, Inc., a Tennessee corporation.

B. 1. Super Valu Stores, Inc., P.O. Box 990, Minneapolis, MN 55440.

2. Subsidiaries:

	State of Incorporation
Preferred Products, Inc.—Chaska, MN.	Minnesota.
Ohiocubco—Eden Prairie, MN	Ohio.
Valu Transportation, Inc.—Eden Prairie, MN.	Minnesota.
Twin Valu Stores, Inc.—Eden Prairie, MN.	Minnesota.

Sidney L. Strickland, Jr.,
Secretary.

BILLING CODE 7035-01-M

[Finance Docket No. 32032]

South Orient Railroad Company, Ltd.—Trackage Rights Exemption—Southern Pacific Transportation Co.

Southern Pacific Transportation Company has agreed to grant overhead trackage rights to South Orient Railroad Company, LTD., over approximately 11.4 miles of rail line between milepost 608.46, near Alpine Junction, Brewster County, TX, and milepost 619.64, near Paisano, Presidio County, TX. The exemption became effective on March 12, 1992.

This notice is filed under 49 CFR 1180.2(d)(7). Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not stay the transaction. Pleadings must be filed with the Commission and served on: Jack L. Coke, Jr., 800 Preston Commons West, 8117 Preston Road, Dallas, TX 75225.

As a condition to the use of this exemption, any employees affected by the trackage rights will be protected pursuant to *Norfolk and Western Ry. Co.—Tracking Rights—BN*, 354 I.C.C. 605 (1978), as modified in *Mendocino Coast Ry., Inc.—Lease and Operate*, 360 I.C.C. 653 (1980).

Dated: March 20, 1992.

By the Commission, David M. Konschnick, Director, Office of Proceedings.

Sidney L. Strickland, Jr.
Secretary.

BILLING CODE 7035-01-M

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

Controlled Substances: Proposed 1992 Aggregate Production Quota for Normorphine

AGENCY: Drug Enforcement Administration (DEA), Justice.

ACTION: Notice of a proposed 1992 aggregate production quota.

SUMMARY: This notice proposes a 1992 aggregate production quota for normorphine, a Schedule I controlled substance.

DATES: Comments or objections must be received on or before April 27, 1992.

ADDRESSES: Send comments or objections to the Administrator, Drug Enforcement Administration, Washington, DC 20537, Attn: DEA Federal Register Representative.

FOR FURTHER INFORMATION CONTACT: Howard McClain, Jr., Chief, Drug & Chemical Evaluation Section, Drug Enforcement Administration, Washington, DC 20537, Telephone: (202) 307-7183 .

SUPPLEMENTARY INFORMATION: Section 306 of the Controlled Substances Act (CSA), (21 U.S.C. 826) requires that the Attorney General establish on an annual basis aggregate production quotas for all controlled substances listed in Schedules I and II. This responsibility has been delegated to the Administrator of the DEA pursuant to § 0.100 of title 28 of the Code of Federal Regulations.

Recently, the DEA received an application for a manufacturing quota for normorphine, a Schedule I controlled substance. The normorphine, is to be used to prepare analytical standards.

The Administrator of the DEA, under the authority vested in the Attorney General by section 306 of the CSA of 1970 (21 U.S.C. 826) and delegated to the Administrator by § 0.100 of title 28 of the Code of Federal Regulations, hereby proposes the 1992 aggregate production quota for normorphine, expressed in grams of anhydrous base.

Basic class	Proposed 1992 aggregate production Quota (grams)
Normorphine	2

All interested persons are invited to submit comments or objections in writing regarding this proposal. Comments or objections should be submitted to the Administrator, Drug Enforcement Administration, United States Department of Justice, Washington, DC 20537, Attention: DEA Federal Register Representative, and must be received by April 27, 1992. If a person raises one or more issues which that person believes would warrant a hearing, that individual should so state and summarize the reason for this belief.

In the event that comments or objections to this proposal raise one or more issues, which the Administrator finds warrant a hearing, the Administrator shall order a public hearing by a notice in the **Federal Register**, summarizing the issues to be heard and setting the time for the hearing.

Pursuant to sections (3)(c)(3) and 3(e)(2)(C) of Executive Order 12291, the Director of the Office of Management and Budget has been consulted with respect to these proceedings.

This action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and it has been determined that this matter does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The Administrator hereby certifies that this matter will have no significant impact upon small entities within the meaning and intent of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.* The establishment of annual production quotas for Schedules I and II controlled substances is mandated by law and by international commitments of the United States. Such quotas impact predominantly upon major manufacturers of the affected controlled substances.

Dated: February 6, 1992.

Robert C. Bonner,
Administrator of Drug Enforcement.

BILLING CODE 4410-09-M

DEPARTMENT OF LABOR

Employment Standards Administration/Wage and Hour Division

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

General wage determination decisions of the Secretary of Labor are issued in accordance with applicable law and are based on the information obtained by the Department of Labor from its study of local wage conditions and data made available from other sources. They specify the basic hourly wage rates and fringe benefits which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of a similar character and in the localities specified therein.

The determinations in these decisions of prevailing rates and fringe benefits have been made in accordance with 29 CFR part 1, by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR part 1, appendix, as well as such additional statutes as may from time to time be enacted containing provisions for the payment of wages determined to be prevailing by the Secretary of Labor in accordance with the Davis-Bacon Act. The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public comment procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in the effective date as prescribed in that section, because the necessity to issue current construction industry wage determinations frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General wage determination decisions, and modifications and supersedeas decisions thereto, contain no expiration dates and are effective from their date of notice in the **Federal Register**, or on the date written notice is received by the agency, whichever is earlier. These decisions are to be used in accordance with the provisions of 29 CFR parts 1 and 5. Accordingly, the applicable decision, together with any modifications issued, must be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR part 5. The wage rates and fringe benefits, notice of which is published herein, and which are contained in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under the Davis-Bacon And Related Acts," shall be the minimum paid by contractors and subcontractors to laborers and mechanics.

Any person, organization, or governmental agency having an interest in the rates determined as prevailing is encouraged to submit wage rate and fringe benefit information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Division of Wage Determinations, 200 Constitution Avenue, NW., room S-3014, Washington, 20210.

Corrections to General Wage Determination Decisions

Pursuant to the provisions of the Regulations set forth in title 29 of the Code of Federal Regulations, part 1, § 1.6(d), the Administrator of the Wage and Hour Division may correct any wage determination that contains clerical errors.

Corrections being issued in the Government Printing Office document entitled "General Wage Determinations Issued Under the Davis-Bacon and Related Acts" are indicated by Volume and are included immediately following the transmittal sheet(s) for the appropriate Volume(s).

Volume II:

Wage Decision No. IL91-2, Modification No. 2 through 5
Wage Decision No. MN90-7, through Modification No. 4
Wage Decision No. MN90-8, through Modification No. 2
Wage Decision No. MN90-15, through Modification No. 2
Wage Decision No. MN91-7, through Modification No. 3
Wage Decision No. MN91-8, through Modification No. 2
Wage Decision No. MN91-15, through Modification No. 3

Pursuant to the Regulations, 29 CFR part 1, § 1.6(d), such corrections shall be included in any bid specifications containing the wage determinations, or in any on-going contracts containing the wage determinations in question, retroactively to the start of construction.

General Wage Determination Publication

General wage determinations issued under the Davis-Bacon and related Acts, including those noted above, may be found in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under the Davis-Bacon And Related Acts". This publication is available at each of the 50 Regional Government Depository Libraries and many of the 1,400 Government Depository Libraries across the country. Subscriptions may be purchased from: Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, (202) 783-3238.

When ordering subscription(s), be sure to specify the State(s) of interest, since subscriptions may be ordered for any or all of the three separate volumes, arranged by State. Subscriptions include an annual edition (issued on or about January 1) which includes all current general wage determinations for the States covered by each volume. Throughout the remainder of the year, regular weekly updates will be distributed to subscribers.

Signed at Washington, DC, this 20th day of March 1992.

Alan L. Moss,

Director, Division of Wage Determinations.

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

General wage determination decisions of the Secretary of Labor are issued in accordance with applicable law and are based on the information obtained by the Department of Labor from its study of local wage conditions and data made available from other sources. They specify the basic hourly wage rates and fringe benefits which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of a similar character and in the localities specified therein.

The determinations in these decisions of prevailing rates and fringe benefits have been made in accordance with 29 CFR part 1, by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR part 1, appendix, as well as such additional statutes as may from time to time be enacted containing provisions for the payment of wages determined to be prevailing by the Secretary of Labor in accordance with the Davis-Bacon Act. The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public comment procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in the effective date as prescribed in that section, because the necessity to issue current construction industry wage determinations frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General wage determination decisions, and modifications and supersedeas decisions thereto, contain no expiration dates and are effective from their date of notice in the **Federal Register**, or on the date written notice is recieved by the agency, whichever is earlier. These decisions are to be used in accordance with the provisions of 29 CFR parts 1 and 5. Accordingly, the applicable decision, together with any modifications issued, must be made a part of every contract for performance of the described work within the georgraphic area indicated as required by an applicable Federal prevailing wage law and 29 CFR part 5. The wage rates and fringe benefits, notice of which is published herin, and which are contained in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon and Related Acts," shall be the minimum paid by contractors and subcontractors to laborers and mechanics.

Any person, organization, or governmental agency having an interest in the rates determined as prevailing is encourage to submit wage rate and fringe benefit information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Division of Wage Determinations, 200 Constitution Avenue, NW., room S-3014, Washington, DC 20210.

Corrections to General Wage Determination Decisions

Pursuant to the regulations set forth in title 29 of the Code of Federal Regulations, part 1, § 1.6(d), the Administrator of the Wage and Hour Division may correct any wage determination that contains clerical errors.

Corrections being issued in the Governmnent Printing Office document entitled "General Wage Determinations Issued Under the Davis-Bacon and Related Acts" are indicated by volume and are included immediately following the transmittal sheet(s) for the appropriate volume(s).

Volume II

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

National Endowment for the Arts

Meeting; Theater Advisory Panel

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Public Law 92-463), as amended, notice is hereby given that a meeting of the Theater Advisory Panel (Theater Companies Task Force Section) will be held on April 13-14, 1992 from 9:30 a.m.-5:30 p.m. in room 714 at the Nancy Hanks Center, 1100 Pennsylvania Avenue NW., Washington, DC 20506.

This meeting will be open to the public on a space available basis. The topics will be opening remarks and discussion of issues involving professional theater companies.

Any interested person may observe meetings, or portions thereof, which are open to the public, and may be permitted to participate in the discussions at the discretion of the meeting chairman and with the approval of the full-time Federal employee in attendance.

If you need special accommodations due to a disability, please contact the Office of Special Constituencies, National Endowment for the Arts, 1100 Pennsylvania Avenue NW., Washington, DC 20506, 202/682-5532, TTY 202/682-5496, at least seven (7) days prior to the meeting.

Further information with reference to this meeting can be obtained from Ms. Yvonne M. Sabine, Advisory Committee Management Officer, National Endowment for the Arts, Washington, DC 20506, or call (202) 682-5433.

Yvonne M. Sabine,

Director, Council and Panel Operations, National Endowment for the Arts.

BILLING CODE 7537-01-M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-220]

Niagara Mohawk Power Corp.; Nine Mile Point Nuclear Station, Unit No. 1; Exemption

I.

Niagara Mohawk Power Corporation (NMPC or the licensee) is the holder of Facility Operating License No. DPR-63, which authorizes operation of Nine Mile Point Nuclear Station Unit No. 1 (the facility or NMP1), at a steady-state reactor power level not in excess of 1850 megawatts thermal. The facility is a boiling water reactor located at the licensee's site in Oswego County, New York. The license provides among other things, that it is subject to all rules, regulations and Orders of the U.S. Nuclear Regulatory Commission (the Commission or NRC) now or hereafter in effect.

II.

Appendix J to 10 CFR part 50 requires that primary reactor containments shall meet certain containment leakage test requirements. Among these are the requirements that containment isolation valves receive local leak rate tests (Type C) and the results of all of the Type C tests are to be added to the results of the Type B tests and the combined leakage rate shall be less than 0.60 La.

III.

By letter dated December 12, 1991, NMPC requested a schedular exemption for Nine Mile Point Nuclear Station Unit No. 1 from the requirements set forth in 10 CFR part 50, appendix J, for four shutdown cooling isolation valves (38-

01, 38–02, 38–12, and 38–13) and four emergency condenser condensate return line valves (39–03, 39–04, 39–05, and 39–06). Specifically, NMPC requested temporary relief from the requirement that leakage of these eight valves be included in the 0.60 La acceptance criteria for the Type B and Type C tests, for the period up to and including NMP1's 1994 refueling outage.

Appendix J to 10 CFR part 50 was published on February 14, 1973, subsequent to the licensing of NMP1. The licensee has, in the past, not included the eight valves in the containment Leak Test Program, because they were not viewed as containment isolation valves under design accident conditions. However, the NRC staff's safety evaluation dated May 6, 1988, determined that these valves should be included in the appendix J program and be local leak rate tested.

By letters dated June 23, 1988, and November 22, 1988, NMPC requested a schedular exemption from certain requirements of appendix J, regarding leak testing of the emergency condenser condensate return line valves and the shutdown cooling isolation valves, respectively. NMPC stated that in order to leak test these valves a number of system changes would be necessary. The check valves, which were not designed for low pressure testing, may need to be replaced if they cannot be repaired or modified to consistently meet the required leakage rate. Additionally, leak-tight block valves and test taps may need to be installed in order to perform appropriate appendix J tests. NMPC requested relief until the next refueling outage, which was scheduled for 1990, to make the necessary system changes. However, due to NMP1's extended time out of service, the next refueling outage was rescheduled to 1992. The NRC staff granted the temporary exemption on October 17, 1988, for the emergency condenser condensate return line valves and on August 29, 1989, for the shutdown cooling isolation valves.

The NMP1 reactor vessel is currently scheduled to be drained during the 1994 refueling outage in order to perform inspections and modifications. The appendix J modifications, if performed during the 1992 outage, would also require the vessel to be drained. Therefore, NMPC has requested an extension to the schedular exemption so that the appendix J modifications may be included with the inspections and modifications of the reactor vessel currently scheduled for 1994.

IV.

The licensee's submittal restated the information that had been provided by letters dated June 23, 1988, and November 22, 1988, and concluded that the information would remain valid for the extended time period. This information formed the basis for the NRC staff's evaluations dated October 17, 1988, and August 29, 1989. Because the information provided on December 12, 1991, has not changed, the evaluations prepared by the NRC staff are still valid and extending the exemption would not cause undue risk to the public health and safety.

The NRC staff believes that special circumstances exist that warrant extending the approved exemption. A chemical decontamination of the reactor vessel significantly reduces radiation exposure to those individuals working in the area where the decontamination has taken place but there is a certain exposure to personnel performing the chemical decontamination. Therefore, the anticipated exposure to personnel must be greater than the exposure associated with the chemical decontamination.

The exposure associated with the appendix J modifications currently scheduled for the 1992 refueling outage does not support a chemical decontamination of the reactor vessel. However, if this activity is combined with inspections and modifications currently scheduled for the 1994 outage, then a chemical decontamination of the reactor vessel can be supported. This would result in reducing the overall dose to licensee personnel when compared to the same work performed over two outages without a chemical decontamination of the reactor vessel.

Another advantage to deferring the appendix J modifications to 1994 would be that the reactor vessel would only need to be drained once. The reactor vessel is currently scheduled to be drained during the 1994 outage to perform inspections and modifications. The appendix J modifications require the vessel to be drained. Deferring these modifications until 1994 will reduce the volume of radwaste generated since the additional draining of the vessel will be avoided.

By letter dated January 27, 1992, NMPC committed to perform a water test on the emergency condenser condensate return isolation valves' penetration and each shutdown cooling isolation valve during NMP1's 1992 refueling outage to ensure that leakage does not exceed 5 gpm. If the 5 gpm limit is exceeded, actions will be taken to reduce leakage to less than 5 gpm. These water tests will confirm that the subject valves have not degraded to a point that could result in an unacceptable increase in the risk to the public health and safety.

V.

On the basis of the above evaluation, the NRC staff concludes that the requested extension to the temporary, schedular exemption from the Type C testing requirements of appendix J to 10 CFR part 50 for emergency condenser condensate return line valves 39–03, 39–04, 39–05, and 39–06 and shutdown cooling isolation valves 38–01, 38–02, 38–12, and 38–13 is justified and should be granted. The technical basis supports a delay for the period from the 1992 refueling outage up to and including the next refueling outage for NMP1. The valves will then be included in the 0.6 La acceptance criteria for Type B and C tests at the conclusion of the 1994 refueling outage.

For these reasons, the Commission has determined that, pursuant to 10 CFR 50.12, the exemption requested by the licensee's letter dated December 12, 1991, as discussed above, is authorized by law, will not present an undue risk to the public health and safety, and is consistent with the common defense and security and that special circumstances are present as set forth in 10 CFR 50.12(a)(2)(ii).

Pursuant to 10 CFR 51.32, the Commission has determined that granting of this Exemption will have no significant impact on the environment (January 23, 1992, 57 FR 2791). A copy of the licensee's request for exemption and supporting documentation is available for public inspection at the Commission's Public Document Room, 2120 L Street, Washington, DC 20555 and at the Reference and Documents Department, Penfield Library, State University of New York, Oswego, New York 13126. Copies may be obtained upon written request to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Director, Division of Reactor Projects—I/II.

This exemption is effective upon issuance.

Dated at Rockville, Maryland, this 20th day of March 1992.

For the Nuclear Regulatory Commission.

Steven A. Varga,

Division of Reactor Projects—I/II, Office of Nuclear Reactor Regulation.

BILLING CODE 7590–01–M

PRESIDENT'S COMMISSION ON WHITE HOUSE FELLOWSHIPS

Annual Meeting of Commissioners

AGENCY: Presidents Commission on White House Fellowships.

ACTION: Notice of annual selection meeting of the President's Commission on White House Fellowships; closed to the public.

SUMMARY: Notice is hereby given that the annual selection meeting of the President's Commission on White House Fellowships will be held at Mt. Washington Conference Center, Baltimore, Maryland, May 28 through May 31, 1992, beginning at 5 p.m.

The annual selection meeting is part of the screening process of the White House Fellowships program. During this three-day meeting the applicants will be interviewed by members of the Presidential Commission. At the conclusion of this meeting, the Commissioners will recommend to the President those they propose be selected to serve as White House Fellows.

It has been determined by the Director of the Office of Personnel Management that because of the nature of the screening process, wherein personnel records and confidential character references must be used, which, if revealed to the public would constitute a clear invasion of the individual's privacy, the content of this meeting falls within the provisions of section 552b(c) of title 5 of the United States Code. Accordingly, this meeting is closed to the public.

DATES: The dates of the annual selection meeting of the President's Commission on White House Fellowships, which is closed to the public, are May 28–May 31, 1992.

FOR FURTHER INFORMATION CONTACT: Janet Kelliher, Administrative Officer, President's Commission on White House Fellowships, 712 Jackson Place, NW., Washington, DC 20503, (202) 395–4522.

Dated: March 17, 1992.

Elsa B. Thompson,

Director, President's Commission on White House Fellowships.

BILLING CODE 6325–01–M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–30505; File Nos. SR–DTC–91–22 and SR–DTC–91–23]

Self-Regulatory Organizations; The Depository Trust Company; Order Approving Proposed Rule Changes Relating to the Elimination of Most Urgent Withdrawals

March 20, 1992.

On November 14, 1991 and November 29, 1991, pursuant to section 19(b) of the Securities Exchange Act of 1934, ("Act"),[1] The Depository Trust Company ("DTC") filed with the Securities and Exchange Commission ("Commission") proposed rule changes (File Nos. SR–DTC–91–22 and SR–DTC–91–23) that would eliminate most urgent withdrawals. Notices of filing of the proposed rule changes were published in the **Federal Register** on December 16, 1991 and December 27, 1991, to solicit comments on the proposed rule changes from interested persons.[2] No comments were received. This order approves the proposals.

I. Description

DTC has filed two proposed rule changes relating to the elimination of urgent withdrawals. The first proposal (File No. SR–DTC–91–22) would eliminate most urgent withdrawals ("Certificate on Demand or COD") [3] for securities settling in DTC's Next Day Funds Settlement System ("NDFS").[4] DTC would continue to make available CODs in municipal bond issues that are eligible in the NDFS. The second proposal (File No. SR–DTC–91–23) would eliminate most CODs for corporate securities and municipal bond issues eligible in DTC's Same Day Funds Settlement System ("SDFS").[5] The proposed rule changes also would implement DTC's Rush Withdrawal Transfer ("RWT") service on a permanent basis.[6]

RWT essentially replaces the COD process whereby DTC would release certificates from its vault registered in DTC's nominee name and endorsed to the participant or in blank. The RWT service allows DTC to expedite the transfer of certificates to the participant's name or other name as the participant directs. Depending on the issue, its transfer agent, its registrar, and the agent's and registrar's locations, newly registered certificates for United States issues generally are available on a next-day basis.[7] Canadian issues generally are available in six days after DTC has received transfer instructions.

Participants may use DTC's Deposit and Withdrawal at Custodian ("DWAC") service in special situations.[8] Through DWAC, participants may make deposits and withdrawals directly with the transfer agent for issues that are evidenced by a balance certificate registered in the name of Cede and Co. and held by the transfer agent.[9] Upon receipt of a request to withdraw securities, DTC will make the necessary adjustments to the participant's account and to DTC's internal account to reflect the withdrawal and forward the participant's request to the appropriate DTC custodian.[10] If accepted, the

[1] 15 U.S.C. 78s(b) (1988).

[2] Securities Exchange Act Release Nos. 30043 (December 6, 1991), 56 FR 65295; and 30104 (December 19, 1991), 56 FR 67109.

[3] A "COD" is a method of withdrawing securities certificates from DTC in which the certificate is released directly from DTC's vault. To make such a withdrawal, the participant first must certify that it has enough securities in its account to fill the request. The participant then completes a withdrawal request describing the securities (*i.e.*, CUSIP, amount, etc.) DTC fills the withdrawal request by delivering to the participant the same day (for most daytime requests) or the next day (for nighttime requests) certificates registered in DTC's nominee name, CEDE & Co., and endorsed to the participant or in blank.

[4] Participants may use DTC's Fast Automated Securities Transfer ("FAST") program to obtain a securities certificate in a timeframe comparable to CODs. Certificates withdrawn through FAST are transferred from DTC's nominee name, Cede & Co., to the participant's name or any other name given to the transfer agent by the participant and are ready for pick-up at DTC or at the transfer agent usually the same day but no later than the next business day.

[5] Currently, DTC receives twenty or fewer requests daily for CODs in municipal bonds eligible in DTC's SDFS. DTC receives requests routinely for CODs in municipal bond issues eligible in DTC's NDFS. DTC will continue to make available CODs for NDFS issues until participant demand diminishes to a level that would allow DTC gradually to phase-out the CODs. See DTC's Important Notice B–9691–91 (November 4, 1991).

[6] DTC is currently operating RWT on a pilot basis. On July 21, 1989, the Commission granted temporary approval of a proposed rule change, substantially the same as File No. SR–DTC–91–22, to gradually eliminate the COD service. Simultaneously, DTC introduced its RWT service on a pilot basis. See Securities Exchange Act Release Nos. 26980 (July 5, 1989), 54 FR 28135; and 27052 (July 31, 1989), 54 FR 31600.

[7] Under DTC's regular WT procedures, newly registered certificates would be available, depending on the issue, its transfer agent and the agent's location, one or two weeks after DTC has received WT transfer instructions.

[8] Securities Exchange Act Release No. 30283 (January 23, 1992), 57 FR 3058.

[9] Only FAST-eligible issues and certain other limited certificate issues are eligible for DWAC. Securities Exchange Act Release No. 30283.

[10] The withdrawal of securities using DWAC is subject to approval by the DTC custodian. For a more detailed description of DWAC, see Securities Exchange Act Release No. 30283.

custodian will notify DTC and DTC will notify the participant that the appropriate entries have been made. If the issue is certificated, the participant may collect its certificates from the custodian.

After requesting a RWT, participants also may telephone DTC's Expediting Department when the transfer is particularly time sensitive. In such a case, after receiving a request for an expedited transfer or withdrawal, the Expediting Department will contact the transfer agent to make the agent aware of the time sensitive nature of the transfer. The Expediting Department will routinely follow-up to ensure transfers have occurred as requested. In extraordinary circumstances, DTC's Expediting Department will attempt to accommodate participants with a COD to the extent that the denominations of certificates requested by the participant are held in DTC's vault, when a participant is unable to obtain a certificate (*e.g.*, when there is no current transfer agent for that particular issue), or in cases when DTC's WT, FAST, or DWAC transfer services cannot accommodate a participant's urgent need for a certificate.

II. Discussion

The Commission believes that DTC's proposed rule changes are consistent with the Act and, in particular, with Sections 17A(b)(3) (A) and (F).[11] The discontinuance of the COD service furthers the Congressional goals in section 17A(e) of the Act by reducing the movement of securities certificates among brokers and dealers, and promotes the goal of prompt and efficient clearance and settlement of securities transactions. Congress stated in section 17A(a)(1) of the Act that inefficient procedures for the clearance and settlement of securities transactions impose unnecessary costs on investors and that prompt and accurate clearance and settlement are necessary for investor protection.[12]

The proposed rule changes will encourage greater use of more efficient transfer services like RWT, DWAC, and FAST. The one-step transfer process offered by RWT, DWAC, and FAST are more efficient than the two-step (or more) COD process in which DTC endorses the certificate to the participant and the participant (or the person that ultimately receives the certificate) must send it to the transfer agent for transfer. Thus the proposals reduce the movement of physical securities consistent with section 17A(e) and facilitate the prompt and accurate clearance and settlement of securities transactions consistent with section 17A(b)(3)(A).

The proposals reduce both the risk and the cost associated with processing and storing certificates. The processing of certificates involves certain risks including the risk that certificates will be stolen or lost in transit or on DTC's premises. While DTC employs security measures designed to help minimize the risk of theft and maintains insurance designed to cover the cost of lost or stolen certificates,[13] the elimination of CODs will substantially reduce DTC's risk by reducing the movement from DTC's vault of securities endorsed in blank. DTC also will reduce the cost of storing and counting large amounts of certificates. Instead of storing large amounts of round lot certificates,[14] DTC can substitute these smaller denominated certificates for "jumbo" certificates. The Commission believes that by reducing the risks and costs associated with transferring and storing securities certificates, the proposal will facilitate the safeguarding of securities and funds under DTC's control or in DTC's possession consistent with section 17A(b)(3)(F).

The proposal will enable DTC to improve tracking of dividend and interest payments and reduce the amount of lost dividends and interest to participants. DTC receives dividend and interest distributions from issuers for redistribution to participants.[15] The amount of distributions received from the issuer is based on the aggregate of all participants' positions in that CUSIP on record date. When DTC releases certificates in blank or endorsed to a participant, DTC reduces the participant's position and DTC's inventory of physical certificates. If a participant or a customer of a participant fails to submit the certificate to the transfer agent prior to record date, DTC will be listed on the transfer agent's records as the record owner and DTC's aggregate positions in that CUSIP as shown on the transfer agent's records will be greater than DTC's inventory. This results in DTC receiving more of the distribution than expected. The proposed rule changes will eliminate one of the causes of such imbalances. In addition, the proposed rule changes will reduce participants' costs of researching and reconciling imbalances created by the failure to transfer securities from DTC's nominee name to the new owner's name.[16]

In the order temporarily approving the elimination of most CODs in DTC's NDFS, the Commission expressed concern that the implementation of RWT not disrupt the prompt and accurate clearance and settlement of securities transactions.[17] The Commission required DTC to monitor the certificate turnaround performance of all transfer agents participating in the RWT pilot program; to compile transfer agent turnaround statistics; and to solicit comments from transfer agents participating in the RWT service and report that information to the Commission.[18] The Commission required DTC to evaluate the statistics and other information it collected concerning transfer agent performance throughout the pilot period and use the information to determine the overall performance of the RWT service and transfer agents' individual performance.[19]

DTC has operated the RWT service on a pilot basis for over two years. DTC has represented to the Commission that during that time, DTC is not aware that any participant or any customer of a participant has suffered a financial loss from a failure to receive a timely withdrawal.[20] DTC does not expect that any participant will experience any inconvenience as a result of the elimination of CODs.[21] DTC's statistics indicate that the volume of CODs in SDFS-eligible issues currently averages twenty or fewer instructions per day. DTC believes that this indicates that participants no longer rely on urgent withdrawals to obtain corporate SDFS certificates.[22] DTC expects that in most cases participants will be able to anticipate their withdrawal needs sufficiently in advance to rely on ordinary WTs for their certificates. Moreover, DTC through its Expediting Department will withdraw certificates from its vault to the extent it has the appropriate denominations in cases when DTC's RWT, FAST, or DWAC transfer services are unable to accommodate a participant's urgent need for a certificate or if transfer services for an issue have been discontinued.

III. Conclusion

On the basis of the foregoing, the Commission finds that the proposed rule changes are consistent with section 17A of the Act.

It is therefore ordered, Pursuant to section 19(b)(2) of the Act, that the proposed rule changes (File Nos. SR–DTC–91–22 and SR–DTC–91–23) be, and hereby are, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[23]

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010–01–M

[11] 15 U.S.C. 78q–1(b)(3) (A) and (F) (1988).

[12] 15 U.S.C. 78q–1(a)(1) (1988).

[13] Securities Exchange Act Release No. 12853 (April 20, 1976), 41 FR 17823.

[14] A "round lot" is a unit of trading or a multiple thereof. On the NYSE, stocks are traded in round lots of 100 shares for active stocks and 10 shares for inactive ones. Bonds are traded in units of $1,000. The New York Institute of Finance, How the Stock Market Works (1988).

[15] DTC is the principal securities depository having in excess of 600 participants and holding most securities of companies represented in the Dow Jones Industrial Average and companies listed on the New York Stock Exchange ("NYSE").

[16] Because the certificate may be endorsed several times after DTC releases the certificate from its vault, DTC may not be able to determine who should receive the dividend or interest distributions. DTC researches the overpayment, including contacting the participant who withdrew the certificate, and if necessary, the participant's transferee in cases where these parties are known to DTC, but DTC is unable to resolve all unclaimed dividends and interest. As of December 31, 1991, DTC held over $104 million in unclaimed dividends and interest. Unclaimed dividends and interest are transferred to the appropriate state when required by abandoned property laws. Telephone conversation between Patricia H. Trainor, Associate Counsel, DTC, and Sonia G. Burnett, Attorney, Division of Market Regulation ("Division"), Commission (March 12, 1992).

[17] Securities Exchange Act Release No. 26960 (July 5, 1989), 54 FR 28135.

[18] *Id.*

[19] *Id.* As of December 1991, DTC's statistics show that DTC received 69% of RWTs handled by New York transfer agents within twenty-four hours after being submitted for transfer. Of the remaining RWTs handled by New York transfer agents, 88% were received within forty-eight hours; 94% were received within 72 hours. Transfer agents outside of New York City turned around 25% of RWTs within 24 hours; 75% within forty-eight hours; 90% within 72 hours.

[20] Letter from Patricia H. Trainor, Associate Counsel, DTC, to Sonia G. Burnett, Attorney, Division, Commission (March 11, 1992).

[21] DTC's analysis of statistics for transfer agent RWT turnaround for the period from July 1989 until the filing of this proposed rule change indicate that the average daily number of RWTs dropped during the course of the pilot program. DTC believes that this indicates that participants are able to better anticipate their withdrawal needs.

[22] Many of the SDFS issues are now predominantly book-entry-only ("BEO") issues. BEO securities are certificated securities that are evidenced by one balance certificate registered in the name of DTC's nominee. Beneficial owners generally cannot obtain negotiable certificates evidencing their ownership interests in BEO issues thereby eliminating the need for any type of certificate withdrawal for these issues. Of the issue types currently eligible in the SDFS system, medium-term notes ("MTN"), commercial paper, and auction-rate preferreds are solely BEO, municipal notes are almost entirely BEO, and many of the asset-backed securities ("ABS") and municipal variable-rate demand option ("VRDO") issues are BEO. This has significantly contributed to the sharp drop in SDFS withdrawals. In the NDFS, few withdrawals are needed because rules of the NYSE, the National Association of Securities Dealers and other self-regulatory organizations now require, in general, that all deliveries of securities made against full payment in depository-eligible securities be settled by book-entry.

[Rel. No. IC–18620; 812–7059]

Prudential-Bache IncomeVertible Plus Fund, Inc., et al.; Application

March 20, 1992.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of application for exemption under the Investment Company Act of 1940 ("Act").

APPLICANTS: Prudential-Bache IncomeVertible Plus Fund, Inc., (d/b/a Prudential IncomeVertible Plus Fund), Prudential California Municipal Fund, Prudential-Bache Equity Fund, Inc., Prudential Equity Income Fund, Prudential Flexifund, Prudential Global Fund, Inc., Prudential-Bache Global Genesis Fund, Inc., Prudential-Bache Global Natural Resources Fund, Inc., Prudential-Bache GNMA Fund, Inc., Prudential-Bache Government Plus Fund, Inc., Prudential Government Securities Trust, Prudential Growth Fund, Inc., Prudential-Bache Growth Opportunity Fund, Inc., Prudential-Bache High Yield Fund, Inc., Prudential Intermediate Global Income Fund, Inc., Prudential Institutional Liquidity Portfolio, Inc., Prudential-Bache MoneyMart Assets, Inc., Prudential Multi-Sector Fund, Inc., Prudential Municipal Bond Fund, Prudential Municipal Series Fund, Prudential-Bache National Municipals Fund, Inc., Prudential-Bache Option Growth Fund, Inc. (d/b/a Prudential Total Return Fund), Prudential-Bache Short Term Global Income Fund, Inc., Prudential-Bache Special Money Market Fund, Inc., Prudential-Bache Strategic Income Fund, Inc., Prudential-Bache Structured Maturity Fund, Inc., Prudential-Bache Tax-Free Money Fund, Inc., Prudential U.S. Government Fund, Prudential-Bache Utility Fund, Inc., Command Government Fund, Command Money Fund, Command Tax-Free Money Fund, Nicholas-Applegate Fund, Inc. (collectively, the "Funds"), Prudential Securities Incorporated ("PSI"), Prudential Mutual Fund Management, Inc. ("PMF"), and Prudential Mutual Fund Distributors, Inc. ("PMFD").

RELEVANT ACT SECTIONS: Order requested under section 6(c) exempting applicants from sections 13(a)(2), 18(a), 18(c), 18(f)(1), 22(f), 22(g), and 23(a), and pursuant to section 17(d) and rule 17d–1 thereunder permitting certain joint transactions.

SUMMARY OF APPLICATIONS: Applicants seek an order under sections 6(c) and 17(d) of the Act and rule 17d–1 thereunder that would amend existing orders that permitted certain open-end investment companies to offer their directors who are not interested persons within the meaning of section 2(a)(19) of the Act ("Non-Interested Directors") a deferred compensation plan. The requested order would extend the relief to additional open-end investment companies ("Mutual Funds") and certain closed-end investment companies ("Closed-End Funds"), provide participating Non-Interested Directors of the Mutual Funds with a choice as to the rate of return earned on their deferred fees and, in certain instances, allow each Mutual Fund to purchase its own shares in order to fund the deferred compensation plan.

FILING DATES: The application was filed on June 30, 1988 and amended on April 20, 1989 and January 31, 1992.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the SEC orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving applicants with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on April 14, 1992, and should be accompanied by proof of service on the applicants, in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by writing to the SEC's Secretary.

ADDRESSES: Secretary, SEC, 450 5th Street, NW., Washington, DC 20549. Applicants, One Seaport Plaza, New York, New York 10292.

FOR FURTHER INFORMATION CONTACT: Felice R. Foundos, Staff Attorney, at (202) 272–2190 or Barry D. Miller, Branch Chief, at (202) 272–3018 (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee at the SEC's Public Reference Branch.

Applicants' Representations

1. PMF acts as manager or administrator and PMFD or PSI acts as distributor for the Prudential Funds (as defined below). PMF is registered as an investment adviser under the Investment Advisers Act (the "Advisers Act"). PMFD is a registered broker-dealer under the Securities Exchange Act of 1934 ("Exchange Act"). PSI is registered as an investment adviser under the Advisers Act and as a broker-dealer under the Exchange Act.

2. Prudential-Bache IncomeVertible Plus Fund, Inc., an open-end investment company, and any other open-end investment company for which PSI serves as administrator, manager, distributor or principal underwriter (the "Prudential Mutual Funds") previously received an exemptive order that was later amended permitting applicants to adopt a deferred compensation plan if authorized by their respective board of directors. (See Investment Company Act Release Nos. 15178 (June 27, 1986) (notice) and 15224 (July 24, 1986) (order); 15543 (Jan. 16, 1987) (notice) and 15573 (Feb. 12, 1987) (amended order) (the "Prior Orders")).

3. Currently, each Prudential Mutual Fund Pays their Non-Interested Directors fees, plus reimbursement for travel and incidental expenses ("Director's Fees"). Under the Prior Orders, each Non-Interested Director of a Prudential Mutual Fund may elect to defer receipt of all or a portion of the Director's Fees payable for services performed after the date of the election. The amounts deferred would accrue a return at a daily rate equivalent to the rate for 90-day U.S. Treasury bills determined each calendar quarter on a prospective basis (the "T-Bill Rate"). In addition, amounts to be paid by a fund pursuant to the deferred fee arrangement may not be funded by the purchase of shares in any Prudential Mutual Fund nor by the establishment of any special fund or separate account.

4. Applicants request that the Prior Orders be amended to apply to the Funds, to any Mutual Fund or Closed-End Fund organized presently or in the future for which PSI, PMF, PMFD, or any successors thereof, serve as principal underwriter, manager, administrator or investment adviser (collectively, with the Funds, the "Prudential Funds") and whose board of directors authorizes it to adopt a deferred compensation agreement substantially similar to the agreement attached to the application (the "Deferred Compensation Plan"), and to any Non-Interested Director of a Prudential Fund.

5. Applicants also seek to modify the Prior Orders to provide Non-Interested Directors of the Mutual Funds with the choice of earning a rate of return on their deferred fees equal to either (i) the T-Bill Rate or (ii) the rate of return earned on the shares of the Mutual Fund on whose board the director serves (the "Fund Rate"). The Fund Rate is equal to the rate of return (positive or negative) earned on shares of the relevant Mutual Fund had the director's deferred fees been invested in such shares. Accordingly, when the Fund Rate is in effect, the income, realized gain or loss on investments or unrealized appreciation or depreciation of a Mutual Fund attributed to a director through the Deferred Compensation Plan would be identical in amount to the income, gain, loss, appreciation or depreciation which would be received by a stockholder of the respective Mutual Fund.

6. Finally, applicants seek to amend the Prior Orders to permit each Mutual Fund to purchase its own shares in order to fund any return earned on deferred fees where the Fund Rate is chosen. The amount of deferred Director's Fees invested in a Prudential Fund will not exceed the amount of Director's Fees earned by the director from that fund and may be invested solely in the fund on whose board the director serves. Any investment of deferred Director's Fees in a Prudential Fund shall be made in accordance with section 12(d)(1) of the Act. In addition, any shares acquired to fund payments on deferred Director's Fees (not including reinvested dividends and distributions) by a Mutual Fund having two classes of shares will be divided evenly between the two classes of shares. Non-Interested Directors of the Closed-End Funds will accrue a return on their deferred fees at the T-Bill Rate, and Closed-End Funds will not use the deferred fees to acquire their shares to fund the return earned on such fees.

Applicants' Legal Analysis

1. Applicants assert that extending the relief to Prudential Funds and to their Non-Interested Directors will benefit applicants and their shareholders. The deferral of Direator's Fees will enhance the funds' ability to attract and retain directors of high caliber. The Deferred Compensation Plan permits the Non-Interested Directors to defer receipt of their compensation enabling them to defer payment of their income taxes on these fees or to accomplish other income management objectives.

2. Applicants content that the Deferred Compensation Plan possesses none of the characteristics of senior securities that led Congress to enact sections 13(a)(2), 18(a), 18(c), and 18(f)(1). All liabilities created by the Deferred Compensation Plan would continue to be offset by equal amounts of fund assets that would not otherwise exist if the fees were currently paid. The deferral of Director's Fees would not induce speculation by a fund. Participation in the Deferred Compensation Plan by the Prudential Funds and their Non-Interested directors would not affect the control of any Fund, confuse its stockholders, complicate the valuation of its shares, convey a false sense of safety, or be inconsistent with the theory of mutuality of risk.

3. Section 22(f) of the Act prevents restrictions on transferability or negotiability either not disclosed to the holder of the security or prohibited by Commission regulation. Since the proposed amendments to the Prior Orders will not affect the restrictions on transferability contained in the Deferred Compensation Plan, those restrictions continue to be consistent with the standards of section 6(c) of the Act.

4. Sections 22(g) and 23(a) prohibit an investment company from issuing any of its securities for services or for property other than cash or securities. Congress enacted these provisions to address concerns of potential dilution of equity and voting power resulting when securities are issued for assets that are not readily valued. Applicants assert that there will be no dilution of fund assets since the value of deferred Director's Fees are readily ascertainable. Applicants argue that interests in the plan may be viewed as issued in return for applicants' right to pay the fees on a deferred basis rather than in return for services. Finally, applicants contend that the total Director's Fees paid to each director will be *de minimis* relative to the total assets of each Prudential Fund. Consequently, the deferral and payment of Director's Fees will have a negligible impact on each fund's assets, liabilities, net assets, net income per share and shareholder's equity.

5. Section 17(d) and rule 17d–1 generally prohibit any joint enterprise, other joint arrangement, or profit-sharing plan between an affiliate of a registered investment company and the registered investment company unless such arrangement has been approved by the Commission. Section 17(d) and rule 17d–1 are designed to limit or prevent abuses caused by conflicts of interest between registered investment companies and their affiliates including directors. Applicants argue that given the interest of the directors in the financial health of the funds, participating in the Deferred Compensation Plan and receiving the T-Bill Rate on their deferred fees will not create conflicts of interest between the directors and the Prudential Funds and their shareholders.

6. In addition, the Non-Interested Director will not have a claim on the profits of any participating Prudential Fund regardless of any return paid on deferred Director's Fees. Amounts accrued under the Deferred Compensation Plan will be general unsecured obligations, payable solely from the respective Prudential Fund's general assets and property, and the director will be a general unsecured creditor of such Prudential Fund. Applicants believe, therefore, that any return earned on the deferred Director's Fees and the purchase of its own shares by a Mutual Fund under the terms specified above would not be a joint transaction with a director on terms different from or less advantageous for the Mutual Fund than for the director within the meaning of section 17(d) and rule 17d–1.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010-01-M

[Release No. 35–25495]

Filings Under the Public Utility Holding Company Act of 1935 ("Act")

March 20, 1992.

Notice is hereby given that the following filing(s) has/have been made with the Commission pursuant to provisions of the Act and rules promulgated thereunder. All interested persons are referred to the application(s) and/or declaration(s) for complete statements of the proposed transaction(s) summarized below. The application(s) and/or declaration(s) and any amendments thereto is/are available for public inspection through the Commission's Office of Public Reference.

Interested persons wishing to comment or request a hearing on the application(s) and/or declaration(s) should submit their views in writing by April 13, 1992 to the Secretary, Securities and Exchange Commission, Washington, DC 20549, and serve a copy on the relevant applicant(s) and/or declarant(s) at the address(es) specified below. Proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. Any request for hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in the matter. After said date, the application(s) and/or declaration(s), as filed or as amended, may be granted and/or permitted to become effective.

Mississippi Power Company 70–7941

Mississippi Power Company ("Mississippi"), 2992 West Beach, Gulfport, Mississippi 39501, a wholly owned electric public utility subsidiary company of The Southern Company, a registered holding company, has filed an application-declaration under sections 6(a), 7, 9(a), 10, 12(c) and 12(d) of the Act and Rules 42, 44, 50 and 50(a)(5) thereunder.

Mississippi proposes to issue a non-negotiable promissory note ("Note"), at any time on or before June 30, 1994, under an exception from the competitive bidding requirements of Rule 50 under subsection (a)(5), in connection with the issuance and sale by public instrumentalities of one or more series of pollution control revenue bonds ("Revenue Bonds") in an aggregate principal amount of up to $25 million.

The Revenue Bonds will be issued for the financing or refinancing of the costs of certain air and water pollution control facilities and sewage and solid waste disposal facilities at one or more of Mississippi's electric generating plants or other facilities located in various counties in the State of Mississippi. It is proposed that each such county or its appropriate instrumentality ("County") will issue its Revenue Bonds to finance or refinance the costs of the acquisition, construction, installation and equipping of said facilities at the plant or other facility located in its county ("Project").

The actual amount of Revenue Bonds to be issued by each County has not yet been determined, such amount will be based upon the cost of refunding outstanding bonds or the cost of the Project located in its jurisdiction.

It is proposed that the Revenue Bonds will mature from 1 to 40 years from the first day of the month in which they are initially issued and may, if it is deemed advisable for purposes of the marketability of the Revenue Bonds, be entitled to the benefit of a mandatory redemption sinking fund calculated to retire a portion of the aggregate principal amount of the Revenue Bonds prior to maturity.

Mississippi proposes to enter into a Loan or Installment Sale Agreement with the County ("Agreement") pursuant to each issue of the Revenue Bonds, and Mississippi may issue a Note therefor, or the County will undertake to sell the related Project to Mississippi. The proceeds from the sale of the Revenue Bonds will be deposited with a trustee ("Trustee") under an indenture to be entered into between the County and such Trustee ("Trust Indenture"), pursuant to which such Revenue Bonds are to be issued and secured, and will be applied by Mississippi to payment of the Cost of Construction (as defined in the Agreement) of the Project or to refund outstanding pollution control revenue obligations.

The Trust Indenture and the Agreement may give the holders of the Revenue Bonds the right, during such time as the Revenue Bonds bear interest at a fluctuating rate, to require Mississippi to purchase the Revenue Bonds from time-to-time, and arrangements may be made for the remarketing of any such Revenue Bonds through a remarketing agent. Mississippi also may be required to purchase the Revenue Bonds, or the Revenue Bonds may be subject to mandatory redemption, at any time if the interest thereon is determined to be subject to federal income tax. Also in the event of taxability, interest on the Revenue Bonds may be effectively converted to a higher variable or fixed rate, and Mississippi also may be required to indemnify the bondholders against any other additions to interest, penalties and additions to tax.

In order to obtain the benefit of ratings for the Revenue Bonds equivalent to the rating of Mississippi's first mortgage bonds outstanding under the indenture dated as of September 1, 1941 between Mississippi and Morgan Guaranty Trust Company of New York, as Trustee, as supplemented and amended ("Mortgage"), Mississippi may determine to secure its obligations under the Note and/or Agreement by delivering to the Trustee, to be held as collateral, a series of its first mortgage bonds ("Collateral Bonds") issued under an exception from the competitive bidding requirements of Rule 50 under subsection (a)(5) thereunder. The aggregate principal amount of the Collateral Bonds would be equal to either: (1) The principal amount of the Revenue Bonds; or (2) the sum of such principal amount of the Revenue Bonds plus interest payments thereon for a specified period.

As a further alternative to, or in conjunction with, securing its obligations through the issuance of the Collateral Bonds, Mississippi may: (1) Cause an irrevocable letter of credit ("Letter of Credit") to be delivered to the Trustee; and/or (2) cause an insurance

company to issue a policy ("Policy") guaranteeing the payment of the Revenue Bonds. In the event that the either the Letter of Credit is delivered to the Trustee or the Policy is issued, Mississippi may also convey to the County a subordinated security interest in the Project or other property of Mississippi as further security for Mississippi's obligations under the Agreement and/or the Note. However, in the event that Mississippi is unable or determines not to issue the Collateral Bonds, deliver the Letter of Credit to the Trustee or cause the Policy to be issued, it proposes to guarantee the payment of the principal of, premium, if any, and interest of the Revenue Bonds.

Mississippi also proposes to issue and sell, at any time on or before June 30, 1994: (1) One or more series of its (a) first mortgage bonds ("Bonds"), having a maturity of not less than five nor more than 40 years, in an aggregate principal amount of up to $100 million and (b) preferred stock ("Preferred") in an aggregate par or stated value of up to $50 million. The Bonds will be issued pursuant to the Mortgage, as to be further supplemented, and sold for the best price obtainable, but for a price to Mississippi of not less than 98% nor more than 101¾% of the principal amount thereof, plus accrued interest (if any), which may be an adjustable interest rate determined on a periodic basis, or a fixed interest rate. The Bonds may be subject to a mandatory or optional cash sinking fund. Mississippi may enhance the marketability of the Bonds by purchasing an insurance policy to guarantee the payment when due of the Bonds.

Mississippi seeks authority to deviate from the redemption and dividend limitation provisions contained in the Commission's Statement of Policy Regarding First Mortgage Bonds and Preferred Stock (HCAR Nos. 13105 and 13106, February 16, 1956, as amended by HCAR Nos. 16369 and 16758, May 8, 1969 and June 22, 1970, respectively) with respect to the issuance of the Bonds and Preferred. Mississippi proposes to issue and sell the Bonds and Preferred under an exception from the competitive bidding requirements of Rule 50 under subsection (a)(5) thereunder, should circumstances develop which make such exception in the best interest of Mississippi, its investors and consumers. Otherwise, Mississippi proposes to issue and sell the Bonds and Preferred under the competitive bidding procedures of Rule 50 of the Act as modified by the Commission's Statement of Policy dated September 2, 1982 (HCAR No. 22623).

Mississippi may use the proceeds from the sale of the Bonds and the Preferred to redeem or otherwise retire its outstanding first mortgage bonds, pollution control bonds and/or preferred stock, or along with other funds, to pay a portion of its cash requirements to carry on its electric utility business.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010-01-M

[Investment Company Act Rel. No. 18621; 811-763]

Variable Stock Fund, Inc.; Application

March 20, 1992.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice or application for deregistration under the Investment Company Act of 1940 (the "Act").

APPLICANT: Variable Stock Fund, Inc.

RELEVANT ACT SECTION: Section 8(f).

SUMMARY OF APPLICATION: Applicant seeks an Order declaring that it has ceased to be an investment company under the Act.

FILING DATE: The application was filed on February 24, 1992.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the SEC orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving Applicant with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on April 14, 1992, and should be accompanied by proof of service on Applicant, in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by writing to the SEC's Secretary.

ADDRESSES: Secretary, SEC, 450 5th Street, NW., Washington, DC 20549. Applicant, 361 Whitney Avenue, Holyoke, Massachusetts 01040.

FOR FURTHER INFORMATION CONTACT: C. David Messman, Senior Attorney, at (202) 272-2813 or Barry D. Miller, Branch Chief, at (202) 272-3018 (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee at the SEC's Public Reference Branch.

Applicant's Representations

1. Applicant is an open-end diversified management investment company. On or about March 19, 1957, Applicant registered under the Act and filed a registration statement under the Securities Act of 1933. The registration statement became effective on or about April 15, 1957.

2. On October 28, 1991, Applicant's board of directors approved an Agreement and Plan of Reorganization (the "Plan") between Applicant and the T. Rowe Price Growth Stock Fund, Inc. (the "Growth Fund") pursuant to which the Growth Fund would acquire substantially all of the assets of Applicant in exchange for Growth Fund common stock. The combined proxy statement and prospectus was mailed to Applicant's shareholders on December 20, 1991. The Plan was approved at a special meeting of Applicant's shareholders held on January 22, 1992. Shareholders of Applicant received that number of full and fractional shares of the Growth Fund having an aggregate net asset value equal to the net asset value of the shareholders' shares of Applicant as of the close of business on January 24, 1992, the business day immediately preceding the closing of the reorganization.

3. As of January 24, 1992, the business day immediately preceding the effective date of the reorganization, Applicant had outstanding 966,947 shares, with a net asset value of $8.42 per share, for a total net asset value of $8,132,738. On January 27, 1992 Applicant sold its portfolio securities and substantially all of its other assets to the Growth Fund, less a reserve of approximately $1,424 in cash for the purpose of satisfying outstanding liabilities of Applicant. The shares of the Growth Fund received by Applicant in exchange for its assets were then distributed to its shareholders *pro rata* in accordance with their respective interests in Applicant. No brokerage fees were paid in connection with the reorganization.

4. Applicant and the Growth Fund each paid their own expenses associated with the reorganization. As of the date of the application, such expenses of Applicant totaled approximately $55,000, consisting principally of attorneys and auditors fees and proxy printing and solicitation expenses.

5. Articles of Transfer were filed and Articles of Dissolution will be filed on behalf of Applicant with the Maryland State Department of Assessments and Taxation to effect the dissolution of Applicant as a Maryland Corporation.

6. As of the date of the application, Applicant had no shareholders, assets, or liabilities. Applicant is not a party to any litigation or administrative proceeding. Applicant is not presently engaged in, nor does it propose to engage in, any business activities other than those necessary for the winding up of its affairs.

For the SEC, by the Division of Investment Management, under delegated authority.

Margaret H. McFarland,

Deputy Secretary.

Viking Money Market Fund, Inc.; Application

March 20, 1992.

AGENCY: Securities and Exchange Commission ("SEC" or "Commission").

ACTION: Notice of application for deregistration under the Investment Company Act of 1940 (the "Act").

APPLICANT: Viking Money Market Fund, Inc.

RELEVANT ACT SECTION: Section 8(f).

SUMMARY OF APPLICATION: Applicant seeks an order declaring that it has ceased to be an investment company.

FILING DATE: The application was filed on December 10, 1991 and amended on February 11, 1992, and March 6, 1992.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the SEC orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving applicant with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on April 14, 1992, and should be accompanied by proof of service on applicant, in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons may request notification of a hearing by writing to the SEC's Secretary.

ADDRESSES: Secretary, SEC, 450 5th Street, NW., Washington, DC 20549. Applicant, 200 Gibraltar Road, Horsham, PA 19044.

FOR FURTHER INFORMATION CONTACT: Elaine M. Boggs, Staff Attorney, at (202) 272-3026, or Nancy M. Rappa, Branch Chief, at (202) 272-3030 (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee at the SEC's Public Reference Branch.

Applicant's Representations

1. Applicant is an open-end diversified investment company that was organized under the laws of Maryland. Applicant registered under the Act and filed a registration statement pursuant to section 8(b) of the Act on June 22, 1984. A registration statement under the Securities Act of 1933 was filed on June 22, 1984. The registration statement was declared effective and the initial public offering commenced on October 22, 1984.

2. At a meeting held on December 18, 1990, applicant's board of directors adopted resolutions declaring advisable a proposed sale of substantially all of applicant's assets to CoreFunds, Inc. ("CoreFunds"). On or about April 5, 1991, applicant mailed proxy materials to its shareholders, who approved the proposal at a special shareholders' meeting held on May 15, 1991.

3. As of November 20, 1990, there were 190,100,860 shares of applicant's Fiduciary Portfolio outstanding, representing an aggregate net asset value of $190,100,860, and a per share value of $1.00. On December 3, 1990, CoreStates Bank (the "Bank"), the sole record shareholder of applicant's Fiduciary Portfolio, redeemed all outstanding shares of the Fiduciary Portfolio and in a separate transaction, purchased shares of CoreFunds Fiduciary Reserve. The Fiduciary Portfolio shares were sold by applicant's distributor, The Fairfield Group, Inc., only to affiliated and subsidiary banks of CoreStates Financial Corp. and other depository institutions and institutional investors acting on behalf of certain customers for which they exercised investment discretion. The funds invested by the Bank in the Fiduciary Portfolio consisted of assets held by the Bank's trust department for customers for whom the Bank acted as trustee, executor, administrator, guardian of estates, investment adviser or in any other fiduciary capacity which conferred investment discretion upon the Bank.

4. On May 30, 1991, applicant transferred all of its assets and liabilities of its Prime Obligations Portfolio to CoreFunds in exchange for shares of class A common stock of CoreFunds.[1] Immediately thereafter, applicant distributed the shares of class A common stock *pro rata* to its shareholders.

5. The expenses incurred in connection with the sale of applicant's assets were approximately $22,000 (legal—$20,000; accounting—$2,000), all of which were assumed by CoreFunds.

6. There are no securityholders to whom distributions in complete liquidation of their interests have not been made. Applicant has no debts or other liabilities that remain outstanding. Applicant is not a party to any litigation or administrative proceeding.

7. Applicant has filed Articles of Dissolution with the Maryland Secretary of State.

8. Applicant is not now engaged, nor does it propose to engage, in any business activities other than those necessary for the winding up of its affairs.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010-01-M

TENNESSEE VALLEY AUTHORITY

Acid Rain Program Designated Representative

AGENCY: Tennessee Valley Authority.

ACTION: Notice.

SUMMARY: TVA is announcing the selection of a "designated representative" and "alternate designated representative" to serve as the agency's point of contact with the U.S. Environmental Protection Agency and States on acid rain program matters.

FOR FURTHER INFORMATION CONTACT: Jerry L. Golden, Manager, Clean Air Program, 2C Missionary Ridge Place, 1101 Market Street, Chattanooga, Tennessee 37402-2801; (615) 751-6779.

SUPPLEMENTARY INFORMATION: Under title IV of the Clean Air Act Amendments, sec. 402, Public Law 101-549, 104 Stat. 2588, affected utility units are authorized to act through a "designated representative" (DR) and "alternate designated representative" (ADR) in the conduct of SO_2 allowance and acid rain permitting activities. On February 19, 1992, at a public meeting, the TVA Board of Directors selected TVA's Senior Vice President, Fossil and Hydro Power, J.W. Dickey, to be TVA's

[1] Accounting to CoreFunds Cash Reserve prospectus dated October 21, 1991, class A common stock represents an interest in CoreFunds Cash Reserve portfolio.

DR for its affected utility units, and TVA's Vice President, Fossil and Hydro Projects, W.M. Bivens, to be TVA's ADR who will act when the DR is unavailable. TVA's affected utility units are those at its Allen, Bull Run, Cumberland, Gallatin, John Sevier, Johnsonville, Kingston, and Watts Bar fossil plants in Tennessee; Colbert and widows Creek fossil plants in Alabama; and Paradise and Shawnee fossil plants in Kentucky.

Dated: March 6, 1992.

Edward S. Christenbury,

General Counsel and Secretary.

DEPARTMENT OF TRANSPORTATION

Coast Guard

[CGD8 92-04]

Lower Mississippi River Waterway Safety Advisory Committee Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463; 5 U.S.C. app. II) notice is hereby given of a meeting of the Lower Mississippi River Waterway Safety Advisory Committee. The meeting will be held on Tuesday, April 21, 1992, in the 29th floor Boardroom of the World Trade Center, 2 Canal Street, New Orleans, Louisiana at 9 a.m. The agenda for the meeting consists of the following items:

1. Call to order.
2. Minutes of the January 14, 1992 meeting.
3. Old Business.
   a. Fishing Vessels Crossing Southwest Pass.
   b. Tows Changing Configuration in Southwest Pass.
4. New Business.
   a. Discussion of deletion of § 164.15 from the Code of Federal Regulations.
   b. Inconsistencies of the aids to navigation in the Mississippi River Gulf Outlet.
   c. Army Corps of Engineers proposal to eliminate the federal dredges and employ commercial dredges only.
5. Report from the VTS Subcommittee.
6. Adjournment.

The purpose of this Advisory Committee is to provide recommendations and guidance to the Commander, Eighth Coast Guard District on navigation safety matters affecting this waterway.

All meetings are open to the public. Members of the public may present written or oral statements at the meetings.

Additional information may be obtained from Commander E. N. Funk, USCG, Executive Secretary, Lower Mississippi River Waterway Safety Advisory Committee, c/o Commander, Eighth Coast Guard District (oan), room 1209, Hale Boggs Federal Building, 501 Magazine Street, New Orleans, LA 70130-3396, telephone number (504) 589-3074.

Dated: March 13, 1992.

RADM J.M. Loy,

Commander, 8th Coast Guard District.

BILLING CODE 4910-13-M

Intent to Rule on Application to Impose and Use the Revenue From a Passenger Facility Charge (PFC) at Palm Springs Regional Airport, Palm Springs, CA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of intent to rule on application.

SUMMARY: The FAA proposes to rule and invites public comment on the application to impose and use the revenue from a PFC at Palm Springs Regional Airport under the provisions of the Aviation Safety and Capacity Expansion Act of 1990 (Title IX of the Omnibus Budget Reconciliation Act of 1990) (Pub. L. 101-508) and part 158 of the Federal Aviation Regulations (14 CFR part 158).

DATES: Comments must be received on or before April 27, 1992.

ADDRESSES: Comments on this application may be mailed or delivered in triplicate to the FAA at the following address: Federal Aviation Administration, Airports Division, Standards Section, AWP-621, P.O. Box 92007, WPC, Los Angeles, California 90009.

In addition, one copy of any comments submitted to the FAA must be mailed or delivered to Allen F. Smoot, Director of Aviation of the City of Palm Springs at the following address: City of Palm Springs, 3200 E. Tahquitz Canyon, Palm Springs, California 92262.

Air carriers and foreign air carriers may submit copies of written comments previously provided to the City of Palm Springs under § 158.23 of part 158.

FOR FURTHER INFORMATION CONTACT: John P. Milligan, Supervisor, Standards Section, AWP-621, Federal Aviation Administration, P.O. Box 92007, WPC, Los Angeles, California 90009, Telephone: (310) 297-1029.

The application may be reviewed in person at this same location.

SUPPLEMENTARY INFORMATION: The FAA proposes to rule and invites public comment on the application to impose and use the revenue from a PFC at Palm Springs Regional Airport under the provisions of the Aviation Safety and Capacity Expansion Act of 1990 (Title IX of the Omnibus Budget Reconciliation Act of 1990) (Pub. L. 101-508) and part 158 of the Federal Aviation Regulations (14 CFR part 158).

On March 16, 1992, the FAA determined that the application to impose and use the revenue from a PFC submitted by the city of Palm Springs was substantially complete within the requirements of section 158.25 of Part 158. The FAA will approve or disapprove the approve the application, in whole or in part, no later than June 25, 1992.

The following is a brief overview of the application. Level of the proposed PFC: $3.00.

Proposed charge effective date: October 1, 1992.

Proposed charge expiration date: October 30, 2022.

Total estimated PFC revenue: $51.4 million.

Brief description of proposed project(s): Airport Terminal Expansion, Phase IA (approx. 43,158 sq. ft.) that includes expand baggage claim area, install temporary hold room area for passenger boarding gates, construct air-conditioned hold room area for commuter and charter operations, construct centralized control center for airport operations and access control system, remodel existing areas of terminal, remove asbestos and install seismic reinforcing in selected portions of existing terminal, install new passenger screening security check point, construct air carrier apron for three (3) additional parking positions and commuter aircraft apron for four (4) additional parking positions, construct an additional six (6) passenger boarding gates; Airport Terminal Expansion Phase IIA (approx. 63,121 sq. ft.) that includes install air-conditioned two-level concourse and hold rooms, construct second level boarding areas, install eight (8) boarding bridges, construct a central utilities plant, construct open-air patio for holding additional passengers during good weather. Class or classes of air carriers which the public agency has requested not be required to collect PFCs: Air Taxi operations under Part 135.

Any person may inspect the application in person at the FAA office listed above under **"FOR FURTHER INFORMATION CONTACT"** and at the FAA regional Airports office located at: Federal Aviation Administration, Western-Pacific Regional Headquarters, Airports Division, Room 3E23, 15000 Aviation Blvd., Hawthorne, California 90261.

In addition, any person may, upon request, inspect the application, notice and other documents germane to the application in person at the City of Palm Springs.

Issued in Hawthorne, California on March 16, 1992.

Herman C. Bliss,

Manager, Airports Division, Western-Pacific Region.

BILLING CODE 4910-13-M

Federal Highway Administration

Intermodal Surface Transportation Efficiency Act of 1991; Electronic Access to Informal Implementation Guidance Via the FHWA Electronic Bulletin Board System

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice.

SUMMARY: To assist in the implementation of the Intermodal Surface Transportation Efficiency Act of 1991 (ISTEA) (Pub. L. 102-240, 105 Stat. 1914), the FHWA is making informal guidance on the ISTEA available on the FWHA Electronic Bulletin Board System (FEBBS). The information provided in the ISTEA conference on FEBBS shall be considered only as preliminary guidance on the implementation of the ISTEA and is subject to change. Members of the public may now dial into the FEBBS ISTEA information conference using a microcomputer and modem and view informal Questions and Answers on how the agency intends to implement the provisions of the ISTEA. This read-only facility is especially intended for use by the State and local transportation agencies. Specific questions on how the ISTEA will be implemented should be referred to the local FHWA division and regional offices. The telephone number for FEBBS is Area Code 202-366-3764. While the system supports 300, 1200 and 2400 baud line speeds, and a variety of terminal types and protocols, setting the modem for 2400 baud, 8 data bits, full duplex and no parity will give optimal performance. Once a connection has been established and the <R<egistration item completed, callers should select either <Q<uestions and Answers on ISTEA, or <I<nformation for more detailed help.

FOR TECHNICAL ASSISTANCE CONTACT: FHWA Computer Help Desk, HMS-40, room 4401, 400 Seventh Street, SW., Washington, DC 20590, (202) 366-1120.

FOR FURTHER INFORMATION CONTACT: Mr. Lawrence I. Neff, HMS-40, room 4331, 400 Seventh Street, SW., Washington, DC 20590, (202) 366-9013. Office hours are from 7:45 a.m. to 4:15 p.m., e.t., Monday through Friday, except for legal Federal holidays.

(23 U.S.C. 315; 49 CFR 1.48)

Issued on: March 20, 1992.

T.D. Larson,

Administrator.

BILLING CODE 4910-22-M

Federal Transit Administration

Environmental Impact Statement on East-West Corridor Transit Improvements in Milwaukee, WI

AGENCY: Federal Transit Administration, DOT.

ACTION: Notice of intent to prepare an environmental impact statement.

SUMMARY: The Federal Transit Administration (FTA) and the Wisconsin Department of Transportation (WisDOT) are undertaking the preparation of an Environmental Impact Statement (EIS) in accordance with the National Environmental Policy Act (NEPA), for transit improvements in the East-West Corridor of Milwaukee and Waukesha counties. The local agency will ensure that the EIS also satisfies the requirements of the Wisconsin Environmental Policy Act (WEPA). In addition to the fixed guideway transit improvement alternatives, the EIS will evaluate the No-Action/Transportation System Management (TSM) alternative and any new alternatives generated through the scoping process. Scoping will be accomplished through correspondence with interested persons, organization, and federal, state and local agencies and through five public meetings.

DATES: *Comment due date:* Written comments on the scope of alternatives and impacts to be considered should be sent to WisDOT by April 20, 1992. *Scoping meetings:* Public scoping meetings will be held on Thursday, April 9, 1992 at 6 p.m. at the Zoofari Conference Center; Saturday, April 11, 1992 at 1 p.m. at Washington Park Senior Center; Tuesday, April 14, 1992 at 6 p.m. at University of Milwaukee Student Union; Wednesday, April 15, 1992 at 6 p.m. at Brookfield Town Hall; and Thursday, April 16, 1992 at 1 p.m. at War Memorial Center. See **ADDRESSES** below.

FOR FURTHER INFORMATION CONTACT: Mr. Joel Ettinger, Central Area Director, Federal Transit Administration, 55 East Monroe Street, Suite 1415, Chicago, Illinois 60603. Phone: (312) 353-2789.

ADDRESSES: Written comments on project scope should be sent to Mr. James Beckwith, Project Manager, Wisconsin Department of

Transportation, District No. 2, 141 NW Barstow Street, P.O. Box 649, Waukesha, Wisconsin 53187–0649. Scoping Meetings will be held at the following locations:

1. Zoofari Conference Center, 9715 W. Bluemound Road, Milwaukee, WI 53226.
2. Washington Park Senior Center, 4420 W. Vliet Street, Meeting Room, 1st Floor, Milwaukee, WI 53208.

5. War Memorial Center, 750 N. Lincoln Memorial Drive, Memorial Hall, 3rd Floor, Milwaukee, WI 53202.

SUPPLEMENTARY INFORMATION: *Scoping:* FTA and WisDOT invite interested individuals, organizations, and federal, state and local agencies to participate in defining the alternatives to be evaluated in the EIS and identifying any significant social, economic, or environmental issues related to the alternatives. An information packet describing the purpose of the project, the proposed alternatives, the impact areas to be evaluated, the citizen improvement program and the preliminary project schedule is being mailed to affected federal, state and local agencies and to interested parties on record. Others may request the scoping materials by contacting Mr. James Beckwith at the address above or by calling him at (414) 548–8675. Scoping comments may be made verbally at any of the public scoping meetings or in writing. See the **DATES** and **ADDRESSES** sections above for locations and times. During scoping, comments should focus on identifying specific social, economic or environmental impacts to be evaluated and suggesting alternatives which are less costly or less environmentally damaging while achieving similar transit objectives. Scoping is not the appropriate time to indicate a preference for a particular alternative. Comments on preferences should be communicated after the Draft EIS has been completed. If you wish to be placed on the mailing list to receive further information as the project develops, contact Mr. James Beckwith as previously described.

Description of Study Area and Project Needs: The East-West Corridor is a major travel corridor bisecting Milwaukee and Waukesha Counties. The Corridor includes portions of six cities: Brookfield, Milwaukee, New Berlin, Waukesha, Wauwatosa, and West Allis; three villages: Elm Grove, Shorewood and West Milwaukee; and three towns: Brookfield, Pewaukee and Waukesha.

Beginning at the University of Wisconsin-Milwaukee, the Corridor proceeds through downtown Milwaukee to the City of Waukesha. Generally, Locust Street is considered the Corridor's northern boundary and Lincoln Avenue is considered the southern boundary, from Lake Michigan to County Highway T in Waukesha County, WI. Transit improvements in the East-West Corridor are intended to improve transit accessibility in the Corridor. A significant portion of the Corridor is largely composed of a low income, non-white, and transit-dependent population. Improved transit may alleviate traffic and parking problems that prevail in some of the most densely populated portions of the Corridor. Further, improved transportation should better serve the bidirectional travel needs of Waukesha County's growing employment base and population. Improved transit in the corridor may alleviate regional air quality problems by providing alternatives to the automobile for many trips. In light of the above factors, the purpose of the East-West Corridor study is to identify the best approach for improving transit service in the Corridor in a cost-effective, equitable, and publicly acceptable manner.

Alternatives: Transportation alternatives proposed for consideration in the Corridor include a No-Build/TSM Alternative, consisting of already programmed transportation improvements such as the reconstruction of the Stadium, Marquette and Zoo interchanges on IH 94 and implementation of an extensive Freeway Traffic Management System. The No-Build/TSM Alternative also will include maintenance of current transit service expanded for Corridor growth. Secondly, the Alternatives Analysis will include an Express Bus Alternative which represents the best that can be accomplished with bus and bus guideways. Improvements could include high occupancy vehicle (HOV) lanes, signal timing improvements, and bus park-and-ride and transfer centers, intersection modifications and busways. Two Light Rail Transit (LRT) alternatives as proposed for consideration in the Corridor. The two alternatives could be light rail services from Waukesha to Downtown Milwaukee and the University of Wisconsin-Milwaukee Campus. Two levels of light rail service are proposed for analysis: one would be an urban, frequent stop, higher capacity service and the other would offer higher speeds, greater station spacing, and more park-and-ride opportunities for transit users. The alignments could be an exclusive guideway, along transit malls or on a shared right-of-way. The alignments selected for inclusion in the East-West Corridor AS/DEIS will be evaluated during screeening and refined during the study; multiple alignments will be studies.

Probable Effects: FTA and WisDOT plan to evaluate the EIS all significant social, economic and environmental impacts of the alternatives. Among the primary issues are transportation service changes, including transit cost, service, patronage change, and its financial implications; the effect on traffic movement and railroad operations; community impacts, including land use planning and zoning compatibility, neighborhood compatibility, local and regional economic change, aesthetics, and utility relocation; cultural resource impacts, including effects on historic, archeological, and park resources; and natural resource impacts, including air quality, noise and vibration, removal of pre-existing hazardous wastes, and effects on water resources and quality, natural features, and ecosystems. The proposed impact assessment and its evaluation criteria will take into account both positive and negative impacts, direct and indirect impacts, short-term (construction) and long-term (operation) impacts, and site-specific and corridor-wide impacts. Evaluation criteria will be consistent with the applicable Federal, State of Wisconsin, and local standards, criteria, regulations, and policies. Mitigation measures will be explored for any adverse impacts that are identified as part of the analysis.

FTA Procedures: In accordance with the Federal Transit Act, as amended, and FTA policy, the Draft EIS will be prepared in conjunction with an Alternatives Analysis, and the Final EIS in conjunction with Preliminary Engineering. After its publication, the Draft EIS will be available for public and agency review and comment, and a public hearing will be held. On the basis of the Draft EIS and the comments received, WisDOT will select a locally preferred alternative and see approval from FTA to continue with Preliminary Engineering and preparation of the Final EIS.

Issued on: March 20, 1992.

Joel Ettinger,

Central Area Director.

BILLING CODE 4910–57–M

DEPARTMENT OF THE TREASURY

Public Information Collection Requirements Submitted to OMB for Review

Date: March 20, 1992.

The Department of Treasury has submitted the following public information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1980, Public Law 96–511. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments regarding this information collection should be addressed to the OMB reviewer listed and to the Treasury Department Clearance Officer, Department of the Treasury, room 3171 Treasury Annex, 1500 Pennsylvania Avenue, NW., Washington, DC 20220.

Internal Revenue Service

OMB Number: 1545–0314.

Form Number: Notice 89–61.

Type of Review: Extension.

Title: Imported Substance; Rules for Filing a Petition.

Description: Section 4672 provides that importers and exporters may request modifications of the list of imported taxable substance. The Notice sets forth rules for filing a request.

Respondents: Businesses or other, Small businesses or organizations.

Estimated Number of Respondents: 100.

Estimated Burden Hours Per Respondent: 1 hour.

Frequency of Response: On occasion.

Estimated Total Reporting Burden: 100 hours.

Clearance Officer: Garrick Shear (202) 535–4297, Internal Revenue Service, room 5571, 1111 Constitution Avenue, NW., Washington, DC 20224.

OMB Reviewer: Milo Sunderhauf (202) 395–6880, Office of Management and Budget, room 3001, New Executive Office Building, Washington, DC 20503.

Lois K. Holland,

Departmental Reports Management Officer.

BILLING CODE 4830–01–M

Office of the Secretary

[Department Circular—Public Debt Series—No. 11–92]

Treasury Notes of March 31, 1997, Series K–1997

Washington, March 19, 1992.

1. Invitation for Tenders

1.1. The Secretary of the Treasury, under the authority of chapter 31 of title 31, United States Code, invites tenders for approximately $10,250,000,000 of United States securities, designated Treasury Notes of March 31, 1997, Series K–1997 (CUSIP No. 912827 E7 3), hereafter referred to as Notes. The Notes will be sold at auction, with bidding on the basis of yield. Payment will be required at the price equivalent of the yield of each accepted bid. The interest rate on the Notes and the price equivalent of each accepted bid will be determined in the manner described below. Additional amounts of the Notes may be issued to Federal Reserve Banks for their own account in exchange for maturing Treasury securities. Additional amounts of the Notes may also be issued at the average price to Federal Reserve Banks, as agents for foreign and international monetary authorities.

2. Description of Securities

2.1. The Notes will be dated March 31, 1992, and will accrue interest from that date, payable on a semiannual basis on September 30, 1992, and each subsequent 6 months on March 31 and September 30 through the date that the principal becomes payable. They will mature March 31, 1997, and will not be subject to call for redemption prior to maturity. In the event any payment date is a Saturday, Sunday, or other nonbusiness day, the amount due will be payable (without additional interest) on the next business day.

2.2. The Notes will be issued only in book-entry form in a minimum amount of $1,000 and in multiples of that amount. They will not be issued in registered definitive or in bearer form.

2.3. The Department of the Treasury's general regulations governing United States securities, i.e., Department of the Treasury Circular No. 300, current revision (31 CFR part 306), as to the extent applicable to marketable securities issued in book-entry form, and the regulations governing book-entry Treasury Bonds, Notes, and Bills, as adopted and published as a final rule to govern securities held in the TREASURY DIRECT Book-Entry Securities System in Department of the Treasury Circular, Public Debt Series, No. 2–86 (31 CFR part 357), apply to the Notes offered in this circular.

3. Sale Procedures

3.1. Tenders will be received at Federal Reserve Banks and Branches and at the Bureau of the Public Debt, Washington, DC 20239–1500, Wednesday, March 25, 1992, prior to 12 noon, Eastern Standard time, for noncompetitive tenders and prior to 1 p.m., Eastern Standard time, for competitive tenders. Noncompetitive tenders as defined below will be considered timely if postmarked no later than Tuesday, March 24, 1992, and received no later than Tuesday, March 31, 1992.

3.2. The par amount of Notes bid for must be stated on each tender. The minimum bid is $1,000, and larger bids must be in multiples of that amount. A bidder, whether bidding directly or submitting bids through a depository institution or government securities broker/dealer, may not bid both competitively and noncompetitively for its own account in the auction.

3.3. Competitive bids must also show the yield desired, expressed in terms of an annual yield with two decimals, e.g., 7.10%. Fractions may not be used. A single bidder, as defined in Treasury's single bidder guidelines contained in Attachment A to this circular, may submit bids for more than one yield. However, at any one yield, the Treasury will not recognize any amount tendered by a single bidder in excess of $3,587,500,000, which is 35 percent of the public offering amount of $10,250,000,000. A competitive bid by a single bidder at any one yield in excess of $3,587,500,000 will be reduced to that amount.

3.4. Noncompetitive tenders do not specify a yield. A single bidder should not submit a noncompetitive tender for more than $5,000,000. A noncompetitive bid by a single bidder in excess of $5,000,000 will be reduced to that amount. A bidder may not submit a noncompetitive bid if the bidder holds a position, in the notes being auctioned, in "when issued" trading, or in futures or forward contracts. A noncompetitive bidder may not enter into any agreement to purchase or sell or otherwise dispose of the security being auctioned, nor may it commit to sell the security prior to the designated closing time for receipt of competitive bids.

3.5. The following institutions may submit tenders for accounts of customers: depository institutions, as described in section 19(b)(1)(A), excluding those institutions described in subparagraph (vii), of the Federal Reserve Act (12 U.S.C. 461(b)(1)(A)); and government securities broker/dealers that are registered with the Securities and Exchange Commission or noticed as government securities broker/dealers pursuant to section 15C(a)(1) of the Securities Exchange Act of 1934. Others are permitted to submit tenders only for their own account. For competitive bids,

an institution submitting a bid for customers must submit with the institution's tender a customer list that includes, for each customer, the name of the customer and the amount bid at each yield. Customer bids may not be aggregated by yield on the customer list. For noncompetitive bids, the customer list must provide, for each customer, the name of the customer and the amount bid. All competitive and noncompetitive bids submitted on behalf of trust estates must provide, for each trust estate, the name or title of the trustee(s), a reference to the document creating the trust with the date of execution, and the employer identification number of the trust.

3.6. A competitive single bidder must report its net long position if the total of all its bids for the security being offered and its position in the security equals or exceeds $2 billion, with the position to be determined as of one half-hour prior to the closing time for the receipt of competitive tenders. A net long position includes positions in the security being auctioned, in "when issued" trading, and in futures and forward contracts. Bidders who meet this reporting requirement and are customers of a depository institution or a government securities broker/dealer must report their positions through the institution submitting the bid on their behalf.

3.7. Tenders from bidders who are making payment by charge to a funds account at a Federal Reserve Bank and tenders from bidders who have an approved autocharge agreement on file at a Federal Reserve Bank will be received without deposit. In addition, tenders from States, and their political subdivisions or instrumentalities; public pension and retirement and other public funds; international organizations in which the United States holds membership; foreign central banks and foreign states; and Federal Reserve Banks will be received without deposit. Tenders from all others must be accompanied by full payment for the amount of Notes applied for, or by a guarantee from a commercial bank or a primary dealer of 5 percent of the par amount applied for.

3.8. Immediately after the deadline for receipt of competitive tenders, tenders will be opened, followed by a public announcement of the amount and yield range of accepted bids. Subject to the reservations expressed in section 4, noncompetitive tenders will be accepted in full, and then competitive tenders will be accepted, starting with those at the lowest yields, through successively higher yields to the extent required to attain the amount offered. Tenders at the highest accepted yield will be prorated if necessary. After the determination is made as to which tenders are accepted, an interest rate will be established, at ⅛ of one percent increment, which results in an equivalent average accepted price close to 100.000 and lowest accepted price above the original issue discount limit of 98.750. That stated rate of interest will be paid on all of the Notes. Based on such interest rate, the price on each competitive tender allotted will be determined and each successful competitive bidder will be required to pay the price equivalent to the yield bid. Those submitting noncompetitive tenders will pay the price equivalent to the weighted average yield of accepted competitive tenders. Price calculations will be carried to three decimal places on the basis of price per hundred, e.g., 99.923, and the determinations of the Secretary of the Treasury shall be final. If the amount of noncompetitive tenders received would absorb all or most of the offering, competitive tenders will be accepted in an amount sufficient to provide a fair determination of the yield. Tenders received from Federal Reserve Banks will be accepted at the price equivalent to the weighted average yield of accepted competitive tenders.

3.9. No single bidder will be awarded securities in an amount exceeding 35 percent of the public offering. The maximum amount which may be awarded in this auction is $3,587,500,000. The determination of the maximum award to a single bidder will take into account the bidder's net long position, if the bidder has been obliged to report its position per the requirements outlined in § 3.6.

3.10. Notice of awards will be provided by a Federal Reserve Bank or Branch or the Bureau of the Public Debt to bidders who have submitted accepted competitive bids, whether for their own account or for the account of customers. Those submitting non-competitive bids will be notified only if the bid is not accepted in full, or when the price at the average yield is over par. No later than 12 noon local time Thursday, March 26, 1992, the appropriate Federal Reserve Bank will notify each depository institution that has entered into an autocharge agreement with a bidder as to the amount to be charged to the institution's funds account at the Federal Reserve Bank on the issue date. Any customer that is awarded $500 million or more of securities must furnish, no later than 10 a.m. local time Thursday, March 26, 1992, written confirmation of its bid to the Federal Reserve Bank or Branch where the bid was submitted. A depository institution or government securities broker/dealer submitting a bid for a customer is responsible for notifying its customer of this requirement if the customer is awarded $500 million or more as a result of bids submitted by the depository institution or the broker/dealer.

4. Reservations

4.1. The Secretary of the Treasury expressly reserves the right to accept or reject any or all tenders in whole or in part, to allot more or less than the amount of Notes specified in section 1, and to make different percentage allotments to various classes of applicants when the Secretary considers it in the public interest. The Secretary's action under this Section is final.

5. Payment and Delivery

5.1. Settlement for the Notes allotted must be made timely at the Federal Reserve Bank or Branch or at the Bureau of the Public Debt, wherever the tender was submitted. Settlement on Notes allotted will be made by a charge to a funds account or pursuant to an approved autocharge agreement, as provided in § 3.7. Settlement on Notes allotted to institutional investors and to others whose tenders are accompained by a guarantee as provided in § 3.7, must be made or completed on or before Tuesday, March 31, 1992. Payment in full must accompany tenders submitted by all other investors. Payment must be in cash; in other funds immediately available to the Treasury; in Treasury notes or bonds maturing on or before the settlement date but which are not overdue as defined in the general regulations governing United States securities; or by check drawn to the order of the institution to which the tender was submitted, which must be received from institutional investors no later than Friday, March 27, 1992. When payment has been submitted with the tender and the purchase price of the Notes allotted is over par, settlement for the premium must be completed timely, as specified above. When payment has been submitted with the tender and the purchase price is under par, the discount will be remitted to the bidder.

5.2. In every case where full payment has not been completed on time, an amount of up to 5 percent of the par amount of Notes allotted shall, at the discretion of the Secretary of the Treasury, be forfeited to the United States.

5.3 Registered definitive securities tendered in payment for the Notes allotted and to be held in Treasury Direct are not required to be assigned if the inscription on the registered definitive security is identical to the registration of the Note being purchased. In any such case, the tender form used to place the Notes allotted in Treasury Direct must be completed to show all the information required thereon, or the Treasury Direct account number previously obtained.

6. General Provisions

6.1. As fiscal agents of the United States, Federal Reserve Banks are authorized, as directed by the Secretary of the Treasury, to receive tenders, to make allotments, to issue such notices as may be necessary, to receive payment for, and to issue, maintain, service, and make payment on the Notes.

6.2. The Secretary of the Treasury may at any time supplement or amend provisions of this circular if such supplements or amendments do not adversely affect existing rights of holders of the Notes. Public announcement of such changes will be promptly provided.

6.3. The Notes issued under this circular shall be obligations of the United States, and, therefore, the faith of the United States Government is pledged to pay, in legal tender, principal and interest on the Notes.

6.4. Attachment A is incoroporated as part of this circular.

Gerald Murphy,

Fiscal Assistant Secretary.

Attachment A—Treasury's Single Bidder Guidelines for Noncompetitive Bidding in all Treasury Security Auctions

The investor categories listed below define what constitutes a single noncompetitive bidder.

(1) Bank Holding Companies and Subsidiaries

A bank holding company (includes the company and/or one or more of its subsidiaries, whether or not organized as separate entities under applicable law).

(2) Banks and Branches

A parent bank (includes the parent and/or one or more of its branches, whether or not organized as separate entities under applicable law).

(3) Thrift Institutions and Branches

A thrift institution, such as a savings and loan association, credit union, savings banks, or other similar entity (includes the principal or parent office and/or one or more of its branches, whether or not organized as separate entities under applicable law).

(4) Corporations and Subsidiaries

A corporation (includes the corporation and/or one or more of its majority-owned subsidiaries, i.e., any subsidiary more than 50 percent of whose stock is owned by the parent corporation or by any other of its majority-owned subsidiaries).

(5) Families

A married person (includes his or her spouse, and any unmarried adult children, having a common address and/or household).

Note: A minor child, as defined by the law of domicile, is not permitted to submit tenders individually, or jointly with an adult bidder. (A minor's parent acting as natural guardian is not recognized as a separate bidder.)

(6) Partnerships

Each partnership (includes a partnership or individual partner(s), acting together or separately, who own the majority or controlling interest in other partnerships, corporations, or associations).

(7) Guardians, Custodians, or other Fiduciaries

A guardian, custodian, or similar fiduciary, identified by (a) the name or title of the fiduciary, (b) reference to the document, court order, or other authority under which the fiduciary is acting, and (c) the taxpayer identifying number assigned to the estate.

(8) Trusts

A trust estate, which is identified by (a) the name or title of the trustee, (b) a reference to the document creating the trust, e.g., a trust indenture, with date of execution, or a will, (c) the IRS employer identification number (not social security account number).

(9) Political Subdivisions

(a) A state government (any of the 50 states and the District of Columbia).

(b) A unit of local government (any county, city, municipality, or township, or other unit of general government, as defined by the Bureau of the Census for statistical purposes, and includes any trust, investment, or other funds thereof).

(c) A commonwealth, territory, or possession.

(10) Mutual Funds

A mutual fund (includes all funds that comprise it, whether or not separately administered).

(11) Money Market Funds

A money market fund (includes all funds that have a common management).

(12) Investment Agents/Money Managers

An individual, firm, or association that undertakes to service, invest, and/or manage funds for others.

(13) Pension Funds

A pension fund (includes all funds that comprise it, whether or not separately administered).

Notes: The definitions do not reflect all bidder situations. "Single bidder" is not necessarily synonymous with "Single entity"

Questions concerning the guidelines should be directed to the Office of Financing, Bureau of the Public Debt, Washington, DC 20239 (telephone 202/219-3350).

[FR Doc. 92-7163 Filed 3-24-92; 3:57 pm]

BILLING CODE 4810-40-M

[Department Circular—Public Debt Series—No. 10-92]

Treasury Notes of March 31, 1994, Series X-1994

Washington, March 19, 1992.

1. Invitation for Tenders

1.1. The Secretary of the Treasury, under the authority of Chapter 31 of Title 31, United States Code, invites tenders for approximately $14,750,000,000 of United States securities, designated Treasury Notes of March 31, 1994, Series X-1994 (CUSIP No. 912827 E6 5), hereafter referred to as Notes. The Notes will be sold at auction, with bidding on the basis of yield. Payment will be required at the price equivalent of the yield of each accepted bid. The interest rate on the Notes and the price equivalent of each accepted bid will be determined in the manner described below. Additional amounts of the Notes may be issued to Federal Reserve Banks for their own account in exchange for maturing Treasury securities. Additional amounts of the Notes may also be issued at the average price to Federal Reserve Banks, as agents for foreign and international monetary authorities.

2. Description of Securities

2.1. The Notes will be dated March 31, 1992, and will accrue interest from that date, payable on a semiannual basis on September 30, 1992, and each subsequent 6 months on March 31 and September 30 through the date that the

principal becomes payable. They will mature March 31, 1994, and will not be subject to call for redemption prior to maturity. In the event any payment date is a Saturday, Sunday, or other nonbusiness day, the amount due will be payable (without additional interest) on the next business day.

2.2. The Notes will be issued only in book-entry form in a minimum amount of $5,000 and in multiples of that amount. They will not be issued in registered definitive or in bearer form.

2.3. The Department of the Treasury's general regulations governing United States securities, i.e., Department of the Treasury Circular No. 300, current revision (31 CFR part 306), as to the extent applicable to marketable securities issued in book-entry form, and the regulations governing book-entry Treasury Bonds, Notes, and Bills, as adopted and published as a final rule to govern securities held in the Treasury Direct Book-Entry Securities System in Department of the Treasury Circular, Public Debt Series, No. 2–86 (31 CFR part 357), apply to the Notes offered in this circular.

3. Sale Procedures

3.1. Tenders will be received at Federal Reserve Banks and Branches and at the Bureau of the Public Debt, Washington, DC 20239–1500, Tuesday, March 24, 1992, prior to 12 noon, Eastern Standard time, for noncompetitive tenders and prior to 1 p.m., Eastern Standard time, for competitive tenders. Noncompetitive tenders as defined below will be considered timely if postmarked no later than Monday, March 23, 1992, and received no later than Tuesday, March 31, 1992.

3.2. The par amount of Notes bid for must be stated on each tender. The minimum bid is $5,000, and larger bids must be in multiples of that amount. A bidder, whether bidding directly or submitting bids through a depository institution or government securities broker/dealer, may not bid both competitively and noncompetitively for its own account in the auction.

3.3. Competitive bids must also show the yield desired, expressed in terms of an annual yield with two decimals, e.g., 7.10%. Fractions may not be used. A single bidder, as defined in Treasury's single bidder guidelines contained in Attachment A to this circular, may submit bids for more than one yield. However, at any one yield, the Treasury will not recognize any amount tendered by a single bidder in excess of $5,162,500,000, which is 35 percent of the public offering amount of $14,750,000,000. A competitive bid by a single bidder at any one yield in excess of $5,162,500,000 will be reduced to that amount.

3.4. Noncompetitive tenders do not specify a yield. A single bidder should not submit a noncompetitive tender for more than $5,000,000. A noncompetitive bid by a single bidder in excess of $5,000,000 will be reduced to that amount. A bidder may not submit a noncompetitive bid if the bidder holds a position, in the notes being auctioned, in "when issued" trading, or in futures or forward contracts. A noncompetitive bidder may not enter into any agreement to purchase or sell or otherwise dispose of the security being auctioned, nor may it commit to sell the security prior to the designated closing time for receipt of competitive bids.

3.5. The following institutions may submit tenders for accounts of customers: Depository institutions, as described in Section 19(b)(1)(A), excluding those institutions described in subparagraph (vii), of the Federal Reserve Act (12 U.S.C. 461(b)(1)(A)); and government securities broker/dealers that are registered with the Securities and Exchange Commission or noticed as government securities broker/dealers pursuant to section 15C(a)(1) of the Securities Exchange Act of 1934. Others are permitted to submit tenders only for their own account. For competitive bids, an institution submitting a bid for customers must submit with the institution's tender a customer list that includes, for each customer, the name of the customer and the amount bid at each yield. Customer bids may not be aggregated by yield on the customer list. For noncompetitive bids, the customer list must provide, for each customer, the name of the customer and the amount bid. All competitive and noncompetitive bids submitted on behalf of trust estates must provide, for each trust estate, the name or title of the trustee(s), a reference to the document creating the trust with the date of execution, and the employer identification number of the trust.

3.6. A competitive single bidder must report its net long position if the total of all its bids for the security being offered and its position in the security equals or exceeds $2 billion, with the position to be determined as of one half-hour prior to the closing time for the receipt of competitive tenders. A net long position includes positions, in the security being auctioned, in "when issued" trading, and in futures and forward contracts. Bidders who meet this reporting requirement and are customers of a depository institution or a government securities broker/dealer must report their positions through the institution submitting the bid on their behalf.

3.7. Tenders from bidders who are making payment by charge to a funds account at a Federal Reserve Bank and tenders from bidders who have an approved autocharge agreement on file at a Federal Reserve Bank will be received without deposit. In addition, tenders from States, and their political subdivisions or instrumentalities; public pension and retirement and other public funds; international organizations in which the United States holds membership; foreign central banks and foreign states; and Federal Reserve Banks will be received without deposit. Tenders from all others must be accompanied by full payment for the amount of Notes applied for, or by a guarantee from a commercial bank or a primary dealer of 5 percent of the par amount applied for.

3.8. Immediately after the deadline for receipt of competitive tenders, tenders will be opened, followed by a public announcement of the amount and yield range of accepted bids. Subject to the reservations expressed in section 4, noncompetitive tenders will be accepted in full, and then competitive tenders will be accepted, starting with those at the lowest yields, through successively higher yields to the extent required to attain the amount offered. Tenders at the highest accepted yield will be prorated if necessary. After the determination is made as to which tenders are accepted, an interest rate will be established, at a ⅛ of one percent increment, which results in an equivalent average accepted price close to 100.000 and a lowest accepted price above the original issue discount limit of 99.500. That stated rate of interest will be paid on all of tne Notes. Based on such interest rate, the price on each competitive tender allotted will be determined and each successful competitive bidder will be required to pay the price equivalent to the yield bid. Those submitting noncompetitive tenders will pay the price equivalent to the weighted average yield of accepted competitive tenders. Price calculations will be carried to three decimal places on the basis of price per hundred, e.g., 99.923, and the determinations of the Secretary of the Treasury shall be final. If the amount of noncompetitive tenders received would absorb all or most of the offering, competitive tenders will be accepted in an amount sufficient to provide a fair determination of the yield. Tenders received from Federal Reserve Banks will be accepted at the price equivalent to the weighted average yield of accepted competitive tenders.

3.9. No single bidder will be awarded securities in an amount exceeding 35 percent of the public offering. The maximum amount which may be awarded in this auction is $5,162,500,000. The determination of the maximum award to a single bidder will take into account the bidder's net long position, if the bidder has been obliged to report its position per the requirements outlined in § 3.6.

3.10. Notice of awards will be provided by a Federal Reserve Bank or Branch or the Bureau of the Public Debt to bidders who have submitted accepted competitive bids, whether for their own account or for the account of customers. Those submitting non-competitive bids will be notified only if the bid is not accepted in full, or when the price at the average yield is over par. No later than 12 noon local time Wednesday, March 25, 1992, the appropriate Federal Reserve Bank will notify each depository institution that has entered into an autocharge agreement with a bidder as to the amount to be charged to the institution's funds account at the Federal Reserve Bank on the issue date. Any customer that is awarded $500 million or more of securities must furnish, no later than 10 a.m. local time Wednesday, March 25, 1992, written confirmation of its bid to the Federal Reserve Bank or Branch where the bid was submitted. A depository institution or government securities broker/dealer submitting a bid for a customer is responsible for notifying its customer of this requirement if the customer is awarded $500 million or more as a result of bids submitted by the depository institution or the broker/dealer.

4. Reservations

4.1. The Secretary of the Treasury expressly reserves the right to accept or reject any or all tenders in whole or in part, to allot more or less than the amount of Notes specified in section 1, and to make different percentage allotments to various classes of applicants when the Secretary considers it in the public interest. The Secretary's action under this Section is final.

5. Payment and Delivery

5.1 Settlement for the Notes allotted must be made timely at the Federal Reserve Bank or Branch or at the Bureau of the Public Debt, wherever the tender was submitted. Settlement on Notes allotted will be made by a charge to a funds account or pursuant to an approved autocharge agreement, as provided in § 3.7. Settlement on Notes allotted to institutional investors and to others whose tenders are accompanied by a guarantee as provided in § 3.7. must be made or completed on or before Tuesday, March 31, 1992. Payment in full must accompany tenders submitted by all other investors. Payment must be in cash; in other funds immediately available to the Treasury; in Treasury notes or bonds maturing on or before the settlement date but which are not overdue as defined in the general regulations governing United States securities; or by check drawn to the order of the institution to which the tender was submitted, which must be received from institutional investors no later than Friday, March 27, 1992. When payment has been submitted with the tender and the purchase price of the Notes allotted is over par, settlement for the premium must be completed timely, as specified above. When payment has been submitted with the tender and the purchase price is under par, the discount will be remitted to the bidder.

5.2. In every case where full payment has not been completed on time, an amount of up to 5 percent of the par amount of Notes allotted shall, at the discretion of the Secretary of the Treasury, be forfeited to the United States.

5.3. Registered definitive securities tendered in payment for the Notes allotted and to be held in Treasury Direct are not required to be assigned if the inscription on the registered definitive security is identical to the registration of the Note being purchased. In any such case, the tender form used to place the Notes allotted in Treasury Direct must be completed to show all the information required thereon, or the Treasury Direct account number previously obtained.

6. General Provisions

6.1. As fiscal agents of the United States, Federal Reserve Banks are authorized, as directed by the Secretary of the Treasury, to receive tenders, to make allotments, to issue such notices as may be necessary, to receive payment for, and to issue, maintain, service, and make payment on the Notes.

6.2. The Secretary of the Treasury may at any time supplement or amend provisions of this circular if such supplements or amendments do not adversely affect existing rights of holders of the Notes. Public announcement of such changes will be promptly provided.

6.3. The Notes issued under this circular shall be obligations of the United States, and, therefore, the faith of the United States Government is pledged to pay, in legal tender, principal and interest on the Notes.

6.4. Attachment A is incorporated as part of this circular.

Gerald Murphy,
Fiscal Assistant Secretary.

Attachment A—Treasury's Single Bidder Guidelines for Noncompetitive Bidding in all Treasury Security Auctions

The investor categories listed below define what constitutes a single noncompetitive bidder.

(1) Bank Holding Companies and Subsidiaries

A bank holding company (includes the company and/or one or more of its subsidiaries, whether or not organized as separate entities under applicable law).

(2) Banks and Branches

A parent bank (includes the parent and/or one or more of its branches, whether or not organized as separate entities under applicable law).

(3) Thrift Institutions and Branches

A thrift institution, such as a savings and loan association, credit union, savings banks, or other similar entity (includes the principal or parent office and/or one or more of its branches, whether or not organized as separate entities under applicable law).

(4) Corporations and Subsidiaries

A corporation (includes the corporation and/or one or more of its majority-owned subsidiaries, i.e., any subsidiary more than 50 percent of whose stock is owned by the parent corporation or by any other of its majority-owned subsidiaries).

(5) Families

A married person (includes his or her spouse, and any unmarried adult children, having a common address and/or household).

Note: A minor child, as defined by the law of domicile, is not permitted to submit tenders individually, or jointly with an adult bidder. (A minor's parent acting as natural guardian is not recognized as a separate bidder.)

(6) Partnerships

Each partnership (includes a partnership or individual partner(s), acting together or separately, who own the majority or controlling interest in other partnerships, corporations, or associations).

(7) Guardians, Custodians, or other Fiduciaries

A guardian, custodian, or similar fiduciary, identified by (a) the name or title of the fiduciary, (b) reference to the

document, court order, or other authority under which the fiduciary is acting, and (c) the taxpayer identifying number assigned to the estate.

(8) Trusts

A trust estate, which is identified by (a) the name or title of the trustee, (b) a reference to the document creating the trust, e.g., a trust indenture, with date of execution, or a will, (c) the IRS employer identification number (not social security account number).

(9) Political Subdivisions

(a) A state government (any of the 50 states and the District of Columbia).

(b) A unit of local government (any county, city, municipality, or township, or other unit of general government, as defined by the Bureau of the Census for statistical purposes, and includes any trust, investment, or other funds thereof).

(c) A commonwealth, territory, or possession.

(10) Mutual Funds

A mutual fund (includes all funds that comprise it, whether or not separately administered).

(11) Money Market Funds

A money market fund (includes all funds that have a common management).

(12) Investment Agents/Money Managers

An individual, firm, or association that undertakes to service, invest, and/or manage funds for others.

(13) Pension Funds

A pension fund (includes all funds that comprise it, whether or not separately administered).

Notes: The definitions do not reflect all bidder situations. "Single bidder" is not necessarily synonymous with "single entity".

Questions concerning the guidelines should be directed to the Office of Financing, Bureau of the Public Debt, Washington, DC 20239 (Telephone 202/219–3350).

BILLING CODE 4810–40–M

Fiscal Service

Surety Company in Liquidation; Mutual Fire & Marine Inland Insurance Co.

Mutual Fire & Marine Inland Insurance Company of Philadelphia, Pennsylvania, is being liquidated by the Pennsylvania Insurance Commissioner using the commissioner's rehabilitation powers. Until 1989, Mutual Fire & Marine Inland Insurance Company was a general purpose mutual casualty insurance company doing business under the laws of Pennsylvania. According to a 1991 order from the Pennsylvania court supervising the liquidation, $1.5 million have been set aside for United States claims anticipated against the estate under the Comprehensive Environmental Recovery, Compensation, and Liability Act ("CERCLA"), 41 U.S.C. 6901 *et seq.* or similar claims identified by the Environmental Protection Agency.

Mutual Fire & Marine Inland Insurance Company did not hold a Certificate of Authority as an acceptable surety on Federal bonds. However, because the Company executed surety bond guarantees to financial institutions which were placed in federal receivership, the United States may have acquired claims against the Company's estate.

All claims must be filed in writing and shall set forth the amount of the claim, the facts upon which the claim is based, any priorities asserted, and any other pertinent facts to substantiate the claim. It is recommended that federal agencies who wish to assert priority status claims under 31 U.S.C. 3713 should forward the claim to the address below no later than June 30, 1992: Department of Justice, Civil Division, Commercial Litigation Branch, P.O. Box 875, Ben Franklin Station, Washington, DC 20044, Attn: Sandra P. Spooner, Deputy Director.

Any questions concerning filing claims may be directed to Ms. Spooner at (202) 514–7194.

Questions concerning this notice may be directed to the Department of the Treasury, Financial Management Service, Funds Management Division, Surety Bond Branch, Washington, DC 20227, Telephone (202/FTS) 874–6850.

Dated: March 20, 1992.

Charles F. Schwan, III,

Director, Funds Management Division, Financial Management Service.

Sunshine Act Meetings

Federal Register
Vol. 57, No. 60
Friday, March 27, 1992

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

FEDERAL DEPOSIT INSURANCE CORPORATION

Notice of Change in Subject Matter of Agency Meeting

Pursuant to the provisions of subsection (e)(2) of the "Government in the Sunshine Act" (5 U.S.C. 552b(e)(2)), notice is hereby given that at its open meeting held at 10:00 a.m. on Tuesday, March 24, 1992, the Corporation's Board of Directors determined, on motion of Director C.C. Hope, Jr. (Appointive), seconded by Director T. Timothy Ryan, Jr. (Office of Thrift Supervision), concurred in by Vice Chairman Andrew C. Hove, Jr., Chairman William Taylor, and Director Stephen R. Steinbrink (Acting Comptroller of the Currency), that Corporation business required the withdrawal from the agenda for consideration at the meeting, on less than seven days' notice to the public, of the following matter:

Memorandum and resolution re: Statement of Policy Regarding Applications for Deposit Insurance.

The Board further determined, by the same majority vote, that no earlier notice of the change in the subject matter of the meeting was practicable.

Dated: March 24, 1992.

Federal Deposit Insurance Corporation.

Robert E. Feldman,

Deputy Executive Secretary.

[FR Doc. 92–7179 Filed 3–24–92; 4:48 pm]

BILLING CODE 6714–01–M

INTERSTATE COMMERCE COMMISSION

Commission Conference

TIME AND DATE: 10:00 a.m., Tuesday, March 31, 1992.

PLACE: Hearing Room A, Interstate Commerce Commission, 12th and Constitution Avenue NW., Washington, DC 20423.

STATUS: The Commission will meet to discuss among themselves the following agenda items. Although the conference is open for the public observation, no public participation is permitted.

MATTERS TO BE DISCUSSED:

There has been a change in the agenda listed in the notice served March 24, 1992. The following items have been added to the agenda:

Finance Docket No. 31924, *Minnesota Zephyr Limited—Operation Exemption—Between East of Hudson, WI and Minneapolis and Duluth Junction, MN.*

and

Finance Docket No. 31685, *Stillwater and St. Paul Railroad, A Division of the Minnesota Transportation Museum, Inc.—Operation Exemption—Between Stillwater and Duluth Junction, MN.*

CONTACT PERSONS FOR MORE INFORMATION: Alvin H. Brown or A. Dennis Watson, Office of External Affairs, Telephone: (202) 927–5350, TDD: (202) 927–5721.

Sidney L. Strickland, Jr.,

Secretary.

BILLING CODE 7035–01–M

UNITED STATES POSTAL SERVICE BOARD OF GOVERNORS

Notice of a Meeting

The Board of Governors of the United States Postal Service, pursuant to its Bylaws (39 C.F.R. Section 7.5) and the Government in the Sunshine Act (5 U.S.C. Section 552b), hereby gives notice that it intends to hold a meeting at 8:30 a.m. on Tuesday, April 7, 1992, in Washington, DC. The meeting is open to the public and will be held in the Benjamin Franklin Room on the 11th floor of U.S. Postal Service Headquarters, 475 L'Enfant Plaza, SW. The Board expects to discuss the matters stated in the agenda which is set forth below. Requests for information about the meeting should be addressed to the Secretary of the Board, David F. Harris, at (202) 268–4800.

There will also be a session of the Board on Monday, April 6, 1992, but it will consist entirely of briefings and is not open to the public.

Agenda

Tuesday Session

April 7—8:30 a.m. (Open)

1. Minutes of Previous Meeting, March 9–10, 1992.
2. Remarks of the Postmaster General.
3. Operational Use of the Customer Satisfaction Index. (William R. Cummings, Senior Assistant Postmaster General, Operations Support Group.)
4. Review of the Barcoding Program. (Mr. Cummings.)
5. Tentative Agenda for the May 4–5, 1992, meeting in Washington, DC.

David F. Harris,

Secretary.

Part II

Department of Health and Human Services

Food and Drug Administration

21 CFR Part 821
Medical Devices; Device Tracking; Proposed Rule

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 821

[Docket No. 91N-0296]

Medical Devices; Device Tracking

AGENCY: Food and Drug Administration, HHS.

ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is proposing regulations to establish a device tracking requirement for certain categories of medical devices. This action will ensure that device manufacturers can, after certain devices have been distributed to patients, promptly locate patients and devices if FDA orders a recall or patient notification due to serious adverse health consequences or unreasonable risks of substantial harm to the public health associated with the use of the device. To that end, the proposed tracking regulations outline the minimum recordkeeping and reporting requirements which FDA believes are necessary to ensure that tracking serves its purpose. The proposed regulations would apply to manufacturers and those persons involved in the distribution of tracked devices.

The promulgation of this device tracking regulation is required by the Safe Medical Devices Act of 1990 (the SMDA), which requires manufacturers of certain medical devices to adopt a method of tracking that follows the devices through the distribution chain and then identifies and follows the patients who receive them. The SMDA and this proposed rule require tracking of devices whose failure would be reasonably likely to have serious adverse health consequences if the devices either are life-supporting or life-sustaining and used outside a device user facility or are permanently implantable devices. The SMDA also gives FDA the authority to designate other devices which must be tracked by their manufacturers. This proposed regulation would apply to any such additional devices that FDA designates for tracking.

DATES: Written comments by May 26, 1992.

ADDRESSES: Written comments to the Dockets Management Branch (HFA-305), Food and Drug Administration, rm. 1-23, 12420 Parklawn Dr., Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Kathleen S. Shanahan, Center for Devices and Radiological Health (HFZ-321), Food and Drug Administration, 1390 Piccard Dr., Rockville, MD 20850, 301-427-1122.

SUPPLEMENTARY INFORMATION:

I. Background

The current regulatory framework for medical devices is the result of three statutes which include: (1) The Federal Food, Drug, and Cosmetic Act of 1938 (the act), (2) the Medical Device Amendments of 1976 (the 1976 amendments), and (3) the Safe Medical Devices Act of 1990 (the SMDA).

The act, codified at 21 U.S.C. 321-394, prohibited the marketing of adulterated or misbranded devices. The 1976 amendments (Pub. L. 94-295), amended the act with new authority expressly designed to ensure the safety and effectiveness of medical devices.

The 1976 amendments gave FDA, for the first time, premarket controls over medical devices (e.g., classification, premarket notification, and premarket approval). Additionally, the 1976 amendments strengthened the act's postmarket controls relating to medical devices, giving FDA the authority to require patient notification; repair, replacement, or refund; reporting and recordkeeping; current good manufacturing practices (CGMP's); and restrictions on the distribution of certain devices.

The SMDA (Pub. L. 101-629), by streamlining procedures in some places and augmenting authority in others, refines the premarket and postmarket controls relating to medical devices added to the act by the 1976 amendments. Among the provisions of the SMDA that augment postmarket controls is the device tracking requirement of section 519(e) of the act (21 U.S.C. 360i(e)). This new provision requires that manufacturers track certain devices from the manufacturer through the distribution chain to the patient using the device. Under section 519(e) of the act, manufacturers must track devices whose failure would be reasonably likely to have serious adverse health consequences if the devices are either life-supporting or life-sustaining devices that are used outside a device user facility or permanently implantable devices. Section 519(e) of the act also gives FDA the authority to designate other devices which must be tracked by their manufacturers.

This new tracking provision is intended to ensure that FDA can remove dangerous or defective devices from the market expeditiously under new mandatory recall authority added to the act by the SMDA (section 518(e) of the act (21 U.S.C. 360h(e))) and preexisting notification authority (section 518(a) of the act (21 U.S.C. 360h(a))). As public health tools, however, notification and recall are only effective if patients are notified or devices are removed from distribution. Recent experiences with notification efforts undertaken by two manufacturers under section 518(a) of the act, in one case voluntarily, in another instance as ordered by FDA, highlight the need to implement effective device tracking.

The voluntary notification involved identifying, locating, notifying, and registering an estimated 23,000 recipients of an artificial heart valve that may fracture, putting the recipient's life in immediate danger (Refs. 1 through 5). Although the manufacturer of the valve did distribute return cards to hospitals to obtain each recipient's name when the valve was implanted, it is reported that less than 50 percent of these return cards were ever returned to the manufacturer (Ref. 2). Therefore no complete list of names of patients or information on their location was available to the manufacturer when it agreed to undertake the patient notification program (Ref. 2). The manufacturer has reportedly spent 2 million dollars to initiate the location, notification, and registration program (Refs. 2, 4, and 5). Location efforts, which began in December 1990, have included letters and telegrams to cardiologists, advertisements in medical journals, telephone calls to doctors, and media (Ref. 2). As of November 1991, the manufacturer reported to FDA that slightly more than 61 percent of the estimated number of recipients had been located (Ref. 6).

Another notification, ordered by FDA under section 518(a) of the act, involved a jaw implant with defects that may cause bone degeneration (Refs. 1 through 7). FDA estimates that over 26,000 of these implants were distributed between 1973 and 1988, but the manufacturer does not know how many were implanted (Refs. 9, 12, and 13). The manufacturer declared bankruptcy under chapter 7 on June 7, 1990 as a result of product liability suits (Ref. 14). The bankruptcy trustee has agreed to make distribution records (to the extent that they exist) available to FDA and the company president, but has refused to authorize notification on behalf of the bankrupt manufacturer or to pay for a patient notification program (Ref. 14). FDA has thus had to set up and provide funds for a patient identification and notification program.

II. Legislative History

In the past several years, Congress has focused considerable attention on FDA's implementation and enforcement of the 1976 amendments. Likewise, in the past several years, the General Accounting Office (GAO), the Office of Technology Assessment (OTA), and the Office of Inspector General of the Department of Health and Human Services (OIG) have conducted investigations and issued reports on problems associated with the distribution and use of defective pacemakers, pacemaker leads, heart valves, and apnea monitors. Although these reports discussed FDA's enforcement efforts, the reports also addressed the sufficiency of the existing provisions of the act to cope with the public health problems presented by these types of defective devices.

Congress concluded, from its own hearings and investigations and from its review of the GAO, OTA, and OIG investigations and reports, that the 1976 amendments were not always adequate to protect the public health. (H. Rept. 808, 101st Cong., 2d sess. 13-14 (1990); S. Rept. 513, 101st Cong., 2d sess. 13-16 (1990)). To correct these inadequacies, both houses of Congress proposed bills that streamlined and strengthened FDA's premarket and postmarket controls over medical devices. By conference agreement between the House and Senate, provisions in their two bills were merged, modified, and passed as the SMDA. The President signed the bill into law on November 28, 1990. Section 519(e), as enacted, incorporates section 13 concerning traceability in S. 3006 and section 3(b) of the SMDA concerning user tracking in H.R. 3095, but more closely follows the provisions of H.R. 3095.

Both the Senate and House Reports that accompanied these bills make clear that the purpose of tracking is to strengthen FDA's capability to remove dangerous and defective devices from the market. Specifically, section 519(e)'s tracking requirement is meant to facilitate implementation of the patient notification requirements (section 518(a) of the act) and the recall requirements (section 518(e) of the act). For example, the House Report states: "User tracking is critical to enable manufacturers or the FDA to notify patients who are using defective or otherwise dangerous devices." (H. Rept. 808, 101st Cong., 2d sess. 23 (1990). See also S. Rept. 513, 101st Cong., 2d sess. 26 (1990)).

The legislative history also speaks to the kinds of devices subject to the tracking requirement. The Senate Report accompanying S. 3006 states: "This requirement is limited to devices with the potential for causing the greatest harm and for which the potential of a recall is greatest." (S. Rept. 513, 101st Cong., 2d sess. 26 (1990)). Similarly, the House Report states that the tracking provisions in H.R. 3095 dealt with "devices critical to human health, such as heart valves and other implantable, life-sustaining devices." (H. Rept. 808, 101st Cong., 2d sess. 23 (1990)). FDA believes that these statements, in conjunction with the statutory language, provide a clear standard for determining when a device is a critical, high risk device that must be tracked. The statutory standard, the failure of which would be reasonably likely to have serious adverse health consequences, if the devices are either life-sustaining or life-supporting devices used outside device user facilities or are permanently implantable devices, is directed, as was congressional concern, to the medical importance of the device and the risks associated with a failure of the device.

Finally, the legislative history also addresses issues relating to the involvement of physicians in the accomplishment of effective tracking. The House Report states:

> The Committee believes that the role of individual physicians in the process of user tracking is an important but limited one. While FDA may establish regulations which call for the physician to initially provide patient information at the time a device is first used or implanted, the physician is not responsible for subsequent reporting on the whereabouts of the patient if that information is not available to physicians in the conduct of their medical practice. * * * To place the sole responsibility for user tracking on physicians would be unworkable * * *.

(H. Rept. 808, 101st Cong., 2d sess. 23 (1990)).

III. Purpose of the Proposed Regulation

The purpose of the proposed rule is to implement section 519(e) of the act. Section 519(e)(1) requires that a method of tracking be adopted by every person who is required to register under section 510 of the act (21 U.S.C. 360) and who engages in the manufacture of a device the failure of which would be reasonably likely to have serious adverse health consequences, if the device is either a life-sustaining or life-supporting device used outside a device user facility or is a permanently implantable device. This proposed rule also implements section 519(e)(2) of the act which requires that such persons adopt a method of device tracking of any other device that FDA designates for tracking.

The goal of the proposed rule is to ensure that a manufacturer can, if ordered to do so by FDA, comply with section 518(a) of the act (patient notification) and section 518(e) of the act (recall) in a prompt and complete manner. The proposed rule accomplishes this goal, not by requiring a particular method of tracking, but by setting forth the standard that every tracking system must satisfy: A manufacturer of a tracked device, by whatever method(s) of tracking it chooses, must be able to report specified information relating to the identity of patients and location of tracked devices to FDA within 3 working days (proposed § 821.25(a)). To assure that the methods adopted are adequate to meet this standard, the proposed rule requires: (1) That a tracking system be based on a written standard operating procedure (SOP) that provides for the collection and maintenance of certain information for the useful life of the device (proposed § 821.25 (b) and (c)); (2) that the manufacturer identify its devices in a unique fashion; and (3) that the tracking data and the functioning of the tracking system be audited at 6 month intervals in accordance with a quality assurance program incorporated into the tracking SOP (proposed § 821.25(c)). As further assurance that manufacturers' tracking systems will be effective, the proposed rule imposes specific but limited tracking obligations on other persons involved in the distribution of tracked devices (proposed § 821.30).

IV. Statutory Authority

Section 519(e) was added to the act by section 3(b)(1) of the SMDA. Section 3(c) of the SMDA directs FDA to issue regulations to implement section 519(e) of the act. Section 3(c)(B) of the SMDA specifically requires that such regulations: (1) Require appropriate methods for maintenance of records to ensure that, if notification is ordered under the act, it is effective; (2) require that manufacturers adopt effective tracking methods; and (3) account for the position of distributors in the device distribution process. This provision of the SMDA also gives FDA authority to include such other requirements as it deems necessary to ensure effective tracking.

In addition, section 519(a) of the act (21 U.S.C. 360i(a)) (added by the 1976 amendments) authorizes FDA to issue regulations to require device manufacturers, importers, and distributors to maintain such records, make such reports, and provide such information to FDA as may reasonably be necessary to assure that devices are not adulterated or misbranded and are otherwise safe and effective for human

use. That Congress intended FDA to use this authority under section 519 of the act to protect the public from potentially hazardous devices, as well as devices with confirmed hazards, is clear from the legislative history of the 1976 amendments. In discussing the provisions in section 519 of the act designed to reduce the burden and cost of recordkeeping requirements of that section of the act, the House Report specifically identifies records of "product distribution * * * where necessary to protect the public health" as examples of records that may be required under section 519(a) despite the limiting provisions. (H. Rept. 853, 94th Cong., 2d sess. 24 (1976)).

In discussing the notification provisions of section 518 of the act (21 U.S.C. 360h), the House Report, the principal legislative document on the 1976 amendments, states, in part:

> The notification provision is similar to, and to some extent patterned after, comparable authority contained in the National Traffic and Motor Vehicle Safety Act of 1966, the Radiation Control for Health and Safety Act of 1968, and the Consumer Product Safety Act of 1972. These statutes also include requirements that manufacturers provide notification of defects in their products to appropriate Federal agencies. The Committee determined that a comparable provision in new section 518(a) with respect to devices would be unnecessary since the Secretary could require the reporting of such information under the recordkeeping and reporting authority provided in new section 519 of the act.

(H. Rept. 835, 94th Cong., 2d sess. 21 (1976)).

Section 701(a) of the act (21 U.S.C. 371(a)) authorizes FDA to promulgate substantive binding regulations for the efficient enforcement of the act. *Weinberger* v. *Hynson, Westcott & Dunning, Inc.*, 412 U.S. 609 (1973); see also *Weinberger* v. *Bentex Pharmaceuticals, Inc.*, 412 U.S. 645, 653 (1973); *National Ass'n of Pharmaceuticals Manufacturers* v. *FDA*, 637 F. 2d 877 (2d Cir. 1981); *National Confectioners Ass'n* v. *Califano*, 569 F. 2d 690 (D.C. Cir. 1978); *National Nutritional Foods Ass'n* v. *Weinberger*, 512 F. 2d 688 (2d Cir.), cert. denied, 423 U.S. 827 (1975).

Section 704(a) of the act (21 U.S.C. 374(a)) provides, for purposes of enforcement of the act, that any duly authorized FDA employee is authorized, among other things: (1) To enter, at reasonable times, any factory, warehouse, or establishment in which devices are manufactured, processed, packed, or held or to enter any vehicle being used to transport or hold devices; and (2) to inspect, at reasonable times and within reasonable limits and in a reasonable manner, such factory, warehouse, establishments, or containers, and labeling therein. Section 704(e) of the act (21 U.S.C. 374(e)) establishes that every person required under section 519 of the act to maintain records and every person who is in charge or custody of such records must, upon request of any authorized FDA employee, permit the FDA employee at all reasonable times to have access to, to copy, and to verify such records.

V. Definitions

"Importer" means the initial distributor of an imported device who is required to register under section 510 of the act and 21 CFR 807.20 and includes any person who initially imports a device into the United States with the intention of further marketing the device without processing, repackaging, or relabeling the device.

"Manufacturer" means any person who manufactures, prepares, assembles, or processes a device. The term includes persons who: (1) Initially distribute an imported device (importer); (2) repackage or otherwise change the container, wrapper, or labeling of a device in furtherance of the distribution of the device from the original place of manufacture to the person who makes final delivery or sale to the ultimate consumer (repacker or relabeler); (3) initiate specifications for devices that are manufactured by a second party for subsequent distribution by the person initiating the specification (specifications developer); or (4) manufacture components or accessories which are ready to be used for any intended health-related purpose and are packaged or labeled for distribution for such health-related purpose and are processed by a licensed practitioner or other qualified person to meet the needs of a particular patient (ready-for-use component or accessory manufacturer).

"Device failure" includes the failure of a device to perform its intended function due to: (1) A departure from design, materials, or performance specifications; or (2) inadequate or inappropriate specifications. The term is not restricted to unanticipated, sudden, or catastrophic failures. With respect to material specifications, an unanticipated change in the biocompatibility of device materials, e.g., through degradation resulting in carcinogenic or other toxic effects that outweigh the benefits of using the device, would be considered a departure from such specifications.

"Reasonably likely" means probable. FDA emphasizes that the application of section 519(e) of the act does not turn on the probability of a device failure occurring but on the judgment (based on the intended use of the device) that, if a device failure occurs, serious adverse health consequences are more likely than not to occur.

The definition of "serious adverse health consequences" is derived from the legislative history of section 519(e) of the act. For a full explanation of this definition see the discussion below under "Serious Adverse Health Consequences."

"Permanently implantable device" is defined in terms of the device's intended purpose to assist, restore, or replace the function of an organ, system, or structure of the human body in a continuous and active manner throughout its useful life (i.e., the period of its placement in the body). This definition thus excludes implanted devices that are intended as temporary or are intended to be removed. However, FDA notes that an implant that is not permanent under this definition may nonetheless be subject to section 519(e) of the act because it is a life-sustaining or life-supporting device used outside a device user facility.

The definition for "life-supporting or life-sustaining device" is derived from 21 CFR 860.3 (classification procedure regulations) and the meaning is comparable. The definition of "device user facility" is that contained in new section 519(b)(5) of the act (21 U.S.C. 360i(b)(5)) (medical device reporting by device user facilities). FDA believes that outpatient diagnostic facilities which are not physicians' offices should be included with hospitals, ambulatory surgical facilities, nursing homes, and outpatient treatment facilities as a "device user facility." Devices located at outpatient diagnostic facilities are not used by the persons for whom the devices are indicated, and these persons would not possess the devices in the event of recall.

FDA notes that devices may be intended for use in a device user facility but will also be used outside a device user facility or that devices may be intended for use in and outside a device user facility. Manufacturers of life-sustaining or life-supporting devices who distribute such devices solely for use at a device user facility, but who know or should know that such devices are also being distributed for use or used outside a device user facility, must track this use of the device, as these devices have thereby become intended for use outside a device user facility. See 21 CFR 801.4 (definition of intended use). Likewise, manufacturers of life-sustaining or life-supporting devices who distribute such devices for use in and out of a device user facility must track the outside distribution and use of their device to the patient.

"Distributor" has been defined in terms of its common regulatory usage, to exclude the final person who makes delivery or sale of the device to the ultimate user.

"Distributes" is defined to clarify that distribution is not limited to commercial distribution, i.e., the sale or offering for sale, of a device intended for human use. FDA believes that section 519(e) of the act requires the tracking of all devices that are distributed regardless of whether the patient pays for the device. FDA is aware, for example, that some companies distribute pacemakers or implantation in the needy after their "implant before" date has been exceeded. Thus, for the purpose of this proposed rule, "distributes" covers any distribution. The only exclusions from this definition are: (1) For devices distributed under an effective investigational device exemption in accordance with section 520(g) of the act and 21 CFR part 812 because patients receiving investigational devices are effectively tracked through participation in a study, and (2) for devices distributed for teaching, law enforcement, research or analysis as specified in 21 CFR 801.125.

"Final distributor" and "multiple distributor" are defined for ease of reference. FDA believes it is necessary to include the class of persons covered by these two definitions within this proposed rule. "Final distributors," such as licensed practitioners, retail pharmacies and other retailers, and hospitals and other device user facilities, and "multiple distributors," such as rental firms, device user facilities, or other device distributing enterprises, are vital links in the device user tracking process. Further, including these persons within the tracking system comports with Congress's directive to FDA in section 3(c)(1)(B) of the SMDA to take into consideration the position of distributors in the device distribution chain and with the legislative history of the SMDA that states that FDA may require physicians to report patient identity.

"Licensed practitioner" is defined in terms comparable to those used in other FDA regulations.

VI. General Guidance

A. Responsibility for Identification

1. Devices Subject To Tracking Under Section 519(e)(1) of the Act

Section 519(e)(1) of the act provides for the mandatory tracking of those devices that meet its criteria. However, FDA recognizes that, as the agency charged with implementing and enforcing section 519(e) of the act, its interpretation of the statutory terms and its views on the application of section 519(e)(1) of the act are entitled to great weight. Thus, FDA expects manufacturers to make this determination based upon the guidance in the definitions in the rule, with the guidance herein (which includes an illustrative list of example devices that FDA believes are subject to tracking under section 591(e)(1) of the act), and with future guidance from FDA. To ensure that the list of example devices is readily available to the public in conjunction with the definitions of the key terms, FDA is proposing to incorporate this illustrative list in proposed § 821.20 (b)(1) and (b)(2).

In addition, FDA, when clearing premarket notification submissions (510 (k)'s) or approving premarket approval applications (PMA's), will notify the person receiving clearance or approval that FDA believes the device is subject to tracking. This notification will be given in writing, but will not be a part of the 510(k) order or the PMA approval order. In addition, FDA will notify the public (through publication of a notice in the **Federal Register**) that FDA believes a new generic type of device is subject to tracking and will solicit comments from the public on the agency's position. In the case of PMA devices that are the subject of approved PMA's, this notification will be given in the same issue of the **Federal Register** as the notice of the PMA approval order that is published after FDA's approval of the PMA for the device. In the case of section 510(k) devices, this notice will be published as soon as possible following notification of the manufacturer that a device is substantially equivalent. New generic types of devices that FDA identifies as subject to tracking through the premarket approval and clearance processes will also be added to the list of example devices set out in the regulation.

FDA believes that making the public aware of the fact that FDA believes a device is subject to tracking and soliciting comment from the public will serve two distinct purposes. First, it will serve to notify manufacturers of substantially equivalent devices that FDA believes that the tracking requirements of section 519(e) of the act apply to their devices, while also serving to notify those in the distribution chain of the tracking requirement. Secondly, it will provide consumers and manufacturers and other persons affected by FDA's determination, as well as the manufacturer(s) of the device in question, with the opportunity to share information and views with FDA, thereby ensuring that FDA's enforcement of the tracking provision proceeds deliberately and publicly, based upon complete and balanced information.

The decision diagram, shown below in Figure 1, is provided to assist firms in deciding which types of devices must be tracked on the basis of section 519(e) of the act, the definitions set forth in the proposed rule, and the concepts discussed in this preamble.

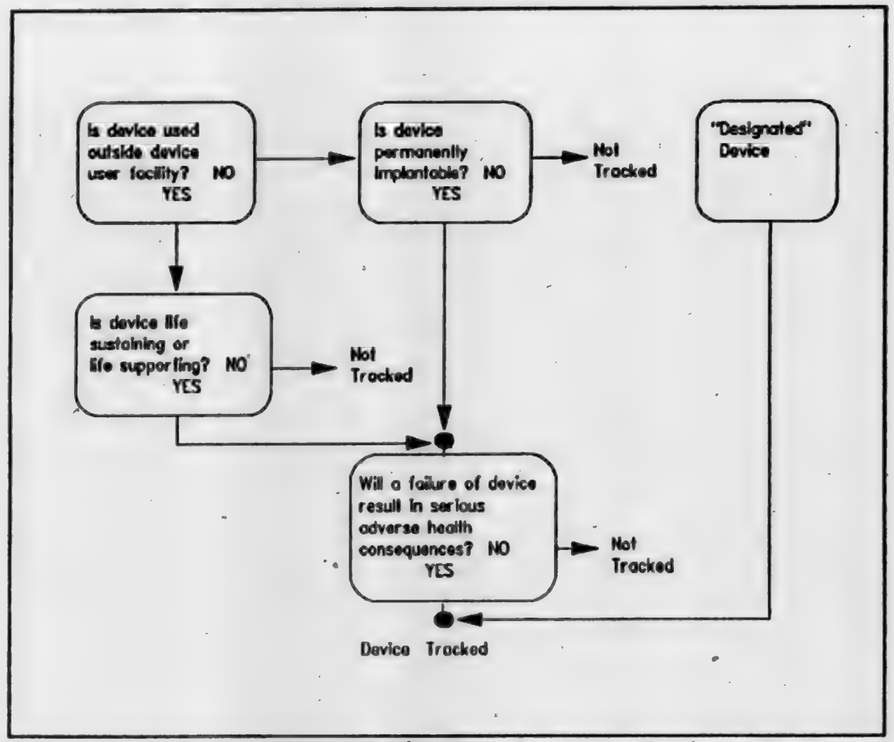

Figure 1

FDA realizes that this proposed rule is likely to become the final rule on May 28, 1992, by operation of the statute. See Public Law 101-629, section 3(c)(2) of the SMDA. If this occurs, FDA will consider the rule an interim final rule, will continue to review the comments, and will make any revisions to the rule as soon as practicable. Nevertheless, FDA emphasizes that, because the proposed rule will have become final by operation of law, manufacturers of devices subject to mandatory or discretionary tracking will be required to establish tracking systems for such devices in accordance with these regulations.

This approach, however appropriate it may be, leaves both FDA and those persons subject to the tracking requirements with a degree of uncertainty as to what the final scope of the regulations will be. For example, FDA anticipates that many comments may address not only the requirements for tracking systems but may also address definitions such as "permanent implant." "serious adverse health consequences." and "life-sustaining or life-supporting," terms whose definitions affect the scope and application of the mandatory tracking requirements. In addition, FDA expects that some comments will specifically challenge the devices that appear on the illustrative lists as examples of FDA's current interpretation of section 519(e)(1)'s terms.

FDA believes, under the unusual statutory provisions applicable to this rulemaking, that it is necessary to accommodate the statutory requirement of a final rule by May 28, 1992, with FDA's commitment to the notice and comment process as the appropriate mechanism for informed decisionmaking on device tracking. In addition, FDA has no interest in compelling the expenditure of unncecessary resources to initiate tracking for devices that FDA, upon due consideration of comments, believes are not subject to mandatory tracking. Thus, FDA advises that, prior to May 28, 1992, if FDA determines that a generic type of device that FDA included on the illustrative lists does not meet the applicable mandatory tracking standards, FDA will promptly announce, by notice in the **Federal Register** of a device included on the illustrative lists is able to convince FDA that its version of the device should not be subject to tracking due to circumstances (e.g., technology, intended use) unique to its particular version of the device, FDA, in its enforcement discretion, will notify the manufacturer that FDA will not take action for failure to track the device.

2. *Devices designated by FDA for tracking.* The diagram in Figure 1 identifies a category of devices called "designated" devices. This category encompasses the devices that FDA designates for tracking under section 519(e)(2) of the act. A designated device may not be a permanently implantable device or a life-sustaining or life-supporting device used outside a device user facility. Some of the considerations that FDA is likely to use to determine whether a device should be designated are illustrated in Figure 2.

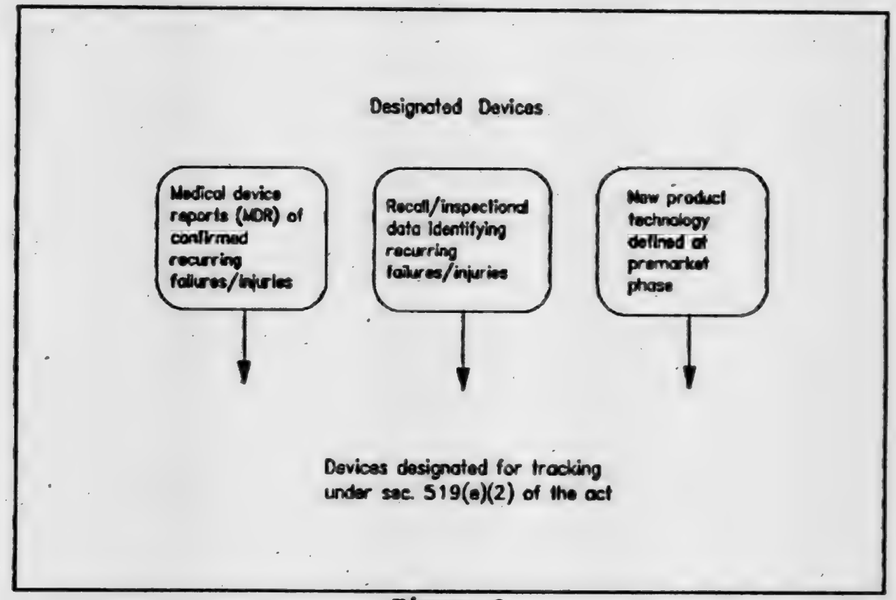

Figure 2

The agency will use its discretionary authority to designate and require the tracking of devices under section 519(e)(2) of the act to protect the public health. In assessing whether to designate a device to be tracked under section 519(e)(2) of the act, the agency will focus on the significance of risks to health posed by device use, especially the potential for serious injury, harm, or hazard to the public. Devices that FDA anticipates it will need to designate to be tracked are devices that demonstrate (or may demonstrate) recurrent, unpredictable, unexpected, or widespread failures, when such failures are hazardous or potentially hazardous. In the tracking context, the agency will consider a device to be hazardous if the device presents a risk of injury, death, or other serious adverse effect under the conditions of its intended use. The agency believes it is consistent with the intent of section 519(e)(2) of the act and with the general purpose of the SMDA to designate devices that present such risks to protect the public from defective devices that are unsafe or ineffective.

FDA is considering, with respect to designated devices, whether to adopt "levels" of tracking. FDA recognizes that some protection may be afforded patients who are part of an implanted device registry that is effectively compiled. For example, FDA would require a device to be tracked to the date of initial implantation in a patient and require full identification of all patients implanted with such designated devices, but because of the nature of the device or other circumstances, but not require the following patients beyond that point in time. This initial patient identification would include a social security number which, FDA believes, would make subsequent location of the patient possible.

The agency will designate that a particular device or gneric type of device is required to be tracked under section 519(e)(2) of the act by written notice, in the form of a letter, issued to the manufacturer of such a device or to the manufacturers of such a generic type of device. In addition, the agency will publish in the **Federal Register** a notice of the agency's determination that a particular generic type of designated device is required to be tracked under section 519(e)(2) of the act and will, as with devices subject to tracking under section 519(e)(1) of the act, solicit comment from the public. The agency considers the determination authorized by section 519(e)(2) of the act to be within the agency's discretionary authority and not subject to the rulemaking procedures prescribed by the Administrative Procedure Act.

FDA is hereby announcing that the agency will designate and require the tracking of any device that has silicone gel as a primary constituent of the finished device and is intended to remain in the body for 30 days or longer, and is soliciting comment on this designation and data regarding the long

term safety of these devices. Examples of these devices include silicone gel-filled breast prostheses (21 CFR 878.3540) and testicular prostheses (21 CFR 876.3750). FDA has examined recent scientific data concerning silicone implants and the migration of silicone in the body that reveal the occurrence of allergic reactions, silicone lymphadenoma, and morbidity due to silicone and silicone migration. FDA has documentation of risks associated with the use of silicone gel-filled breast implants, and believes that silicone gel-filled implants other than the breast implant have the potential to present the same risks documented for the breast implant. However, the agency has considerably less information regarding possible risks specifically associated with the use of other types of silicone gel implants. Therefore, FDA solicits comments on whether risks associated with gel-filled breast implants should be extrapolated to all other silicone gel implants, or whether there are scientific factors specific to other silicone implants that would raise doubts about such an extrapolation. In light of recently reported information together with absence of adequate clinical data on the long term safety of silicone gel, the agency believes that silicone gel implants are potentially hazardous and should be tracked. Silicone inflatable breast prostheses (21 CFR 878.3530) will also be designated to be tracked because of similar potential hazards presented by these devices. FDA will notify the manufacturers of such products that these devices are designated as devices that are required to be tracked under section 519(e)(2) of the act. This designation will become effective when regulations implementing section 519(e) of the act become final.

B. Serious Adverse Health Consequences

The legislative history of the SMDA provides the following explanation of the term "serious adverse health consequences:"

> The Committee believes that this term should mean any significant adverse experience attributable to a device, including those which may be either life threatening, or involve permanent or long term injuries, but excluding those non-life-threatening injuries which are temporary and reasonably reversible. In other words, injuries attributable to a device that are not significant in nature and are treatable and reversible by standard medical techniques, proximate in time to the injury, are not included within the term's definition.

(S. Rept. 513, 101st Cong., 2d sess. 19 (1990)).

The definition of "serious adverse health consequences" (proposed § 821.3(e)) incorporates these elements and includes life-threatening, permanent, and long-term illnesses attributable to device failure as serious adverse health consequences.

To be considered a serious adverse health consequence, an injury or illness caused by device failure must be life-threatening or have permanent or long-term effects that cannot be readily reversed or abated by medical techniques applied proximate in time to the onset of the adverse event. To determine whether a device failure would probably cause such serious adverse health consequences, a number of factors should be assessed.

First, risks to health posed by the intended use of the devise should be examined to identify those risks that are attributable to the characteristics or performance of the device, or lack thereof, and those risks that are not attributable to its characteristics or performance (i.e., its ability to accomplish its intended function in accordance with adequate and appropriate specifications).

Secondly, reports of failure, failure modes, and injuries associated with device use should be examined. Particular attention should be paid to sudden, catastrophic, and unanticipated device failures. In FDA's case, literature reports, premarketing submissions, establishment inspection reports, medical device reporting (MDR), and device recall data may be relied on to identify failures and resulting injuries.

Thirdly, the intended function of the device and the organ, structure, system or function of the body affected by the performance of the device should be examined to assess the significance of any injury or illness that would result from device failure. The significance of an injury or illness should be determined from examining the importance of the function of the device to life and health; the importance, to life and health, of the organ or structure of the body affected by the illness or injury; the expected effects of the injury or illness upon the residual capacity or condition of an already impaired structure or system of the body; and any collateral ramifications that may ensue from the illness or injury, such as risks attendant to any required surgery.

The probable or expected effects of device failures also assist in assessing the nature and type of medical intervention that would be required to treat adverse consequences. Life-threatening injuries or illnesses require immediate medical care and are serious adverse health consequences. Injuries and illnesses that do not worsen the residual capacity of an organ, structure or system of the body should not require medical treatment proximate in time to the occurrence of the device failure and thus are not serious adverse health consequences within the meaning of the proposed definition.

Injuries or illnesses that damage or worsen the residual capacity of an already impaired organ, structure, system or function of the body probably necessitate medical treatment as near as possible to the time of device failure detection or the observed onset of an adverse reaction. If the effects of such injuries or illnesses can be reversed, abated or prevented from having long-term sequelae by nonsurgical, medical techniques, the injuries or illnesses are not serious adverse health consequences. However, if significant surgical intervention is required to replace a failed or defective implant or to prevent the injury or illness from having irreversible or long-lasting effects, the illness or injury is a serious adverse health consequence.

C. Critical Devices Versus Tracked Devices

As noted earlier, among the postmarket controls provided to FDA under the 1976 amendments was the authority to require CGMP's for the methods used in and the facilities and controls used for the manufacture, packaging, storage, and installation of a device (sec. 520(f) of the act (21 U.S.C. 360j(f))). Under this authority, FDA promulgated regulations that imposed general CGMP requirements for all devices. FDA, under the sections 519 and 520(f) of the act, also imposed additional CGMP requirements on manufacturers of certain devices, termed "critical devices." One of these additional CGMP controls was a traceability requirement which requires the manufacturer of a critical device to keep records tracking the device to the first level of distribution. See 21 CFR 820.14, 820.151, 820.185.

A "critical device" is "a device that is intended for surgical implant * * * or to support or sustain life and whose failure to perform when properly used * * * can be reasonably expected to result in a significant injury to the user." 21 CFR 820.3(f). These terms are similar to terms used in section 519(e). Guidance that the agency has provided to clarify the types of devices which it considers to be critical devices (a 1988 advisory list), therefore, may be of some use in identifying tracked devices. However, FDA emphasizes that, as guidance, the "Advisory List of Critical Devices—1988" (53 FR 8854 through 8858, March 17, 1988 (Ref. 15)) has limitations as the list was published in 1988 and was never intended to be an exhaustive compilation of critical devices. To ensure that no undue reliance is placed on this list, FDA will discuss the differences that must be kept in mind when examining the critical devices list and distinguishing between critical devices and tracked devices.

Only permanently implantable devices that are intended to perform their function in an active and continuous manner in the body, thoughout the useful life of the device, or are not intended to be explanted must be tracked. A number of implantable devices shown on the 1988 critical devices list do not meet these criteria and are not subject to tracking requirements on this basis. Examples of such devices that are not required to be tracked, include: Indwelling blood oxygen partial pressure (PO_2) analyzer (21 CFR 868.1200), trace microsphere (21 CFR 870.1360), absorbable surgical gut suture (21 CFR 878.4830), and smooth or threaded metallic bone fixation fastener (21 CFR 888.3040).

Only life-sustaining or life-supporting devices intended for use outside device user facilities must be tracked. Life-sustaining or life-supporting devices that are intended for use in, distributed to, and exclusively used in device user facilities are not subject to tracking requirements. Examples of such devices, taken from the 1988 critical devices list, that are not required to be tracked due to this distinction include: medical equipment (autotransfusion apparatus, 21 CFR 868.5530); therapeutic devices (tracheal/bronchial differential ventilation tube, 21 CFR 868.5740); diagnostic devices (withdrawal-infusion pump, 21 CFR 870.1800); and monitoring devices (arrythmia detector and alarm, 21 CFR 870.1025).

Critical devices present the reasonable expectation that their failure would cause "significant injury." Tracked devices, on the other hand, present a reasonable likelihood of "serious adverse health consequences" in the event of failure. Distinctions between "significant injury" and "serious adverse health consequences" are a matter of judgment, degree, and definition. An injury to an already impaired organ or structure of the human body that is important to life and health is inherently significant. When the effects of such an injury or illness caused by device failure are life-threatening, permanent or long-term, the injury or illness is also a serious adverse health consequence. Examples of devices, taken from the 1988 critical devices list, that are not required to be tracked because their failure would probably cause a significant injury, but not a serious adverse health consequence include: Single/multiple component metallic bone fixation appliances and accessories (21 CFR 888.3030), finger joint polymer constrained prosthesis (21 CFR 888.3230), toe joint polymer constrained prosthesis (21 CFR 888.3720) and toe joint phalangeal (hemi-toe) polymer prosthesis (21 CFR 888.3730).

D. Examples of Devices Subject To Tracking

As further guidance, FDA is providing a list of devices that FDA believes are subject to the tracking provisions of section 519(e)(1) of the act. As explained previously, this list is included in the proposed text of the tracking regulation (§ 821.20(b)(1) and (b)(2)) and is to be published in the Code of Federal Regulations. The devices are identified by classification names established in FDA's classification regulations (21 CFR parts 862 through 892) and are preceded by the part and section number of the applicable classification regulation. These devices are ones that FDA believes meet the criteria for tracking, based on information available to the agency. Absent additional information or a reevaluation of available information, FDA does not now foresee taking enforcement action based on a manufacturer's failure to track devices that FDA has not placed on the illustrative list or for which manufacturers have not received any notice. (Of course, this approach would not apply if the device was being distributed without the requisite clearance from FDA, since FDA would not have been aware that the device was being distributed and would not have been able to give any kind of notice.) FDA notes that other devices may also meet the criteria for tracking, based on information not currently available to the agency. It is initially the responsibility of the manufacturer to make this distinction, subject, of course, to the agency's primary jurisdiction to interpret its statutes and regulations. FDA welcomes inquiries and consultation on whether additional devices are required to be tracked.

E. Manufacturer Requirements

1. Requirements for Device Tracking Systems

The proposed rule does not mandate how a manufacturer implements the tracking requirements or tracks a device. FDA has chosen to allow manufacturers with tracking obligations to develop the detailed plans, procedures, methods, and means of tracking, so they can implement tracking systems most suitable in light of the tracked device and the manufacturer's distribution system, resources, computer capability, and recordkeeping processes. The tracking system requirements are only specific in that they mandate the minimum characteristics of a tracking system, the data which must be collected and maintained, and the standards by which to measure the effectiveness of the tracking system.

The proposed rule establishes the following standards for device tracking systems.

a. The manufacturer must be able to furnish FDA, within 3 working days of a request, with the location and identity of all persons currently holding or using a tracked device (proposed § 821.25(a)).

b. The manufacturer must collect and keep current records of certain patient identification and device location data for the useful life of the device (i.e., as long as the device is in distribution or use) (proposed §§ 821.25(b) and 821.60).

c. The tracking system must be based on a written SOP for the uniform collection, maintenance, and manipulation of the required distribution and user information (proposed § 821.25(c)(1) and (c)(2)).

d. The tracking system SOP must include a quality assurance program that incorporates: (1) Written procedures for auditing the accuracy of required distribution and user information; and (2) written procedures for auditing the functioning of the device tracking system, including the adequacy of the reporting, and information collection and maintenance procedures of distributors, final distributors, multiple distributors, and outside organizations that implement the manufacturer's device user tracking system (proposed § 821.25(c)(3)).

These standards do not preclude the use of patient registries or implant registries as long as such registries comply with the tracking requirements mandated by the proposed rule. Nor do these standards restrict or prohibit the use of outside consultant or specialist organizations from assisting a manufacturer in developing an effective tracking program or from assisting a manufacturer in implementing a tracking system. However, as set out in the proposed § 821.1(b), in both instances, the agency considers any tracking program and tracking system developed and implemented by an outside organization to be the manufacturer's responsibility, and the manufacturer

bears full responsibility for assuring compliance with the requirements of the proposed rule.

2. Data Collection and Maintenance

Proposed § 821.25(b) sets out the product, distribution, and patient identification information that must be obtained, recorded, and maintained (updated) by a manufacturer in an effective tracking system.

Manufacturers must obtain, record, and maintain the identity of each tracked device they distribute. Tracked devices must be identified in a unique manner that distinguishes a device from other units and other models of the device and from comparable devices of different manufacturers. If product model, lot, and serial numbers do not distinguish between units of a device, the manufacturer must adopt unique tracking designations for device units. Thus, the proposed rule does have the effect of requiring manufacturers to uniquely identify each tracked device distributed, if they do not already do so. Without such a requirement, tracking would be unworkable.

Manufacturers must obtain, record, and maintain the following distribution information in a tracking system: (1) The date the device was shipped by the manufacturer; and (2) the name, address, and telephone number of distributors, multiple distributors and final distributors in the distribution network between the manufacturer and the patient.

Manufacturers must obtain, record, and maintain the following patient or user information in a tracking system: For single-patient-use devices, the name, address, telephone number, and social security number of the patient; the date the patient received the device; and for multiple-patient-use devices, the name, address, and telephone number of the multiple distributor. In addition, in the case of single-patient-use devices, manufacturers must obtain, record, and maintain the name and location of the licensed practitioner who prescribed and/or implanted the device, who explanted the device (if applicable), or who treats the patient. This information, in conjunction with the required distribution information, is indispensable to the conduct of timely recalls and notification of patients or licensed practitioners when serious adverse health consequences or unreasonable risks of substantial public harm associated with the use of a device warrant such actions. FDA believes that the Social Security number may be a very useful tool in tracking patients. FDA is also sensitive, however, to concerns about including Social Security numbers in records. Therefore, FDA notes that Social Security numbers may be supplied to the tracking system only with the consent of the patient.

In addition, the proposed rule provides for the collection of information that will terminate a manufacturer's responsibility to track a particular device, including the date the device was explanted, first returned to the manufacturer or any other person in the distribution network, or the date the device was permanently retired from use or otherwise permanently disposed of. Removal of devices from use because they no longer function as intended in a safe and effective manner due to age should result in the destruction of the devices and terminate tracking. Removal of implanted devices from patients and device returns to the manufacturer may temporarily interrupt or permanently terminate tracking of the products depending upon whether the devices are destroyed or reworked and further distributed as safe and effective devices. (However, tracked devices returned to multiple distributors which remain available for further distribution must be tracked by the multiple distributor to the next patient.)

FDA has chosen not to mandate the use of labeling or tracking forms to implement section 519(e) of the act. Nevertheless, the agency encourages the use of such labeling. FDA believes that labeling, tracking forms, invoice notations, or other written notices that alert distributors, multiple distributors, and final distributors that a device must be tracked can only improve the effectiveness of a manufacturer's tracking system.

FDA considers licensed practitioners, hospitals, and ambulatory surgical facilities to be key links to patients when tracking permanent implants and single-patient-use life-sustaining or life-supporting devices since they, as a result of their relationship with the patient, should possess reliable and accurate patient information. A manufacturer should, therefore, devote special effort to designing a tracking system that facilitates required reporting from these persons back to the manufacturer. Likewise, with respect to multiple-patient-use tracked devices, tracking methods put in place by a manufacturer should provide for the accurate and complete recording of tracking information by multiple distributors to facilitate satisfactory recordkeeping and prompt transmission of the necessary data to the manufacturer.

The agency is not aware of any one method that most effectively keeps track of the identity and current location of patients with tracked devices. In the case of permanent implants, after initial collection of the required data, a combination of tracking methods will probably be necessary to make sure the records are current, including preaddressed postcards given to patients by the final distributor intended to be completed and returned to the manufacturer if the patient moves or changes names; the use of cost rebates contingent upon the receipt of solicited information from the patient; periodic mailings or phone communication to patients; and postal service forwarding address lists to identify the changed address of a patient which was not otherwise obtained. FDA considers it extremely unlikely, however, that exclusive use of physician or patient return cards or other tracking methods intended solely to identify the patient at time of receipt would enable the manufacturer to meet the standard of proposed § 821.25(a) (i.e., provide FDA with patient and device data within 3 working days).

FDA is aware of the fact that the accuracy of the information in the tracking system depends, to some extent, on the cooperation of persons beyond the control of the manufacturer or distributor, namely the physician or patient. FDA is requiring only that persons required to track a device demonstrate a "good faith" effort to collect the information and are able to demonstrate to FDA why information is not in the tracking system. We are particularly interested in receiving comments from manufacturers and distributors as to the methods they expect to use to track the patient-recipients of implantable devices and the patient-users of purchased or rented devices. We are also interested in receiving any data on the problems with or the success of current tracking programs.

3. Audit Requirements

An effective audit, FDA believes, should combine in-house paperwork and process reviews with external audits of information provided by distributors, final distributors, and multiple distributors. FDA believes that auditing at 6-month intervals is necessary to ensure the accuracy of data in the tracking system. The audit requirements apply to each device product line being tracked by the manufacturer. Further, the auditing should provide for a statistically relevant sampling of the data and information to be obtained to ensure data accuracy and proper functioning of the tracking system. The agency believes that an audit is necessary every 6 months to ensure the proper functioning of the tracking system. The audit of the functioning of the system should include visiting or communicating with the persons upon whom the manufacturer relies for information, (i.e., distributors, final distributors, multiple distributors, and patients or users possessing the device). The purpose of data and performance audit requirements is to ensure that, if FDA orders a recall or patient notification, the tracking system will contain current, accurate patient identity and product location information.

Requiring the SOP to include a procedure to record changes or modifications made to existing data in the tracking system and changes made in the format used to maintain such data, including the dates on which such changes were made, provides information essential to data integrity. When errors in data are found, this record will provide a timeframe for initiating efforts to collect corrected distribution or patient identification information. Such a record may also be used to identify what data in the tracking system has been audited and at what time.

4. Distribution Requirements

Proposed § 821.1(d) and § 821.35(d) prohibit manufacturers from distributing tracked devices to any distributor, final distributor, or multiple distributor if a manufacturer knows, or should know, that required tracking information has not been collected, reported, or maintained by any such person. This prohibition does not apply when noncompliance is caused by the refusal of patients to provide necessary information despite reasonsable efforts by the manufacturer or distributor to obtain it. FDA notes that manufacturers have no excuse for failing to comply with this requirement: any tracking system put in place by a manufacturer of a tracked device must record that data on a tracked device is missing and why such data was not obtained (proposed § 821.25(c)(1)). In addition, FDA advises that it believes that manufactures have an affirmative duty to investigate when a particular distributor, multiple distributor, or final distributor frequently fails to provide information and claims it is due to patient refusals. Finally, a manufacturer must report the matter to FDA as required by proposed § 821.25(d).

The agency does not believe this sanction is as burdensome as it appears at first glance. If the sanction is applied consistently by all manufacturers, no competitive advantage or disadvantage would accrue to any manufacturer. FDA also believes that this sanction is the best protection a tracking manufacturer has against being held accountable for the noncompliance of others.

F. Tracking Obligations of Persons Other Than Manufacturers

Proposed § 821.30(a) imposes slightly different collection, reporting, and recordkeeping requirements on the persons involved in the distribution of tracked devices, depending on the type of device tracked (e.g., single- or multiple-patient-use) and role of that person in the distribution system.

Distributors (those persons between the manufacturer and the person who distributes the device to a patient) have the least to collect and report back. Upon receipt of a tracked device, they must provide the manufacturer with device identification information (name and model, serial number, and lot number), the date of receipt, and from whom they received the device (proposed § 821.30(a)(1) through (a)(4)). FDA is requiring distributors to report this information because it is necessary to ensure an effective recall or notification. After distribution of a tracked device, a distributor must provide to the manufacturer, if applicable and if known to the distributor, with information on explantation, patient death, returns, and retirement or other permanent disposition of a tracked device (proposed § 821.30(a)(5)). FDA is requiring reporting of this information back to the manufacturer so the manufacturer knows it can terminate tracking.

Final distributors (e.g., retailers, licensed practitioners, hospitals who distribute tracked devices to the patient, whether permanent implants, single-patient-use life-sustaining or life-supporting devices or devices designated for tracking), upon receipt of a tracked device, must provide the manufacturer with device identification information (name and model, serial number, and lot number), the date of receipt, and from whom they received the device (proposed § 821.30(a)(1) through (a)(4)). FDA is requiring final distributors to report this information because it is critical to ensure an effective recall or notification. Upon distribution of a tracked device to the patient, a final distributor must provide to the manufacturer patient information and certain physician information (proposed § 821.30(b)(1) through (b)(6)). Finally, if applicable and if known to the final distributor, the final distributor must provide the manufacturer with information on explantation, patient death, returns, and retirement or other permanent disposition of a tracked device (proposed § 821.30(b)(7)). FDA is requiring reporting of this information back to the manufacturer so the manufacturer knows it can terminate tracking.

Multiple distributors (persons who distribute to patients tracked devices intended for multiple-patient-use), in addition to similar collection and reporting responsibilities, must comply with certain recordkeeping requirements. Multiple distributors, upon receipt of a tracked device, must provide to the manufacturer device identification information (name and model, serial number, and lot number), the date of receipt, and from whom they received the device (proposed § 821.30(a)(1) through (a)(4)). As discussed above, reporting this information is necessary to ensure an effective recall or notification. Upon distribution of a tracked device to the patient, a multiple distributor must collect and maintain patient information and certain physician information, but need not report it to the manufacturer unless the manufacturer requests it (proposed § 821.30(c)(1) and (c)(2)). Finally, when applicable, the multiple distributor must provide the manufacturer with information on retirement or other permanent disposition of a tracked device (proposed § 831.30(c)(1)(viii)). Once again, FDA is requiring reporting of this information back to the manufacturer so the manufacturer knows it can terminate tracking.

FDA recognizes that the proposed rule may appear to affect multiple distributors more than other types of distributors. However, the durable medical equipment distributed by these person includes many life-supporting or life-sustaining devices that are used outside device user facilities. Any regulation that did not take into account this aspect of the device distribution system would not serve the statutory mandate. FDA believes that the proposed rule provides for the most effective and least costly manner of tracking multiple-patient-use devices. FDA has determined that requiring a manufacturer to keep constant track of each multiple-patient-use device would be overwhelming and unnecessary as long as a manufacturer can obtain current patient and device location information if it needs to. Moreover, FDA believes that the data that multiple distributors must keep under the proposed rule are largely data they currently collect in the normal course of business.

G. Termination of Tracking Responsibilities

All persons subject to this proposed rule must continue their tracking obligations for the useful life of each tracked device they manufacture or distribute. The useful life of a tracked device is the time a device is in use or in distribution for use (proposed § 821.60).

The proposed rule contains one exception to this requirement. Persons subject to this rule that are going out of business, permanently and completely, shall notify the appropriate FDA field office of their intention at the time they notify any government agency, court, or any supplier, and make arrangements to provide FDA with a complete set of their tracking records and information. FDA advises that this provision of the proposed rule does not apply to the following situations: (1) If a person ceases distribution of a tracked device but still continues to do other business, the person shall continue to track distributed devices for the remainder of the devices' useful life. (This holds true even if another person acquires the distribution rights to the device, unless that person, affirmatively and in writing, assumes responsibility for continuing the tracking of the devices previously distributed.); (2) If a person goes out of business completely, but other persons acquire the right to manufacture or distribute tracked devices from that person, those other persons are required to be responsible for continuing the tracking responsibilities of the previous manufacturer, distributor, multiple distributor, or final distributor.

H. Records

Under section 704 of the act, FDA's inspection authority extends to data relating to devices subject to reporting and inspection under regulations issued under section 519 of the act.

In general, FDA expects manufacturers to be able to produce records required under the proposed rule within 24 hours of the initiation of an inspection by the presentation of the FDA representative's official credentials and the issuance of Form FD 482, notice of inspection. This includes records and information required to be kept by regulations that are in the possession of others under contract with the manufacturer to conduct the manufacturer's tracking program.

I. Confidentiality

FDA has a longstanding policy of carefully guarding the privacy of individual patients and research subjects by fully observing the provisions of both the Freedom of Information Act and the Privacy Act. These statutes protect the confidentiality of personal information about individuals in agency records to the fullest possible extent. FDA's regulations implementing these statutes prohibit, with certain exceptions, the public disclosure of information in medical or similar records if that information would identify individual patients. See 21 CFR 20.63 and 21.10.

J. Compliance

The agency will review manufacturers' detailed, product-specific device tracking systems and user tracking programs during both regularly scheduled inspections and inspections initiated to investigate recalls and similar actions. As part of these inspections, the agency will also review manufacturers' quality assurance programs and audits under these regulations. In addition, persons with device tracking obligations other than manufacturers will be subject to periodic inspections, probably in association with specific recall matters.

K. Failure To Track

The tracking regulations are enforced through sections 502, 301, 302, 303, and 304 of the act. Under section 502(t)(2) of the act (21 U.S.C 352(t)(2)) a device is misbranded if there is a failure or refusal to submit information about the device that is required under section 519 of the act. Under section 301(a) of the act (21 U.S.C. 331(a)) the introduction of a misbranded device into interstate commerce is prohibited. Under section 301(b) of the act (21 U.S.C 331(b)) the misbranding of a device in interstate commerce is prohibited. Under section 301(k) of the act (21 U.S.C. 331(k)) any act which results in a device being misbranded after its shipment in interstate commerce is prohibited. Furthermore, under section 301(q)(1)(B) of the act (21 U.S.C. 331(q)(1)(B)) the failure or refusal to furnish any information required under section 519 of the act is prohibited. Under section 301(q)(2) of the act (21 U.S.C. 331(q)(2)) the submission of any required report that is false or misleading in any material respect is prohibited. Violations of section 301 of the act may be enjoined under section 302(a) of the act (21 U.S.C. 332(a)). Persons who are responsible for the violation of section 301 may be subject to criminal prosecution under section 303 of the act (21 U.S.C. 333). Devices that are misbranded within the meaning of section 502(t) of the act are subject to seizure and condemnation under section 304(a)(2) of the act (21 U.S.C. 334(a)(2)). Finally, under section 303(f) of the act (21 U.S.C. 333(f)), any person who commits a major violation of section 519(e) of the act may be subject to civil money penalties.

VII. Effective Date

Section 519(e) of the act becomes effective on the date that final regulations go into effect, or on May 28, 1992, whichever occurs first. Section 3(c)(A)(ii) of the SMDA directs FDA to issue proposed regulations implementing section 519(e) of the act within 9 months of enactment (by August 28, 1991). Section 3(c)(2) further directs FDA to issue final regulations not later than 18 months after enactment (by May 28, 1992). Section 3(c)(2) of the SMDA provides that if, after 18 months, final regulations have not been issued, the proposed regulations will become final. In the event this occurs, notice of this change in status of the proposed regulation will be published in the **Federal Register.**

VIII. Environmental Impact

The agency has determined under 21 CFR 25.24(a)(8) and (e)(2) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

IX. Economic Impact

FDA has performed a threshold assessment to determine whether the requirements of the Medical Device Tracking regulation have sufficient economic impact to warrant a regulatory impact analysis in accordance with the requirements of Executive Order 12291 or a regulatory flexibility analysis under the Regulatory Flexibility Act (Pub. L. 96–354).

Based on the preliminary cost analysis below, the economic impact on industry will not exceed the $100 million threshold established under Executive Order 12291. Accordingly, the agency concludes that the rule is not a major rule under the criteria included in the Executive Order.

FDA believes this estimate is accurate on the basis of available data, however there are many aspects of current device tracking information about which FDA has little or no knowledge. Consequently, we solicit comment in response to the following questions to better estimate the costs and benefits:

1. How many device manufacturers currently use some form of tracking system?
2. What types of tracing systems do device manufacturers currently use?
3. To what extent would established tracking systems need to be adapted to meet the proposed requirements?
4. Which provisions of the proposed requirements would require completely new additions to, or restructuring of, current tracking systems?
5. What are the estimated costs to manufacturers of developing new systems, adding new components to existing systems, or making incremental changes to existing systems in order to meet the proposed tracking requirements?
6. Which standards in the proposed tracking requirement hinder the development by manufacturers of a cost-effective tracking system?
7. How and to what degree can the proposed tracking requirements for distributors be assimilated into the data systems that distributors currently use?
8. What are the costs to distributors of adapting their data systems to fit the proposed requirements?
9. What benefits would result from the proposed tracking systems in terms of standard business practices as well as improved ability to track and recall? The agency has identified 35 device types that are illustrative of devices subject to mandatory tracking (though not necessarily the only devices). Most of the illustrative devices are "critical devices," and the manufacturers of these devices already have to maintain appropriate distribution records that trace the devices to the first consignee under the CGMP regulations.

The preliminary estimated annual cost of medical device tracking, after a steady state condition is reached in about 7 years, is $41.1 million, consisting of $18.2 million to track breast implants, and $22.1 million to track the other permanently implanted devices and $0.8 million to track devices used outside of the device user facilities. These costs affect a relatively small number of manufacturers, 372 in total, which leads to an average impact of $110,000. The bulk of the impact is highly concentrated on a relatively few manufacturers, however. For instance, each of the 15 manufacturers of breast implants will experience a cost increase of over $1.2 million, on the average. The 40 manufacturers of heart valves, pacemakers and pacemaker leads will bear an estimated cost increase of $460,000 each. (The remaining 317 manufacturers will have cost increases averaging $14,500 each.) Of the 55 manufacturers bearing the largest impact, 22 of them are small (fewer than 50 employees). It is possible that some of these smaller manufacturers (and even some of the larger ones) may have difficulty in passing on some or all of the costs of tracking. Therefore, it is likely that some manufacturers will leave the implant market.

A copy of the agency's threshold assessment of the requirements for medical device tracking is on file at the Dockets Mangement Branch (address above) and may be seen in that office between 9 a.m. and 4 p.m., Monday through Friday.

X. Paperwork Reduction Act of 1980

This proposed rule contains information collections which are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1980 (44 U.S.C. chapter 35). The title, description and respondent description of the information collection are shown below with an estimate of the annual reporting and recordkeeping burden. Included in the estimate is the time for reviewing requirements and instructions, searching existing sources of distribution data, gathering and maintaining the data needed, and completing and reviewing the collection of information.

Title: Medical Device Tracking Requirements under section 519(e) of the act.

Description: FDA is proposing to implement the device tracking requirements of section 519(e) of the act, as added to the act by section 3(b)(1) of the SMDA (Pub. L. 101–629).

The agency is requiring that manufacturers, including repackers, relabelers, importers and others, of devices the failure of which would be reasonably likely to have serious adverse health consequences, if the devices are either premanently implantable devices or life-sustaining or life-supporting devices used outside device user facilities, or otherwise designated by FDA for tracking, adopt a method of tracking such devices throughout distribution to the device user or patient. Manufacturers (including others identified as manufacturers) and their device tracking systems and distributors, final distributors, and multiple distributors of the manufacturers' products, are required by the regulation to gather, record, maintain, and furnish to FDA, upon request, the location of the aforementioned types of devices, and the name and address of current users of the devices. The purpose of these tracking requirements is to facilitate identifying the current location of certain types of devices and the identity of all persons using the devices to enable manufacturers and FDA to expedite the recall of distributed devices that are dangerous or defective, and to facilitate the timely notification of patients or licensed practitioners of risks associated with such devices.

Description of Respondents: Manufacturers and other parties involved in the manufacture and distribution of certain devices.

ESTIMATED ANNUAL RECORDKEEPING BURDEN

Section	Annual number of respondents	Average burden per response	Annual burden (hours)
821.25(a)	[1]372	344.0	127,968
821.25(b)(c)(d)	376,000	0.2	75,200
821.30(a)(b)(c)	500,000	0.2	100,000
Total			303,168

[1] This part of the burden for § 821.25(a) is a one-time burden for setting up a tracking system.

ESTIMATED ANNUAL REPORTING BURDEN

Section	Annual number of respondents	Average burden per response (hours)	Total annual burden (hours)
821.25(d)	8	4	32

As required by section 3504(h) of the Paperwork Reduction Act of 1980, FDA has submitted a copy of this proposed rule to OMB for its review of these information collection requirements. Other organizations and individuals desiring to submit comments regarding this burden estimate or any aspects of these information collection requirements, including suggestions for reducing the burden, should direct to FDA's Dockets Management Branch (address above) and to the Office of Information and Regulatory Affairs, OMB, rm. 3208, New Executive Office Bldg., Washington, DC 20503, Attn: Officer for FDA.

XII. Request for Comments

Interested persons may, on or before May 26, 1992, submit to the Dockets Management Branch (address above) written comments regarding this proposal. Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. Received comments may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

List of Subjects in 21 CFR Part 821

Device tracking, Medical devices, Reporting and recordkeeping requirements.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs, it is proposed that 21 CFR part 821 be added to read as follows:

PART 821—MEDICAL DEVICE TRACKING REQUIREMENTS

Subpart A—General Provision

Sec.
821.1 Scope.
821.3 Definitions.

Subpart B—Tracking Requirements

821.20 Devices subject to tracking.
821.25 Device tracking system and content requirements: Manufacturer requirements.

Subpart C—Additional Requirements and Responsibilities

821.30 Tracking obligations of persons other than device manufacturers: distributor requirements.

Subpart D—Records and Inspections

821.50 Availability.
821.55 Confidentiality.
821.60 Retention of records.

Authority: Secs. 502, 518, 519, 701, and 704 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 352, 360h, 360i, 371, and 374).

Subpart A—General Provisions

§ 821.1 Scope.

(a) The regulations in this part implement section 519(e) of the Federal Food, Drug, and Cosmetic Act (the act) which requires the adoption of a method of device tracking by any person who registers under section 510 of the act and is engaged in the manufacture and distribution of devices the failure of which would be reasonably likely to have serious adverse health consequences if the devices are life-sustaining or life-supporting devices used outside of a device user facility or are permanently implantable devices. This part also applies to any other device that the Food and Drug Administration (FDA) designates as requiring a method of tracking to protect the public health. A device subject to this part either by statutory requirement or by FDA designation is referred to herein as a "tracked device."

(b) These regulations are intended to ensure that tracked devices can be traced from the device manufacturing facility to the person for whom the device is indicated, that is, the patient. Effective tracking of devices from the manufacturing facility, through the distributor network (including distributors, retailers, rental firms and other commercial enterprises, device user facilities and licensed practitioners) and, ultimately, to any person for whom the device is intended is necessary for the effectiveness of remedies prescribed by the act, such as patient notification (section 518(a) of the act) or device recall (section 518(e) of the act). Although these regulations do not preclude a manufacturer from involving outside organizations in that manufacturer's device tracking effort, the legal responsibility for complying with this part rests with manufacturers who must register under section 510 of the act, and that responsibility cannot be altered, modified, or in any way abrogated by contracts or other agreements.

(c) Each manufacturer of a tracked device shall implement a method of tracking devices by (insert date 30 days after date of publication of the final rule in the **Federal Register**) or May 28, 1992, whichever occurs first.

(d) Under section 301(q)(1)(B) of the act, it is prohibited for a manufacturer to distribute a tracked device to any distributor, final distributor, or multiple distributor when a manufacturer knows or should know that such person has failed to collect, maintain, or furnish any record or information required by this part. If, however, to the extent such a person, despite reasonable efforts, cannot collect, maintain, or furnish such required records or information because of refusals by patients to provide the necessary information, FDA may exempt a manufacturer from the sanction in the preceding sentence.

(e) The failure of a manufacturer or any other person, including a distributor, final distributor, or multiple distributor, who distributes a device subject to tracking to comply with any applicable requirement of this part renders the device misbranded within the meaning of section 501(t) of the act and further constitutes a prohibited act within the meaning of section 301(q)(1)(B) of the act.

(f) Any person subject to this part who permanently discontinues doing business is required to notify FDA at the time they notify any government agency, court, or supplier, and provide FDA with a complete set of its tracking records and information. However, if a person ceases distribution of a tracked device but continues to do other business, that person continues to be responsible for compliance with this part unless another person, affirmatively and in writing, assumes responsibility for continuing the tracking of devices previously distributed under this part. Further, if a person subject to this part goes out of business completely, but other persons acquire the right to manufacture or distribute tracked devices, those other persons are deemed to be responsible for continuing the tracking responsibility of the previous person under this part.

§ 821.3 Definitions.

The following definitions and terms apply to this part:

(a) *Act* means the Federal Food, Drug, and Cosmetic Act, 21 U.S.C. 321 et seq., as amended.

(b) *Importer* means the initial distributor of an imported device who is required to register under section 510 of the act and § 807.20 of this chapter. "Importer" does not include anyone who only performs a service for the person who furthers the marketing, i.e., brokers, jobbers, or warehousers.

(c) *Manufacturer* means any person, including any importer, repacker and/or relabeler, who manufactures, prepares, propagates, compounds, assembles, or processes a device or engages in any of the activities described in § 807.3(d) of this chapter.

(d) *Device failure* means the failure of a device to perform or function as intended, including any deviations from the device's performance specifications or intended use.

(e) *Serious adverse health consequences* means any significant adverse experience related to a device, including device-related events which are life-threatening or which involve permanent or long-term injuries or illnesses.

(f) *Permanently implantable device* means a device that is intended to be placed into a surgically or naturally formed cavity of the human body to continuously assist, restore, or replace the function of an organ system or structure of the human body throughout the useful life of the device. The term does not include any device which is intended and used for temporary purposes or which is intended for explantation.

(g) *Life-supporting or life-sustaining device used outside a device user facility* means a device which is essential, or yields information that is essential, to the restoration or continuation of a bodily function important to the continuation of human life that is intended for use outside a hospital, nursing home, ambulatory surgical facility, or diagnostic or outpatient treatment facility. Physicians' offices are not device user facilities and, therefore, devices used therein are subject to tracking if they otherwise satisfy the statutory and regulatory criteria.

(h) *Distributor* means any person who furthers the distribution of a device from the original place of manufacture to the person who makes delivery or sale to the ultimate user, i.e., the final or multiple distributor but who does not repackage or otherwise change the container, wrapper, or labeling of the device or device package.

(i) *Final distributor* means any person who distributes a tracked device intended for use by a single patient over the useful life of the device to the patient. This term includes, but is not limited to, licensed practitioners, retail pharmacies, hospitals, and other types of device user facilities.

(j) *Distributes* means any distribution of a tracked device, including the charitable distribution of a tracked device. This term does not include the distribution of a device under an effective investigational device exemption in accordance with section 520 (g) of the act and part 812 of this chapter or the distribution of a device for teaching, law enforcement, research, or analysis as specified in § 801.125 of this chapter.

(k) *Multiple distributor* means any device user facility, rental company, or any other entity that distributes a life-sustaining or life-supporting device intended for use by more than one patient over the useful life of the device.

(l) *Licensed practitioner* means a physician, dentist, or other health care practitioner licensed by the law of the State in which he or she practices to use or order the use of the tracked device.

(m) Any term defined in section 201 of the act shall have the same definition in this part.

Subpart B—Tracking Requirements

§ 821.20 Devices subject to tracking.

(a) A manufacturer of any device the failure of which would be reasonably likely to have a serious adverse health consequence, that is either a life-sustaining or life-supporting device used outside of a device user facility or a permanently implantable device, or a manufacturer of any other device that FDA, in its discretion, designates for tracking, shall track that device in accordance with this part.

(b) Manufacturers have the responsibility to identify devices that meet the criteria for tracking and to initiate tracking. By way of illustration and to provide guidance, FDA has set out below a list of example devices it regards as subject to tracking under the criteria set forth in this regulation.

(1) PERMANENTLY IMPLANTABLE DEVICES

21 CFR	Classification
870.3260	Vena cava clip.
870.3375	Cardiovascular intravascular filter.
870.3450	Vascular graft prosthesis of less than 6 millimeters diameter.
870.3460	Vascular graft prosthesis of 6 millimeters and greater diameter.
870.3470	Intracardiac patch or pledget made of polypropylene, polyethylene terephthalate, or polytetrafluoroethylene.
870.3545	Ventricular bypass (assist) device.
870.3610	Implantable pacemaker pulse generator.
870.3680	Cardiovascular permanent pacemaker electrode.
870.3800	Annuloplasty ring.
870.3925	Replacement heart valve.
(no cite)	Automatic implantable cardioverter/defibrillator.
878.3720	Tracheal prosthesis.
882.5150	Intravascular occluding catheter.
882.5200	Aneurysm clip.
882.5550	Central nervous system fluid shunt and components.

(1) PERMANENTLY IMPLANTABLE DEVICES—Continued

21 CFR	Classification
882.5820	Implanted cerebellar stimulator.
882.5830	Implanted diaphragmatic/phrenic nerve stimulator.
882.5950	Artificial embolization device.
888.3050	Spinal interlaminal fixation orthosis.
888.3060	Spinal intervertebral body fixation orthosis.

(2) LIFE-SUSTAINING OR LIFE-SUPPORTING DEVICES USED OUTSIDE DEVICE USER FACILITIES

21 CFR	Classification
868.2375	Breathing frequency monitors (apnea monitors).
868.2700	Pressure regulator, including mechanical oxygen regulators.
868.5440	Portable oxygen generator, including oxygen concentrators.
868.5655	Portable liquid oxygen unit.
868.5800	Tracheostomy tube and tube cuff.
868.5895	Continuous ventilator.
868.5905	Noncontinuous ventilator (IPPB).
870.5300	DC-defibrillator (including paddles).
876.5830	Peritoneal dialysis system and accessories, including: Chronic ambulatory (adult) and chronic pediatric (infant) peritoneal dialysis systems.
880.5725	Infusion pumps.

(c) FDA designates the following devices as subject to tracking. Manufacturers must track these devices in accordance with this part.

21 CFR	Classification
878.3530	Silicone inflatable breast prosthesis.
878.3540	Silicone gel-filled breast prosthesis.
876.3750	Testicular prosthesis, silicone gel-filled.
(no cite)	Silicone gel-filled chin prosthesis.
(no cite)	Silicone gel-filled angel chik reflux valve.

(d) FDA, when responding to premarket notification submissions and approving premarket approval applications, will notify the sponsor that FDA believes the device meets the criteria of section 519(e)(1) and therefore should be tracked. FDA will also, after notifying the sponsor, publish a notice in the **Federal Register** announcing that FDA believes a new generic type of device is subject to tracking and soliciting comment on FDA's position. If the device is a new generic type of device not already on the example list above, FDA will add it to this list.

§ 821.25 Device tracking system and content requirements: manufacturer requirements.

(a) A manufacturer of a tracked device shall adopt a method of tracking for each such type of device that it

distributes that enables a manufacturer to, within 3 working days of a request from FDA, provide FDA with the following information in writing for each tracked device distributed:

(1) Prior to the distribution of a tracked device to a multiple distributor or a patient, the name, address, and telephone number of the distributor or final distributor holding the device for distribution and the location of the device;

(2) For life-sustaining or life-supporting devices used outside a device user facility that are intended for use by a single patient over the life of the device and permanent implants that are tracked devices, after distribution to or implantation in a patient:

(i) The model number of the device or other identifier that identifies each unique version of the device;

(ii) The serial number of the device or other identifier that is unique to that individual device;

(iii) The date the device was shipped by the manufacturer;

(iv) The name, address, telephone number, and social security number (if available) of the patient receiving the device;

(v) The date the device was provided to the patient;

(vi) The name, mailing address, and telephone number of the prescribing physician;

(vii) The name, mailing address, and telephone number of the physician regularly following the patient if different than the prescribing physician; and

(viii) If applicable, the date the device was explanted and the name, mailing address, and telephone number of the explanting physician; the date of the patient's death; or the date the device was returned to the manufacturer, permanently retired from use, or otherwise permanently disposed of.

(3) For life-sustaining or life-supporting devices used outside device user facilities that are intended for use by more than one patient and that are tracked devices, after the distribution of the device to the multiple distributor:

(i) The model number of the device or other identifier that identifies each unique version of the device;

(ii) The serial number of the device or other identifier that is unique to that individual device;

(iii) The date the device was shipped by the manufacturer;

(iv) The name, address, and telephone number of the multiple distributor;

(v) The name, address, telephone number, and social security number (if available) of the patient using the device;

(vi) The location of the device;

(vii) The date the device was provided for use by the patient;

(viii) The name, address, and telephone number of the prescribing physician; and

(ix) If and when applicable, the date the device was returned to the manufacturer, permanently retired from use, or otherwise permanently disposed of.

(b) A manufacturer of a tracked device shall keep current records in accordance with its standard operating procedure of the information identified in paragraphs (a)(1), (a)(2) and (a)(3)(i) through (a)(3)(iv) of this section on each tracked device released for distribution for as long as such device is in use or in distribution for use.

(c) A manufacturer of a tracked device shall establish a written standard operating procedure for the collection, maintenance, and auditing of the data specified in paragraphs (a) and (b) of this section. A manufacturer shall make this standard operating procedure available to FDA upon request. A manufacturer shall incorporate the following into the standard operating procedure:

(1) Data collection and recording procedures, which shall include a procedure for recording when data which is required under this part is missing and could not be collected and the reason why such required data is missing and could not be collected;

(2) A method for recording all modifications or changes to the tracking system or to the data collected and maintained under the tracking system, reasons for any modification or change, and dates of any modification or change. Modification and changes included under this requirement include modifications to the data (including termination of tracking), the data format, the recording system, and the file maintenance procedures system; and

(3) A quality assurance program that includes an audit procedure to be run at not less than 6-month intervals for each device product line subject to tracking, which audit procedure shall provide for statistically relevant sampling of the data collected to ensure the accuracy of data and performance testing of the functioning of the tracking system.

(d) When a manufacturer becomes aware that a distributor, final distributor or multiple distributor has not collected, maintained, or furnished any record or information required by this part, the manufacturer shall cease further distribution of tracked devices to such person and shall notify the FDA district office responsible for the area in which the distributor, final distributor, or multiple distributor is located of the failure of such persons to comply with the requirements of this part.

Subpart C—Additional Requirements and Responsibilities

§ 821.30 Tracking obligations of persons other than device manufacturers: distributor requirements.

(a) A distributor, final distributor, or multiple distributor of any tracked device shall, upon purchasing or otherwise acquiring any interest in such a device, promptly provide the manufacturer tracking the device with the following information:

(1) The model number of the device or other identifier that identifies each unique version of the device;

(2) The serial number of the device or other identifier that is unique to that individual device;

(3) The date the device was received;

(4) The person from whom the device was received;

(5) If and when applicable, the date the device was explanted, the date of the patient's death, or the date the device was returned to the distributor, permanently retired from use, or otherwise permanently disposed of.

(b) A final distributor, upon sale or other distribution of a tracked device for use in or by the patient, shall promptly provide the manufacturer tracking the device with the following information:

(1) The model number of the device or other identifier that identifies each unique version of the device;

(2) The serial number of the device or other identifier that is unique to that individual device;

(3) The name, address, telephone number, and social security number (if available) of the patient receiving the device;

(4) The date the device was provided to the patient or for use in the patient;

(5) The name, mailing address, and telephone number of the prescribing physician;

(6) The name, mailing address, and telephone number of the physician regularly following the patient if different than the prescribing physician; and

(7) When applicable, the date the device was explanted and the name, mailing address, and telephone number of the explanting physician, the date of the patient's death, or the date the device was returned to the manufacturer, permanently retired from use, or otherwise permanently disposed of.

(c)(1) A multiple distributor shall keep written records of the following each time such device is distributed for use by a patient:

(i) The model number of the device or other identifier that identifies each unique version of the device;

(ii) The serial number of the device or other identifier that is unique to that individual device;

(iii) The name, address, telephone number, and social security number (if available) of the paitent using the device;

(iv) The location of the device;

(v) The date the device was provided for use by the patient;

(vi) The name, address, and telephone number of the prescribing physician;

(vii) The name, address, and telephone number of the physician regularly following the patient if different than the prescribing physician; and

(viii) When applicable, the date the device was permanently retired from use or otherwise permanently disposed of.

(2) Any person who is a multiple distributor subject to the recordkeeping requirement of paragraph (c)(1) of this section shall, within 2 working days of a request from the manufacturer or within 3 working days of a request from FDA for the information identified in paragraph (c)(1) of this section, provide such information to the manufacturer or FDA.

Subpart D—Records and Inspections

§ 821.50 Availability.

(a) Manufacturers, distributors, multiple distributors, and final distributors shall, upon the presentation by an FDA representative of official credentials and the issuance of Form FD 482 at the initiation of an inspection of an establishment or person under section 704 of the act, make each record and all information required to be collected and maintained under Part 821 and all records and information related to the events and persons identified in such records available to FDA personnel.

(b) Records and information referenced in paragraph (a) of this section shall be available to FDA personnel for purposes of reviewing, copying, or any other use related to the enforcement of the act and this part.

§ 821.55 Confidentiality.

(a) Records and other information submitted to FDA under this part shall be protected from public disclosure to the extent permitted under part 20 of this chapter, and in accordance with § 20.63 information contained in such records that would identify patient or research subjects shall not be available for public disclosure except as provided in those parts.

(b) Patient names or other identifiers may be disclosed to a manufacturer or other person subject to this part or to a physician when the health or safety of the patient requires that such persons have access to this information. Such notification will be pursuant to agreement that the record or information will not be further disclosed except as the health aspects of the patient requires. Such notification does not constitute public disclosure and will not trigger the availability of the same information to the public generally.

§ 821.60 Retention of records.

Persons required to maintain records under this part shall maintain such records for the useful life of each tracked device they manufacture or distribute. The useful life of a device is the time a device is in use or in distribution for use. For example, a record may be retired if the person maintaining the record becomes aware of the fact that the device is no longer in use, has been explanted, returned to the manufacturer, or the patient has died.

David A. Kessler,

Commissioner of Food and Drugs.

Dated: March 5, 1992.

Louis W. Sullivan,

Secretary of Health and Human Services.

Part III

Environmental Protection Agency

Premanufacture Notices; Monthly Status Report for February 1992

ENVIRONMENTAL PROTECTION AGENCY

[OPPTS-53152; FRL 4054-7]

Premanufacture Notices; Monthly Status Report for February 1992

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5(d)(3) of the Toxic Substance Control Act (TSCA) requires EPA to issue a list in the **Federal Register** each month reporting the premanufacture notices (PMNs) and exemption request pending before the Agency and the PMNs and exemption requests for which the review period has expired since publication of the last monthly summary. This is the report for February 1992.

Nonconfidential portions of the PMNs and exemption request may be seen in the TSCA Public Docket Office NE-G004 at the address below between 8 a.m. and noon and 1 p.m. and 4 p.m., Monday through Friday, excluding legal holidays.

ADDRESSES: Written comments, identified with the document control number "(OPPTS-53152)" and the specific PMN and exemption request number should be sent to: Document Processing Center (TS-790), Office of Pollution Prevention and Toxics, Environmental Protection Agency, 401 M St., SW., rm. L-100, Washington, DC 20460, (202) 260-1532.

FOR FURTHER INFORMATION CONTACT: David Kling, Acting Director, Environmental Assistance Division (TS-799), Office of Pollution Prevention and Toxics, Environmental Protection Agency, rm. E-545, 401 M St., SW., Washington, DC 20460 (202) 260-3725.

SUPPLEMENTARY INFORMATION: The monthly status report published in the **Federal Register** as required under section 5(d)(3) of TSCA (90 Stat. 2012 (15 U.S.C. 2504)), will identify: (a) PMNs received during FEBRUARY; (b) PMNs received previously and still under review at the end of FEBRUARY; (c) PMNs for which the notice review period has ended during FEBRUARY; (d) chemical substances for which EPA has received a notice of commencement to manufacture during FEBRUARY; and (e) PMNs for which the review period has been suspended. Therefore, the FEBRUARY 1992 PMN Status Report is being published.

Dated: March 23, 1992.

Douglas W. Sellers,

Acting Director, Information Management Division, Office of Pollution Prevention and Toxics.

Premanufacture Notice Monthly Status Report for FEBRUARY 1992.

IV. 75 Chemical Substances for Which EPA Has Received Notices of Commencement To Manufacture

PMN No.	Identity/Generic Name	Date of Commencement
P 85-0169	G Alkyl alkoxy siloxane	February 26, 1985.
P 85-0612	G Polymer of substituted aryl olefin	January 17, 1991.
P 85-0914	G Trisubstituted triazole	December 27, 1991.
P 86-0066	G Substituted triazine isocyanurate	July 12, 1988.
P 86-0579	G Diphenol dicyanate	August 13, 1986.
P 86-1685	G Styrenated acrylic	January 16, 1992.
P 87-0910	2-Cyclopentene-1-acetic acid	June 14, 1988.
P 87-1225	Poly(oxy-1,2-ethanediyl), alpha-hydro-omega-hydroxy, poly(oxy(methyl-1,2-ethanediyl)), alpha-hydroxy-omega-hydroxy-, polymer w/1,1'-methylene bis(4-isocyanate cyclohexane), and 2-butanone oxime	December 16, 1987.
P 87-1369	G Sodium methyl naphthalene sulfonate, condensed	December 9, 1991.
P 87-1397	G Alkanolamine salt of an aqueous acrylic emulsion	January 21, 1992.
P 87-1398	G Alkanolamine salt of an aqueous acrylic emulsion	January 20, 1992.
P 88-0579	G Calcium salt of glycine derivative	November 10, 1988.
P 88-0853	G Self-crosslinking, block polyurethane system	December 27, 1991.
P 88-1753	G Bis(substituted)carbomonocyclic azo)-carbomonocyclicol	February 14, 1990.
P 89-0033	G Polyester, rosin carboxylated	January 28, 1992.
P 89-0579	G Amine neutralized hydroxyl dialkyl phosphorus dithiate	January 15, 1992.
P 89-0632	4-Piperidinamine, *N*-butyl-2,2,6,6-tetramethyl; 1,3-propanediamine,*N,N'*-1,2-ethandiyl bis-; 1,3,5-triazine,2,4,6-trichloro-	June 23, 1991.
P 89-0653	G Copolymer	October 31, 1989.
P 89-0697	G Alkenoic acid, trisubstituted benzyl-disubstituted-phenyl ester	October 23, 1990.
P 89-0770	G Oils, glyceridic, palm kernel (or coconut oil), reaction products with tetra-hydroxy branched alkane esters of tri-substituted benzene-propanoic acid	February 1, 1990.
P 89-1062	G Polyether amide	June 1, 1991.
P 90-0365	G Aromatic dicarboxylic acid triaromatic polyester	January 11, 1992.
P 90-1635	Benzenepropanoic acid, 3-(2*H*-benzotriazol-2-yl)-5-(1,1-dimethylethylethyl)-4-hydroxyl-, C_{7-9} alkyl, branched and linear, esters	January 18, 1991.
P 90-1822	Acetic acid, hydroxyphosphono-, disodium salt	January 15, 1992.
P 91-0020	G Crosslinked polymer	December 4, 1991.
P 91-0130	G Triazinyl reactive mono azo dye	February 5, 1991.
P 91-0366	G Fluorochemical salt	January 21, 1992.
P 91-0739	1,2-Bis(diphenyl phosphino)ethane	January 13, 1992.
P 91-0784	G Chlorinated diene polymer	January 15, 1992.
P 91-0803	G Modified alkyd resin	January 23, 1992.
P 91-0901	G Styrene acrylic polymer	January 9, 1992.
P 91-0927	G Substituted polyoxyalkyl aromatic amine tint	January 23, 1992.
P 91-1112	G Basic dye toner SM	January 21, 1992.
P 91-1122	G ((Dialkylcarbomonocyclic)amino)xanthylium salt, methylhetero-monocycle, phenylheteromonocyclic formal polymer, acid salt	December 9, 1991.
P 91-1152	G Organopolysiloxane	November 5, 1991.
P 91-1164	G Hindered amine carboxylate	January 28, 1992.
P 91-1213	G Reaction product of alkyl thioalcohol,and substituted phosphate	January 27, 1992.
P 91-1216	G Acrylic copolymer	January 28, 1992.
P 91-1246	G Acrylic acid esters/acrylonitrile copolymer	January 16, 1992.
P 91-1260	G Organic salt	December 27, 1991.
P 91-1290	G Methyl methacrylate butadiene styrene (MBS) copolymer	January 8, 1992.
P 91-1296	G Monoester of 2-propenoic acid, 2-hydroxyethyl ester and aliphatic isocyanate	December 10, 1991.
P 91-1332	Phosphorothioic acid, *O,O*-bis(2-methylpropyl)ester, sodium salt	January 21, 1992.
P 91-1334	G Polyvinylsulfone	January 14, 1992.
P 91-1344	G Polyamide	November 23, 1991.
P 91-1345	G Alkyd resin	November 23, 1991.
P 91-1381	G Quaternary ammonium salt	January 13, 1992.
P 91-1395	Hexanoic acid, 6,6'6''-(1,3,5-triazine-2,4,6-triyltrimino)tris-, tripotassium salt	January 15, 1992.
P 91-1396	Hexanoic acid, 6,6,6''-(1,3,5-triazine-2,4,6-triyltrimino)tris-, trisodium salt	January 15, 1992.
P 91-1437	G Aliphatic-aromatic carboxylate complex	January 29, 1992.
P 91-1438	G Aliphatic-aromatic carboxylate complex	January 29, 1992.
P 91-1440	G Substituted polyoxyalkylene aniline	January 29, 1992.
P 92-0042	G Calcium amate-dicarboxylate salt paraffinic mineral oil	January 30, 1992.
P 92-0058	G Sodium salt of substituted naphthalene disulphonic acid	January 24, 1992.
P 92-0130	G Amine capped polyester polyurethane	January 15, 1992.
Y 90-0288	G Benzene, ethenylethyl-, polymer with butyl-2-propenoate, diethylbenzene, ethoxylbenzene and (1-methylethenyl)benzene	February 3, 1992.
Y 91-0083	G Polymer of aliphatic acids, aromatic acids, and aliphatic diols, and lactones	January 28, 1992.
Y 91-0144	G High solids long oil alkyd resin	January 17, 1992.
Y 91-0169	G Aqueous acrylic polymer	January 23, 1992.
Y 91-0189	G Styrenated acrylic copolymer	December 27, 1991.
Y 91-0190	G Styrenated acylic copolymer	December 27, 1991.
Y 91-0219	G Poly-alpha-alkene	December 14, 1991.

IV. 75 Chemical Substances for Which EPA Has Received Notices of Commencement To Manufacture—Continued

PMN No.	Identity/Generic Name	Date of Commencement
Y 91-0231	G Carboxylated acrylic copolymer	December 16, 1991.
Y 92-0031	G Dibasic acid glycol polyester	January 10, 1992.
Y 92-0039	G Saturated polyester, modified with glycidyl compound	January 25, 1992.
Y 92-0040	G Saturated polyester, modified with glycidyl compound	January 25, 1992.
Y 92-0041	G Saturated polyester, modified with glycidyl compound	January 25, 1992.

Part IV

Department of Education

National Science Foundation

34 CFR Part 652

National Science Scholars Program; Final Rule and Notice

DEPARTMENT OF EDUCATION
NATIONAL SCIENCE FOUNDATION
34 CFR Part 652

RIN 1840-AB49

National Science Scholars Program

AGENCY: Department of Education and National Science Foundation.

ACTION: Final regulations.

SUMMARY: The Secretary of Education (Secretary) issues final regulations governing the National Science Scholars Program (NSSP) in accordance with the provisions of the NSSP authorizing legislation in title VI, part A, of the Excellence in Mathematics, Science and Engineering Education Act of 1990, Public Law 101-589 (the Act). These regulations specify the role of the Secretary and the responsibilities of Chief State School Officers, State nominating committees, and institutions of higher education in the administration of the program. The regulations also specify the applicant eligibility requirements and the selection criteria by which National Science Scholars (Scholars) are nominated and receive scholarships and describe the responsibilities of the Scholars. The Secretary and the Director of the National Science Foundation (Director) jointly issue § 652.32 of the regulations, containing the selection criteria to which applicants must respond and which State nominating committees must apply in selecting scholarship nominees for submission to the President.

EFFECTIVE DATE: These regulations take effect either 45 days after publication in the **Federal Register** or later if the Congress takes certain adjournments, with the exception of §§ 652.21, 652.51 and 652.53. Sections 652.21, 652.51 and 652.53 will become effective after the information collection requirements contained in those sections have been submitted by the Department of Education and approved by the Office of Management and Budget under the Paperwork Reduction Act of 1980. Those wishing to know the effective date of these regulations may call or write the Department of Education contact person listed below. A document announcing the effective date will be published in the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: Steve Wingard, Charles Brazil, or Denise Boulanger, Office of Student Financial Assistance, U.S. Department of Education, 400 Maryland Avenue, SW., Regional Office Building 3, room 4018, Washington, DC 20202-5447, Telephone (202) 708-4607. Deaf and hearing impaired individuals may call the Federal Dual Party Relay Service at 1-800-877-8339 (in Washington, DC 202 area code, telephone 708-9300) between 8 a.m. and 7 p.m., Eastern time.

SUPPLEMENTARY INFORMATION: These regulations implement the NSSP, enacted under the Excellence in Mathematics, Science and Engineering Act of 1990 (Pub. L. 101-589) on November 16, 1990, as amended by Pub. L. 102-103, section 314(a), on August 8, 1991. The NSSP supports the President's AMERICA 2000 education strategy and National Education Goal 4, which calls for U.S. students to be first in the world in science and mathematics achievement by the year 2000. Specifically, the goals of this program will be to:

(1) Attract both men and women into these fields;

(2) Encourage men and women to pursue teaching careers in these fields, thereby improving student mathematics and science skills and knowledge among students at the primary and secondary level; and

(3) Increase the number of U.S. undergraduate students who complete degrees in mathematics, science, and engineering.

On September 24, 1991, the Secretary published a notice of proposed rulemaking (NPRM) for the National Science Scholars Program, 34 CFR part 652, in the **Federal Register** at 56 FR 48400. The NPRM included a discussion of the major issues in the proposed regulations. The following list identifies the different issues discussed and indicates the pages of the preamble to the NPRM on which the discussion of those issues is found:

- The definitions of the scholarship disciplines in § 652.6 of the proposed regulations (page 48400).
- The establishment, composition, and responsibilities of State nominating committees in §§ 652.20, 652.21, and 652.30 of the proposed regulations (page 48400).
- The selection criteria, jointly developed by the Secretary and the Director, to be used by State nominating committees to select Scholar nominees in § 652.32 of the proposed regulations (page 48401).
- The nomination of Scholars by the State nominating committees and selection of Scholars by the President in §§ 652.30 and 652.33 (page 48401).
- The student eligibility requirements in § 652.2 of the proposed regulations pertaining to a student who wishes to apply for an NSSP scholarship and separate requirements in proposed § 652.40 that must be met by a Scholar in order to receive a scholarship (page 48401).
- Other scholarship considerations in section 603(a)(1) of the Act that permit the Director and the Secretary to give consideration to the financial need of an individual seeking a scholarship and to promote participation by minorities and individuals with disabilities (page 48401).
- The requirements in § 652.42 of the proposed regulations that a Scholar must meet, including a high level of academic achievement, and other eligibility requirements to receive continuation awards after the Scholar's first academic year of attendance (page 48402).
- The waiver of full-time attendance under unusual circumstances as determined by a Scholar's institution of higher education as proposed in § 652.43(b) (page 48402).
- The provision in proposed § 652.44 permitting a Scholar's institution of higher education to determine that a Scholar may have his or her eligibility for an NSSP scholarship reinstated after a period of interruption or suspension (page 48402).
- The requirements in proposed § 652.51 that an institution of higher education must follow to administer the scholarships awarded under the NSSP (page 48402).

Major Changes to the NPRM

As a result of the comments received on the NPRM, the Secretary has made the following major changes in the final regulations:

- The eligibility requirements in §§ 652.2(d) and 652.40(b) were modified to exclude a student who will attend a U.S. service academy from eligibility to apply for, or receive, an NSSP scholarship.
- The requirement that State nominating committees establish administrative procedures to resolve conflicts of interest is clarified in § 652.21(c) of the final regulations to provide that these procedures be written administrative procedures as discussed in the preamble of the proposed regulations.
- Section 652.51(d) of the final regulations is added to allow the Scholar's institution of higher education to enter into a written agreement with another institution or organization so that the Scholar may receive funds under specified conditions for study at the other institution or organization.
- The Secretary is revising § 652.52 to provide rules for situations where a Scholar transfers to a different institution of higher education during an award year.

Analysis of Comments and Changes

In response to the Secretary's invitation in the NPRM, 11 parties submitted comments on the proposed regulations. An analysis of the comments and of the changes in the regulations since publication of the NPRM follows. Substantive issues are discussed under the section of the regulations to which they pertain. Technical and other minor issues—and suggested changes the Secretary is not legally authorized to make under the applicable statutory authority—are not addressed.

Section 652.1 What is the National Science Scholars Program?

Comment: One commenter requested that the Secretary clarify § 652.1(g) of the NPRM that discusses attracting talented students to teaching careers in mathematics and science because some applicants might argue that education majors were entitled to scholarships under the NSSP. Aother commenter asserted that references in the NPRM to teaching should be deleted since encouraging teaching careers is not a purpose of the program.

Discussion: Section 652.1 Discusses the general purposes of the NSSP. One of those purposes under section 601(a)(7) of the Act is to attract talented mathematics and science students to pursue careers in teaching. While a student majoring in education would not be eligible to receive funds under this program, a student pursuing a major in mathematics, science, or engineering and incorporating into his or her degree program the coursework necessary to qualify as a teacher may be eligible to be a Scholar.

Changes: None.

Section 652.2 Who is Eligible to Apply for a Scholarship Under This Program? and Section 652.40 What Requirements Must a Scholar Meet in Order to Receive a Scholarship?

Comments: One commenter requested clarification about whether students who attended the U.S. service academies such as the U.S. Naval Academy would be eligible to apply for the NSSP and, if so, how the Secretary would administer awards to these Scholars.

Discussion: The Secretary has determined that there are no costs incurred by students attending U.S. service academies. Since the amount of a scholarship awarded under this program is limited in section 605(b) of the Act to the Scholar's cost of attendance as defined in Part F of the Higher Education Act of 1965, as amended (HEA), students attending U.S. service academies do not qualify for scholarships under this program. A student who has accepted an appointment to a U.S. service academy cannot receive financial assistance to continue his or her postsecondary education, which is one of the purposes of the NSSP as stated in section 601(a)(2) of the Act. Therefore, the student would be ineligible to apply.

However, all students who apply to U.S. service academies are not ineligible. An otherwise eligible student under § 652.2 who applies to an academy, but has not yet been appointed, is eligible to apply for an NSSP scholarship. Such a student may be selected as a Scholar, accept the award, but then be notified of and accept an appointment to a U.S. service academy. The Secretary has determined that in this circumstance the student becomes ineligible to be a Scholar.

Because a Scholar becomes ineligible to receive an NSSP scholarship by accepting an appointment to a U.S. service academy, the Secretary would select an alternate NSSP Scholar from the same congressional district to receive the scholarship.

Changes: Section 652.2(d) of the proposed regulations is modified to exclude a student who has accepted an appointment to a U.S. service academy from eligibility to apply for an NSSP scholarship, and § 652.40(b) is also modified to clarify that Scholars appointed to U.S. service academies are ineligible to receive a scholarship.

Comment: One commenter recommended that the Secretary revise the requirement in § 652.2(c) that an applicant demonstrate outstanding academic achievement in secondary school in the scholarship disciplines by adding a provision that an applicant may qualify by demonstrating an "academic potential for outstanding work in such fields."

Discussion: Section 602(a)(2) of the Act requires that NSSP scholarships be awarded to students who have already demonstrated outstanding academic achievement in the physical, life, or computer sciences, mathematics, or engineering.

Changes: None.

Comment: One commenter proposed that the Secretary eliminaté the eligibility requirement in § 652.2(d) that applicants declare their intention to undertake a program of study leading to a baccalaureate degree. The commenter believed that students who intended to go into programs that were directed at applied skills for employment in the mathematics and sciences should also be eligible for an NSSP scholarship.

Discussion: The Secretary believes that the purpose of the NSSP is to provide scholarships for the pursuit of a baccalaureate degree, including scholarships to students who enroll in educational programs for transfer to a baccalaureate degree program. For example, a student who enrolls at a community college in a program for transfer to a baccalaureate degree program would be eligible to apply; however, an individual pursuing a terminal occupational undergraduate program of study of less than 4 years would not be eligible to apply.

Changes: None.

Section 652.6 What Definitions Apply to This Program?

Comment: One commenter recommended that the definition for engineering be modified to read "Engineering means the science by which the properties of matter and the sources of energy in nature are made economically useful to humanity * * *."

Discussion: The Secretary believes that the field of engineering encompasses a broader scope of scientific exploration than just those that are "economically useful." Some engineering endeavors and accomplishments increase human knowledge without being immediately economically useful.

Changes: None.

Section 652.20 How Does a State Establish a Nominating Committee?

Comment: One commenter thought that the prescribed composition of the State nominating committee is too heavily weighted toward educators. Another commenter did not understand how an admissions officer from an institution of higher education could contribute to the committee and believed that the addition of this individual to the committee would cause an unnecessary increase in the State's administrative costs. Another commenter inquired about adding a financial aid officer to the committee to assist in financial need issues. A fourth commenter asked whether a State requiring a larger number of committee members would be limited to those specified in the NPRM.

Discussion: The composition of the State nominating committee is not limited to those individuals prescribed by the regulations. The regulations merely establish minimum requirements. The State, at its option, may appoint additional members to the committee from the education, business, or

scientific community that the State determines will best meet its needs in fulfilling its duties under the program.

The Secretary is requiring that an admissions officer be on the committee because an admissions officer is a professional involved with reviewing applicants for admission to colleges and universities. The Secretary believes that the experience of an admissions officer would provide members of the State nominating committee with insights into distinguishing the most outstanding applicants from among the applicants.

The information to determine financial need of an applicant is not available at the time an applicant is evaluated by a State nominating committee, and the addition of a financial aid officer's professional expertise is, thus, not required. However, a State is not prohibited from adding a financial aid officer to the membership of its State nominating committee.

Changes: None.

Section 652.21 What are the Responsibilities of a State and its Nominating Committees?

Comment: One commenter asked if a State could combine the NSSP application form with other application forms for such programs as the Robert C. Byrd Honors Scholarship Program or the Paul Douglas Teacher Scholarship Program. The commenter also asked if a State could use applications received from applicants for another scholarship program that had similar application requirements and evaluate those applicants for the NSSP. The commenter believed that this procedure would be less costly and more efficient for the State.

Discussion: The Secretary believes that some of the information required in the selection criteria in § 652.32 is unique to the NSSP. For example, the required essay must be on a topic that the applicant chooses and considers to be of interest to the nominating committee as an NSSP applicant, and the State nominating committee must determine the degree that the references chosen by the applicant reflect the applicant's qualifications for a National Science Scholarship. Because of these unique requirements, the Secretary does not believe that it is possible for an applicant to apply on a combined application or apply for another program and be considered for this program.

Changes: None.

Comment: One commenter thought that the requirement in § 652.21(c) that State nominating committees establish written procedures to resolve potential conflicts of interest would be burdensome to develop. Another commenter requested clarification of the requirement that these administrative procedures be written procedures because it was only stated in the preamble, and not in the regulations.

Discussion: The Secretary believes it is imperative that clear guidelines be established to prevent conflicts of interest from arising. Written procedures that establish requirements for resolution of conflicts of interest before a committee evaluates applications assure that all members have a mutual understanding of what the committee determines to be conflicts of interest and how the committee determines to resolve such conflicts. Written procedures covering conflicts of interest should leave little doubt among members of what constitutes such conflicts and prevent misunderstandings. Each State nominating committee has the sole responsibility to determine what constitutes a conflict of interest and to establish the guidelines to resolve a conflict.

Changes: The Secretary modifies § 652.21(c) to include the establishment of written administrative procedures.

Comment: One commenter suggested that the committee meet in a single joint meeting to review the applications and agree upon the nominees. This commenter suggested that applications be sent to committee members at their homes or businesses for review before the committee meets. Another commenter indicated that it was sometimes impossible for all members of a State nominating committee to meet at the same time and, even when all members could meet, it was impossible for all committee members to evaluate every National Science Scholars Program applicant. The commenter argued that State nominating committees should be given the authority to form subcommittees that could meet at different times, different locations, and even review different applications.

Discussion: In reviewing applications, the State nominating committee is responsible under § 652.21(c)(1) for the establishment of written internal administrative procedures for the timely submission, processing, and review of applications submitted by eligible students. The committee must as a group make the selection of nominees for the NSSP and should, in developing these procedures, consider that the purpose of establishing a broad-based committee is to bring the varying perspectives of its members to the evaluation of each application. However, the Secretary allows the committee to determine how best to fulfill the responsibilities of the committee to provide such a broad-based review of each applicant.

Changes: None.

Section 652.30 How are Scholars Nominated?

Comment: Several comments were received concerning the requirement in the proposed regulations that at least half of the nominees be female. One commenter requested clarification on the requirement that at least one-half of the nominees from a congressional district be female. The commenter stated that in the selection process for fiscal year 1991 there had been some question concerning the meaning of this requirement. Several commenters indicated that the regulations should require that exactly half of the nominees from a congressional district be female. Another commenter believed that the requirement should be eliminated. One commenter questioned why the Secretary left the requirement in the regulations because of the reference in the preamble of the proposed regulations to the President's proposal to eliminate this requirement as part of the reauthorization of the HEA.

Discussion: Section 603(b)(2) of the Act requires that at least one-half of the Scholars nominated from a congressional district be female. The Secretary does not have the authority to modify this requirement. The term "at least" means that it is possible for more than half of all nominees from a congressional district to be female. However, it is not possible for less than half to be female. For example, a nominating committee submits four nominees from each congressional district. The top four applicants in one district were female; therefore, all nominees from that district are female. In another congressional district the top four applicants are males, and the fifth and sixth top ranking applicants were female. The top two ranking males are selected, and the next two males are passed over for two females.

The President has proposed to eliminate the statutory requirement that at least half of the nominees and selected Scholars be female when the HEA is reauthorized. This part of the preamble was intended to inform the public of the President's intent to propose changes to a statutory requirement, not to indicate that the requirement had already been changed.

Changes: None.

Comment: One commenter asked if nominees were selected from the congressional district in which they lived or from the congressional district where they attended school.

Discussion: Section 652.30(d) of the proposed regulations states, "Each State nominating committee shall submit to the President the nominations of at least four applicants legally residing in each congressional district in the State . . ."

Changes: None.

Section 652.32 What Selection Criteria Shall the State Nominating Committee Use?

Comment: A commenter expressed concerns about the number of applications that the State nominating committee would have to review unless the State could place a limit on the number of applicants who could apply. Others asked if States could screen applications for the committee, have high schools limit the number of applicants from their schools, or establish additional eligibility or selection criteria.

Discussion: Under Subpart C of the regulations, a State's responsibility is limited to establishing a State nominating committee, requiring the nominating committee to establish operating procedures, and maintaining applications and written procedures relating to the selection of nominees for a scholarship. A State does not have the authority to screen applications; further, neither a State nor a State nominating committee has the authority either to limit the number of applicants or to have high schools review eligible applications and make preselections for the committee.

The State's nominating committee is charged with developing operating procedures governing the scholarship nomination process, evaluating applications according to the selection criteria, and providing information on each nominee to the Secretary. The State nominating committee may not delegate its functions to others, directly limit the number of applicants, or establish additional eligibility or selection criteria in its operating procedures. However, the State nominating committee, under § 652.2(c) of the eligibility criteria in the NPRM, determines whether applicants have "demonstrated outstanding academic achievement in secondary school in the physical, life, or computer science, mathematics, or engineering." Thus, the State nominating committee may establish the level of academic performance, such as grade point averages, test scores, or both, that establishes "demonstrated outstanding achievement." Upon the request of a State nominating committee, a State agency may review applications on behalf of the State nominating committee to determine eligibility before forwarding them to the State nominating committee for evaluation. The State nominating committee would then need to verify the State agency's determinations of eligibility.

Changes: None.

Comment: Several commenters suggested the adoption of selection criteria to give stronger consideration to individuals who are economically disadvantaged, disabled, or from minority groups. These commenters argued that simply to promote the participation of these individuals in the program was not enough. One commenter recommended providing additional points to the selection criteria that could be added to an applicant's score if the applicant came from one of these backgrounds. Another suggested that financial need not be considered in the selection criteria but at the point when a Scholar enters an institution of higher education. This commenter believed that the amount of the scholarship should be decreased for those Scholars who demonstrated little financial need when entering the institution.

Discussion: Although the Secretary received comments that supported providing special consideration to those in financial need, commenters did not provide recommendations on how financial need could be considered during the application evaluation process, which falls outside the normal financial aid application timeframe. Under the Act the President must select Scholars by January 1 of their senior year in high school, which is also generally the earliest date on which students may submit applications for student financial assistance. It is the Secretary's view that, because of the incompatibility of the timeframes for the NSSP and the submission of a financial aid application, there is no feasible means of incorporating consideration of financial need into the application process.

While the Act in section 603(a)(1) provides for the promotion of the NSSP among individuals with disabilities or who are minorities, this provision is not one of the purposes of the NSSP as provided into section 601 of the Act. The Secretary believes that, if the program is promoted among minorities and the handicapped, outstanding individuals among these groups can successfully compete for an NSSP scholarship on their own merit without additional considerations.

The statute does not provide for an adjustment to the amount of a Scholar's award based upon financial need, *i.e.*, the difference between the cost of attendance at the Scholar's institution and the amount his or her family can reasonably expect to contribute toward meeting that cost. However, section 605(b) of the Act provides that a Scholar's award may not exceed his or her cost of attendance as defined in section 472 of the HEA.

Changes: None.

Comment: One commenter recommended and provided an extensive grading system to be used within the different parts of the selection criteria so that the selection process would be standardized.

Discussion: The Secretary does not believe it would be appropriate to codify grading or scoring systems within the selection criteria. It is the Secretary's belief that a State nominating committee should have some discretion in applying the selection criteria to NSSP applications within the State. However, the State nominating committee must carefully review the selection criteria and the purpose for which the criteria were developed before evaluating NSSP applicants. The State nominating committee must then consistently evaluate each application based on the selection criteria.

Changes: None.

Section 652.42 What are the Requirements for a Scholar to Continue to Receive Scholarship Payments Under the NSSP?

Comment: One commenter proposed to incorporate satisfactory progress standards used for the title IV, HEA programs into the regulations.

Discussion: Section 604(b)(1) of the Act requires that a Scholar maintain a high level of academic achievement to continue to receive a scholarship. Satisfactory progress standards for title IV, HEA programs only require that a student be making progress toward graduation, not that the progress show a high level of achievement.

Changes: None.

Section 652.43 What are the Consequences of a Scholar's Noncompliance With the Scholarship Eligibility Requirements in § 652.40 or § 652.42?

Comments: Some commenters wanted provisions added to the regulations that allow a Scholar to postpone an initial award if the Scholar does not intend to begin studying at his or her institution of higher education in the fall after his or her senior year in high school.

Discussion: The regulations allow a Scholar's institution of higher education to suspend a Scholar's eligibility for a

scholarship if the Scholar does not meet the requirements in § 652.40 and § 652.42. If a Scholar is not enrolling at an institution of higher education in the initial award year, the Scholar could request that his or her institution of higher education suspend the NSSP scholarship because he or she did not meet all the requirement in § 652.40. If the Scholar's institution agrees to suspend the award, the institution may consider reinstating the NSSP scholarship under § 652.44 as long as the suspension is no longer than 12 months and the Scholar meets the eligibility requirements in § 652.40. In exceptional circumstances as determined by the institution, the period of suspension may be greater than 12 months.

Changes: None.

Comment: One commenter contended that the provision under § 652.43(c) that requires proration of the NSSP scholarship payment for part-time attendance could cause undue hardship on handicapped students who, because of their handicap, could only attend college part-time. The commenter felt that full scholarship payment should be provided in these instances because the student might not otherwise be able financially to cover the total costs of education and would therefore not be able to participate in the NSSP.

Discussion: In section 602(b) of the Act the Secretary is authorized to pay an initial scholarship for a period of one academic year for the first year of undergraduate study, and additional scholarships for not more than three academic years of undergraduate study except in the case of a student who enrolls in an undergraduate course of study that requires attendance for five academic years, in which case the student could receive four additional scholarships. The Secretary in § 652.43(c) of the NPRM proposed the requirement that the institution of higher education which the Scholar attends prorate the scholarship amount for less than full-time attendance in order to assure that NSSP funds are available to the Scholar throughout the period of his or her undergraduate enrollment. For example, if a Scholar attends as a half-time student during the first two academic years he or she is enrolled, the Scholar would have used only one year of scholarship eligibility. This is because he or she used only one-half of a year of eligibility in each of those years. If the Scholar is enrolled in a four-year degree program, he or she has three years of eligibility remaining. The Secretary believes that in the case of a student with disabilities, scholarships should be prorated. Otherwise, the disabled Scholar would not have NSSP funds available throughout his or her baccalaureate program of study and would suffer a much greater hardship.

Changes: None.

Section 652.50 What Institutional Agreement is Required?

Comment: A commenter inquired if there were any circumstances where an institution might refuse to participate given the extensive administrative requirements imposed on institutions with NSSP Scholars. The commenter also asked if the Secretary could provide administrative relief if an institution needed to establish the program for one NSSP Scholar.

Discussion: Under section 603(d) of the Act, the Secretary must disburse scholarship proceeds to the Scholar's institution of higher education on behalf of the Scholar. The regulations were developed to align the program closely with other financial aid program administrative requirements. The Secretary, therefore, does not believe that the administrative requirements of the program create extensive new administrative requirements that institutions do not handle routinely.

An institution is not required to complete the institutional agreement. However, if an institution refuses to complete an agreement with the Secretary, an NSSP Scholar will be unable to receive the scholarship at that institution. Further, if the Scholar's institution refuses to complete the agreement in the Scholar's first year of undergraduate study at an institution of higher education, the Scholar becomes ineligible for continuation awards.

Changes: None.

Section 652.51 How are Scholarships to be Administered by Institutions of Higher Education?

Comment: One commenter inquired about instances when a Scholar takes courses at other institutions that apply toward the Scholar's baccalaureate degree and asked for provision for written agreements between institutions to assist these Scholars in paying the cost of these courses.

Discussion: The Secretary accepts the comment.

Changes: An additional provision is added at § 652.51(d) to allow for written agreements between institutions in accordance with the requirements for other Federal student assistance programs.

Comment: One commenter requested that the Secretary clarify how NSSP awards should be treated in conjunction with title IV funds.

Discussion: Section 605(b) of the Act provides that an NSSP scholarship cannot be reduced on the basis of receipt of other forms of Federal student financial assistance but must be taken into consideration when determining the Scholar's eligibility for those other forms of assistance. The scholarship is considered as a "resource" for the campus-based (Perkins Loan, College Work-Study, and Supplemental Educational Opportunity Grant) programs in accordance with 34 CFR 674.14, 675.14, and 676.14 and as "estimated financial assistance" for the Guaranteed Student Loan (Stafford Loan, Supplemental Loans for Students, and PLUS) programs in accordance with 34 CFR 682.206. An institution of higher education must reduce a Scholar's Pell Grant if the NSSP scholarship plus the Pell Grant exceeds the Scholar's cost of attendance under section 472 of the HEA.

Changes: None.

Section 652.52 How are Scholarship Awards to be Made and Scholarship Proceeds Returned and Transferred?

Comment: One commenter requested clarification of the provision in § 652.52(a) that requires an institution to provide scholarship proceeds to a Scholar in at least two payments. The commenter asked if the institution's disbursements could be in unequal payments when unequal costs were incurred in different payment periods. The commenter also wanted to know how unequal disbursements, if allowed, would affect § 652.52(d) that requires prorations of the scholarship amount if a Scholar becomes ineligible for any part of an NSSP scholarship.

Discussion: If a scholar incurred unequal educational costs in two different payment periods, the institution is not prevented from providing funds in unequal amounts to assist the Scholar in covering those costs. In this instance, the institution would base the prorated amount of the refund on the amount disbursed during that payment period and the portion of the time in the payment period that the Scholar was eligible to receive the award.

Changes: None.

Comment: A commenter requested clarification concerning whether an institution had to monitor the classroom attendance of an NSSP scholar to determine if the Secretary was due a refund under § 652.52. The commenter felt that if monitoring classroom attendance was required it was unduly burdensome because most institutions do not keep these types of records. In addition, two commenters objected to the requirement in § 652.52(c) that an institution prorate that portion of the NSSP scholarship award for any part of the academic period that a Scholar fails to complete. The commenters stated that the prorating of the scholarship proceeds is different from the title IV, HEA refund and repayment requirements and creates an additional administrative hardship that would be eliminated if the Secretary were consistent with other programs. One of these commenters requested that the Secretary allow some institutional discretion in prorating an NSSP scholarship if a Scholar withdraws for medical reasons.

Discussion: It is the responsibility of an institution of higher education to determine whether a Scholar is eligible for a scholarship before providing NSSP funds to that individual. An institution must be able to determine whether a Scholar attended class and the last date of attendance for a Scholar who ceases to attend. This determination can be made by course records, records of the last examinations taken by a Scholar, or other institutional records that determine the Scholar's last date of enrollment.

The Secretary recognizes that the *pro rata* requirement for the NSSP differs from those requirements governing the Title IV, HEA programs. However, the NSSP is not a Title IV program, and this requirement is consistent with other Federal programs administered by the Department of Education. In addition, the number of individuals receiving NSSP scholarships at any one time is limited, and the number of instances in which an institution would have to prorate a scholarship and make a refund, therefore, would not create an undue administrative burden on institutions. The Secretary does not believe there is a need for institutional discretion in determining whether an institution should prorate an NSSP award; proration is sufficient and provides for the best use of Federal funds.

Changes: None.

Comment: One commenter asked if it is the intent of the Secretary in § 652.52(c), which cross-referenced 34 CFR 690.79, Recovery of overpayments, to make Scholars who received NSSP overpayments ineligible for title IV assistance until resolution of the overpayment, as required in § 690.79(c). Another commenter believed that the overpayment provisions in § 652.52(c) were too stringent.

Discussion: It is the Secretary's duty to administer properly Federal programs and conserve the funds appropriated for these programs. One of the tools available to the Secretary to promote repayment in instances of overpayment is withholding additional program funds or funds from other programs.

Changes: None.

Comment: A commenter noted that the NPRM did not provide guidance to institutions in cases where a Scholar might transfer to another institution of higher education during an award year. The commenter inquired if the NSSP scholarship could be transferred.

Discussion: A scholar may transfer his or her scholarship to another institution of higher education during an award year. If the Scholar transfers during an award year, the Scholar would be eligible to continue to receive the remainder of the scholarship at the new institution as long as the new institution determined the Scholar met the provisions under §§ 652.40 and 652.42. If a Scholar transfers between award years, the institution reports information about the Scholar's transfer in its annual performance report. The Scholar's new institution then determines if the Scholar is eligible for a continuation award.

Changes: The Secretary adds § 652.52(e) which provides the procedures for institutions to follow if a Scholar transfers from one institution to another during an award year.

Executive Order 12291

These regulations have been reviewed in accordance with Executive Order 12291. They are not classified as major because they do not meet the criteria for major regulations established in the order.

Intergovernmental Review

This program is subject to the requirements of Executive Order 12372 and the regulations in 34 CFR part 79. The objective of the Executive order is to foster an intergovernmental partnership and a strengthened federalism by relying on processes developed by State and local governments for coordination and review of proposed Federal financial assistance.

In accordance with the order, this document is intended to provide early notification of the Department's specific plans and actions for this program.

Assessment of Educational Impact

In the notice of proposed rulemaking, the Secretary requested comments on whether the proposed regulations would require the transmission of information that is being gathered by or is available from any other agency or authority of the United States.

Based on the response to the proposed rules and on its own review, the Department has determined that the regulations in this document do not require transmission of information that is being gathered by or is available from any other agency or authority of the United States.

List of Subjects in 34 CFR Part 652

Education, Grant programs-education, State administered-education, Student aid-education, Reporting and recordkeeping requirements.

(Catalog of Federal Domestic Assistance No. 84.242, National Science Scholars Program)

Dated: January 7, 1992.

Lamar Alexander,

Secretary of Education.

Dated: January 12, 1992.

Walter E. Massey,

Director, National Science Foundation.

The Secretary amends title 34 of the Code of Federal Regulations by adding a new part 652 to read as follows:

PART 652—NATIONAL SCIENCE SCHOLARS PROGRAM

Subpart A—General

Sec.

652.1 What is the National Science Scholars Program?
652.2 Who is eligible to apply for a scholarship under this program?
652.3 How are awards distributed?
652.4 In what amounts are scholarships awarded?
652.5 What regulations apply to this program?
652.6 What definitions apply to this program?

Subpart B—How Does a Student Apply for a Scholarship?

652.10 How does a student apply for a scholarship?

Subpart C—What Are the Administrative Responsibilities of a State?

652.20 How does a State establish a nominating committee?
652.21 What are the responsibilities of a State and its nominating committee?
652.22 What records must a State maintain?

Subpart D—How Are Scholars Nominated and Selected?

652.30 How are Scholars nominated?
652.31 How shall a State nominating committee evaluate an application?
652.32 What selection criteria shall the State nominating committee use?
652.33 How are Scholars selected?

Subpart E—What Condition Must Be Met By Scholars?

652.40 What requirements must a Scholar meet in order to receive a scholarship?
652.41 What is the duration of a scholarship?

652.42 What are the requirements for a Scholar to continue to receive scholarship payments under the NSSP?
652.43 What are the consequences of a Scholar's noncompliance with the scholarship eligibility requirements in § 652.40 or § 652.42?
652.44 Under what conditions may scholarship eligibility be reinstated?

Subpart F—What Are the Administrative Responsibilities of the Institutions of Higher Education at Which NSSP Scholars Are Enrolled?

652.50 What institutional agreement is required?
652.51 How are scholarships to be administered by institutions of higher education?
652.52 How are scholarship awards to be made and scholarship proceeds returned and transferred?
652.53 What reports are required from an institution?

Authority: 20 U.S.C. 5381 to 5386, unless otherwise noted.

Subpart A—General

§ 652.1 What is the National Science Scholars Program?

Under the National Science Scholars Program (NSSP) the Secretary awards scholarships to students who have demonstrated outstanding academic achievement, who show promise of continued outstanding academic performance, and who are selected by the President, for the following purposes:

(a) To recognize student excellence and achievement in the physical, life, and computer sciences, mathematics, and engineering.

(b) To provide financial assistance to students to continue their postsecondary education in those fields of study at sustained outstanding levels of performance.

(c) To contribute to strengthening the leadership of the United States in those fields.

(d) To strengthen the United States' mathematics, science, and engineering base by offering opportunities to pursue postsecondary education in physical, life, and computer sciences, mathematics, and engineering.

(e) To encourage role models in scientific, mathematics, and engineering fields for young people.

(f) To strengthen the United States' mathematics, scientific, and engineering potential by encouraging equal participation of women with men in mathematics, scientific, and engineering fields.

(g) To attract talented students to teaching careers in mathematics and science in elementary and secondary schools.

(Authority: 20 U.S.C. 5381)

§ 652.2 Who is eligible to apply for a scholarship under this program?

An individual is eligible to apply for an initial scholarship under the NSSP if the individual—

(a) Is scheduled to graduate from a public or private secondary school or to obtain the recognized equivalent of a high school diploma, as defined in 34 CFR 600.2, during the award year prior to the award year in which the NSSP scholarship is to be awarded;

(b) (1) Is a citizen or national of the United States; or

(2) Provides evidence from the U.S. Immigration and Naturalization Service that he or she—

(i) Is a permanent resident of the United States; or

(ii) Is in the United States for other than a temporary purpose with the intention of becoming a citizen or permanent resident;

(c) Has demonstrated outstanding academic achievement in secondary school in the physical, life, or computer sciences, mathematics, or engineering as determined by the State nominating committee established under § 652.20;

(d) Demonstrates to the State nominating committee that he or she intends to apply for enrollment at an institution of higher education as a full-time undergraduate student for the purpose of receiving a baccalaureate degree and has not accepted an appointment to a U. S. service academy, such as the U.S. Military Academy, the U.S. Naval Academy, the U.S. Air Force Academy, the U.S. Coast Guard Academy, and the U.S. Merchant Marine Academy; and

(e) Demonstrates to the State nominating committee that he or she intends to major, at an institution of higher education, in one of the physical, life, or computer sciences, mathematics, or engineering.

(Authority: 20 U.S.C. 5384)

§ 652.3 How are awards distributed?

(a) In each award year, the Secretary awards one initial scholarship to each of two eligible Scholars selected by the President under § 652.33 from each congressional district.

(b) The Secretary disburses the scholarship proceeds, on behalf of each Scholar selected by the President, to the institution of higher education at which each Scholar is enrolled.

(c) A student awarded a scholarship under this part may attend any institution of higher education, as defined in § 652.6, that enters into an agreement with the Secretary under § 652.50, for the purpose of obtaining a baccalaureate degree in the physical, life, or computer sciences, mathematics, or engineering.

(Authority: 20 U.S.C. 5382 and 5383)

§ 652.4 In what amounts are scholarships awarded?

(a) Except as provided in paragraphs (b) and (c) of this section, the amount of a scholarship awarded under this part for a full-time student for any academic year is $5,000.

(b) The Secretary reduces the scholarship amount awarded under this part by the amount that the scholarship would otherwise exceed the Scholar's cost of attendance, as defined in section 472 of the Higher Education Act of 1965, as amended.

(c) In the event that funds available in a fiscal year are insufficient to fund fully each award under this part, the Secretary reduces proportionately each scholarship and the amount paid to each Scholar.

(Authority: 20 U.S.C. 5385)

§ 652.5 What regulations apply to this program?

The following regulations apply to the National Science Scholars Program:

(a) The Education Department General Administrative Regulations (EDGAR), as follows, except as provided in paragraph (b) of this section:

(1) 34 CFR part 74 (Administration of Grants to Institutions of Higher Education, Hospitals, and Nonprofit Organizations).

(2) 34 CFR part 75 (Direct Grant Programs) except for the following:

(i) Subpart C (How to Apply for a Grant).

(ii) Sections 75.200 through 75.216, 75.218, and 75.220 through 75.261 of subpart D (How Grants Are Made).

(iii) Sections 75.500 through 75.592 of subpart E (What Conditions Must Be Met By a Grantee?).

(3) 34 CFR part 77 (Definitions that Apply to Department Regulations).

(4) 34 CFR part 79 (Intergovernmental Review of Department of Education Programs and Activities).

(5) 34 CFR part 81 (General Education Provisions Act—Enforcement)

(6) 34 CFR part 82 (New Restrictions on Lobbying)

(7) 34 CFR part 85 (Governmentwide Debarment and Suspension (Nonprocurement) and Governmentwide Requirements for Drug-Free Workplace (Grants)).

(8) 34 CFR part 86 (Drug-Free Schools and Campuses).

(b) For the purposes of the regulations in this part, the terms "grantee" and "recipient," as used in EDGAR, mean an institution of higher education that administers a scholarship award on behalf of a National Science Scholar.

(c) The regulations in this part 652.

(Authority: 20 U.S.C. 5381 to 5386)

§ 652.6 What definitions apply to this program?

The following definitions apply to terms used in this part:

(a) *Definitions in the Act.* The following terms are defined in sections 603(b)(5) and 602(d) of the Act:

Congressional district.
National Science Scholar (Scholar).

(b) *Definitions in EDGAR.* The following terms used in this part are defined in 34 CFR 77.1:

Applicant.
Application.
Award.
Department.
Fiscal Year.
Private.
Secondary school.
Secretary.
State.

(c) *Other definitions that apply to this part.* The following additional definitions apply to this part:

Academic year means—

(1) A period of time in which a full-time student is expected to complete the equivalent of at least two semesters, two trimesters, or three quarters, at an institution that measures academic progress in credit hours and uses a semester, trimester, or quarter system; or

(2) A period of time in which a full-time student is expected to complete at least 24 semester hours or 36 quarter hours at an institution that measures academic progress in credit hours but does not use a semester, trimester, or quarter system.

Act means the Excellence in Mathematics, Science and Engineering Education Act of 1990.

Award year means the period of time from July 1 of one year through June 30 of the following year.

Computer sciences means the branch of knowledge or study of computers. The term encompasses, but is not limited to, such fields of knowlege or study as computer hardware, computer software, computer engineering, information systems, and robotics.

Director means the Director of the National Science Foundation.

Engineering means the science by which the properties of matter and the sources of energy in nature are made useful to humanity in structures, machines and products as in the construction of engines, bridges, buildings, mines, and chemical plants. The term encompasses, but is not limited to, such fields of knowledge or study as aeronautical engineering, chemical engineering, civil engineering, electrical engineering, industrial engineering, materials engineering, and mechanical engineering.

Full-time student means a student enrolled in an institution of higher education, other than a correspondence school, who is carrying a full-time academic workload as determined by the institution under standards applicable to all students enrolled in that student's educational program.

Institution of higher education (institution) means an institution of higher education as defined in 34 CFR 600.4 (institutional eligibility regulations).

Life sciences means the branch of knowledge or study of living things. The term encompasses, but is not limited to, such fields of knowledge or study as biology, biochemistry, biophysics, microbiology, genetics, physiology, botany, zoology, ecology, and behavioral biology. This term does not encompass social psychology or the health professions.

Mathematics means the branch of knowledge or study of numbers and the systematic treatment of magnitude, relationships between figures and forms, and relations between quantities expressed symbolically. The term encompasses, but is not limited to, such fields of knowledge or study as statistics, applied mathematics, and operations research.

Physical sciences means the branch of knowledge or study of the material universe. The term encompasses, but is not limited to, such fields of knowledge or study as astronomy, atmospheric sciences, chemistry, earth sciences, ocean sciences, and physics.

Scholarship means an award made to an individual in an award year under this part for one academic year.

Scholarship disciplines means the physical, life, and computer sciences, mathematics, and engineering.

(Authority: 20 U.S.C 5381 to 5386)

Subpart B—How Does A Student Apply for a Scholarship?

§ 652.10 How does a student apply for a scholarship?

(a) To apply for a scholarship under this part, an individual, who meets the eligibility requirements of § 652.2, must submit an application as required by the State nominating committee administering the NSSP in the State of his or her legal residence.

(b) In his or her application, the applicant shall address the selection criteria contained in § 652.32.

(c) The applicant shall submit the application to the State nominating committee within the deadline established by the committee.

(Approved by the Office of Management and Budget under control number 1840-0629)

(Authority: 20 U.S.C. 5383)

Subpart C—What Are the Administrative Responsibilities of a State?

§ 652.20 How does a State establish a nominating committee?

(a) To participate in the NSSP, a State shall establish a nominating committee for the purpose of nominating students for NSSP scholarships.

(b) The State nominating committee may be appointed either by the Chief State School Officer (CSSO) or by an existing grant agency or panel that was previously designated by the CSSO.

(c) Before the nominating committee may begin to fulfill its functions under § 652.21, the CSSO, grant agency, or panel that appoints the nominating committee shall submit for the Secretary's approval the names and qualifications of the individuals to be appointed.

(d) The nominating committee must include, but is not limited to, the following:

(1) At least one individual from each of the following fields:

(i) Education.
(ii) Science.
(iii) Mathematics.
(iv) Engineering.

(2) At least two faculty members each teaching in a different scholarship discipline at the postsecondary level.

(3) At least one teacher teaching in one or more of the scholarship disciplines at the secondary level.

(4) At least one person who is a scientist, mathematician, or engineer from a private-sector business that is oriented to the sciences, mathematics, or engineering.

(5) At least one admissions officer from an institution of higher eduation.

(e) An individual representing one of the nominating committee membership categories under paragraphs (d) (2) through (5) of this section, may, if qualified, also represent a category in paragraph (d)(1) of this section.

(f) Each State shall require that its State nominating committee members serve as volunteers without compensation.

(Approved by the Office of Management and Budget under control number 1840-0629)

(Authority: 20 U.S.C. 5383)

§ 652.21 What are the responsibilities of a State and its nominating committee?

Each State shall require its nominating committee to establish operating procedures governing the scholarship nomination process that include—

(a) The dissemination of program information and application materials to the State's public and private secondary schools and GED test centers;

(b) The promotion of participation in the NSSP by students from groups underrepresented in the scholarship disciplines, such as students from minority groups, students with disabilities, or students who are economically disadvantaged; and

(c) The establishment of written internal administrative procedures for—

(1) The timely submission, processing, and review of applications submitted by eligible students; and

(2) The resolution of conflicts of interest of members of the nominating committee.

(Authority: 20 U.S.C. 5383)

§ 652.22 What records must a State maintain?

The CSSO, State agency, or panel that appoints the nominating committee under § 652.20(b) shall maintain all student applications and the records and written procedures related to the selection of nominees for a scholarship competition for a period of 5 award years following the award year of the scholarship competition.

(Approved by the Office of Management and Budget under control number 1840–0629)

(Authority: 20 U.S.C. 5383 and 5384)

Subpart D—How Are Scholars Nominated and Selected?

§ 652.30 How are Scholars nominated?

(a) Scholars are nominated by State nominating committees that are established in accordance with § 652.20.

(b) Each State nominating committee shall review and evaluate the applications received each year under this program.

(c) Each State nominating committee shall select nominees in accordance with the program eligibility requirements for an initial award. Each State nominating committee may adopt one or more minimum standards to demonstrate outstanding academic achievement at the secondary school level that may include such standards as an overall minimum grade point average or a minimum class rank combined with a minimum grade point average in the sciences, mathematics, and engineering.

(d) Each State nominating committee shall submit to the President the nominations of at least four applicants legally residing in each congressional district in the State, at least half of whom must be female. The nominations must be—

(1) Ranked in order of evaluated score; and

(2) Submitted to the Secretary, who receives the nominations on behalf of the President, in the manner and by the date established by the Secretary in a notice published in the **Federal Register**.

(e) Each nominating committee shall provide the following information for each nominee to the Secretary:

(1) Name.

(2) Sex.

(3) Address.

(4) Telephone number.

(5) Social security number (if provided by the nominee).

(6) Congressional district and name of Representative or Delegate.

(7) Other information that the Secretary considers necessary for the proper administration of the program.

(Approved by the Office of Management and Budget under control number 1840–0629)

(Authority: 20 U.S.C. 5383)

§ 652.31 How shall a State nominating committee evaluate an application?

(a) Each State nominating committee shall evaluate an application on the basis of the selection criteria in § 652.32.

(b) The committee shall give each of the selection criteria equal weight.

(c) The State nominating committee shall score each applicant's responses to the selection criteria in § 652.32 using the following scale: 5 (truly exceptional), 4 (outstanding), 3 (excellent), 2 (good), 1 (fair), 0 (poor).

(d) Each applicant may receive a maximum of 25 points.

(Authority: 20 U.S.C. 5383)

§ 652.32 What selection criteria shall the State nominating committee use?

The State nominating committee shall use the following selection criteria to evaluate and rate applications:

(a) *Evidence of exceptional academic achievement at the secondary level.* The nominating committee shall rate the applicant's overall academic achievement at the secondary level by considering one or more of the following:

(1) High school class rank and grades.

(2) For an applicant who is earning the recognized equivalent of a high school diploma in lieu of graduating from high school, the applicant's score on the high school equivalency examination and high school record before leaving school.

(3)(i) The applicant's composite score on the ACT Assessment;

(ii) The sum of the applicant's verbal and quantitative scores on the Scholastic Aptitude Test (SAT); or

(iii) Both the composite score on the ACT Assessment and the sum of the applicant's SAT scores.

(b) *Evidence of exceptional nonacademic accomplishment in extracurricular areas and in the physical, life, or computer sciences, mathematics, or engineering.* The nominating committee shall rate the applicant's achievement in activities in areas such as community service, leadership, and artistic an athletic performance along with achievement outside the classroom in the sciences, mathematics, and engineering.

(c) *Letters of reference.* The nominating committee shall rate letters of reference written by three individuals chosen by the applicant and determine the degree to which these letters reflect the applicant's qualifications for a National Science Scholarship, based upon relevant factors such as—

(1) The author's qualifications to provide a recommendation for the particular applicant;

(2) The extent to which each letter of reference describes the applicant's motivation and potential to pursue a career in the physical, life, or computer sciences, mathematics, or engineering; or

(3) The extent to which each letter of reference describes the applicant's overall potential and abilities.

(d) *Applicant essay.* The applicant must write an essay that the nominating committee shall analyze and rate. The essay of 500 words or less must be on a topic that the applicant chooses and considers to be of interest to the nominating committee. The essay must reflect the applicant's motivation to pursue a career in the physical, life, or computer sciences, mathematics, or engineering, and otherwise be of relevance to the committee's determination of the applicant's qualification for a National Science Scholarship.

(e) *Meeting the purposes of the authorizing statute.* The nominating committee shall rate each application to determine how well it meets the purposes of the National Science Scholars Program as set forth in § 652.1.

(Approved by the Office of Management and Budget under control number 1840–0629)

(Authority: 20 U.S.C. 5381–5383)

§ 652.33 How are Scholars selected?

(a) For each award year, after consultation with the Secretary and the Director of the National Science Foundation, the President selects and announces from among the nominees submitted by State nominating committees under § 652.30, two National Science Scholars legally residing in each congressional district.

(b) The selection of National Science Scholars is announced prior to January 1 of each fiscal year for which funds are appropriated.

(Authority: 20 U.S.C. 5383)

Subpart E—What Conditions Must Be Met By Scholars?

§ 652.40 What requirements must a Scholar meet in order to receive a scholarship?

To be eligible to receive a scholarship, a Scholar who has been selected by the President under § 652.33, must—

(a) Meet the eligibility requirements in § 652.2;

(b) Have been accepted for enrollment at an institution of higher education other than a U.S. service academy, such as the U.S. Military Academy, the U.S. Naval Academy, the U.S. Air Force Academy, the U.S. Coast Guard Academy, and the U.S. Merchant Marine Academy, as a full-time undergraduate student (as determined by the institution) for the purpose of obtaining a baccalaureate degree;

(c) Have declared a major in one of the physical, life, or computer sciences, mathematics, or engineering, or have provided a written statement to the institution of higher education of his or her intent to major in one of these fields of study if it is the policy of the institution at which the Scholar has been accepted for enrollment that students not declare a major until a later point in their course of study; and

(d) Have filed with the institution he or she plans to attend or is attending, a Statement of Educational Purpose in accordance with 34 CFR 668.32 of the Student Assistance General Provisions regulations.

(Approved by the Office of Management and Budget under control number 1840–0629)

(Authority: 20 U.S.C. 5381 and 5383)

§ 652.41 What is the duration of a scholarship?

(a) In the first award year after a Scholar is selected by the President, the Scholar receives his or her initial scholarship, for a period of one academic year, for his or her first year of undergraduate study in one of the scholarship disciplines at an institution of higher education.

(b) Except for a Scholar covered in paragraph (c) of this section, a Scholar who satisfies the requirements of § 652.42 may receive up to three additional scholarships in subsequent award years, each awarded for a period of one academic year, in order to complete his or her undergraduate course of study.

(c) A Scholar who satisfies the requirements of § 652.42 and who is enrolled in an undergraduate course of study that requires attendance for five academic years may receive additional scholarships for not more than four additional academic years of undergraduate study.

(Authority: 20 U.S.C. 5382)

§ 652.42 What are the requirements for a Scholar to continue to receive scholarship payments under the NSSP?

A Scholar who has received a scholarship under this part for at least one year of undergraduate study is eligible to receive a scholarship for a subsequent year of undergraduate study under § 652.41(b) or (c), if, at the beginning of that subsequent academic year, the Scholar—

(a) Is enrolled as a full-time student at an institution of higher education for the purpose of receiving a baccalaureate degree, unless the institution has determined that unusual circumstances justify waiver of the full-time attendance requirement and the Secretary has waived the full-time attendance requirement as provided for in § 652.43(b);

(b) Continues to major in one of the scholarship disciplines, or provides a written assurance to both the State and the institution of higher education at which the Scholar is enrolled of his or her intent to major in one of the scholarship disciplines, if it is the policy of that institution that a student not declare a major until later in his or her course of study; and

(c) Maintains a high level of academic achievement, as defined by the institution, in—

(1) His or her overall course of study;

(2) Those science, mathematics, or engineering courses in which the Scholar has enrolled; and

(3) The Scholar's major, if declared.

(Approved by the Office of Management and Budget under control number 1840–0629)

(Authority: 20 U.S.C. 5382 and 5384)

§ 652.43 What are the consequences of a Scholar's noncompliance with the scholarship eligibility requirements in §§ 652.40 or 652.42?

(a)(1) Except as provided in paragraph (b) of this section, if an insitution of higher education finds that a Scholar fails to meet the requirements of §§ 652.40 or 652.42 within an award year, the institution shall suspend the Scholar's eligibility to receive further scholarships, or scholarship proceeds.

(2) A suspension of a Scholar's eligibility for failure to meet the requirements of §§ 652.40 or 652.42 must remain in effect until the Scholar is able to demonstrate to the satisfaction of the institution that he or she is in compliance with all applicable scholarship eligibility requirements, including renewal requirements in § 652.42 and reinstatement requirements in § 652.44.

(3) If the total period of suspension exceeds 12 months, the Scholar's eligibility for NSSP scholarships shall be terminated.

(b) The Secretaary may waive the full-time attendance requirement in § 652.40 and § 652.42 for periods during which the institution determines that unusual circumstances have caused the Scholar's noncompliance with the full-time attendance requirement of § 652.42(a) and that suspension of scholarship eligibility would cause a Scholar undue hardship.

(c) If a Scholar's full-time attendance requirement is waived under paragraph (b) of this section, he or she may continue to receive a scholarship payment. The institution shall prorate the payment according to the Scholar's enrollment status for the academic period during which he or she continues to be enrolled on a part-time basis but remains otherwise eligible for the award. For example, if a Scholar for whom the full-time enrollment requirement is waived by the Secretary is enrolled as a half-time student for one semester, he or she is eligible to receive one-half of the scholarship payment for a full-time student for that semester. Therefore, if the institution makes disbursements in equal amounts, the Scholar would receive one-quarter of his or her scholarship during that semester, which would count as one-fourth of a year for purposes of the four-year limit.

(Authority: 20 U.S.C. 5384)

§ 652.44 Under what conditions may scholarship eligibility be reinstated?

A Scholar whose eligibility is suspended under § 652.43(a), such as a Scholar whose attendance at an institution of higher education was interrupted for reasons including, but not limited to, pregnancy, child-rearing, or other family responsibilities, may have his or her scholarship eligibility reinstated by the institution of higher education at which he or she is enrolled if—

(a) The period of suspension or interruption was for a period of no more than 12 months unless the institution determines that the 12-month limitation

should be waived due to exceptional circumstances; and

(b) The Scholar demonstrates to the institution that he or she is in compliance with the relevant eligibility and renewal requirements in §§ 652.40 and 652.42.

(Authority: 20 U.S.C. 5384)

Subpart F—What Are the Administrative Responsibilities of the Institutions of Higher Education at Which NSSP Scholars Are Enrolled?

§ 652.50 What institutional agreement is required?

Any institution at which one or more NSSP Scholars are enrolled shall enter into an agreement with the Secretary under which the institution shall agree to comply with the provisions of the Act and of this part, including providing annual assurances of the eligibility of enrolled Scholars under §§ 652.40 and 652.42 and the awarding of scholarships to those Scholars.

(Authority: 20 U.S.C. 5383 and 5384)

§ 652.51 How are scholarships to be administered by institutions of higher education?

(a) The Secretary sends a roster of Scholars and a notification of an allocation of scholarship funds for each award year to an institution of higher education that has entered into an agreement with the Secretary under § 652.50.

(b) An institution of higher education may not disburse scholarship funds to a Scholar until the Scholar is attending classes at that institution of higher education and meets the other eligibility requirements in § 652.40 and, if applicable, the renewal requirements of § 652.42.

(c) The institution shall award the Scholar a scholarship for an amount that is determined under § 652.4.

(d) The institution of higher education in which a Scholar is enrolled for the purpose of obtaining a degree may allow another institution or organization to provide a portion of the Scholar's program of study if the institution at which the Scholar is enrolled to obtain his or her degree—

(1) Enters into a written agreement with the other institution or organization which is in accordance with the provisions of 34 CFR 600.9 and which, if the other institution has entered into an agreement with the Secretary under § 652.50, is in accordance with the provisions governing written agreements between two eligible institutions in 34 CFR 690.9 of the Pell Grant Program regulations; and

(2) Ensures that the Scholar continues to meet the requirements in subpart E of this part.

(Authority: 20 U.S.C. 5383–5385)

§ 652.52 How are scholarship awards to be made and scholarship proceeds returned and transferred?

(a) An institution shall provide scholarship proceeds to a Scholar in at least two payments per academic year.

(b) In the event that a Scholar refuses a scholarship, does not attend courses, transfers to another institution, or becomes ineligible for a scholarship and cannot be reinstated in the same award year, the institution shall return the scholarship proceeds to the Secretary.

(c) A Scholar who ceases to be eligible for NSSP scholarship proceeds at an institution before completion of an academic period for which payment of a scholarship award has been received is only eligible for a prorated portion of the scholarship award and is liable to the Secretary for any overpayment. The prorated portion of the scholarship to be returned to the Secretary must be in proportion to the portion of the academic period during which the Scholar was ineligible for a scholarship. The institution shall return the overpayment to the Secretary in accordance with the provisions governing the recovery of overpayments in 34 CFR 690.79 of the Pell Grant Program regulations.

(d) The institution shall pay a *pro rata* share of the scholarship for which the Scholar is eligible if he or she enrolls for less than a full academic year to complete his or her baccalaureate degree. The institution shall return the remaining share of the scholarship to the Secretary.

(e) If a Scholar transfers to another institution of higher education during an award year, the institution in which the Scholar was originally enrolled shall calculate, and immediately inform the Secretary of, the amount of the scholarship disbursed to the Scholar at that institution and the amount of the award that remains to be disbursed for the award year. The Secretary will then reallocate the undisbursed funds from the original institution to the institution to which the Scholar has transferred. As long as the new institution to which the Scholar transfers determines that the Scholar meets the provisions of §§ 652.40 and 652.42, it may continue to provide scholarship funds to the Scholar.

(Authority: 20 U.S.C. 5383 and 5384)

§ 652.53 What reports are required from an institution?

(a) Prior to the receipt of funds for disbursement to a Scholar, an institution of higher education shall provide to the Secretary the following:

(1) For a Scholar receiving his or her initial scholarship, a statement from the appropriate official at the institution indicating—

(i)(A) That the Scholar has provided the institution with a written formal commitment to attend the institution for the relevant academic year and has complied with any other institutional requirements for indicating such a commitment including a monetary deposit; or

(B) That the Scholar is currently in attendance at that institution for the relevant academic year; and

(ii) The Scholar's cost of attendance.

(2) For a Scholar who is eligible to receive an additional award in a subsequent award year, a statement from the appropriate official at the institution indicating that the Scholar is in compliance with the renewal requirements of § 652.42.

(b) An institution shall provide such reports to the Secretary as are necessary to carry out the Secretary's functions under this part, in accordance with departmental requirements in EDGAR.

(Authority: 20 U.S.C. 5384)

BILLING CODE 4000-01-M

DEPARTMENT OF EDUCATION

Office of Postsecondary Education

National Science Scholars Program

AGENCY: Department of Education.

ACTION: Notice of the closing date for the submission of fiscal year 1992 Scholar nominations under the National Science Scholars Program.

SUMMARY: The Secretary of Education (Secretary) gives notice of the closing date and procedures for the State nominating committees approved by the Secretary to submit the names of nominees to the President under the National Science Scholars Program (NSSP) authorized by title VI, part A of the Excellence in Mathematics, Science and Engineering Education Act of 1990, Public Law 101–589, 20 U.S.C. 5381 *et seq.* (the Act), as amended. The NSSP supports AMERICA 2000, the President's strategy for moving the Nation toward the National Education Goals, by providing scholarships and other benefits to students selected by the President for undergraduate study of the physical, life, or computer sciences, mathematics, or engineering. National Education Goals 3 and 4 call for American students to demonstrate competency in mathematics and science and to be first in the world in those subjects by the year 2000.

The Secretary will accept the names of nominees on behalf of the President from the nominating committees of States participating in the NSSP, including the 50 States and the District of Columbia, Puerto Rico, American Samoa, Guam, the Commonwealth of the Northern Mariana Islands, and the Virgin Islands. Each State nominating committee must submit for consideration the names and pertinent information of at least four nominees from each congressional district in the State. The Act provides that at least one half of the nominees from each congressional district must be female and all of the nominees must be ranked in order of priority within each congressional district. A State with an approved nominating committee that desires to have its nominees considered for selection as National Science Scholars must provide each nominee's name, permanent address, home telephone number, summer telephone number if different from the home telephone number, social security number if provided by the nominee, sex, congressional district, the congressional representative's or delegate's name for that congressional district, priority ranking within the congressional district, institution of higher education at which the nominee has been accepted or which the nominee plans to attend, and the NSSP subject area in which the nominee intends to major and specific major if known.

CLOSING DATE AND MEDIA FOR TRANSMITTING NSSP NOMINEE INFORMATION: A State must provide its NSSP nominations for fiscal year 1992 by—

(1) Submitting the nominee information in typewritten format; or

(2) Submitting the nominee data on a data diskette provided by the U.S. Department of Education that the U.S. Department of Education sends directly to all States.

To ensure that State nominees are considered for FY 1992 funds, a State must submit nominee information by July 13, 1992.

STATE NSSP NOMINATIONS DELIVERED BY MAIL: NSSP nominations must be sent to the address provided below.

A State must obtain proof of mailing consisting of one of the following:

(1) A legibly dated U.S. Postal Service postmark;

(2) A legible mail receipt with the date of mailing stamped by the U.S. Postal Service;

(3) A dated shipping label, invoice, or receipt from a Commercial Carrier; or

(4) Any other proof of mailing acceptable to the Secretary of Education.

If a State's NSSP nominations are sent through the U.S. Postal Service, the Secretary does not accept either of the following as proof of mailing: (1) A private metered postmark; or (2) a mail receipt that is not dated by the U.S. Postal Service. A State should note that the U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, a State should check with its local post office. A State is encouraged to use registered or at least first-class mail.

Each State submitting nominations after the closing date will be notified that its nominees cannot be assured of consideration for fiscal year 1992 funding.

ADDRESSES: Nominations that are mailed must be sent to the following address: National Science Scholars Program, United States Department of Education, Office of Student Financial Assistance, ROB–3, room 4651, 400 Maryland Avenue, SW., Washington, DC 20202–5453.

APPLICATIONS DELIVERED BY HAND: State NSSP nominations that are typewritten or are on diskette that are hand-delivered must be taken to the U.S. Department of Education, Office of Student Financial Assistance, 7th and D Streets, SW., room 4651, GSA Regional Office Building #3, Washington, DC 20202–5453. Hand-delivered nominations will be accepted between 8 a.m. and 4:30 p.m. daily (Eastern time), except Saturdays, Sundays, and Federal holidays.

State nominations that are hand-delivered will not be accepted after 4:30 p.m. on the closing date.

PROGRAM INFORMATION: Under the NSSP, the Secretary is authorized to award scholarships to outstanding students selected by the President for the study of physical, life, or computer sciences, mathematics, or engineering. The Secretary is authorized to award initial scholarships of up to $5,000 for the first year of undergraduate study to graduating high school students as well as continuation awards of up to $5,000 for up to four additional years of undergraduate study. Based on an appropriation of $4.5 million for fiscal year 1992 and on the assumption that all States participate in the NSSP for fiscal year 1992, the estimated award for recipients in fiscal year 1992 is expected to be approximately $2,600.

APPLICABLE STATUTORY AND REGULATORY PROVISIONS: The following statute and regulations are applicable to the fiscal year 1992 NSSP:

(1) The program statute, 20 U.S.C. 5381 *et seq.*

(2) National Science Scholars Program regulations, 34 CFR part 652, as published in this issue of the **Federal Register**.

(3) The Education Department General Administrative Regulations (EDGAR) in 34 CFR parts 74, 75 (with the exception of subpart C, §§ 75.200–75.216, 75.218, and 75.220–75.261 of subpart D, and sections 75.580–75.592 of subpart E), 77, 79, 81, 82, 85, and 86.

INTERGOVERNMENTAL REVIEW: This program is subject to the requirements of Executive Order 12372 and the regulations in 34 CFR part 79. The objective of Executive Order 12372 is to foster an intergovernmental partnership and strengthened federalism by relying on processes developed by State and local governments for coordination and review of proposed Federal financial assistance.

In accordance with the order, this document is intended to provide early notification of the Department's specific plans and actions for this program.

FOR FURTHER INFORMATION CONTACT: For further information contact Mr. Fred H. Sellers, Chief, State Grant Section, Office of Student Financial Assistance, U.S. Department of Education,

Washington, DC 20202–5447; telephone (202) 708–4607. Deaf and hearing impaired individuals may call: the Federal Dual Party Relay Service at 1–800–877–8339 (in Washington, DC, 202 area code, telephone 708–9300) between 8 a.m. and 7 p.m., Eastern time.

(Authority: 20 U.S.C. 5381 *et seq.*, as amended.)

(Catalog of Federal Domestic Assistance Number 84.242, National Science Scholars Program)

Dated: March 13, 1992.

Gerald R. Riso,

Acting Assistant Secretary for Postsecondary Education.

Public Laws

102d Congress, 2nd Session, 1992

Pamphlet prints of public laws, often referred to as slip laws, are the initial publication of Federal laws upon enactment and are printed as soon as possible after approval by the President. Legislative history references appear on each law. Subscription service includes all public laws, issued irregularly upon enactment, for the 102d Congress, 2nd Session, 1992.

(Individual laws also may be purchased from the Superintendent of Documents, Washington, DC 20402-9328. Prices vary. See Reader Aids Section of the Federal Register for announcements of newly enacted laws and prices).

For those of you who must keep informed about **Presidential Proclamations and Executive Orders,** there is a convenient reference source that will make researching these documents much easier.

Arranged by subject matter, this edition of the *Codification* contains proclamations and Executive orders that were issued or amended during the period April 13, 1945, through January 20, 1989, and which have a continuing effect on the public. For those documents that have been affected by other proclamations or Executive orders, the codified text presents the amended version. Therefore, a reader can use the *Codification* to determine the latest text of a document without having to "reconstruct" it through extensive research.

Special features include a comprehensive index and a table listing each proclamation and Executive order issued during the 1945-1989 period—along with any amendments—an indication of its current status, and, where applicable, its location in this volume.

Published by the Office of the Federal Register, National Archives and Records Administration

Guide to Record Retention Requirements

in the Code of Federal Regulations (CFR)

GUIDE: Revised January 1, 1989
SUPPLEMENT: Revised January 1, 1991

The GUIDE and the SUPPLEMENT should be used together. This useful reference tool, compiled from agency regulations, is designed to assist anyone with Federal recordkeeping obligations.

The various abstracts in the GUIDE tell the user (1) what records must be kept, (2) who must keep them, and (3) how long they must be kept.

The GUIDE is formatted and numbered to parallel the CODE OF FEDERAL REGULATIONS (CFR) for uniformity of citation and easy reference to the source document.

Compiled by the Office of the Federal Register, National Archives and Records Administration.

Briefings on How To Use the Federal Register
For information on briefings in Washington, DC and St. Louis, MO, see announcement on the inside cover of this issue.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 57 FR 12345.

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC

WHEN: April 7, at 9:00 a.m.
WHERE: Office of the Federal Register, First Floor Conference Room, 1100 L Street NW., Washington, DC.
RESERVATIONS: 202-523-5240.
DIRECTIONS: North on 11th Street from Metro Center to corner of 11th and L Streets

ST. LOUIS, MO

WHEN: April 23; at 9:00 a.m.
WHERE: Room 1612, Federal Building, 1520 Market Street, St. Louis, MO
RESERVATIONS: Call the Federal Information Center
St. Louis: 1-800-366-2998

Title 3—

The President

Proclamation 6417 of March 25, 1992

Greek Independence Day: A National Day of Celebration of Greek and American Democracy, 1992

By the President of the United States of America

A Proclamation

The United States proudly joins in celebrating Greek Independence Day on March 25, not only because many Americans trace their roots to Greece, but also because our two countries share a strong commitment to the ideals of freedom and democratic government.

When the people of Greece began to seek independence 171 years ago, they enjoyed widespread support in the United States. President Monroe expressed admiration for "the heroic struggle" of the Greeks during his seventh annual address to the Congress, and countless Americans shared his "ardent wishes" that their quest for liberty would triumph. Yet the shared aspirations and values that unite the Greek and American peoples can be traced long before the historic events of the early 19th century.

The great philosophers of ancient Greece and the experiences of its city-states had a profound impact on the founding of our Republic—as they have had on the development of all Western civilization. Many of our Founders were well schooled in classical languages and Greek literature, and their view of both human nature and the nature of civil order was clearly influenced by the thought of Solon, Thucydides, Plato, and other Greek statesmen, historians, and philosophers. Thomas Jefferson praised Greece for the enlightenment that was provided by its "splendid constellation of sages and heroes," and James Madison and other delegates to the Federal Convention often referred to the experiences of the Amphictyonic council and the Achaean league when debating proposals for the representation of States under our Constitution. Greek antiquity offered the Framers of our Constitution many valuable insights as they labored to establish a just and enduring system of democratic government in the United States.

Thousands of years ago, Greece became the "cradle of democracy." Today, democracy is no longer a nascent ideal, but a tried and proven form of government that continues to flourish around the world as hundreds of millions of people seek the blessings of freedom and self-government. During this period of historic change for so many nations, it is fitting that the peoples of the United States and Greece reaffirm our shared democratic heritage and the importance of our continuing cooperation. The Western alliance of democratic nations, including Greece, was instrumental in thwarting imperial communism and hastening the collapse of totalitarian regimes. Now, as newly emerging democracies grapple with serious problems of economic hardship and social unrest, the United States and Greece will continue to stand as partners in the promotion of peace and stability based on respect for human rights and for the rule of law.

As an expression of the warm and friendly relations that exist between the Greek and American peoples and our governments, the Congress, by Public Law 102–263, has designated March 25, 1992, as "Greek Independence Day: A National Day of Celebration of Greek and American Democracy" and has authorized and requested the President to issue a proclamation in observance of this day.

NOW, THEREFORE, I, GEORGE BUSH, President of the United States of America, do hereby proclaim March 25, 1992, as Greek Independence Day: A National Day of Celebration of Greek and American Democracy. I invite all Americans to observe this day with appropriate programs, ceremonies, and activities in honor of the Greek people and Greek independence.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-fifth day of March, in the year of our Lord nineteen hundred and ninety-two, and of the Independence of the United States of America the two hundred and sixteenth.

George Bush

Rules and Regulations

Federal Register
Vol. 57, No. 61
Monday, March 30, 1992

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF THE TREASURY

26 CFR Part 1

[T.D. 8405]

RIN 1545-AP18

Final Regulations Under Section 382 of the Internal Revenue Code of 1986; Limitations on Corporate Net Operating Loss Carryforwards

AGENCY: Internal Revenue Service, Treasury.

ACTION: Final regulations.

SUMMARY: This document contains final regulations relating to the use of certain corporate tax attributes under section 382 of the Internal Revenue Code of 1986 (the "Code") that are attributable to the period preceding an ownership change of the corporation. Section 382 was amended by the Tax Reform Act of 1986, the Revenue Act of 1987, the Technical and Miscellaneous Revenue Act of 1988 and the Revenue Reconciliation Act of 1989. These final regulations under section 382 provide guidance for the aggregation of stock ownership with respect to the definition of an entity.

DATES: The regulations are effective as of March 27, 1992, and generally are applicable to testing dates occurring on or after November 20, 1990.

FOR FURTHER INFORMATION CONTACT: Lori J. Brown of the Office of Assistant Chief Counsel (Corporate), Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, DC 20224 (Attention: CC:CORP:1) or telephone (202) 566-3205 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

This document contains final regulations to be added to 26 CFR part 1 under section 382 of the Internal Revenue Code (the "Code"). On November 21, 1990, the Internal Revenue Service published in the **Federal Register** (55 FR 48639) a Notice of Proposed Rulemaking proposing amendments to the Income Tax Regulations under section 382. That document proposed amendments to the temporary regulations (T.D. 8149) under section 382 which were published in the **Federal Register** (52 FR 29668) on August 11, 1987. The temporary regulations (52 FR 29704) also published on August 11, 1987, also were proposed to be adopted as final regulations.

Explanation of Provisions

The only written comments received by the Internal Revenue Service with respect to the Notice of Proposed Rulemaking published on November 21, 1990, generally regarded the effect of the proposed amendments on acquisitions of stock made by investors sharing a common investment advisor or decision maker. This document takes those comments into account by amending the definition of an entity to include a group of persons having a formal or informal understanding among themselves to make a coordinated acquisition of stock. A principal element in determining if such an understanding exists is whether the investment decision of each member of a group is based upon the investment decision of one or more other members. The existing examples are modified, and a new example is provided, to reflect the amended definition of an entity.

The regulations also clarify the treatment of creditors who receive stock in satisfaction of indebtedness as part of a bankruptcy reorganization or insolvency workout. A new sentence, added to the definition of an entity, provides that participation by creditors in formulating a plan for an insolvency workout or a reorganization in a title 11 or similar case, whether as members of a creditor's committee or otherwise, and the receipt of stock in satisfaction of indebtedness by creditors do not cause the creditors to be considered an entity.

The regulations generally provide that the new rules apply to testing dates on or after November 20, 1990, but with respect to a group of persons that acquired stock prior to that date, the rules apply only if the group increases or decreases its ownership of stock of the loss corporation by five percentage points or more relative to the percentage ownership interest of such group on November 19, 1990. However, if such group consists only of regulated investment companies under section 851, qualified plans under section 401, common trust funds under section 584, or trusts or estates that are clients of a trust department of a bank defined in section 581, the new rules apply only if the group increases its ownership by five percentage points on or after November 20, 1990, relative to its percentage ownership interest at the close of November 19, 1990.

Special Analyses

It has been determined that these rules are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required. It has also been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) and the Regulatory Flexibility Act (5 U.S.C. chapter 6) do not apply to these regulations, and, therefore, a final Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Internal Revenue Code, the Notice of Proposed Rulemaking for the regulations was submitted to the Chief Counsel for Advocacy of the Small Business Administration for comments on their impact on small business.

Drafting Information

The principal author of these regulations is Lori J. Brown of Office of Assistant Chief Counsel, Corporate, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulation, on matters of both substance and style.

List of Subjects in 26 CFR 1.381(a)-1 Through 1.383-3

Income taxes, Reporting and recordkeeping requirements.

Adoption of Amendments to the Regulations

Accordingly, 26 CFR part 1 is amended as follows:

PART 1—INCOME TAXES; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

Paragraph 1. The authority citation for part 1 is amended by revising the

citations for §§ 1.382–2, 1.383–1 and 1.383–2 to read as follows:

Authority: Sec. 7805, 68A Stat. 917; 26 U.S.C. 7805. * * * Section 1.382–2 also issued under 26 U.S.C. 382(k)(1) and 26 U.S.C. 382(m). * * * Section 1.383–1 also issued under 26 U.S.C. 383. Section 1.383–2 also issued under 26 U.S.C. 383.

Par. 2. Section 1.382–2 is amended as follows:

1. A new paragraph (a)(3) is added.

§ 1.382–2 Definition of ownership change under section 382 as amended by the Tax Reform Act of 1986.

(a) * * *

(3) *Entity.* (i) *In general*—An entity is any corporation, estate, trust, association, company, partnership or similar organization. An entity includes a group of persons who have a formal or informal understanding among themselves to make a coordinated acquisition of stock. A principal element in determining if such an understanding exists is whether the investment decision of each member of a group is based upon the investment decision of one or more other members. However, the participation by creditors in formulating a plan for an insolvency workout or a reorganization in a title 11 or similar case (whether as members of a creditors' committee or otherwise) and the receipt of stock by creditors in satisfaction of indebtedness pursuant to the workout or reorganization do not cause the creditors to be considered an entity.

(ii) *Examples.* The following examples illustrate the provisions of paragraph (a)(3)(i) of this section.

Example 1. (i) L corporation has 1,000 shares of common stock outstanding. For the three-year period ending on October 1, 1992, L's stock was owned by unrelated individuals, none of whom owned five percent or more of L. A group of 20 individuals who previously owned no stock (the "Group") agree among themselves to acquire more than 5 percent of L's stock. The Group is not a corporation, trust, association, partnership or company. On October 1, 1992, pursuant to their understanding, the members of the Group purchase 600 shares of L common stock from the old shareholders of L (a total of 60 percent of L stock), with each member purchasing 30 shares.

(ii) Before the members of the Group acquired L's stock on October 1, 1992, no individual or entity owned, directly or indirectly, five percent or more of the stock of L. As a result, all shareholders were aggregated into a public group and L was considered to be owned by a single 5-percent shareholder ("Public L") in accordance with § 1.382–2T (g)(1) and (j)(1).

(iii) Under paragraph (a)(3)(i) of this section, the members of the Group have a formal or informal understanding among themselves to make a coordinated acquisition of stock and, therefore, the Group is an entity. Thus, the acquisition of more than five percent of the stock of L on October 1, 1992, by members of the Group is not disregarded under § 1.382–2T(e)(1)(ii).–Because no member of the Group owns, directly or indirectly, five percent or more of the stock of L, §§ 1.382–2T (g)(1) and (j)(1) require that the members of the Group be aggregated into a separate public group, which will be presumed to consist of persons unrelated to the members of Public L. Because there is a shift of more than fifty percentage points in the ownership of L stock during the three-year testing period ending on October 1, 1992, an ownership change occurs on October 1, 1992, as a result of the Group's purchase of the 600 shares.

Example 2. (i) Prior to October 1, 1992, L's 1,000 shares of outstanding stock were owned by unrelated individuals, none of whom owned five percent or more of the stock of L. L's management is concerned that L may become subject to a takeover bid. In separate meetings, L's management meets with potential investors who own no stock and are friendly to management to convince them to acquire L's stock based on an understanding that L will assemble a group that in the aggregate will acquire more than 50 percent of L's stock. On October 1, 1991, 15 of these investors each purchase 4 percent of L's stock.

(ii) Under paragraph (a)(3)(i) of this section, the 15 investors (the "Group") are treated as an entity because the members of the Group purchase L stock pursuant to a formal or informal understanding among themselves to make a coordinated acquisition of stock. Sections 1.382–2T (g)(1) and (j)(1) require that on October 1, 1992, the Group be aggregated into a separate public group, which has increased its ownership of L stock by 60 percentage points over its lowest level of ownership in the three-year period ending on October 1, 1992. Accordingly, an ownership change occurs on that date.

Example 3. (i) Prior to October 1, 1992, L's 1,000 shares of outstanding stock were owned by unrelated individuals, none of whom owned five percent or more of the stock of L. On October 1, 1992, an investment advisor advises its clients that it believes L's stock is undervalued and recommends that they acquire L stock. Acting on the investment advisor's recommendation, 20 unrelated individuals purchase 6 percent of L's stock in aggregate, with each individual purchasing less than 5 percent. Each client's decision was not based upon the investment decisions made by one or more other clients.

(ii) Because there is no formal or informal understanding among the clients to make a coordinated acquisition of L stock, their purchase of stock is not made by an entity under paragraph (a)(3)(i) of this section. As a result, they remain part of the public group which owns L stock, and no owner shift results upon their purchase of L stock under § 1.382–2T(e)(1)(ii).

(iii) The result in this example would be the same if the only additional fact was that the investment advisor is also the underwriter (without regard to whether it is a firm commitment or best efforts underwriting) for a primary or secondary offering of L stock.

(iv) Assume that the facts are the same except that, instead of an investment advisor recommending that clients purchase L stock, the trustee of several trusts qualified under section 401(a) sponsored by unrelated corporations causes each trust to purchase the L stock. In this case, the result is the same, so long as the investment decision made on behalf of each trust was not based on the investment decision made on behalf of one or more of the other trusts.

(iii) *Effective date.* (A) *In general.* The second, third and fourth sentences of paragraph (a)(3)(i) of this section and Examples 1, 2 and 3 of paragraph (a)(3)(ii) of this section apply to testing dates (determined by applying such sentence and examples) on or after November 20, 1990, but with respect to any group of persons that pursuant to a formal or informal understanding among themselves makes a coordinated acquisition of stock before November 20, 1990, only if the group increases or decreases its ownership of stock of the loss corporation relative to its percentage ownership interest at the close of November 19, 1990, by five percentage points or more on or after November 20, 1990.

(B) *Special rule.* If pursuant to a formal or informal understanding among themselves a group consisting only of regulated investment companies under section 851, qualified trusts under section 401, common trust funds under section 584, or trusts or estates that are clients of a trust department of a bank under section 581, make a coordinated acquisition of stock before November 20, 1990, the second, third and fourth sentences of paragraph (a)(3)(i) of this section and Examples 1, 2, and 3 of this section apply for testing dates (determined by applying such sentences and examples) on or after November 20, 1990, only if the group increases its ownership of stock of the loss corporation relative to its percentage ownership interest at the close of November 19, 1990, by five percentage points or more on or after November 20, 1990.

(C) *Example.* The following example illustrates the provisions of paragraph (a)(3)(iii) of this section.

Example. Prior to November 1, 1990, L, a loss, corporation, is owned entirely by 1,000 unrelated individuals, none of whom owns as much as 5 percent of the stock of L ("Public L"). On November 1, 1990, 15 individuals (the "Group") each acquired 3 percent, or 45 percent, in total, of L stock pursuant to an understanding among themselves to make a coordinated acquisition of stock. The Group is not a corporation, trust, association, partnership or company. On March 1, 1992, six members of the Group each purchased an additional one percent of L stock, or 6 percent, in total, pursuant to the understanding. Accordingly, the Group increased its ownership in L stock by 51 percentage points during the three-year testing period ending on March 1, 1992. As a result, an ownership change of L occurs on March 1, 1992.

Par. 3. Section 1.382–2T is amended as follows:

1. Paragraph (f)(7) is revised to read as set forth below.

2. Paragraph (g)(4) is amended by adding a new *Example 5* as set forth below.

§ 1.382–2T Definition of ownership change under section 382, as amended by the Tax Reform Act of 1986 (temporary).

* * * * *

(f) * * *

(7) *Entity.* Sec § 1.382–2(a)(3) for the definition of an entity.

* * * * *

(g) * * *

(4) * * *

Example 5—See § 1.382–2(a)(3)(ii) for additional examples with respect to the definition of an entity.

* * * * *

Approved: March 5, 1992.

David G. Blattner,

Acting Commissioner of Internal Revenue.

Fred T. Goldberg, Jr.,

Assistant Secretary of the Treasury.

BILLING CODE 4830–01–M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 88–490; RM–6400, RM–6623]

Radio Broadcasting Services; Lake Havasu City and Parker, AZ

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document substitutes Channel 257C2 for Channel 257A at Parker, Arizona, and modifies the license of Station KMDX, Parker, Arizona, to specify operation on Channel 257C2. This document also allots Channel 224C2 to Lake Havasu City, Arizona, as a new local service. See 53 FR 42983, published October 25, 1988. The reference coordinates for the Channel 257C2 allotment at Parker, Arizona, are 34–07–22 and 114–12–40. The reference coordinates for the Channel 224C2 allotment at Lake Havasu City, Arizona, are 34–29–02 and 114–19–18. Since both Lake Havasu City and Parker are located within 320 kilometers (199 miles) of the U.S.-Mexican border, Mexican concurrence was obtained for these allotments. With this action, the proceeding is terminated.

DATES: Effective May 8, 1992. The window period for filing applications for the Channel 224C2 allotment at Lake Havasu City, Arizona, will open on May 11, 1992, and close on June 10, 1992.

FOR FURTHER INFORMATION CONTACT: Robert Hayne, Mass Media Bureau, (202) 634–6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Report and Order, MM Docket No. 88–490, adopted March 12, 1992, and released March 24, 1992. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, Downtown Copy Center, (202) 452–1422, 1714 21st Street, NW., Washington, DC 20036.

[MM Docket No. 90–510; RM–7491, RM–7496, RM–7682]

Radio Broadcasting Services; Taylorville, Virginia and Augusta, IL

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document substitutes Channel 224B1 for Channel 224A at Taylorville, Illinois; allots Channel 267A to Virginia, Illinois; and substitutes Channel 253A for Channel 266A at Augusta, Illinois, in response to a petition for rule making (RM–7491) and a counterproposal (RM–7682) filed on behalf of USA Radio Corporation. A proposal filed by Panther Communications (RM–7496) to allot Channel 223A to Virginia is denied. See 55 FR 47344, November 13, 1990. The coordinates for Channel 224B1 at Taylorville are 39–32–00 and 89–27–00. The coordinates for Channel 267A at Virginia are 40–00–47 and 90–20–42 with a site restriction 13.5 kilometers (8.4 miles) northwest. The coordinates for Channel 253A at Augusta are 40–16–03 and 90–57–10. The authorizations of Stations WTJY(FM), Taylorville, and WAHL Augusta, are modified to specify operation on the new channels. With this action, the proceeding is terminated.

DATES: Effective May 8, 1992. The window period for filing applications at Virginia will open on May 11, 1992, and close on June 10, 1992.

[MM Docket No. 89-621; RM-7063]

Radio Broadcasting Services; Kerrville, TX

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: The Commission, at the request of Guadalupe Communications, Inc., substitutes Channel 222C2 for Channel 221A at Kerrville, Texas, and modifies the construction permit of Station KITE-FM to specify operation on the higher powered channel. See 55 FR 01065, January 11, 1990. Channel 222C2 can be allotted in compliance with the Commission's minimum distance separation requirements with a site restriction of 4.8 kilometers (3.0 miles) northwest to accommodate Guadalupe's desired site. The coordinates for Channel 222C2 at Kerrville are 30-05-00 and 99-10-00. Mexican concurrence has been obtained for the allotment of Channel 222C2 at Kerrville, Texas. With this action, this proceeding is terminated.

EFFECTIVE DATE: May 8, 1992.

Proposed Rules

Federal Register
Vol. 57, No. 61
Monday, March 30, 1992

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF JUSTICE

Immigration and Naturalization Service

8 CFR Chapter I

[INS No. 1375-92]

Reducing the Burden of Government Regulation; Request for Comments

AGENCY: Immigration and Naturalization Service, Justice.

ACTION: Notice of request for comments.

SUMMARY: The Immigration and Naturalization Service solicits comments on the extent to which its regulations and programs can be improved to promote clarity and efficiency and to eliminate unnecessary regulatory burdens.

DATES: Written comments must be received on or before April 29, 1992.

ADDRESSES: Please submit written comments, in triplicate, to the Records Systems Division, Director, Policy Directives and Instructions Branch, Immigration and Naturalization Service, 425 I Street, NW., room 5304, Washington, DC 20536. To ensure proper handling, please note INS number 1375-92 on your correspondence.

FOR FURTHER INFORMATION CONTACT: Edward J. Lynch, Director, Office of Strategic Planning, Immigration and Naturalization Service, 425 I Street, NW., room 6038, Washington, DC 20536, telephone (202) 514-2199.

SUPPLEMENTARY INFORMATION: By memorandum of January 28, 1992, the President instructed the heads of various executive branch departments and agencies to take certain steps to "weed out unnecessary and burdensome government regulations, which impose needless costs on consumers and substantially impede economic growth." One of these steps is to work with "the public, other interested agencies, the Office of Information and Regulatory Affairs, and the Council on Competitiveness" to (i) identify each agency regulation and program that imposes a substantial cost on the economy and (ii) determine whether each such regulation or program adheres to the following standards:

(a) The expected benefits to society of any regulation should clearly outweigh the expected costs it imposes on society.

(b) Regulations should be fashioned to maximize net benefits to society.

(c) To the maximum extent possible, regulatory agencies should set performance standards instead of prescriptive command-and-control requirements, thereby allowing the regulated community to achieve regulatory goals at the lowest possible cost.

(d) Regulations should incorporate market mechanisms to the maximum extent possible.

(e) Regulations should provide clarity and certainty to the regulated community and should be designed to avoid needless litigation.

The President has asked the agencies, following this review process, to propose administrative changes (including repeal, if appropriate) to bring regulations and programs into conformity with these standards.

In order to make its regulatory review as fruitful as possible, the Immigration and Naturalization Service invites public comment on the extent to which its regulations and programs achieve the goals set forth in these standards. Those responding should comment concisely and specifically. Commenters who suggest that existing regulations can benefit from revision should, if appropriate, propose specific alternatives.

Dated: March 18, 1992.

Gene McNary,

Commissioner, Immigration and Naturalization Service.

BILLING CODE 4410-10-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 92-CE-13-AD]

Airworthiness Directives; British Aerospace, Regional Aircraft Limited, Jetstream Models 3101 and 3201 Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes to adopt a new airworthiness directive (AD) that would be applicable to certian British Aerospace (BAe), Regional Aircraft Limited, Jetstream Models 3101 and 3201 airplanes. The proposed action would require a modification to the shear fitting at the top of each escape hatch. The Federal Aviation Administration (FAA) has received a report of interference between the shear fitting on an escape hatch and a ceiling panel while removing an escape hatch on one of the affected airplanes. The actions specified by this AD are intended to protect occupants who could be prevented from removing an escape hatch during an emergency situation because of such interference.

DATES: Comments must be received on or before May 29, 1992.

ADDRESSES: Service information that is applicable to this AD may be obtained from British Aerospace, Regional Aircraft Limited, Manager Product Support, Prestwick Airport, Ayrshire, KA9 2RW Scotland; Telephone (44-292) 79888; Facsimile (44-292) 79703; or British Aeorspace, Inc., Librarian, Box 17414, Dulles International Airport, Washington, DC 20041; Telephone (703) 435-9100; Facsimile (703) 435-2628. This information may also be examined at the Rules Docket at the address below. Submit comments in triplicate to the FAA, Central Region, Office of the Assistant Chief Counsel, Attention: Rules Docket 92-CE-13-AD, room 1558, 601 E. 12th Street, Kansas City, Missouri 64106. Comments may be inspected at this location between 8 a.m. and 4 p.m., Monday through Friday, holidays excepted.

FOR FURTHER INFORMATION CONTACT:
Mr. Raymond A. Stoer, Program Officer, Brussels Aircraft Certification Office, FAA, Europe, Africa, and Middle East Office, c/o American Embassy, B-1000 Brussels, Belgium; Telephone (322) 513.38.30 ext. 2710; Facsimile (322) 230.68.99; or Mr. John P. Dow, Sr., Project Officer, Small Airplane Directorate, Airplane Certification Service, FAA, 601 E. 12th Street, Kansas City, Missouri 64106; Telephone (816) 426-6932; Facsimile (816) 426-2169. British Aerospace, Commercial Aircraft Ltd., Airlines Division, Prestwick Airport, Ayrshire, KA9 2RW, Scotland.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report that summarizes each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. 92-CE-13-AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Central Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 92-CE-13-AD, room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

Discussion

The Civil Aviation Authority (CAA), which is the airworthiness authority for the United Kingdom, recently notified the FAA that an unsafe condition may exist on certain BAe, Regional Aircraft Limited, Jetstream Models 3101 and 3201 airplanes. The CAA reports that interference between the shear fitting on an escape hatch and a ceiling panel occurred while removing an escape hatch during a scheduled inspection of one of the affected airplanes. This condition, if not detected and corrected, could result in occupant injury during an emergency situation caused by the inability to remove an escape hatch.

The manufacturer (BAe) has issued Service Bulletin (SB) 52-JM 7752, dated December 17, 1991, which specifies a modification to the shear fitting at the top of the right-hand escape hatch for the Models 3101 and 3201 airplanes, and modification to the shear fitting at the top of the left-hand escape hatch for the Model 3201 airplanes. The CAA classified this service bulletin as mandatory in order to assure the continued airworthiness of these airplanes in the United Kingdom.

This airplane model is manufactured in the United Kingdom and is type certificated for operation in the United States under the provisions of § 21.29 of the Federal Aviation Regulations and the applicable bilateral airworthiness agreement. Pursuant to this bilateral airworthiness agreement, the CAA has kept the FAA informed of the situation described above. The FAA has examined the findings of the CAA, reviewed all available information, and determined that AD action is necessary for products of this type design that are certificated for operation in the United States.

Since the condition described is likely to exist or develop in other BAe, Regional Aircraft Limited, Jetstream Models 3101 and 3201 airplanes of the same type design, the proposed AD would require a modification to the shear fitting at the top of each escape hatch in accordance with the instructions in BAe SB 52-JM 7752, dated December 17, 1991.

The FAA estimates that 31 Model 3101 airplanes and 89 Model 3201 airplanes in the U.S. registry would be affected by the proposed AD, that it would take approximately 1 hour per Model 3101 airplane and 3 hours per Model 3201 airplane to accomplish the proposed action, and that the average labor rate is approximately $55 an hour. Parts will be provided by the manufacturer at no cost to the operator. Based on these figures, the total cost impact of the proposed AD on U.S. operators is estimated to be $16,390 ($1,705 for the Model 3101 airplanes and $14,685 for the Model 3201 airplanes).

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action has been placed in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES.**

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend 14 CFR Part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new AD:

British Aerospace, Regional Aircraft Limited: Docket No. 92-CE-13-AD.

Applicability: Jetstream Model 3101 airplanes (serial numbers (S/N) 757 and S/N 770 through 839), and Jetstream Model 3201 airplanes (S/N 790 through 910 and S/N 912), certificated in any category.

Compliance: Required within the next 500 hours time-in-service after the effective date of this AD, unless already accomplished.

To prevent occupant injury during an emergency situation caused by the inability to remove an escape hatch, accomplish the following:

(a) For both Models 3101 and 3201 airplanes, modify the shear fitting at the top of the right-hand escape hatch in accordance with Part A of the Accomplishment Instructions in BAe Service Bulletin (SB) 52-JM 7752, dated December 17, 1991.

(b) For Model 3201 airplanes, modify the shear fitting at the top of the left-hand escape hatch in accordance with Part B of the Accomplishment Instructions in BAe Service Bulletin (SB) 52-JM-7752, dated December 17, 1991.

(c) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

(d) An alternative method of compliance or adjustment of the compliance time that provides an equivalent level of safety may be approved by the Manager, Brussels Aircraft Certification Office, Europe, Africa, Middle East office, FAA, c/o American Embassy, 1000 Brussels, Belgium. The request should be forwarded through an appropriate FAA Maintenance Inspector, who may add comments and then send it to the Manager, Brussels Aircraft Certification Office.

(e) All persons affected by this directive may obtain copies of the document referred to herein upon request to British Aerospace, Regional Aircraft Limited, Manager Product Support, Airlines Division, Prestwick Airport, Ayrshire, KA9 2RW Scotland; or British Aerospace, Inc., Librarian, Box 17414, Dulles International Airport, Washington, DC, 20041. This document may also be examined at the FAA, Central Region, Office of the Assistant Chief Counsel, room 1558, 601 E. 12th Street, Kansas City, Missouri 64106

Issued in Kansas City, Missouri, on March 23, 1992.

Richard F. Yotter,
Acting Manager, Small Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 91-CE-70-AD]

Airworthiness Directives; Fairchild Aircraft (Formerly Swearingen) SA226 and SA227 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Supplemental notice of proposed rulemaking (NPRM); reopening of comment period.

SUMMARY: This notice revises an earlier proposed airworthiness directive (AD), which would have required a modification to the horizontal stabilizer aft spar attach fitting installation and stabilizer skin on certain Fairchild Aircraft SA226 and SA227 airplanes, and repetitive inspections of the radius area of the rib splice straps for cracks with subsequent modification if found cracked. The proposed supplemental action incorporates additional modification procedures that have been added to the service information. The Federal Aviation Administration (FAA) received reports of broken fasteners that attach the pivot fitting of the horizontal tail to the rear spar. The actions specified by this AD are intended to prevent failure of the horizontal stabilizer caused by broken pivot fitting fasteners, which could result in complete loss of control of the airplane.

DATES: Comments must be received on or before May 29, 1992.

ADDRESSES: Service information that is applicable to this AD may be obtained from Fairchild Aircraft, P.O. Box 790490, San Antonio, Texas 78279-0490; Telephone (512) 824-9421. This information also may be examined at the Rules Docket at the address below.

Submit comments on the proposal in triplicate to the FAA, Central Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 91-CE-70-AD, room 1558, 601 E. 12th Street, Kansas City, Missouri 64106. Comments may be inspected at this location between 8 a.m. and 4 p.m., Monday thrugh Friday, holidays excepted.

FOR FURTHER INFORMATION CONTACT:
Mr. Hung Viet Nguyen, Aerospace Engineer, FAA, Airplane Certification Office, 4400 Blue Mound Road, Fort Worth, Texas 76193-0150; Telephone (817) 624-5155; Facsimile (817) 624-5029.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. The closing date for comments, in the Rules Docket for examination by interested persons. A report that summarizes each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket 91-CE-70-AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Central Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 91-CE-70-AD, room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

Discussion

The Federal Aviation Administration (FAA) received reports of broken fasteners that attach the pivot fitting of the horizontal tail to the rear spar on several SA226 and SA227 series airplanes that have over 10,000 hours time-in-service (TIS). If not detected and corrected, this condition could cause failure of the horizontal stabilizer and complete loss of control of the airplane.

These reports prompted the FAA to proposed amending the Federal Aviation Regulations to include an AD that is applicable to certain Fairchild Aircraft SA226 and SA227 series airplanes by publishing a notice of proposed rulemaking (NPRM) in the **Federal Register** on October 23, 1991 (56 FR 54806). The action proposed a modification to the horizontal stabilizer aft spar attach fitting installation and the stabilizer skin in accordance with Fairchild SA226 Series Service Bulletin (SB) 55-010, Horizontal Stabilizer Fitting Fasteners, Issued: May 13, 1991, or Fairchild SA227 Series SB 55-006, Horizontal Stabilizer Fitting Fasteners, Issued: May 13, 1991; Revised: May 22, 1991, whichever is applicable. It also would require repetitive inspections of the radius area of the rib splice straps for cracks with subsequent modification if found cracked.

Interested persons were afforded an opportunity to participate in the making of this amendment. One comment was received in favor of the proposed rule and no comments were received concerning the FAA's determination of the cost to the public.

Since the issuance of the proposal; the manufacturer (Fairchild Aircraft) has revised Fairchild SA227 Series SA 55-006, Horizontal Stabilizer Fitting Fasteners, to include additional procedures for modifying the horizontal stabilizer aft spar attach fitting installation and the stabilizer skin on Fairchild Aircraft SA227 airplanes. Fairchild Aircraft has also revised Fairchild SA226 Series SB 55-010, Horizontal Stabilizer Fitting Fasteners, to incorporate minor editorial corrections. This Fairchild SA226 Series SB 55-010 revision does not add to the scope of work, cost, or effectivity that was originally proposed; however, the

Fairchild SA227 Series SB 55–006 revision does increase the scope of work set forth in the NPRM.

After examining the circumstances and reviewing all available information related to the incidents described above, the FAA has determined that the previously proposed AD action is still valid, but that the Fairchild Aircraft SA226 and SA227 series airplanes should be modified in accordance with Fairchild SA226 Series SB 55–010, Horizontal Stabilizer Fitting Fasteners, Issued: May 13, 1991; Revised: December 13, 1991, or Fairchild SA227 Series SB 55–006, Horizontal Stabilizer Fitting Fasteners, Issued: May 13, 1991; Revised: December 13, 1991, whichever is applicable.

Since the revision to Fairchild SA227 Series SB 55–006, Horizontal Stabilizer Fitting Fasteners, specifies additional procedures that go beyond the scope of what was originally proposed, the notice has been revised accordingly and the comment period has been reopened to provide additional time for public comment.

The FAA estimates that 715 (368 SA226 series and 347 SA227 series) airplanes in the U.S. registry would be affected by the proposed AD, that it would take approximately 32 hours per SA226 series airplane and 33 hours per SA227 series airplane to accomplish the proposed action, and that the average labor rate is approximately $55 an hour. Parts cost approximately $1,400 per airplane. Based on these figures, the total cost impact of the proposed AD on U.S. operators is estimated to be $2,278,485 ($1,162,880 for the SA226 series airplanes and $1,115,605 for the SA227 series airplanes). The FAA estimated that the original NPRM would have cost $2,250,400 (32 hours × $55 per hour + $1,400 × 715 airplanes). The $19,085 ($2,278,485 − $2,250,400) difference between this proposed action and the original NPRM is a one-hour increase (33 hours as opposed to 32) in the scope of work on the SA227 series airplanes (1 hour × $55 per hour × 347 airplanes) that was incorporated through procedural changes in the service information revision.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action has been placed in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES.**

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new AD:

Fairchild Aircraft (formerly Sweeringen): Docket No. 91–CE–70–AD.

Applicability: Model SA226–T airplanes (serial numbers (S/N) T201 through T275 and T277 through T291), Model SA226–T(B) airplanes (S/N T(B)276 and T(B)292 through T(B)417), Model SA226–AT airplanes (S/N AT001 through AT074), Model SA226TC airplanes (S/N TC201 through TC419), Model SA227–TT airplanes (S/N TT421 through TT541), Model SA227–AT airplanes (S/N AT423 through AT695), and Model SA227–AC airplanes (S/N AC406, AC415, AC416, AC420 through AC783, and AC785), certificated in any category.

Compliance: Required as indicated, unless already accomplished.

To prevent failure of the horizontal stabilizer caused by broken pivot fitting fasteners, which could result in complete loss of control of the airplane, accomplish the following:

(a) Upon the accumulation of 10,000 hours time-in-service (TIS) or within the next 1,000 hours TIS after the effective date of this AD, whichever occurs later, accomplish the following:

(1) Modify the horizontal stabilizer aft spar attach fitting installation in accordance with paragraphs A. (1) through A. (7) of 2. Accomplishment Instructions in Fairchild SA226 Series Service Bulletin (SB) 55–010, Horizontal Stabilizer Fitting Fasteners, Issued: May 13, 1991, or paragraphs A. (1) through A. (3) and B. (1) through B. (6) of 2. Accomplishment Instructions in Fairchild SA227 Series SB Bulletin 55–006, Horizontal Stabilizer Fitting Fasteners, Issued: May 13, 1991; Revised: December 13, 1991, whichever is applicable.

(2) Modify the stabilizer skin in accordance with paragraphs B. (1) through B. (4) of 2. Accomplishment Instructions in Fairchild SA 226 Series SB 55–010, Horizontal Stabilizer Fitting Fasteners, Issued: May 13, 1991, or paragraphs C. (1) through C. (5) of 2. Accomplishment Instructions in Fairchild SA227 Series SB 55–006, Horizontal Stabilizer Fitting Fasteners, Issued: May 13, 1991; Revised: December 13, 1991, whichever is applicable.

(3) Visually inspect the radius area of the rib splice strap for cracks in accordance with Figure 2 in Fairchild SA226 Series SB 55–010, Horizontal Stabilizer Fitting Fasteners, Issued: May 13, 1991, or Figure 3 in Fairchild SA227 Series SB 55–006, Horizontal Stabilizer Fitting Fasteners, Issued: May 13, 1991; Revised: December 13, 1991, whichever is applicable.

(i) If cracks are found, prior to further flight, obtain a repair scheme from the manufacturer through the Airplane Certification Office at the address specified in paragraph (c) of this AD, incorporate the repair scheme, and reinspect thereafter at intervals not to exceed 5,000 hours TIS.

(ii) If no cracks are found, reinspect thereafter at intervals not to exceed 5,000 hours TIS.

(b) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

(c) An alternative method of compliance or adjustment of the initial or repetitive compliance times that provides an equivalent level of safety may be approved by the Manager, Airplan Certification Office, FAA, 4400 Blue Mound Road, Fort Worth, Texas 76193–0150. The request should be forwarded through an appropriate FAA Maintenance Inspector, who may add comments and then send it to the Manager, Fort Worth Aircraft Certification Office.

Note: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Fort Worth Aircraft Certification Office.

(d) All persons affected by this directive may obtain copies of the documents referred to herein upon request to Fairchild Aircraft, P.O. Box 790490, San Antonio, Texas 78279–0490; or may examine these documents at the FAA, Central Region, Office of the Assistant Chief Counsel, room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

Issued in Kansas City, Missouri, on March 23, 1992.

Richard F. Yotter,

Acting Manager, Small Airplane Directorate, Aircraft Certification Service.

[FR Doc. 92–7101 Filed 3–27–92; 8:45 am]

BILLING CODE 4910–13–M

14 CFR Part 39

[Docket No. 91–CE–67–AD]

Airworthiness Directives; British Aerospace, Regional Aircraft Limited, Jetstream Models 3101 and 3201 Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes to adopt a new airworthiness directive (AD) that would supersede AD 90–13–12, which currently requires modifications of the airplane electrical system and a revision to the emergency procedures section of the airplane flight manual on certain British Aerospace (BAe), Regional Aircraft Limited, Jetstream Models 3101 and 3201 airplanes. The proposed action would retain the requirements of AD 90–13–12 only for those airplanes that have not installed modified inverters and restored the inverter transfer function. The Federal Aviation Administration (FAA) has determined that the installation of modified inverters along with the restoration of the inverter transfer function corrects the problems in the power supply that were addressed by AD 90–13–12 and should eliminate the need for the actions of that AD. The actions specified by this AD are intended to prevent alternating current (AC) system failures that could result in undetected damage to the airplane navigation systems.

DATES: Comments must be received on or before May 29, 1992.

ADDRESSES: Service information that is applicable to this AD may be obtained from British Aerospace, Regional Aircraft Limited, Manager Product Support, Commercial Aircraft Airlines Division, Prestwick Airport, Ayrshire, KA9 2RW Scotland; Telephone (44–292) 79888; Facsimile (44–292) 79703; or British Aerospace, Inc., Librarian, Box 17414, Dulles International Airport, Washington, DC, 20041; Telephone (703) 435–9100; Facsimile (703) 435–2628. This information may also be examined at the Rules Docket at the address below.

Submit comments on this AD in triplicate to the FAA, Central Region, Office of the Assistant Chief Counsel, Attention: Rules Docket 90–CE–67–AD, room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

FOR FURTHER INFORMATION CONTACT:

Mr. Raymond A. Stoer, Program Officer, Brussels Aircraft Certification Office, FAA, Europe, Africa, and Middle East Office, c/o American Embassy, B–1000 Brussels, Belgium; Telephone (322) 513.38.30 ext. 2710; Facsimile (322) 230.68.99; or Mr. John P. Dow, Sr., Project Officer, Small Airplane Directorate, Airplane Certification Service, FAA, 601 E. 12th Street, Kansas City, Missouri 64106; Telephone (816) 426–6932; Facsimile (816) 426–2169.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report that summarizes each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket 90–CE–67–AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Central Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 90–CE–67–AD, room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

Discussion

Airworthiness Directive (AD) 90–13–12, Amendment 39–6629 (55 FR 23890, June 13, 1990), concurrently requires modifications to the airplane electrical system and a revision to the emergency procedures section of the airplane flight manual on certain British Aerospace (BAe), Regional Aircraft Limited, Jetstream Models 3101 and 3201 airplanes. These modifications are to be accomplished in accordance with BAe Alert Service Bulletin (ASB) 24–A–JA 900443, Revision 1, dated May 1, 1990; and BAe ASB 24–A–JM 7708, Revision 1, dated May 22, 1990.

The Civil Aviation Authority (CAA), which is the airworthiness authority for the United Kingdom, recently notified the FAA that modified inverters, part number (P/N) 1B350–1B1–3, have been installed on certain British Aerospace (BAe), Regional Aircraft Limited, Jetstream Models 3101 and 3201 airplanes. The CAA reports that the installation of these modified inverters along with the restoration of the inverter transfer function corrects the problems in the power supply that were addressed by AD 90–13–12.

This model airplane is manufactured in the United Kingdom and is type certificated for operation in the United States under the provisions of § 21.29 of the Federal Aviation Regulations and the applicable bilaterial airworthiness agreement. Pursuant to a bilateral airworthiness agreement, the CAA has kept the FAA informed of the above situation. The FAA has examined the findings of the CAA, reviewed all available information, and determined that further AD action is necessary for products of this type design that are certificated for operation in the United States.

Since an unsafe condition has been identified that is likely to exist or develop in other BAe Jetstream Models 3101 and 3201 airplanes of the same type design, the proposed action would supersede AD 90–13–12 with a new AD that would (1) retain the modifications to the airplane electrical system and a revision to the emergency procedures section of the airplane flight manual required by AD 90–13–12; and (2) require these modification and revisions only for those airplanes that have not installed modified inverters, P/N 1B350–1B1–3, in accordance with the instructions in BAe Mandatory SB 24–JM 7740, dated November 15, 1990, and have not restored the inverter transfer function in accordance with the instructions in BAe ASB 24–JA 900941, dated November 14, 1990; or BAe ASB 24–JA 900941, Revision 1, dated February 18, 1992.

The FAA estimates that 160 airplanes in the U.S. registry would be affected by the proposed AD, that it would take approximately 10 workhours per airplane to accomplish the proposed action, and that the average labor rate is approximately $55 an hour. Based on these figures, the total cost impact of the proposed AD on U.S. operators is estimated to be $99,000. Since AD 90–13–12, which would be superseded by

the proposed action, required the same actions (except for a limit in the airplane applicability), there is no additional cost impact of the proposed AD on U.S. operators. The $19,800 cost difference between the proposed AD (estimated $99,000) and AD 90-04-04 (estimated $79,200) is a result of inflationary costs used in determining the cost of labor ($55 per hour as opposed to $40 per hour).

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Fedealism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action has been placed in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES.**

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by removing AD 90-13-12, Amendment 39-6629 (55 FR 23890, June 13, 1990), and adding the following new AD:

British Aerospace, Reginal Aircraft Limited: Docket No. 90-CE-67-AD. Supersedes AD 90-13-12, Amendment 39-6629.

Applicability: Jetstream Models 3101 and 3201 airplanes (serial numbers 607 through 904), certificated in any category, that have not accomplished the following:

1. Installed two modified inverters, part number 1B350-1B1-3, in accordance with the instructions in BAe Alert Service Bulletin (ASB) 24-JM 7740, dated November 15, 1990; and

2. Restored the inverter transfer function in accordance with the instructions in BAe ASB 24-JA 900941, dated November 14, 1990; or BAe ASB 24-JA 900941, dated February 18, 1992.

Compliance: Required as indicated, unless already accomplished.

To prevent alternating current (AC) system failures that could result in undetected damage to the airplane navigation systems, accomplish the following:

(a) Within the next 50 hours time-in-service (TIS) after the effective date of this AD, modify the airplane electrical system and revise the emergency procedures section of the airplane flight manual in accordance with the instructions in BAe (ASB) 24-A-JA 900443, Revision 2, dated November 15, 1990, section 2, Accomplishment Instructions; and appendix C (without Modification 7708) and operate the airplane accordingly.

(b) Within the next 100 hours TIS after the effective date of this AD, modify the airplane electrical system in accordance with the instructions in BAe ASB 24-A-JM 7708, Revision 1, dated May 22, 1990, and revise the emergency procedures section of the airplane flight manual in accordance with the instructions in BAe ASB 24-A-JA- 900443, Revision 2, dated November 15, 1990, appendix C (with Modification 7708); or whichever of the following Advance Amendment Bulletins (AAB) is applicable:

Model	Publication
3101	AFM HP.4.10,BAe AAB number 6 with at least issue 1 status; and AFM HP.4.10, BAe AAB number 4 with at least issue 2 status.
3201	AFM HP.4.16, BAe AAB number 2 with a least 2 issue status, and removal of BAe AAB number 2, issue 1.

(c) If the modifications required by paragraphs (a) and (b) of this AD have been accomplished in accordance with BAe ASB 24-A-JM 7708, Revision 1, dated May 22, 1990, and BAe ASB 24-A-JA 90043, Revision 1, dated May 1, 1990, then no further action is required by this AD.

(d) Replacement of both inverters, P/N 1B350-1B1-2, with modified inverters P/N 1B350-1B1-3 in accordance with the "Accomplishment Instructions" of BAe Mandatory Service Bulletin 24-JM 7740, dated November 15, 1990, and restoration of the inverter transfer function in accordance with BAe ASB 24-JA 900941, dated November 14, 1990; or BAe ASB 24-JA 900941, Revision 1, dated February 18, 1992, is considered terminating action for the requirements of this AD.

(e) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

(f) An alternative method of compliance or adjustment of the compliance times that provides an equivalent level of safety may be approved by the Manager, Brussels Aircraft Certification Office, FAA, Europe, Africa, and Middle East Office, c/o American Embassy, B-1000 Brussels, Belgium. The request should be forwarded through an appropriate FAA Maintenance Inspector, who may add comments and then send it to the Manager, Brussels Aircraft Certification Office.

Note: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Brussels Aircraft Certification Office.

(g) All persons affected by this directive may obtain copies of the documents referred to herein upon request to British Aerospace, Regional Aircraft Limited, Manager Product Support, Commercial Aircraft Airlines Division, Prestwick Airport, Ayrshire, KA9 2RW Scotland; or British Aerospace, Inc., Librarian, Box 17414, Dulles International Airport, Washington, DC. 20041; or may examine these documents at the FAA, Central Region, Office of the Assistant Chief Counsel, room 1558, 601 E. 12th street, Kansas City, Missouri 64106.

(h) This amendment supersedes AD 90-13-12, Amendment 39-6629.

Issued in Kansas City, Missouri, on March 23, 1992.

Richard F. Yotter,

Acting Manager, Small Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910-13-M

DEPARTMENT OF THE TREASURY

Fiscal Service

31 CFR Parts 349 and 356

[Department of the Treasury Circular, Public Debt Series No. 1-92]

Sale and Issue of Marketable Book-Entry Treasury Bills, Notes, and Bonds

AGENCY: Bureau of the Public Debt, Fiscal Service, Department of the Treasury.

ACTION: Notice of extension of time for submission of comments.

SUMMARY: This documents extends until April 15, 1992, the deadline for submission of comments on the proposed rule governing the sale and issuance by the Department of the Treasury of all marketable book-entry Treasury bills, notes, and bonds offered to the public for sale. The proposed rule was published in the **Federal Register** on January 31, 1992 (57 FR 3870), and comments were to be submitted on or before March 31, 1992.

DATES: Comments must be received on or before April 15, 1992. Comments are particularly invited on § 356.13, Net long position; § 356.14, Bidding for customers; § 356.16, Certification; § 356.17, Payment for securities; and appendix A, Department of the Treasury Single Bidder Criteria.

ADDRESSES: Comments should be sent to: Office of Financing, Bureau of the Public Debt, room 534, E Street Building, Washington, DC 20239-0001. Comments received will be available for public inspection and copying at the Treasury Department Library, 1500 Pennsylvania Avenue, NW., Washington, DC 20220.

FOR FURTHER INFORMATION CONTACT: Michael W. Sunner, Deputy Assistant Commissioner, Office of Financing, Bureau of the Public Debt, or Margaret V. Marquette, Attorney-Adviser, Bureau of the Public Debt (202) 219-3350. Questions regarding submission of bids by computer should be directed to Alan Zucker, Office of Financing, Bureau of the Public Debt (202) 219-3350.

SUPPLEMENTARY INFORMATION: The Department has received a number of requests to extend the comment period on the proposed rule governing the sale and issue of marketable book-entry Treasury securities. Given the complexity to the issues and the desire of the Department of the Treasury to receive comprehensive, carefully considered comments from as wide a group of participants in the Government securities market as possible, the Department has decided to extend the comment period to April 15, 1992.

Dated: March 25, 1992.

Richard L. Gregg,

Commissioner of the Public Debt.

BILLING CODE 4810-35-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[FRL-4116-7]

Proposed Modification to Stipulation of Settlement; Sacramento Federal Implementation Plan for Ozone

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of proposed modification of settlement; request for public comment.

SUMMARY: In accordance with section 113(g) of the Clean Air Act ("Act"), notice is hereby given of a proposed modification to a stipulation of settlement in litigation instituted against the Environmental Protection Agency ("EPA") regarding the fact that EPA has not promulgated a final rule establishing a Federal Implementation Plan (FIP) to attain the National Ambient Air Quality Standards for ozone in the Sacramento, California nonattainment area. *Environmental Council of Sacramento, et al.*, v. *EPA, et al.*, E.D. Cal. No. CIVS-87-0420 EJG.

The parties to the litigation originally entered into a stipulation of settlement that was approved by the court on June 26, 1989. The parties have since twice made modifications to the settlement which have also been approved by the court. Under the agreement as so modified, EPA is to propose a FIP by June 26, 1992, and take final action by February 26, 1993.

The parties have now agreed to further modify the settlement to stay the schedule for FIP promulgation pending action by the U.S. Court of Appeals for the Ninth Circuit in a related case (*Coalition for Clean Air [CCA], et al.*, v. *EPA*, No. 91-55383). Also under the proposed modification to the settlement agreement EPA is to publish in the **Federal Register** an advanced notice of proposed rulemaking including a list of control measures, ranked in priority order, with associated expected emission reductions, that EPA intends to include in any FIP EPA may ultimately promulgate following action by the Ninth Circuit in CCA.

DATES: The Agency will receive written comments relating to the proposed modification of the stipulation of settlement on or before April 29, 1992. EPA or the Department of Justice may withhold or withdraw consent to the proposed modification if the comments disclose facts or circumstances that indicate that such consent is inappropriate, improper, inadequate, or inconsistent with the requirements of the Act.

ADDRESSES: Written comments should be sent to Sara Schneeberg at the address below.

Copies of the proposed modification are available from Sara Schneeberg, Air and Radiation Division (LE-132A), Office of General Counsel, U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: Sara Schneeberg, (202) 260-7723.

Dated: March 18, 1992.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 92-55, RM-7939]

Radio Broadcasting Services; Quincy, CA

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This document requests comments on a petition for rule making filed on behalf of John K. LaRue, permittee of Station KSPY(FM), Channel 282A, Quincy, California, seeking the substitution of Channel 282C3 for Channel 282A and modification of his permit accordingly to specify operation on the higher powered channel. Petitioner's modification proposal complies with the provisions of § 1.420(g) of the Commission's Rules. Therefore, we will not accept competing expressions of interest in the use of Channel 282C3 at Quincy or require the petitioner to demonstrate the availability of an additional equivalent class channel. Coordinates for Channel 282C3 at Quincy are 40-02-41 and 120-53-04.

DATES: Comments must be filed on or before May 15, 1992, and reply comments on or before June 1, 1992.

ADDRESSES: Secretary, Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner's counsel, as follows: Neal J. Friedman, Esq., Pepper & Corazinni, suite 200, 1776 K St., NW., Washington, DC 20006.

FOR FURTHER INFORMATION CONTACT: Nancy Joyner, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Notice of Proposed Rule Making, MM Docket No. 92-55, adopted March 12, 1992, and released March 24, 1992. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, Downtown Copy Center, (202) 452-1422, 1714 21st St., NW., Washington, DC 20036.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed

Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1204(b) for rules governing permissible *ex parte* contacts.

For information regarding proper filing procedures for comments, See 47 CFR 1.415 and 1.420.

BILLING CODE 6712-01-M

---

47 CFR Part 73

[MM Docket No. 92-54, RM-7937]

Radio Broadcasting Services; North Madison, OH

AGENCY: Federal Communcations Commission.

ACTION: Proposed rule.

SUMMARY: The Commission request comments on a petition filed by Lakeshore Broadcasting seeking the allotment of Channel 229A to North Madison, Ohio, as the community's first local FM service. Channel 229A can be allotted to North Madison in compliance with the Commission's minimum distance separation requirements with a site restriction of 9 kilometers (5.6 miles) west-southwest to avoid short-spacings to Stations WZAK, Channel 226B, Cleveland, Ohio, and WBZZ, Channel 229B, Pittsburgh, Pennsylvania, at coordinates North Latitude 41-47-31 and West Longitude 81-09-41. Canadian concurrence in the allotment as specially negotiated allotment has been requested because the site restriction does not remove the short-spacings to Stations CBCL-FM, Channel 228C1, London, Ontario, and CKLW, Channel 230C1, Windsor, Ontario, Canada.

DATES: Comments must be filed on or before May 15, 1992, and reply comments on or before June 1, 1992.

ADDRESSES: Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner, or its counsel or consultant, as follows: Edward Sumrada, Lakeshore Broadcasting, 2634 River Road, Willoughby Hills, Ohio 44094 (Petitioner).

FOR FURTHER INFORMATION CONTACT: Leslie K. Shapiro, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Notice of Proposed Rule Making, MM Docket No. 92-54, adopted March 12, 1992, and released March 24, 1992. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, Downtown Copy Center, (202) 452-1422, 1714 21st Street, NW., Washington, DC 20036.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.204(b) for rules governing permissable *ex parte* contacts.

For information regarding proper filing procedures for comments, see 47 CFR 1.415 and 1.420.

Notices

Federal Register
Vol. 57, No. 61
Monday, March 30, 1992

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Forest Service

Jackson Creek Timber Sales, Okanogan National Forest, Okanogan County, WA

AGENCY: Forest Service, USDA.

ACTION: Notice of intent to prepare an environmental impact statement.

SUMMARY: Notice is hereby given that the Forest Service, USDA will prepare an environmental impact statement (EIS) for a set of proposals to implement one to two timber sales. The purpose of the EIS will be to develop and evaluate a range of alternatives for timber harvest and road construction levels. The proposed action is preliminary, and detailed alternatives will be developed. The alternatives will include a no action alternative, involving no harvest or road construction, and additional alternatives to respond to issues generated during the scoping process. The proposed projects will be consistent with the direction in the Okanogan National Forest Land and Resource Management Plan (Forest Plan, December, 1989) which provides the overall guidance for management of the area and the proposed projects. The proposed projects all lie within the Jackson Creek RARE II Inventory Area (Roadless Area Review and Evaluation II), and would be implemented in Fiscal Year 1994 on the Tonasket Ranger District. The Jackson Creek RARE II Area is located approximately 27 miles northeast of Oroville, Washington. The agency invites written comments on the scope of this project. In addition, the agency gives notice of this analysis so that interested and affected people are aware of how they may participate and contribute to the final decision.

DATES: Comments concerning the scope and implementation of this proposal must be received by April 24, 1992.

ADDRESSES: Submit written comments and suggestions concerning the scope of the analysis to Elaine Zieroth, District Ranger, Tonasket Ranger District, P.O. Box 466, Tonasket, WA 98855.

FOR FURTHER INFORMATION: Direct questions about the proposed action and environmental impact statement to Michael Alvarado, Project Coordinator, Tonasket Ranger District, P.O. Box 466, Tonasket, WA 98855 [telephone: (509) 486-2186].

SUPPLEMENTARY INFORMATION: The proposed actions are listed below:

Fiscal Year: 1994
Sale Name: Jackson*
Legal Desc: Sec. 1-4, 8-17, 21-24, T.4ON., R.31E., W.M., Okanogan County, WA
Acres: 7800 Acres
Net Volume: 9 Million Board Feet (MMBF)
Road Miles: 32 Miles Construction; 3 Miles reconstruction
Harvest Method: Shelterwood, Overstory Removal, Commercial Thinning
Yarding Systems Cable: 7200 MBF. *Tractor:* 1800 MBF
Management Areas: 50% MA 25, 50% MA 26

* If harvest volume or other factors warrant, volume may be split between two sales.

A number of issues have been identified to date. The major issues focus on health and growth of forest stands, management of the unroaded area, cumulative effects to watersheds and wildlife, and protection of unmaintained trails.

This EIS will tier to the final EIS for the Okanogan National Forest Land and Resource Management Plan. The Forest Plan provides goals and objectives, forest-wide standards and guidelines, management area standards and guidelines, desired future conditions, and management area prescriptions for the various lands on the Forest. This direction is provided for management practices that will be utilized during the implementation of the Forest Plan.

The Jackson Creek RARE II Inventory Area contains about 10,800 acres. Approximately 7,800 acres of the RARE II area is on the Tonasket Ranger District of the Okanogan National Forest. The remainder of the RARE II area, about 3000 acres, is on the Colville National Forest. The Analysis Area is for that portion of Jackson Creek RARE II Area location on the Tonasket Ranger District and is allocated to the following Management Areas:

—Approximately 50 percent is in Management Area 25 which is designed to intensively manage the timber and range resources.
—Approximately 50 percent is in Management Area 26 which is designed to manage deer winter range and fawning habitats to provide conditions which can sustain optimal numbers of deer indefinitely, without degrading habitat characteristics such as forage, cover and soil. Wood product outputs will be provided to a reduced level.

Public participation will be especially important at several points during the analysis. Public meetings will be held throughout the analysis process. The Forest Service will be seeking information, comments, and assistance from Federal, State, local agencies, Native American Tribes, and other individuals or organizations who may be interested in or affected by the proposed project. This input will be used in preparation of the Draft EIS. The scoping process includes:

1. Identifying potential issues.
2. Identifying major issues to be analyzed in depth.
3. Identifying issues which have been covered by a relevent previous environmental analysis.
4. Exploring additional alternatives based on themes which will be derived from issues recognized during scoping activities.
5. Identifying potential environmental effects of this project and alternatives (i.e., direct, indirect, and cumulative effects and connected actions).
6. Determining potential cooperating agencies and task assignments.
7. Notifying interested publics of opportunities to participate through meetings, personal contacts, or written comment. Keeping the public informed through the media and/or written material (i.e. newsletters, correspondence, etc.).

The Draft EIS is expected to be filed with the Environmental Protection Agency (EPA) and to be available for public review by August, 1993. At that time copies of the Draft EIS will be distributed to interested and affected agencies and organizations and members of the public for review and comment. EPA will publish a notice of availability of the Draft EIS in the **Federal Register**. The comment period

on the Draft EIS will be 45 days from the date the EPA notice appears in the Federal Register. It is very important that those interested in the management of the Okanogan National Forest participate at that time. The Forest Service believes it is important to give reviewers notice of several court rulings related to public participation in the environmental review process.

First, reviewers of Draft EIS must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewer's position and contentions. *Vermont Yankee Nuclear Power Corp.* v. *NRDC*, 435 U.S. 519, 553 (1978). Also, environmental objections that could have been raised at the Draft EIS stage may be waived or dismissed by the court if not raised until after completion the Final EIS. *City of Angoon* v. *Hodel*, 803 F.2d. 1016, 1022 (9th Cir. 1986) and *Wisconsin Heritages, Inc.* v. *Harris*, 490 F. Supp. 1334, 1338 (E.D. Wis. 1980). Because of these court rulings, it is very important that those interested in this proposed action participate by the close of the 45 day comment period so that substantive comments and objections are made available to the Forest Service at a time when it can meaningfully considered and responded to in the Final EIS.

The Final EIS is scheduled to be completed by December, 1993. In the Final EIS, the Forest Service is required to respond to comments and responses received during the comment period that pertain to the environmental consequences discussed in the Draft EIS and applicable laws, regulations, and policies considered in making a decision regarding the proposal. Sam Gehr, Forest Supervisor, Okanogan National Forest, is the responsible official. As the responsible officer, he will document the decision and reasons for the decision in the Record of Decision. That decision will be subject to Forest Service appeal regulations (36 CFR 217).

Dated: March 18, 1992.

Don Lyon,

Planning, Lands and Minerals Staff Officer.

BILLING CODE 3410-11-M

COMMISSION ON CIVIL RIGHTS

Agenda and Notice of Public Meeting of the Florida Advisory Committee

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a meeting of the Florida Advisory Committee to the Commission will convene at 1 p.m. and adjourn at 4 p.m. on Tuesday, April 21, 1992, at the Holiday Inn Conference Center, 7417 NW 8th Avenue, Grenada Room, Gainesville, Florida 32605. The purpose of the meeting is to discuss the status of the Commission and follow-up plans to the Tampa police project. In addition, the committee will receive information from community leaders on racial tensions in Florida (Gainesville).

Persons desiring additional information, or planning a presentation to the Committee should contact Florida Chairperson Bradford Brown 305/361-4991 or Bobby D. Doctor, Regional Director, Southern Regional Office of the U.S. Commission on Civil Rights at (404/730-2476, TDD 404/730-2481). Hearing impaired persons who will attend the meeting and require the services of a sign language interpreter should contact the Southern Regional Office at least five (5) working days before the scheduled date of the meeting.

The meeting will be conducted pursuant to the provisions of the rules and regulations of the Commission.

Dated at Washington, DC, March 24, 1992.

Carol-Lee Hurley,

Chief, Regional Programs Coordination Unit.

[FR Doc. 92-7184 Filed 3-27-92; 8:45 am]

BILLING CODE 6335-01-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Coastal Zone Management: Federal Consistency Appeal by the Asociacion de Propietarios de los Indios, Inc. From an Objection by the Puerto Rico Planning Board

AGENCY: National Oceanic and Atmospheric Administration, Commerce.

ACTION: Notice of decision.

On February 19, 1992, the Secretary of Commerce (Secretary) issued a decision in the consistency appeal of the Asociacion de Propietarios de los Indios, Inc. (Appellant). The Appellant had applied to the U.S. Army Corps of Engineers (Corps) for permits to authorize its proposed projects to reconstruct a private road and to construct residential houses, landfills, piers and bulkheads and for after-the-fact permits for some landfills and structures already produced in Salinas, Puerto Rico. In conjunction with the Federal permit applications, the Appellant submitted to the Corps for review of the Puerto Rico Planning Board (PRPB), the Commonwealth of Puerto Rico's coastal management agency, a certification that the proposed activities are consistent with Puerto Rico's Federally-approved Coastal Management Program.

On August 31, 1988, the PRPB objected to the Appellant's consistency certification for the proposed projects on the ground that they are not in accordance with Puerto Rico's coastal management public policies and objectives of discouraging lateral expansion along the coast, discouraging utilization of lands with important natural resources for urban uses, and prohibiting land development and construction in areas affected by floods and wave surge. Under CZMA section 307(c)(3)(A) and 15 CFR section 930.121, the PRPB's consistency objection precludes the Corps from issuing a permit for the activities unless the Secretary finds that the activities are either consistent with the objectives or purposes of the CZMA (Ground I) or necessary in the interest of national security (Ground II).

Upon consideration of the information submitted by the Appellant, the PRPB and interested Federal agencies, the Secretary made the following findings pursuant to 15 CFR 930.121: The proposed authorization of already-completed or nearly-completed residential structures, landfills, piers and bulkheads, and maintenance of a private road does not further one or more of the competing national objectives or purposes contained in sections 302 or 303 of the CZMA. Further, the Appellant failed to meet its burden of presenting sufficient evidence to support an appeal pursuant to Ground II.

Because the Appellant's proposed projects failed to satisfy the requirements of Ground I, and the Appellant failed to meet its burden of presenting sufficient evidence to support an appeal pursuant to Ground II, the Secretary did not override the PRPB's objection to the Appellant's consistency certification, and consequently, the already-completed or nearly-completed residential structure, landfills, piers and bulkheads, and maintenance of a private road may not be permitted by Federal agencies. Copies of the decision may be obtained from the contact person listed below.

FOR ADDITIONAL INFORMATION CONTACT: Margo E. Jackson, Assistant General Counsel for Ocean Services, National Oceanic and Atmospheric Administration (NOAA), U.S. Department of Commerce, 1825 Connecticut Avenue, NW., suite 603, Washington, DC 20235, (202) 606-4200.

Dated: March 24, 1992.

Thomas A. Campbell,

General Counsel.

[FR Doc. 92-7202 Filed 3-27-92; 8:45 am]

BILLING CODE 3510-08-M

DEPARTMENT OF DEFENSE

Office of the Secretary

Renewal of 33 Department of Defense (DoD) Advisory Committees

SUMMARY: Under the provisions of Public Law 92-463, the "Federal Advisory Committee Act," notice is hereby given that the following 33 DoD advisory committees have been determined to be in the public interest and have been renewed:

Advisory Committee on the Air Force History Program.
Advisory Council on Dependents' Education.
Advisory Group on Electron Devices.
Armed Forces Epidemiological Board.
Army Advisory Panel on ROTC Affairs.
Army Science Board.
Board of Advisors to the President, Naval War College.
Board of Advisors to the Superintendent, Naval Postgraduate School.
Air University Board of Visitors.
Air Force ROTC Advisory Committee.
Board of Visitors, Defense Systems Management College.
Board of Visitors, Equal Opportunity Management Institute.
Board of Visitors, National Defense University.
Chief of Engineers Environmental Advisory Board.
Chief of Naval Operations Executive Panel Advisory Committee.
Command and General Staff College Advisory Committee.
Community College of the Air Force Advisory Committee.
Defense Advisory Committee on Military Personnel Testing.
Defense Advisory Committee on Women in the Services.
Defense Systems Information Agency Scientific Advisory Group.
Defense Policy Advisory Committee on Trade.
Defense Science Board.
Department of the Army Historical Advisory Committee.
DoD Wage Committee.
National Security Agency Scientific Advisory Board.
Naval Research Advisory Committee.
Naval Exchange System Advisory Committee.
Scientific Advisory Board of the Armed Forces Institute of Pathology.
Strategic Advisory Group for the Joint Strategic Target Planning Staff.
Scientific Advisory Group on Effects.
Secretary of the Navy's Advisory Committee on Naval History.
U.S. Air Force Scientific Advisory Board.
U.S. Army Medical Research and Development Advisory Panel.

These committees provide necessary and valuable advice to the Secretary of Defense and other senior officials in the DoD in their respective areas of expertise. They make important contributions to DoD efforts in research and development, education and training, and various technical program areas.

It is a continuing DoD policy to make every effort to achieve a balanced membership in DoD advisory committees. Each committee is evaluated in terms of the functional disciplines, levels of experience, professional diversity, public and private association, and similar characteristics required to ensure that a high degree of balance is obtained.

Dated: March 24, 1992.

L. M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

[FR Doc. 92-7212 Filed 3-27-92; 8:45 am]

BILLING CODE 3810-01-M

Defense Policy Board Advisory Committee; Meeting

ACTION: Notice of Advisory Committee meeting.

SUMMARY: The Defense Policy Board Advisory Committee will meet in closed session on 21-22 April 1992 from 0900 until 1700 in the Pentagon, Washington, DC.

The mission of the Defense Policy Board is to provide the Secretary of Defense, Deputy Secretary of Defense and the Under Secretary of Defense for Policy with independent, informed advice and opinion concerning major matters of defense policy. At this meeting the Board will hold classified discussions on national security matters.

In accordance with section 10(d) of the Federal Advisory Committee Act, Public Law No. 92-463, as amended (5 U.S.C. app. II, (1982)), it has been determined that this Defense Policy Board meeting concerns matters listed in 5 U.S.C. 552b (c)(1)(1982), and that accordingly this meeting will be closed to the public.

Dated: March 25, 1992.

L. M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

[FR Doc. 92-7211 Filed 3-27-92; 8:45 am]

BILLING CODE 3810-01-M

Department of the Army

Army Science Board; Closed Meeting

In accordance with Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), announcement is made of the following Committee Meeting:

Name of the Committee: Army Science Board (ASB).

Dates/Time of Meeting: 30 April 1992.

Time: 0800-1200 hours.

Place: Westinghouse Corporation, Baltimore, MD.

Agenda: The members of the Army Science Board Issue Group Study on Longbow for the Comanche and Apache will review the progress of the Fire Control Radar Work Group. The contractor team will present an update of risk reduction efforts, to date, and risk mitigation planned for the balance of the program. The discussions will focus on the classified targeting parameters, design status, Built in Test (BIT) parameters status, and Apache integration status. This meeting will be closed to the public in accordance with section 552b(c) of title 5, U.S.C., specifically subparagraph (1) thereof, and title 5, U.S.C., apprendix 2, subsection 10(d). The classified, proprietary, and unclassified matters to be discussed are so inextricably intertwined so as to preclude opening any portion of the meeting. The ASB Administrative Officer, Sally Warner, may be contacted for further information at (703) 695-0781/0782.

Salley A. Warner,

Administrative Officer, Army Science Board.

[FR Doc. 92-7210 Filed 3-27-92; 8:45 am]

BILLING CODE 3710-08-M

DEPARTMENT OF ENERGY

Defense Programs; Determination To Establish Inertial Confinement Fusion Advisory Committee/Defense Programs

Pursuant to section 9(a)(2) of the Federal Advisory Committee Act (FACA) (Pub. L. 92-463); title 41, chapter 101, Code of Federal Regulations, section 101-6.1005, Authorities for establishment of advisory committees; and following consultation with the Committee Management Secretariat, General Services Administration (GSA); notice is hereby given that an Inertial Confinement Fusion Advisory Committee/Defense Programs (ICFAC/DP) is being established.

The purpose of the ICFAC/DP is to provide advice and guidance to the

Assistant Secretary for Defense Programs (ASDP) of the Department of Energy (DOE) on both technical and management aspects of the Inertial Confinement Fusion (ICF) Program. The Committee will review technical progress toward the program goals and milestones and recommend any changes it deems necessary, advise on the efficacy of plans and strategies, advise on the appropriate pace and scope of the program, advise on new facilities and upgrades, and address any other program-related issues as requested by the ASDP or the Scretary of Energy.

The establishment of the ICFAC/DP has been determined necessary and in the public interest in connection with the performance of duties imposed on DOE by law. The Committee will operate in accordance with the provisions of the FACA, the DOE Organization Act (Pub. L. 95-91), the General Services Administration rule on Federal Advisory Committee Management, and other directives and instructions issued in implementation of those acts. Committee members will be selected to ensure an appropriately balanced membership, taking into account (1) scientific disciplines to be represented, such as plasma and ICF target physics, particle beams, lasers, systems engineering, and nuclear weapons applications; (2) institutions involved in the research; and (3) other appropriate criteria to assure a proper balance. Members may be required to have a DOE or other security clearance, since many of the Committee's meetings are likely to discuss classified matters.

Further information concerning this Committee may be obtained from Robert A. Jones, Program Manager, Office of Inertial Confinement Fusion, DP-28, Washington, DC 20585 (301/903-4236).

Issued at Washington, DC on: March 24, 1992.

Howard H. Raiken,

Advisory Committee Management Officer.

[FR Doc. 92-7240 Filed 3-27-92; 8:45 am]

BILLING CODE 6450-01-M

Floodplain and Wetland Involvement Notification for a Site-Wide Treatability Study To Test Treatment Technologies at Rocky Flats Plant, Golden, CO

AGENCY: Department of Energy (DOE).

ACTION: Notification of floodplain/wetland involvement.

SUMMARY: Regulations at 10 CFR part 1022 require DOE to evaluate actions it may take in a floodplain/wetland in order to ensure consideration of protection of the floodplain/wetland in decision making. As soon as practicable after a determination that a floodplain/wetland may be involved, the regulations require that public notice be published in the Federal Register, including a description of the proposed action and its location. DOE proposes to carry out a site-wide treatability study at its Rocky Flats Plant north of Golden, Colorado, to support the Comprehensive Environmental Response, Compensation, and Liability Act and the Resource Conservation and Recovery Act remediation of contaminated areas at the plant site. The study would involve the collection of soil, sediment, and waste samples and the laboratory testing of 10 treatment technologies to remove contaminants from the samples.

DATES: Comments on the proposed action must be received by April 14, 1992.

ADDRESSES: All comments concerning this notice should be addressed to Floodplain/Wetlands Comments, Beth Brainard, Public Affairs Office, U.S. Department of Energy, Rocky Flats Office, P.O. Box 928, Golden, Colorado 80402-0928; Telephone: (303) 966-5993.

FOR FURTHER INFORMATION CONTACT: Information on floodplain/wetland environmental review requirements is available from Carol M. Borgstrom, Director, Office of NEPA Oversight, U.S. Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585; Telephone: (202) 586-4600 or (800) 472-2756.

SUPPLEMENTARY INFORMATION: DOE proposes to carry out a site-wide treatability study at its Rocky Flats Plant north of Golden, Colorado, to support the Comprehensive Environmental Response, Compensation, and Liability Act and the Resource Conservation and Recovery Act remediation of contaminated areas at the plant site. The study would involve the collection of soil, sediment, and waste samples and the laboratory testing of 10 treatment technologies to remove contaminants from the samples.

Water samples totaling approximately 300 gallons plant-wide would be collected. Approximately 8 cubic yards of soil and sediment samples would be collected. Individual sample volumes would be about 2 liters of water and 1½ kilograms of soil or sediment.

Water samples would be collected in a hand-held container dipped into the water or through the use of a small pump. Samples would be collected from streams, seeps, ponds, and wells. If existing wells do not provide a sufficient quantity of water for the tests, up to 10 new 20- to 60-foot wells may be drilled adjacent to existing wells.

In most cases, soil and sediment samples would be collected from the top 10 to 20 centimeters of the ground surface using a shovel. It may be necessary to use a backhoe to obtain soil samples where the ground is too hard or rocky to use a shovel, a larger volume of soil than usual is needed, or soil is needed from deeper than 20 centimeters.

Specific sample collection sites at the plant have not yet been identified. Some soil and ground water samples will be collected from within the 100-year floodplain. Virtually all of the sediment and surface water samples would be collected from wetland areas within the 100-year floodplain. If new ground water sampling wells are needed, it is possible that one or more wells would be drilled within the 100-year floodplain. Areas where samples are to be collected are Operable Units 1 (881 Hillside), 2 (903 Pad Area), 3 (Offsite Areas), 4 (Solar Evaporation Ponds), 5 (Woman Creek), 6 (Walnut Creek), and 7 (Present Landfill). None of the laboratory testing would occur in the vicinity of wetlands or floodplains.

A map showing the specific locations of the sampling stations is available on request to the Rocky Flats Office (see **ADDRESSES** above).

Paul D. Grimm,

Principal Deputy Assistant Secretary for Environmental Restoration and Waste Management.

[FR Doc. 92-7245 Filed 3-27-92; 8:45 am]

BILLING CODE 6450-01-M

Office of Energy Research

Change of Scope of an Existing Federally Funded Research and Development Center

AGENCY: Department of Energy (DOE).

ACTION: Notice of change of scope of an existing federally funded research and development center; first of three notices.

SUMMARY: This notice advises interested parties of the intent of the Department of Energy (DOE) to expand the scope and mission of the Stanford Linear Accelerator Center (SLAC), a Federally Funded Research and Development Center (FFRDC), to include the synchrotron radiation research and user support currently being performed at the Stanford Synchrotron Radiation Laboratory (SSRL). Funding for the SSRL activities will be provided under the existing SLAC management and operating contract, DE-AC03-76SF00515.

DATES: Comments on this notice should be submitted to DOE by April 29, 1991. Two more notices also will be published which will allow for additional thirty-day comment periods.

ADDRESSES: Comments should be forwarded to the Director, Acquisition and Assistance Management Division, Office of Energy Research, ER-64, U.S. Department of Energy, Washington, DC 20585.

SUPPLEMENTARY INFORMATION:

Background

SLAC was established in 1962 and has operated since that time as a single purpose laboratory engaged in experimental and theoretical research in elementary particle physics, including the development of advances in high-energy accelerators and elementary particle detectors. SLAC is managed and operated for the DOE under Contract DE-AC03-76SF00515, a management and operating contract as defined and regulated in accordance with FAR § 17.6, DEAR § 917.6 and DEAR part 970. SLAC was designated as an FFRDC on November 1, 1967 and has been operated in accordance with Office of Federal Procurement Policy Letter 84-1 and FAR § 35.017.

The SSRL, located on the SLAC site, was formally established in 1976. It was one of the first major laboratories to develop synchrotron radiation and to make it available to a large community of scientists, who have used it for basic and applied research in biology, chemistry, materials science, solid-state physics, and biomedical research. SSRL is funded by the DOE under a research and development, cost reimbursement contract with Stanford University.

The rationale for merging the two laboratories is based upon a number of reasons, including: The two laboratories share the same site; share use of some facilities; share interests in the development of advanced accelerators; and, both face the need for increased oversight in the areas of environment, safety and health.

The growth and development of the field of synchrotron radiation is another factor in the merger. In 1972, SLAC completed the Stanford Positron Electron Asymmetric Ring (SPEAR), a single ring some 80 meters in diameter, in which counter-rotating beams of electrons and positrons from the SLAC Linac circulate at energies up to about 4 GeV. In 1973, pioneering advances were made at SPEAR in synchrotron radiation (energetic photons generated by the electrons circulating within the ring), leading to the creation of SSRL as a separate laboratory in 1976. Since that time, many beamlines have been brought into regular operation; in addition, SSRL has constructed two beamlines for synchrotron research on the larger Positron Electron Project (PEP) Storage Ring, operated by SLAC for high energy physics. Until recently, SLAC and SSRL (the Laboratory) have used SPEAR and PEP jointly for high energy physics and synchrotron radiation research, with 50% of the SPEAR machine time devoted to each field. In November, 1990, SSRL completed construction of a new 3-GeV injector, replacing the SLAC Linac as the source of electrons. This allows SSRL to be operated independently of the High Energy Physics program at SLAC. Merging the two activities at the same site into a single Laboratory, with a single director, provides the Laboratory with: (1) Improved management over these important research instruments; (2) focussed guidance to maximize the research programs of the facilities; (3) clearer responsibility and authority for managing the Laboratory's activities so as to minimize environmental impacts and maximize safety and health for employees; and, (4) the opportunity for small savings in the administrative areas (reduction in paperwork).

Expanded Mission of SLAC

SLAC will continue as a focal point for high energy electron physics in the United States and will be available to the user community. The Laboratory is responsible for experimental facility operation, high energy accelerator operations and development, advanced accelerator R&D, and central computing, as well as high energy physics user support.

Added to these current SLAC activities at the site will be the ongoing SSRL synchrotron radiation program. SSRL activities include operation of the booster synchrotron, the SPEAR storage ring, synchrotron radiation facilities development, and user support for both the university community and industrial users interested in this area of laboratory technology transfer.

A single, unified Environment, Health and Safety division will have site-wide responsibility for these areas. The Laboratory's administrative group will have its charter expanded to cover SSRL activities.

SSRL is an established laboratory and, although it is not a Federally funded R&D center, it is an *essential* component of the Nation's capability in providing a balanced array of synchrotron light sources to a large and growing community of user scientists. These facilities are used for research in structural biology, medicine, chemistry, materials science, and solid state physics. SSRL has been a leader in the development of new concepts to generate synchrotron light, especially in the development of wiggler and undulator sources with unprecedented spectral brightness. Such developments have provided the technical basis for the third generation light sources now being constructed at Lawrence Berkeley Laboratory (LBL) (the Advanced Light Source (ALS) will be a high brightness source of Vacuum Ultraviolet (VUV) and soft x-rays) and at Argonne National Laboratory (ANL) (the Advanced Photon Source (APS) will provide extremely bright beams of hard x-rays). The joining of SSRL and SLAC should enhance the potential for future developments in light sources by bringing the expertise in accelerator physics from SLAC together with the end users—the synchrotron radiation user community of SSRL under one administrative roof.

Alternative Sources

As noted above, SSRL is important in providing balance in the Nation's capability—it provides a strong center for x-ray science on the West Coast and complements the x-ray source at Brookhaven National Laboratory (BNL) on the East Coast. Both facilities are now over-subscribed. If either SSRL or National Synchrotron Light Source (NSLS) should go down, the most important x-ray experiments could not be done. The APS will be another source of hard x-rays in the Midwest when it becomes operational in mid-1998, and will relieve the pressure on SSRL and NSLS.

SSRL is also an important source for experiments in the VUV spectral region serving users on the West Coast. It is now complemented by the VUV source at NSLS, and, again, SSRL and NSLS back each other up. When the ALS becomes operational in mid-1993, some of the VUV experimentation will move from the SSRL to ALS; but SSRL will continue to be an important source, particularly for users from the silicon valley region. Thus, SSRL provides balance in the Nation's capability—spectrally and geographically—and will be important in serving a large user community for years to come. Accordingly, existing alternative sources for satisfying the agency's requirements cannot effectively meet the special research and development needs.

Government Expertise for Evaluation

Sufficient Government expertise is available to adequately and objectively evaluate the work to be performed by the expanded FFRDC. The Division of chemical Sciences, within DOE's Office of Energy Research Basic Energy Sciences Program, has been responsible for program direction and evaluation for SSRL since the Laboratory has been funded by the DOE; the Chemical Sciences staff members will continue to be responsible for the SSRL Division at SLAC. The Division of High Energy Physics, within DOE's Office of Energy Research High Energy and Nuclear Physics Program, was responsible for the creation and construction of SLAC in 1962 and has been responsible for SLAC's evolving program since that time. The Division will continue to provide the same degree of program guidance to SLAC management concerning high energy physics research and other related activities as it did when SLAC operated as a single purpose laboratory.

Cost Control

DOE regulations, policies and procedures relative to management and operating contracts provide controls to ensure that the costs of the services provided are reasonable. Compliance with these regulations, policies and procedures is monitored by the DOE San Francisco Field Office staff.

Differentiation Between FFRDC and Non-FFRDC Work

The scope of work of the M&O contract for the combined activities will clearly define the efforts to be undertaken by the single Laboratory. That work scope has been summarized above in the section entitled, Expanded Mission of SLAC.

Long Term Support for the Laboratory

The Division of High Energy Physics supports the long-term goals for, SLAC i.e., Stanford Linear Collider (SLC) research and planning for the next linear collider. Within available funding, the Division envisions long term support for SLAC activities as the primary facility for electron physics research. SSRL provides support to several hundred scientists, most of who receive support from sources other than DOE. The facility services a number of industrial users and is a key element of the Department's technology transfer program. These facts, coupled with the important advances in biomedicine and material sciences made possible by the Laboratory, support the intent of the Office of Basic Energy Sciences to provide long term funding for this laboratory.

Management by an Autonomous Organization

The FFRDC composed of SLAC and SSRL will be managed and operated by an identifiably separate operating unit of Stanford University.

William Happer,

Director, Office of Energy Research.

[FR Doc. 92-7244 Filed 3-27-92; 8:45 am]

BILLING CODE 6450-01-M

Office of Fossil Energy

[FE Docket No. 91-109-NG]

Meridian Oil Transportation Inc.; Order Granting Blanket Authorization To Export Natural Gas to Mexico

AGENCY: Department of Energy, Office of Fossil Energy.

ACTION: Notice of an order granting blanket authorization to export natural gas.

SUMMARY: The Office of Fossil Energy of the Department of Energy gives notice that it has issued an order granting Meridian Oil Transportation Inc. blanket authorization to export a total of 54 Bcf of U.S. natural gas to Mexico over a two-year period commencing with the date of first delivery.

A copy of this order is available for inspection and copying in the Office of Fuels Programs Docket Room, 3F-056, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-9478. The docket room is open between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, March 16, 1992.

Charles F. Vacek,

Deputy Assistant Secretary for Fuels Programs, Office of Fossil Energy.

[FR Doc. 92-7248 Filed 3-27-92; 8:45 am]

BILLING CODE 6450-01-M

[FE Docket No. 91-107-NG]

Natural Gas Marketing & Storage Co.; Order Granting Authorization To Export Natural Gas to Mexico

AGENCY: Department of Energy, Office of Fossil Energy.

ACTION: Notice of an order granting blanket authorization to export natural gas.

SUMMARY: The Office of Fossil Energy of the Department of Energy gives notice that it has issued an order granting Natural Gas Marketing & Storage Company blanket authorization to export a total of 275 Bcf of U.S. natural gas to Mexico over a two-year period commencing with the date of first delivery.

A copy of this order is available for inspection and copying in the Office of Fuels Programs Docket Room, 3F-056, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-9478. The docket room is open between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, March 16, 1992.

Charles F. Vacek,

Deputy Assistant Secretary for Fuels Programs, Office of Fossil Energy.

[FR Doc. 92-7247 Filed 3-27-92; 8:45 am]

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket Nos. ER92-348-000, et al.]

Electric Rate, Small Power Production, and Interlocking Directorate Filings; Florida Power Corp., et al.

March 23, 1992.

Take notice that the following filings have been made with the Commission:

1. Florida Power Corp.

[Docket No. ER92-348-000]

Take notice that on March 4, 1992, Florida Power Corporation ("Florida Power") filed a letter agreement dated July 25, 1990 between itself and Central Power and Lime, Inc. ("CP&L"), under which Florida Power agreed to provide CP&L with temporary daily firm transmission service under Florida Power's T-1 tariff. Florida Power agreed to provide service in the letter agreement for the period beginning July 25, 1990 and ending March 31, 1992. The letter agreement has made it possible for CP&L to reduce its transmission costs by temporarily avoiding having to pay Florida Power's monthly transmission rate during a period when it does not need long-term wheeling service provided for in an agreement with Florida Power.

Florida Power requests waiver of the 60 day notice requirement in order to permit the letter agreement to become effective for the period July 25, 1990 through March 3, 1992. Florida Power states that, since the letter agreement results in a temporary rate reduction to CP&L, the request for waiver is supported by a showing of good cause.

Comment date: April 6, 1992, in accordance with Standard Paragraph E at the end of this notice.

2. Florida Power Corp.

[Docket No. ER92-376-000]

Take notice that on March 13, 1992, Florida Power Corporation ("Florida Power") tendered for filing amended revisions to the capacity charges, reservation fees and energy adder for various interchange services provided by Florida Power pursuant to interchange contracts with Cajun Electric Power Cooperative, Inc., Entergy Services, Inc., Florida Power & Light Company, Fort Pierce Utilities Authority, Jacksonville Electric Authority, Kissimmee Utility Authority, Orlando Utilities Commission, Sebring Utilities Commission, Seminole Electric Cooperative, Inc., Tampa Electric Company, Reedy Creek Improvement District, and the Cities of Gainesville, Homestead, Key West, Lakeland, Lake Worth, New Smyrna Beach, St. Cloud, Starke, Tallahassee and Vero Beach, Florida. The interchange services which are affected by these revisions are (1) Services Schedule B—Short Term Firm, (2) Service Schedule F—Assured Capacity and Energy, (3) Service Schedule G—Backup Service, (4) Service Schedule H—Reserve Service and (5) Contract For Assured Capacity And Energy With Florida Power & Light Company. Florida Power states that the revised capacity charges, reservation fees, and energy adder were developed using the same methodology as used in the original filings.

Florida Power requests that the amended revised capacity charges, reservation fees and energy adder be made effective on May 1, 1992 and remain effective through April 30, 1993. Florida Power requests waiver of the Commission's sixty-day notice requirement. If waiver is denied, Florida Power requests that the filing be made effective June 1, 1992.

Comment date: April 6, 1992, in accordance with Standard Paragraph E at the end of this notice.

3. Tampa Electric Co.

[Docket No. ER92-366-000]

March 23, 1992.

Take notice that on March 17, 1992, Tampa Electric Company (Tampa Electric) tendered for filing a Contract for Interchange Service between Tampa Electric and Seminole Electric Cooperative, Inc. (Seminole). The Contract would supersede the existing agreement for interchange service between Tampa Electric and Seminole.

Tampa Electric also tendered for filing, as supplements to the Contract for Interchange Service, Service Schedules A and B, providing for Emergency Interchange Service and Scheduled/Short-Term Firm Interchange Service, respectively. These schedules would supersede the existing Service Schedules A and B between Tampa Electric and Seminole.

Finally, Tampa Electric requested that all remaining service schedules and letters of commitment under the existing agreement for interchange service be continued and given new supplement designations under the tendered Contract for Interchange Service.

Tampa Electric proposes an effective date of June 1, 1992, for the Contract for Interchange Service, Service Schedules A and B, and redesignation of service schedules and letters of commitment.

Copies of the filing have been served on Seminole and the Florida Public Service Commission.

Comment date: April 6, 1992, in accordance with Standard Paragraph E at the end of this notice.

4. New England Power Co.

[Docket No. ER92-382-000]

Take notice that on March 16, 1992, New England Power Company (NEP) submitted for filing an agreement between itself and four operating subsidiaries of Northeast Utilities (NU). NEP states that the purpose of the agreement is to set forth the terms under which NU and NEP agree to determine and measure the impact upon NEP's system of transactions between NU and Public Service Company of New Hampshire (PSNH) upon consummation of NU's impending acquisition of PSNH. NEP requests that the agreement be allowed to become effective upon the date of the acquisition by NU of PSNH, in accordance with the terms of the agreement.

Comment date: April 6, 1992, in accordance with Standard Paragraph E at the end of this notice.

5. Arkansas Power & Light Co.

[Docket No. ER92-341-000]

Take notice that on March 2, 1992, Arkansas Power & Light Company (AP&L) tendered for filing in accordance with the Power Coordination, Interchange and Transmission Service Agreements between AP&L and Conway, West Memphis, and Osceola, Arkansas (Arkansas Cities); Campbell and Thayer, Missouri (Missouri Cities); City Water & Light Plant of Jonesboro, Arkansas (Jonesboro); Arkansas Electric Cooperative Corporation (AECC); the Power Coordination, Interchange and Transmission Service Agreement between AP&L and Entergy Power, Inc. (EPI); the Transmission Service Agreement between AP&L and the Louisiana Energy & Power Authority (LEPA); the Transmission Service Agreement between AP&L and the City of Hope, Arkansas (Hope); and Hydroelectric Power Transmission and Distribution Service Agreement between AP&L and the City of North Little Rock, Arkansas (North Little Rock). AP&L states that this filing updates the rates and the transmission loss factor produced by the formulas contained in the agreements in order to reflect 1991 data.

Comment date: April 6, 1992, in accordance with Standard Paragraph E end of this notice.

6. Northern States Power Co.

[Docket No. ER92-343-000]

Take notice that on March 2, 1992, Northern States Power Company (NSP) tendered for filing a Transmission Service Loss Study and revised tariff sheets for inclusion in NSP's Transmission Services Tariff, first accepted for filing in Docket No. ER91-21-000.

Comment date: April 8, 1992, in accordance with Standard Paragraph E end of this notice.

7. New England Power Co.

[Docket No. ER92-355-000]

Take notice that on March 2, 1992, New England Power Company (NEP) tendered for filing a Notice of Termination for two (2) Unit Power Contracts between NEP and the following two (2) utilities:

(1) Central Vermont Public Service Corporation.

(2) Fitchburg Gas and Electric Light Company.

NEP requests an effective date of April 30, 1992.

Comment date: April 6, 1992, in accordance with Standard Paragraph E at the end of this notice.

8. Public Service Company of New Hampshire

[Docket No. ER92-72-000]

Take notice that on March 17, 1992, Public Service Company of New Hampshire ("PSNH") submitted supplemental information regarding the Purchase Agreement With Respect to PSNH System and Newington ("Purchase Agreement"). PSNH filed the Purchase Agreement with the Commission on October 3, 1991.

Comment date. April 6, 1992, in accordance with Standard Paragraph E at the end of this notice.

9. Jesse T. Williams, Sr.

[Docket No. ID-2680-000]

Take notice that on March 17, 1992, Jesse T. Williams, Sr. tendered for filing an application under section 305(b) of the Federal Power Act to hold the following positions:

Director: Ohio Edison Company.
Vice-President: The Goodyear Tire and Rubber Company.

Comment date: April 6, 1992, in accordance with Standard Paragraph E at the end of this notice.

10. Daniel M. Tellep

[Docket No. ID-2681-000]

Take notice that on March 17, 1992, Daniel M. Tellep (Applicant) tendered for filing a supplemental application under section 305(b) of the Federal Power Act to hold the following positions:

Director: Southern California Edison Company.
Director: First Interstate Bancorp.

Comment date. April 6, 1992, in accordance with Standard Paragraph E at the end of this notice.

11. Public Service Electric and Gas Company

[Docket No. ER92-381-000]

Take notice that Public Service Electric and Gas Company (PSE&G) of Newark, New Jersey on March 16, 1992, tendered for Authority (NYPA). Pursuant to the agreement, PSE&G proposes to begin selling on March 27, 1992, and will sell to NYPA energy from time to time as scheduled by NYPA.

PSE&G requests the Commission to waive its notice requirements under § 35.3 of its rules and to permit the Energy Sales Agreement to become effective as of the commencement of the transaction, March 27, 1992. Copies of the filing have been served upon NYPA.

Comment date. April 6, 1992, in accordance with Standard Paragraph E at the end of this notice.

12. Detroit Edison Co.

[Docket Nos. ER92-180-001 and EL92-17-000]

Take notice that on March 3, 1992, The Detroit Edison Company (Edison) tendered for filing revised firm power rates in compliance with the Commission's Order issued March 2, 1992 in these proceedings.

Comment date. April 6, 1992, in accordance with Standard Paragraph E at the end of this notice.

13. Otter Tail Power Co.

[Docket No. ER92-383-000]

Take notice that on March 16, 1992, Otter Tail Power Company (Otter Tail) tendered for filing an agreement between Otter Tail and Manitoba Hydro Electric Board (MHEB). Otter Tail states that the Agreements are for the sale of capacity and energy from MHEB to Otter Tail for the months of May through October for 1992, 1993 and 1994.

Otter Tail requests a waiver of the Commission notice requirements to allow this schedule to become effective on May 1, 1992.

Comment date: April 6, 1992, in accordance with Standard Paragraph E at the end of this notice.

14. Southwestern Electric Power Co.

[Docket No. ER92-385-000]

Take notice that on March 16, 1992, Southwestern Electric Power Company ("SWEPCO") tendered for filing an amendment to a Power Supply Agreement, between SWEPCO and City of Bentonville, Arkansas ("City"). The amendment extends the term of the Power Supply Agreement and provides the City with flexibility in its power supply planning.

A copy of the filing has been served on the City and the Arkansas Public Service Commission.

Comment date: April 6, 1992, in accordance with Standard Paragraph E at the end of this notice.

15. Northern States Power Co. (Wisconsin).

[Docket No. ER92-374-000]

Take notice that on March 12, 1992, Northern States Power Company, Eau Claire, Wisconsin (NSPW) tendered for filing a new wholesale electric service agreement, dated March 1, 1992, between NSPW and the City of Bloomer (City), a municipal corporation in Chippewa County, Wisconsin. The City currently purchases power and energy from NSPW under an agreement dated May 24, 1977.

NSPW requests an effective date of May 1, 1992. NSPW states that, on the effective date of the new agreement, the May 24, 1977 agreement will be terminated. NSPW also states that the March 1, 1992 agreement will not affect the rates charged by NSPW for wholesale electric service to the City.

A copy of the filing was served upon the City and the Public Service Commission of Wisconsin.

Comment date. April 6, 1992, in accordance with Standard Paragraph E end of this notice.

16. WestPlains Energy, A Division of UtiliCorp United, Inc.

[Docket No. ER92-386-000]

Take notice that on March 16, 1992, WestPlains Energy a Division of UtiliCorp United, Inc. (WestPlains) tendered for filing Service Schedule 92-I-1, Incremental Power Service. Current customers eligible for the incremental service are the following Kansas Municipalities: Anthony, Ashland, Attica, Beloit, Greensburg, Hoisington, Kingman, Lincoln Center, Osborne, Pratt, Russell, Stockton and Washington. Service Schedule 92-I-1 is intended to supplement WestPlains' existing service arrangements with its municipal wholesale customers by reducing the rate for incremental service. Incremental service is defined as service in excess of each customer's monthly deliveries to the Municipality, if any, under Service Schedules 89-D-1 and 90-P-1, combined, for the period of January, 1991 to December, 1991. Incremental Power Service under Service Schedule 92-I-1 will be provided at rates below those currently in effect for wholesale service under Service Schedule 90-P-1. Waiver of notice has been requested and an effective date of April 1, 1992 has been requested for those customers who consent to the waiver prior to May 8, 1992, the approximate date that the first bills under the proposed rate schedule will be rendered if waiver is granted. If waiver is denied, an effective date 60 days after the filing is requested.

Copies of the filing were served upon each of the eligible Municipals, their agent, Kansas Municipal Energy Agency (KMEA), and the Utilities Division, Kansas Corporation Commission, Topeka, Kansas.

Comment date: April 6, 1992, in accordance with Standard Paragraph E at the end of this notice.

17. Pennsylvania Power & Light Co.

[Docket No. ER92-371-000]

Take notice that on March 11, 1992, Pennsylvania Power & Light Company (PP&L) tendered for filing the First Supplemental Agreement between PP&L and Consolidated Edison Company of New York, Inc. (Con Edison) dated March 3, 1992. PP&L and con Edison are parties to a System Power Purchase Agreement dated as of November 24, 1982 (Basic Agreement), which is on file with the Commission as PP&L Rate Schedule No. 76. At present, the Basic Agreement provides that Con Edison may reserve interruptible power and energy from PP&L only at a designated Point of Interchange. As more fully set forth therein, the First Supplemental Agreement amends section 2 of the Basic Agreement to allow the parties thereto to agree upon additional Points of Interchange. The First Supplemental Agreement does not modify the rates for reservations of interruptible power and energy from PP&L by Con Edison, nor does it modify any of the terms and conditions contained therein except for the provision of additional Points of Interchange. Further, no facilities need to be constructed to effectuate the First Supplemental Agreement.

PP&L requests waiver of the notice requirements of Section 205 of the Federal Power Act and § 35.3 of the Commission's Regulations so that the First Supplemental Agreement can be made effective as of March 11, 1992. Initial service under the Second Supplemental Agreement will not begin before the requested effective date.

PP&L states that a copy of its filing was served on Con Edison, the Pennsylvania Public Utility Commission and the New York Public Service Commission.

Comment date: April 6, 1992, in accordance with Standard Paragraph E at the end of this notice.

18. Northern States Power Co. (Wisconsin)

[Docket No. ER92-375-000]

Take notice that on March 12, 1992, Northern States Power Company, Eau Claire, Wisconsin (NSPW) tendered for filing a new wholesale electric service agreement, dated February 27, 1992, between NSPW and the City of Rice Lake (City), a municipal corporation in Barron County, Wisconsin. The City currently purchases power and energy from NSPW under an agreement dated March 14, 1972.

NSPW states that the City and NSPW have executed the new agreement to provide the City with the option to convert to partial requirements service if the City deems conversion to be in its best interest. Such conversion cannot take place prior to May 1997. The new agreement also provides the City the option of entering into coordination transactions with NSPW.

NSPW requests an effective date sixty days subsequent to the date of filing. NSPW states that, on the effective date of the new agreement, the March 14, 1972 agreement will be terminated. NSPW also states that the February 27, 1992 agreement will not effect the rate charged by NSPW for wholesale electric service to the City.

A copy of the filing was served upon the City and the Public Service Commission of Wisconsin.

Comment date: April 6, 1992, in accordance with Standard Paragraph E end of this notice.

19. Iowa-Illinois Gas and Electric Co.

[Docket No. ER92-339-000]

Take notice that Iowa-Illinois Gas and Electric Company (Iowa-Illinois) on March 2, 1992, tendered for filing pursuant to § 35.12 of the regulations under the Federal Power Act an initial rate schedule in the form of an Interchange Agreement (the Agreement) dated February 26, 1992 between Iowa-Illinois and City of Pella, Iowa (Pella).

Iowa-Illinois states the Agreement applies only to transactions between Iowa-Illinois and Pella. Service Schedule A of the Agreement provides for either party to furnish Scheduled Capacity consisting of power and associated energy subject to further agreement of the parties from time to time for an amount, period, and a degree of firmness. Reservation charges (demand charges) per megawatt for such power will be up to $400 per day or up to $2,400 per week. Charges for energy supplied will be 110% of the selling party's out-of-pocket or average production cost. Service Schedule B of the Agreement provides for either parties from time to time. Term Energy will be reserved for periods of one hour or more and is intended to replace higher cost energy sources thereby enabling the parties to share cost savings through more efficient use of resources. The energy charge will be up to 110% of the selling party's out-of-pocket cost per megawatthour plus a availability charge for energy reserved of up to $25 per megawatthour. The maximum availability charge for any one day will be $400 multiplied by the highest average number of megawatts delivered in any one hour. The minimum charge for each transaction pursuant to this service schedule will be 100% of the out-of-pocket cost of supplying the energy for any such transaction.

Iowa-Illinois proposes the rate schedule to be effective on May 1, 1992.

Copies of the filing were served upon the Iowa Utilities Board and Pella.

Comment date: April 6, 1992, in accordance with Standard Paragraph E at the end of this notice.

20. Iowa-Illinois Gas and Electric Co.

[Docket No. ER92-369-000]

Take notice that Iowa-Illinois Gas and Electric Company (Iowa-Illinois), 206 East Second Street, P.O. Box 4350, Davenport, Iowa 52808, on March 11, 1992, tendered for filing pursuant to § 35.13 of the Regulations under the Federal Power Act a rate schedule change in the form of a First Amendment dated January 22, 1992 to Interchange Agreement (the Agreement) dated June 13, 1983, between Iowa-Illinois and City of Tipton, Iowa (Tipton).

Iowa-Illinois states the Agreement applies only to transactions between Iowa-Illinois and Tipton. Under the First Amendment, Schedule D (Supplement No. 4 to Rate Schedule FERC No. 49) has been changed to allow Short Term Firm Power to be taken for periods of one or more days rather than for periods of one or more weeks of seven consecutive days. The Demand Charge under Service Schedule D has been changed from 95 cents per kilowatt reserved per week to up to 19 cents per kilowatt reserved per day when reserved on a daily basis or up to 95 cents per kilowatt reserved per week when reserved on a weekly basis. The Energy Charge under Service Schedule D has been changed to remove the floor of 6 mills per kilowatthour and to establish the Energy Charge as the incremental cost of the delivering party plus ten percent (10%) of such cost plus reimbursement for certain wheeling charges.

Iowa-Illinois proposes the rate schedule change to be effective on June 1, 1992.

Copies of the filing were served upon the Illinois Commerce Commission, the Iowa Utilities Board and Tipton.

Comment date: April 6, 1992, in accordance with Standard Paragraph E at the end of this notice.

21. New England Power Co.

[Docket No. ER90-525-000]

Take notice that on March 2, 1992, New England Power Company (NEP) submitted for filing a Surcharge Compliance Settlement filing in the above-referenced dockets. NEP states that its filing reflects the reconciliation of estimates to actuals for certain specified costs and the refund of these amounts, pursuant to settlement agreements approved in these dockets.

Comment date: April 6, 1992, in accordance with Standard Paragraph E at the end of this notice.

22. PacifiCorp Electric Operations

[Docket No. ER92-367-000]

Take notice that on March 17, 1992, tendered for filing in accordance with 18 CFR part 35 of the Commission's Rules and Regulations, a Firm Transmission Service Agreement ("Service Agreement") between PacifiCorp and Deseret Generation & Transmission Co-Operative ("Deseret") dated March 9, 1992.

Under terms of the Agreement, PacifiCorp will provide firm transmission service for Deseret under Service Schedules TS–1 and TS–4 of PacifiCorp's FERC Electric Tariff, Original Volume No. 5.

PacifiCorp requests that an effective date of June 1, 1991 be assigned to the Agreement, this date being consistent with the date Deseret anticipates service under the Service Agreement is required.

Copies of this filing were supplied to Deseret, the Public Utility Commission of Oregon and the Utah Public Service Commission.

Comment date: April 6, 1992, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraphs

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 92–7165 Filed 3–27–92; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. RP92–133–000 (Phase I)]

Gas Research Institute; Annual Application and Technical Conference

March 23, 1992.

Take notice that on February 28, 1992, the Gas Research Institute (GRI) filed an application to initiate the Commission's review of GRI's 1993–1997 research and development (R&D) plan and 1993 R&D program, pursuant to the Natural Gas Act and the Commission's Regulations, particularly 18 CFR 154.38(d)(5). In its application, GRI asks for a two-phase review of the GRI program.

In Phase I, the Commission would review options for, and establish a revised GRI funding mechanism to, address recent changes in the gas market and the Commission's rules. Phase II would address the scope and the content of the 1993 R&D program compatible with the funding mechanism developed in Phase I.

On March 20, 1992, GRI filed its modified funding system, thereby initiating Phase I. It asked the Commission to establish a procedural schedule and to grant expedited approval.

The Commission has committed to acting on an appropriately revised mechanism in time for it to be reflected in GRI's 1993 R&D budget. Accordingly, the Commission will schedule a conference to address Phase I issues on Monday, April 13, 1992, at 10 a.m., in the Commission meeting room, at the offices of the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426. All persons interested in participating in the conference should notify the Commission's Secretary by April 8, 1992. By a supplemental notice, the Commission will issue a list of questions for the parties to address in their comments or at the conference.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 214 and 211 of the Commission's Rules of Practice and Procedures, 18 CFR 385.214 and 385.211. All protests and motions to intervene should be filed on or before April 6, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 92–7166 Filed 3–27–92; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. RP92–142–000]

Penn-York Customer Group v. Penn-York Energy Corp. Complaint

March 20, 1992.

Take notice that on March 18, 1992, the Penn-York Customer Group (Customer Group) filed a complaint against Penn-York Energy Corporation (Penn-York) in the captioned docket, pursuant to rule 206 of the Commission's Rules of Practice and Procedure, 18 CFR 385.206 and section 1b.8 of the Commission's General Rules, 18 CFR 1b.8.

The complaint alleges that Penn-York is charging its customers rates that are higher than the compliance rates on file with the Commission, and that this violates section 4 of the Natural Gas Act (NGA) and the filed rate doctrine established in *Arkansas Louisiana Gas Co.* v. *Hall*, 453 U.S. 571 (1981). Specifically, the Customer Group asserts Penn-York is charging a deliverability rate of $4.3981 under Rate Schedule SS–1 and $5.6484 under Rate Schedule SS–2, even though the Commission directed Penn-York, in an order issued October 3, 1991 (57 FERC ¶ 61,025), to file rates of $3.5270 under Rate Schedule SS–1 and $4.6107 under Rate Schedule SS–2, and these lower compliance rates were then filed and made effective as of October 3, 1991.

The Customer Group states that Penn-York is apparently of the view that it is not required to comply with the October 3 order because the record in the proceeding was before the U.S. Court of Appeals for the District of Columbia Circuit on that date, and the Commission had no authority to issue the October 3 order without the Court's permission. The Customer Group argues that the Commission has subsequently asked the Court for such permission, and asserts that the October 3 order simply implements earlier orders in this case that were not stayed and that the Commission had the right to issue.

The Customer Group asks that the Commission enforce the October 3 order by instructing Penn-York to discontinue charging its customers unlawful rates, to refund the amount collected in excess of the filed rates, and to charge the filed rates pending investigation. The Customer Group also requests that the Commission issue a show cause order against Penn-York, and conduct an investigation of Penn-York's apparent violation of section 4 of the NGA and the filed rate doctrine.

Any person desiring to be heard or to protest the instant complaint should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 214 and 211 of the Commission's Rules of Practice and Procedure. All such motions or protests shall be filed on or before April 20, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of the filing are on file with the Commission and are available for public inspection. Answers to this complaint shall be due on or before April 20, 1992.

Lois D. Cashell,

Secretary.

[FR Doc. 92–7167 Filed 3–27–92; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. RP92–74–001]

South Georgia Natural Gas Co.; Proposed Changes to FERC Gas Tariff

March 23, 1992.

Take notice that on March 17, 1992, South Georgia Natural Gas Company ("South Georgia") tendered for filing Sixth Revised Sheet No. 4A and Sixth Revised Sheet No. 4B to its FERC Gas Tariff, First Revised Volume No. 1.

South Georgia is making the instant filing in response to the option the Commission granted South Georgia in its Order dated February 28, 1992 to place into effect on March 1, 1992, the revised rates proposed in South Georgia's filing of December 31, 1991, that allow South Georgia to remain revenue neutral with respect to whether it makes firm sales or provides firm transportation service.

South Georgia states that copies of the filing will be served upon all of South Georgia's jurisdictional customers, interested state commissions and interested parties.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure (sections 385.211 and 385.214). All such motions or protests should be filed on or before March 30, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

ENVIRONMENTAL PROTECTION AGENCY

[FRL–4118–6]

Underground Injection Control Program; Hazardous Waste Disposal Injection Restrictions; Petition for Exemption—Class I Hazardous Waste Injection; Sterling Chemicals

AGENCY: Environmental Protection Agency.

ACTION: Notice of final decision on petition reissuance.

SUMMARY: Notice is hereby given that a reissuance to an exemption to the land disposal restrictions under the 1984 Hazardous and Solid Waste Amendments to the Resource Conservation and Recovery Act has been granted to Sterling Chemicals, for the Class I injection wells located at Texas City, Texas. As required by 40 CFR part 148, the company has adequately demonstrated to the satisfaction of the Environmental Protection Agency by petition and supporting documentation that, to a reasonable degree of certainty, there will be no migration of hazardous constituents from the injection zone for as long as the waste remains hazardous. This final decision allows the underground injection by Sterling Chemicals, of the specific restricted hazardous waste identified in the petition reissuance, into the Class I hazardous waste injection wells at the Texas City, Texas facility specifically identified in the reissued petition, for as long as the basis for granting an approval of this petition remains valid, under provisions of 40 CFR 148.24. As required by 40 CFR 124.10, a public notice was issued January 17, 1992. The public comment period ended on March 2, 1992. EPA received no comments. This decision constitutes final Agency action and there is no Administrative appeal.

DATES: This action is effective as of March 23, 1992.

ADDRESSES: Copies of the reissued petition and all pertinent information relating thereto are on file at the following location: Environmental Protection Agency, Region 6, Water Management Division, Water Supply Branch (6W–SW), 1445 Ross Avenue, Dallas, Texas 75202–2733.

FOR FURTHER INFORMATION CONTACT: Oscar Cabra, Jr., Chief Municipal Facilities Branch, EPA—Region 6, telephone (214) 655–7110, (FTS) 255–7110.

Myron O. Knudson,

Director, Water Management Division (6W).

BILLING CODE 6560–50–M

[FRL–4118–5]

Public Meeting on EPA's Scientific Reassessment of Dioxin

AGENCY: U.S. Environmental Protection Agency.

ACTION: Notice of public meeting.

SUMMARY: This notice announces a second public meeting to be held by the U.S. Environmental Protection Agency's (EPA's) Office of Research and Development to inform the public of EPA's scientific reassessment of dioxin, and to receive comment from the public. This meeting will serve as an introduction to the Agency's efforts and as a follow-up to a meeting held on the same subject on November 15, 1991. The public is invited to give oral and written comment on all aspects of the scientific reassessment of dioxin. The meeting will begin with a series of presentations by EPA officials concerning the current status of EPA's scientific reassessment of dioxin. Each presentation will be followed by a short question and answer period. The rest of the meeting will consist of oral comments by organizations and individuals who indicate an interest to do so in accordance with the procedures described in this notice.

DATES: The meeting will be held on Tuesday, April 28, 1992, from 8:45 a.m. to 5 p.m.

ADDRESSES: The meeting will be held at the U.S. Environmental Protection Agency, Education Center Auditorium, Waterside Mall, 401 M Street, SW., Washington, DC. Environmental Management Support, Inc., an EPA contractor, is providing logistical support for the public meeting. Members of the public wishing to give oral comment at the meeting on EPA's scientific reassessment of dioxin may request a time by calling Environmental Management Support, Inc., at telephone number (301)589–0885 no later than 5:00 p.m. (EST) Monday, April 27, 1992. Please do not call EPA directly to request a time at this meeting. Only those individuals and organizations that are assigned a time in advance of the meeting will be permitted to give oral comment. Please be advised that oral comment on the day of the meeting will be limited to not more than 5 minutes in

order to give everyone an equal opportunity to speak. Because of time limitations, only approximately 30 people who wish to present oral comments can be accommodated at the April 28th meeting. Speakers will be informed of the time they will be expected to present their oral comments.

In addition to oral comments, members of the public may also submit written comments and other materials relevant to EPA's scientific reassessment of dioxin by mail to: Environmental Management Support, Inc., 1010 Wayne Ave., suite 200, Silver Spring, Maryland, 20910, Attention: Dioxin Reassessment. EPA is asking the public to address subject areas, either orally or in writing, not previously submitted in response to the first public meeting on the Scientific Reassessment of Dioxin held at EPA Headquarters on November 15, 1991.

EPA invites public comment on the elements comprising the scientific reassessment of dioxin, which are:

(1) Development of a new biologically-based, dose-response model for dioxin to estimate human health risks; (2) Supporting laboratory research relevant to the development of a new dose-response model; (3) Update and revision of the Health Assessment Document for Dioxin; (4) Update and revision of the Dioxin Exposure Assessment Document; and (5) Supporting research to characterize ecological risks of dioxin in aquatic ecosystems, and the development of an Ecological Risk Characterization Report. The EPA is particularly interested in receiving:

A. New scientific data relevant to the scientific reassessment of dioxin not previously submitted to the Agency in response to the November 15, 1991 public meeting;

B. Any ongoing or recently published scientific research in these areas;

C. Any scientific or technical interpretation and analysis of data relevant to the dioxin reassessment;

D. Suggestions for additional public participation and involvement in EPA's scientific reassessment of dioxin.

Inspection and Copying

The following EPA documents, relevant to the scientific reassessment of dioxin, are available for public inspection and copying at the ORD Public Information Shelf, U.S. Environmental Protection Agency Headquarters Library, Waterside Mall, 401 M Street SW., Washington, DC 20460. The hours of inspection and copying are between 8 a.m. and 4:30 p.m. Monday through Friday, except holidays. For persons outside of the Washington, DC area, copies of these documents can be obtained from sources stated.

1. Summary description of "EPA's Scientific Reassessment of Dioxin," dated November 15, 1991. This summary may be obtained by written request or by telephone to the EPA support contractor, Environmental Management Support, Inc., 1010 Wayne Ave., suite 200, Silver Spring, Maryland, 20910, Attention: Dioxin Reassessment, telephone number: (301) 589-0885.

2. Health Assessment Document for Polychlorinated Dibenzo-p-Dioxins. U.S. Environmental Protection Agency, Office of Health and Environmental Assessment, Washington, DC. September 1985. EPA/600/8-84/014F. Available from the National Technical Information Service; PB86-122546/AS.

3. A Cancer Risk-Specific Dose Estimate for 2,3,7,8-TCDD. (Review Draft). U.S. Environmental Protection Agency, Office of Health and Environmental Assessment, Washington, DC. June 1988. EPA/600/6-88/007Aa. Available from the National Technical Information Service; PB88-231204/AS.

4. A Cancer Risk-Specific Dose Estimate for 2,3,7,8-TCDD. Appendices A Through F. (Review Draft). U.S. Environmental Protection Agency, Office of Health and Environmental Assessment, Washington, DC. June 1988. EPA/600/6-88/007Ab. Available from the National Technical Information Service, PB88-231212/AS.

5. Estimating Exposures to 2,3,7,8-TCDD (Review Draft). U.S. Environmental Protection Agency, Office of Health and Environmental Assessment, Washington, DC. March 1988. EPA/600/6-88/005A. Available from the National Technical Information Service; PB88-231196/AS.

6. Report of the *ad hoc* dioxin panel of the Science Advisory Board: Review of draft documents: "A Cancer Risk-Specific Dose Estimate for 2,3,7,8-TCDD" and "Estimating Exposure to 2,3,7,8-TCDD." U.S. Environmental Protection Agency, Washington, DC. EPA-SAB-EC-90-003. Available for copying at the ORD Public Information Shelf.

7. Written public comments as received by EPA from the first public meeting on EPA's Scientific Reassessment of Dioxin held at EPA Headquarters on November 15, 1991. Available for copying at the ORD Public Information Shelf.

FOR FURTHER INFORMATION CONTACT: Mr. David Cleverly, Office of Technology Transfer and Regulatory Support (H-8105), Office of Research and Development, U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460, telephone (202) 260-7891 (FTS: 260-7891).

SUPPLEMENTARY INFORMATION: This meeting is the second in a series of public meetings on EPA's Scientific Reassessment of Dioxin. The first public meeting was held November 15, 1991 at the Headquarters of the U.S. Environmental Protection Agency (EPA) in Washington, DC. At that time, EPA officials gave presentations to inform the public on all scientific aspects of the scientific reassessment of dioxin. In addition EPA received written and oral comment from 29 individuals representing a broad spectrum of the public, e.g., representatives of industry, representatives of environmental groups, and representatives of academia. At the November 15th meeting EPA informed the public that a second public meeting on the Scientific Reassessment of Dioxin would be held, the date to be announced. The purposes of this one-day meeting are to provide the public with a brief orientation on the current status of EPA's Scientific Reassessment of Dioxin, to answer any relevant questions from the public, to receive public comment on any aspect of the process, and to receive any relevant scientific information.

The EPA Administrator, William K. Reilly, announced on April 8, 1991, that EPA is conducting a scientific reassessment of the risks of exposure to 2,3,7,8-TCDD and related compounds, collectively known as "dioxin." The EPA is undertaking this task because significant advances have occurred in the scientific understanding of the mechanisms by which dioxin becomes toxic; of the health effects of dioxin in animals and people; of the pathways to human exposure; and of the toxic effects of dioxin to the environment, particularly aquatic organisms.

Based on animal studies, dioxin is one of the most potent carcinogens studied. The Agency has previously prepared assessments of the human health risks from environmental exposures to dioxin in 1985 and 1988. These assessments were reviewed by the EPA's Science Advisory Board (SAB). At the time of the 1988 risk assessment there was general agreement within the scientific community that the standard dose-response approaches were inappropriate for dioxin and should be improved, but there was no consensus identifying a more biologically defensible methodology. The Agency was challenged to explore the development of such a method.

Two important events have recently occurred that impact this reassessment: The NIOSH cancer mortality study of U.S. chemical workers published in the New England Journal of Medicine (Marilyn A. Fingerhut, et al. "Cancer Mortality in Workers Exposed to 2,3,7,8-Tetrachlorodibenzo-p-Dioxin." January 24, 1991, Vol. 324:4, pages 212-218.), and the Banbury Conference on dioxin toxicology held in October, 1990, in Cold Spring Harbor, New York.

The proceedings of the Banbury Conference have been published since the November 15th meeting [Biological Basis for Risk Assessment of Dioxins and Related Compounds, Cold Spring Harbor Laboratory Press, Plainview, New York, 1991]. It should be noted that the Banbury Conference involved many of the leading scientific experts on dioxin. At the meeting, there was general agreement in certain areas of dioxin toxicology, for example:

a. Humans and experimental animals respond to dioxin similarly.

b. Effects in humans can be anticipated by effects observed in experimental animals, e.g., enzyme induction, immunotoxicity, reproductive toxicity, developmental toxicity, and carcinogenicity.

c. Certain related chemicals (having similar molecular structure) to dioxin may behave the same as dioxin, for example, certain polychlorinated and polybrominated dibenzofurans, polychlorinated and polybrominated dibenzo-p-dioxins, and coplanar chlorinated biphenyls.

d. All toxic effects of dioxin are mediated by the chemicals binding to a protein receptor within the cell cytoplasm, and, therefore, a receptor-based risk assessment model is appropriate and should be developed.

The EPA's scientific reassessment of dioxin is comprised of 5 basic parts:

1. Development of a new biologically-based, dose-response model for dioxin to estimate human health risks;

2. Supporting research relevant to the development of a new dose-response model;

3. Update and revision of the Health Assessment Document for Dioxin;

4. Update and revision of the Dioxin Exposure Assessment Document;

5. Supporting research to characterize ecological risks of dioxin in aquatic ecosystems, and the development of an Ecological Risk Characterization Report.

These five basic parts of this intensive effort are summarized in the document, "EPA's Scientific Reassessment of Dioxin," which is available to the public through this notice, and on the day of the public meeting.

Dated: February 24, 1992.

Erich W. Bretthauer,

Assistant Administrator for Research and Development.

FEDERAL COMMUNICATIONS COMMISSION

FCC Establishes Small Business Advisory Committee

March 24, 1992.

The Federal Communications Commission (FCC) has established the Small Business Advisory Committee. This committee will provide expert advice and recommendations on small business issues, including minority and female participation issues. The establishment of this committee is necessary and in the public interest.

The FCC will select committee members to achieve a balanced membership given the purpose and objectives of the committee.

For additional information, contact Alan McKie at (202) 632-6390.

Federal Communications Commission.

Donna R. Searcy,

Secretary.

BILLING CODE 6712-01-M

FEDERAL HOUSING FINANCE BOARD

Financing Corp. Net New Borrowings

AGENCY: Federal Housing Finance Board for Financing Corporation.

ACTION: Notice.

SUMMARY: Notice is hereby given that the Financing Corporation has completed all net new borrowings under section 21(e) of the Federal Home Loan Bank Act, as amended, 12 U.S.C. 1441(e), and will issue no additional obligations after December 12, 1991.

DATES: Effective date was December 12, 1991.

FOR FURTHER INFORMATION CONTACT: K. Diane Boyle, Secretary/Treasurer of the Financing Corporation, (202) 272-4978 or James H. Gray Jr., Associate General Counsel, Federal Housing Finance Board, (202) 408-2552.

SUPPLEMENTARY INFORMATION: Section 416(b) of the Competitive Equality Banking Act of 1987 requires the Financing Corporation to give public notice after completing all net new borrowings. See 12 U.S.C. 1441 note. Section 104 of the Resolution Trust Corporation Refinancing, Restructuring, and Improvement Act of 1991, states that "No obligation of the Financing Corporation shall be issued after the date of enactment of the Resolution Trust Corporation Thrift Depositor Protection Refinance Act of 1991." 105 Stat. 1761, 1762 to be codified at 12 U.S.C. 1441(e)(2). The Resolution Trust Corporation Thrift Depositor Protection Refinance Act was enacted December 12, 1991 and became effective on February 1, 1992. Accordingly, the Financing Corporation is providing the required public notice of completion of net new borrowings.

Philip L. Conover,

Deputy Executive Director.

BILLING CODE 6725-01-M

FEDERAL RESERVE SYSTEM

First Farmers Financial Corporation; Notice of Application to Engage de novo in Permissible Nonbanking Activities

The company listed in this notice has filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the

evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than April 24, 1992.

A. Federal Reserve Bank of Chicago (David S. Epstein, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. First Farmers Financial Corporation, Converse, Indiana; to engage *de novo* through its subsidiary, Personalized Tax Services, Converse, Indiana, in tax planning and preparation pursuant to § 225.25(b)(21) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, March 24, 1992.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210-01-F

West Milton Bancorp, Inc., et al.; Formations of; Acquisitions by; and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than April 24, 1992.

A. Federal Reserve Bank of Philadelphia (Thomas K. Desch, Vice President) 100 North 6th Street, Philadelphia, Pennsylvania 19105:

1. West Milton Bancorp, Inc., West Milton, Pennsylvania; to become a bank holding company by acquiring 100 percent of the voting shares of West Milton State Bank, West Milton, Pennsylvania.

B. Federal Reserve Bank of Chicago (David S. Epstein, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. G.R. Bancorp, Ltd., Grand Ridge, Illinois; to become a bank holding company by acquiring 83 percent of the voting shares of The First National Bank of Grand Ridge, Grand Ridge, Illinois.

C. Federal Reserve Bank of St. Louis (Randall C. Sumner, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. Friendship Bancshares, Inc., Meta, Missouri; to become a bank holding company by acquiring 100 percent of the voting shares of Meta Banco, Inc., Meta, Missouri, and thereby indirectly acquire Mid America Bank, Linn, Missouri.

D. Federal Reserve Bank of Dallas (W. Arthur Tribble, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. Baylor Bancshares, Inc., Seymour, Texas; to acquire 94 percent of the voting shares of The First National Bank in Whitney, Whitney, Texas.

Board of Governors of the Federal Reserve System, March 24, 1992.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210-01-F

FEDERAL TRADE COMMISSION

[Docket C-3374]

Hanson PLC, et al.; Prohibited Trade Practices, and Affirmative Corrective Actions

AGENCY: Federal Trade Commission.

ACTION: Consent order.

SUMMARY: In settlement of alleged violations of Federal law prohibiting unfair acts and practices and unfair methods of competition, this consent order permits, among other things, the respondents to acquire Beazer PLC, and requires the respondents to divest the Cencal interest to a Commission-approved acquirer. If the divestiture is not completed within 12 months, the respondents shall consent to the appointment by the Commission of a trustee to divest the Cencal interest.

DATES: Complaint and Order issued March 9, 1992.[1]

FOR FURTHER INFORMATION CONTACT: Casey Triggs, FTC/S-2308, Washington, DC 20580. (202) 326-2682.

SUPPLEMENTARY INFORMATION: On Monday, December 16, 1991, there was published in the **Federal Register**, 56 FR 65262, a proposed consent agreement with analysis In the Matter of Hanson PLC, et al., for the purpose of soliciting public comment. Interested parties were given sixty (60) days in which to submit comments, suggestions or objections regarding the proposed form of the order.

No comments having been received, the Commission has ordered the issuance of the complaint in the form contemplated by the agreement, made its jurisdictional findings and entered an order to divest, as set forth in the proposed consent agreement, in disposition of this proceeding.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interpret or apply sec. 5, 38 Stat. 719, as amended; sec. 7, 38 Stat. 731, as amended; 15 U.S.C. 45, 18)

Donald S. Clark,

Secretary.

[FR Doc. 92-7242 Filed 3-30-92; 8:45 am]

BILLING CODE 6750-01-M

[1] Copies of the Complaint and the Decision and Order are available from the Commission's Public Reference Branch, H-130, 6th Street & Pennsylvania Avenue, NW., Washington, DC 20580.

GENERAL SERVICES ADMINISTRATION

Public Hearing and Availability of Draft Environmental Impact Statement

The United States General Services Administration (GSA) has prepared a Draft Environmental Impact Statement (DEIS) concerning the proposed construction of the Federally-owned eastern portion of the Southeast Federal Center (SEFC), including the construction of a facility to house the GSA headquarters and a facility to house the Army Corps of Engineers headquarters, pursuant to section 102(2)(c) of the National Environmental Policy Act (NEPA) of 1969 as implemented by the Council on Environmental Quality regulations (40 CFR parts 1500-1508). The DEIS will be released March 18-24, 1992 to Federal, State and local agencies, community groups and concerned individuals.

The Southeast Federal Center is located in the southeast quadrant of the District of Columbia and adjoins the western border of the Washington Navy Yard. The eastern portion of the SEFC includes the area east of an extended New Jersey Avenue and M Street, SE., extending east to the western border of the Washington Navy Yard, and extending south from M Street, SE., to the Anacostia River.

A public hearing is scheduled to present the DEIS findings and to provide the community the opportunity to submit comments. The details of the hearing are described below. In addition, written comments on the DEIS may be submitted until May 11, 1992, and should be addressed:

General Services Administration,
National Capital Region, Planning Staff (WPL), room 7618, Attention: Frank T. Thomas, Seventh & D Streets, SW., Washington, DC, 20407.

Public Hearing

Date: April 23, 1992.
Time: 7:00 p.m.
Place: Building #159, 1st floor, room 102, 3rd & M Street, SE., Southeast Federal Center, Washington, DC.
Purpose: To receive comments concerning the environmental impacts that may result from the proposed project.
Instructions: Interested parties who want to present oral comments at the public hearing may register at the desk inside room #102 on the night of the hearing or call 202-708-5334 and register in advance. Speakers may be heard in the order they register. Each party will receive 5 minutes to speak at the hearing. Oral comments may be accompanied by written submissions or by continued oral presentation after the list of registered speakers is completed. A verbatim transcript of testimony will be taken.

Additional copies of the DEIS and backup information are available for public inspection at the following locations:

1. General Services Administration, National Capital Region, Bid Room, room 1701, 7th & D Streets, SW., Washington, DC, 20407
2. Martin Luther King, Jr. Memorial Library, 901 G Street, NW., Washington, DC, 20001
3. Southwest Branch Library, Wesley Place and K Streets, SW., Washington, DC
4. Southeast Branch Library, 7th & D Streets, SE., Washington, DC

Dated: March 19, 1992.

Linda L. Eastman,

Director, NCR Planning Staff (WPL).

[FR Doc. 92-7207 Filed 3-27-92; 8:45 am]

BILLING CODE 6820-23-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

Office of the General Counsel; Statement of Organization, Functions and Delegations of Authority

Part A, chapter AG (Office of the General Counsel) of the Statement of Organization, Functions, and Delegations of Authority for the Department of Health and Human Services (38 FR 17033, as amended most recently at 56 FR 4965, Sep. 23, 1991) is amended to delete from section AG.14 the reference to Special Counsel for Ethics and from section AG 21.2.E., Special Counsel for Ethics and to amend section AG.22 by adding a new subsection 10. Ethics Division. The effect of the change will be to transfer without change the functions of the Special Counsel for Ethics to the Ethics Division. The changes are as follows:

1. Section AG.14 is amended by deleting "5. Special Counsel for Ethics" and redesignating "6" as "5."

2. Section AG.21 is amended by deleting section 2.E relating to the Special Counsel for Ethics.

3. Section AG.22 is amended by adding at the end thereof the following:

10. Ethics Division.

a. The Associate General Counsel for Ethics serves as the Designated Agency Ethics Official responsible for Department-wide activities required by the Ethics in Government Act, as amended.

b. The Ethics Division shall be responsible for providing legal advice to officials and employees of the Department regarding ethics and standards of conduct matters; coordinating the Department's confidential reporting system for reporting on financial interests and outside activities, assisting components of the Department with the development and implementation of ethics training plans; providing liaison with the White House General Counsel on ethics matters, the Office of Government Ethics and Department ethics officials.

Dated: March 19, 1992.

Arnold R. Tompkins,

Assistant Secretary for Management and Budget.

[FR Doc. 92-7162 Filed 3-27-92; 8:45 am]

BILLING CODE 4150-04-M

Centers for Disease Control

Cooperative Research and Development Agreement

[CRADA 92-02]

AGENCY: Centers for Disease Control (CDC), Public Health Service, HHS.

ACTION: Notice.

SUMMARY: The Centers for Disease Control (CDC) announces the opportunity for a potential collaborator to enter into a Cooperative Research and Development Agreement (CRADA) to develop and commercialize enzyme immunoassay technologies for the specific detection of antibodies to enteroviruses, which are markers of recent enterovirus infection.

It is anticipated that all inventions which may arise from this CRADA will be jointly owned and licensed on a royalty-bearing basis exclusively to the collaborator with which the CRADA is made. The CRADA will be executed for a 6 month period with the possibility of renewal.

Because CRADAs are designed to facilitate the development of scientific and technological knowledge into useful, marketable products, a great deal of freedom is given to Federal agencies in implementing collaborative research. The CDC may accept staff, facilities, equipment, supplies, and money from the other participants in a CRADA; CDC may provide staff, facilities, equipment, and supplies to the project. There is a single restriction in this exchange: CDC may not provide funds to the other participants in a CRADA.

DATES: This opportunity is available until 30 days after publication of this notice. Respondents may be provided a longer period of time to furnish additional information if CDC finds this necessary.

FOR FURTHER INFORMATION CONTACT:

Technical: Harried H. Walls or Mark A. Pallansch, Ph.D., Division of Viral and Rickettsial Diseases, National Center for Infectious Diseases, Centers for Disease Control, 1600 Clifton Road, NE., Mailstop A30, Atlanta, GA 30333, telephone (404) 639-2339.

Business: Lisa Blake-DiSpigna, Technology Transfer Representative, National Center for Infectious Diseases, Centers for Disease Control, 1600 Clifton Road, NE., Mailstop C19, Atlanta, GA 30333, telephone (404) 639-2897.

SUPPLEMENTARY INFORMATION: The objective is to commercialize these assays for laboratories worldwide. These assays will detect IgM and IgA antibodies to provide evidence of recent infection with enteroviral agents. The IgG assays would provide evidence of past infection or provide information on the immune status of an individual or populations. Since enterovirus infections are responsible for considerable hospitalization with particularly serious disease in some neonates, a rapid assay for the implication of enteroviruses would be valuable. The collaborator and CDC will jointly evaluate existing reagents including monoclonal antibodies, and antigens to determine their suitability as immunodiagnostic reagents. Various combinations of these reagents will be evaluated in different test formats. The test would provide modern technology which is of equal or greater sensitivity and specificity, but less complex than the complement fixation and neutralization technologies which are currently used in the United States. The tests will be evaluated using well-characterized sera banked within the Respiratory and Enteric Viruses Branch. If new reagents are required, they will be prepared according to established procedures. CDC will provide training (including appropriate safety training) for specialized techniques and technical expertise for evaluating the assays.

Respondents should provide evidence of expertise in the development and evaluation of immunoassay procedures, evidence of experience in commercialization of products for diagnostic use, and supporting data (e.g. publications, proficiency testing, certifications, resumes, etc.) of qualifications for the laboratory director and laboratory personnel who would be involved in the CRADA. The respondent will develop the final research plan in collaboration with CDC but should provide an outline of a research plan for review by CDC in judging applications.

Applicants will be judged according to the following criteria:

1. Soundless of the analytic approach and research plan;

2. Evidence of appropriate personnel to complete the project in a timely fashion or evidence of a plan to recruit and fund personnel appropriate for the project;

3. Evidence of scientific credibility; and

4. Evidence of commitment and ability to develop and evaluate immunologic tests to the level of a product which will benefit the public interest.

This CRADA is proposed and implemented under the 1986 Federal Technology Transfer Act: Pub. L. 99-502.

The responses must be made to: Nancy C. Hirsch, Technology Transfer Coordinator, National Center for Infectious Diseases, Centers for Disease Control, 1600 Clifton Road, NE., Mailstop C19, Atlanta, GA 30333.

Dated: March 23, 1992.

Robert L. Foster,

Acting Director, Office of Program Support, Centers for Disease Control.

[FR Doc. 92-7195 Filed 3-27-92; 8:45 am]

BILLING CODE 4160-18-M

CDC Advisory Committee on the Prevention of HIV Infection: Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), the Centers for Disease Control (CDC) announces the following committee meeting.

Name: CDC Advisory Committee on the Prevention of HIV Infection.

Times and Dates: 8:15 a.m.-5 p.m., April 15, 1992, 8 a.m.-1 p.m., April 16, 1992.

Place: CDC, Executive Park Facility, 26 Executive Park Drive, Conference Rooms A-B, Atlanta, Georgia 30329.

Status: Open to the public, limited only by the space available.

Purpose: This committee is charged with advising the Director, CDC, regarding objectives, strategies, and priorities for HIV prevention efforts, including maintaining surveillance of AIDS and HIV infection, the epidemiologic and laboratory study of AIDS and HIV, information/education and risk reduction activities designed to prevent the spread of HIV infection, and other preventive measures that become available.

Matters to be Discussed: The committee will discuss actions taken by CDC on the recommendations made by the committee during the October 30-31, 1991, meeting and CDC's current HIV prevention activities and plans. In-depth discussions will lead to development of a preliminary list of recommendations regarding CDC methods and approaches.

Agenda items are subject to change as priorities dictate.

Contact Person for More Information: Connie Granoff, Committee Assistant, Office of the Deputy Director (HIV), CDC, 1600 Clifton Road, NE., Mailstop E-40, Atlanta, Georgia 30333, telephone (404) 639-2918 or FTS 236-2918.

Dated: March 24, 1992.

Elvin Hilyer,

Associate Director for Policy Coordination, Centers for Disease Control.

BILLING CODE 4160-18-M

Food and Drug Administration

[Docket No. 92G-0085]

Michael Foods, Inc.; Filing of Petition for Affirmation of GRAS Status

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that Michael Foods, Inc., has filed a petition (GRASP 2G0387), proposing to affirm that β-cyclodextrin is generally recognized as safe (GRAS) for use as a processing aid in reducing the cholesterol content of liquid eggs.

DATES: Written comments by May 29, 1992.

ADDRESSES: Submit written comments to the Dockets Management Branch (HFA-305), Food and Drug Administration, rm. 1-23, 12420 Parklawn Dr., Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Gerald J. Buonopane, Center for Food Safety and Applied Nutrition (HFF-334), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202-254-9519.

SUPPLEMENTARY INFORMATION: Under the Federal Food, Drug, and Cosmetic Act (secs. 201(s), 409 (21 U.S.C. 321(s), 348)) and the regulations for affirmation of GRAS status in § 170.35 (21 CFR 170.35), notice is given that Michael Foods, Inc., 324 Park National Bank Bldg., 5353 Wayzata Blvd., Minneapolis, MN 55416, has filed a petition (GRASP 2G0387), proposing that β-cyclodextrin be affirmed as GRAS for use as a processing aid in reducing the cholesterol content of liquid eggs. The petition has been placed on display at the Dockets Management Branch (address above).

Any petition that meets the requirements outlined in §§ 170.30 and 170.35 (21 CFR 170.30 and 170.35) is filed by the agency. There is no prefiling review of the adequacy of data to support a GRAS conclusion. Thus, the filing of a petition for GRAS affirmation should not be interpreted as a preliminary indication of suitability for GRAS affirmation.

The potential environmental impact of this action is being reviewed. If the agency finds that an environmental impact statement is not required and this petition results in a regulation, the notice of availability of the agency's finding of no significant impact and the evidence supporting that finding will be published with the regulation in the **Federal Register** in accordance with 21 CFR 25.40(c).

Interested persons may, on or before May 29, 1992, review the petition and/or file comments (two copies, identified with the docket number found in brackets in the heading of this document) with the Dockets Management Branch (address above). Comments should include any available information that would be helpful in determining whether the substance is, or is not, GRAS for the proposed use. A copy of the petition and received comments may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

Dated: March 20, 1992.

Fred R. Shank,

Director, Center for Food Safety and Applied Nutrition.

[FR Doc. 92-7203 Filed 3-27-92; 8:45 am]

BILLING CODE 4160-01-M

National Institutes of Health

Workshop to Develop Priorities for Future Research Into the Long-Term Health Effects of Exposure to Diethylstilbestrol (DES)

AGENCY: National Institutes of Health, HHS.

ACTION: Notice.

SUMMARY: Notice is hereby given that the National Cancer Institute (NIC), the National Institute of Environmental Health Sciences (NIEHS), the National Institute of Child Health and Human Development (NICHD), and the Office of Research on Women's Health (ORWH) in the Office of the Director, NIH, will sponsor a workshop to develop priorities for the future research into the long-term health effects of exposure to diethylstilbestrol (DES). All sessions will be open to the public, however, limited seating is available, and registration will be on a first-come, first-served basis. Individuals who are unable to attend but who wish to provide written statements should send three (3) copies of their statements to the address located below by April 1, 1992, no later than 5 p.m. EST. All written statements received by that date will be made available to workshop planners prior to the April meeting for consideration in preparing final recommendations.

DATES: The workshop will be held on April 22-24, 1992, at the Fairview Park Marriott in Falls Church, Virginia.

ADDRESSES: Registration forms can be obtained from Ms. Jennifer Connor, Division of Cancer Treatment, National Cancer Institute, Building 31, room 3A44, Bethesda, Maryland 20892.

FOR FURTHER INFORMATION CONTACT: Ms Jennifer Connor at the address given above; telephone (301) 496-6404 (this is not a toll-free number).

SUPPLEMENTARY INFORMATION: Diethylstilbestrol (DES), a synthetic nonsteroidal estrogen, was developed in the 1938 and was promoted in the late 1940s and 1950s for the prevention of miscarriages and pre-term births.

While estimates of DES exposure in the U.S. are rough at best, and the dosage range varied considerably, one estimate for the number of children exposed in utero comes from the National Prescription Audit. This audit started in 1958 and projects prescriptions for 41 marketers of DES. The number of prescriptions was estimated to be 1 million annually between 1948 and 1957, and about 500,000 annually between 1963 and 1971. Thus, between 1948 and 1971, an estimated 18 million prescriptions were given for DES. If 50 percent of these were for completed pregnancies, 9 billion out of about 72 million or 13 percent of completed pregnancies between 1948 and 1971 were DES exposed.

In 1971, in a classic case-control study by Herbst et al., an association was reported between prenatal exposure to DES and the subsequent development of clear cell adenocarcinoma of the vagina in young women. This finding was confirmed by Greenwald et al. (1971) soon thereafter. The use of DES in pregnancy was banned later last year.

Follow-up of daughters of women who took DES during pregnancy suggests that the risk of clear cell carcinoma of the vagina is low, one case per 1,000 women exposed in utero. While epithelial

changes in the cervix and vagina can be demonstrated by colposcopy in 65–90 percent of daughters, the rate of progression to dysplasia and carcinoma in situ remains unclear. One study reported a twofold increase of dysplasia and carcinoma in situ among DES daughters compared to a matched control group. No studies have yet shown an increase of incidence of invasive squamous carcinoma among DES daughters. Mothers who took DES during pregnancy have been found to have a small increased risk of breast cancer compared to unexposed women (a relative risk of 1.4 with 20 years of follow-up). No increased cancer risk has yet been demonstrated in men exposed in utero to DES.

Prenatal exposure to DES has also been associated with anomalies of the uterus, cervix and upper vagina, which have been reported in 25–40 percent of exposed daughters. No conclusive evidence suggests increased primary infertility in these women, however, rates of spontaneous abortion, ectopic pregnancy and premature labor are increased. A threefold increase in genital tract abnormalities has been reported among men with prenatal exposure to DES, including cryptrochidism and hypoplastic testes, with unconfirmed reports of decreased fertility among these men. Additionally, animal studies have raised questions about immunologic effects of prenatal DES exposure. Decreases in thymic weight and mitotic index have been found in mice exposed perinatally to DES. While this is reversible, defects in T helper and natural killer cell function persist. The implications of these findings, if any, in exposed humans is unknown.

As the cohort of exposed individuals ages, concerns have been raised about breast, ovarian, and prostate cancer, as well as reproductive and immunologic effects related to DES exposure. The purpose of the proposed conference is to review existing data concerning long-term health effects of exposure to DES and discuss the need for future research.

Dated: March 20, 1992.

Bernadine Healy,

Director, NIH.

BILLING CODE 4140–01–M

Public Health Service

Centers for Disease Control; Statement of Organization, Functions, and Delegations of Authority

Part H, Chapter HC (Centers for Disease Control) of the Statement of Organization, Functions, and Delegations of Authority of the Department of Health and Human Services (45 FR 67772–67776, dated October 14, 1980, and corrected at 45 FR 69296, October 20, 1980, as amended most recently at 57 FR 6329, dated February 24, 1992) is amended to reflect the following changes within the Public Health Practice Program Office: (1) Revision of the functional statement for the Division of Laboratory Systems; and (2) revision of the functional statement for the Office of the Director, Division of Laboratory Systems.

Section HC–B, Organization and Functions, is hereby amended as follows:

1. After the heading for the *Division of Laboratory Systems (HCH6),* delete the functional statement and substitute the following: (1) Encourages the establishment and adoption of performance standards for laboratory practice; (2) develops, evaluates, and implements systems for measurement and assessment of laboratory practices and the quality of laboratory testing; (3) develops, promotes, implements, and evaluates intervention strategies to correct general performance deficiencies in health laboratory systems and workers; (4) provides a forum for exchange of general information about laboratory practice and research and development activities to promote the coordination of Federal, State, and private laboratory improvement efforts; (5) facilitates and conducts research and demonstration (a) to support the scientific development of performance standards, evaluation systems, and regulatory standards, and (b) to assess the efficacy of established standards; (6) promotes, develops, and implements training needs assessment methodology to establish priorities for training interventions; (7) develops and conducts training to facilitate the timely transfer of newly emerging laboratory technology and standards for laboratory practice; (8) provides technical assistance, consultation, and training for trainers to improve the capacity and capability of regional organizations and State health agencies to develop and maintain decentralized training networks for laboratory professionals; (9) coordinates and conducts activities that provide technical and scientific support to the Health Care Financing Administration (HCFA) and the Food and Drug Administration (FDA) in the implementation of the Clinical Laboratory Improvement Amendments of 1988; (10) in carrying out the above functions, collaborates with other components of PHPPO and with other Centers, Institute, and Offices of CDC, and where another Center, Institute, or Office has the lead responsibility, provides support to and works in conjunction with the other Center, Institute, or Office.

2. After the heading *Division of Laboratory Systems (HCH6), Office of the Director (HCH61),* delete the functional statement and insert the following: (1) Provides leadership, policy development, scientific oversight, guidance, and coordination for Division activities; (2) plans, directs, manages, and evaluates the operations of the Division; (3) provides administrative, programmatic, planning, and information management support services for the Division; (4) provides for communication and dialogue with Federal, State, and private organizations whose missions are related to laboratory systems or practices; (5) insures that Division activities are coordinated with other components of CDC both within and outside the Center; with Federal, State, and local agencies; and with the voluntary and professional health agencies.

Dated: March 20, 1992.

William L. Roper,

Director, Centers for Disease Control.

DEPARTMENT OF THE INTERIOR

Office of the Secretary

Privacy Act of 1974—Revision and Update of Systems of Records Compilation

Pursuant to the provisions of the Privacy Act of 1974, as amended (5 U.S.C. 552a), notice is hereby given that the Department of the Interior is revising the appendix to the compilation of the Department's systems of records. All changes being published are editorial in nature, and reflect organization and address changes which have occurred since the previous publication of the material in the **Federal Register.**

The appendix to the compilation of the Department's systems of records notices contains the addresses of Department facilities which are referenced in various systems notices. Part VI of the appendix, which was previously published in the **Federal Register** on August 21, 1980 (45 FR 55831), is revised to include the addresses of the Minerals Management Service's facilities, and is published below.

Since these changes do not involve any new or intended use of the information in the Department's systems of records, the revisions shall be effective upon publication in the **Federal Register** (March 30, 1992). Additional information regarding these revisions may be obtained from the Departmental Privacy Act Officer, Office of the Secretary, U.S. Department of the Interior, 1849 "C" Street, NW., m.s. 2242, Washington, DC 20240.

Dated: March 25, 1992.

Janet L. Bishop,

Acting Director, Office of Management Improvement.

BILLING CODE 4310–MR–M

Privacy Act of 1974—Revision and Update of Systems of Records Notices and Compilation

Pursuant to the provisions of the Privacy Act of 1974, as amended (5 U.S.C. 552a), notice is hereby given that the Department of the Interior is revising four notices describing systems of records maintained by the Bureau of Mines, and part XII of the appendix of the compilation of the Department's systems of records notices containing the addresses of Bureau of Mines facilities referenced in various systems notices.

All changes being published are editorial in nature, and reflect address changes which have occurred since the previous publication of the material in the **Federal Register.**

The four notices being revised, which are published in their entirety below, are:

1. Property Control-Interior, Mines–4 (previously published on August 28, 1986; 51 FR 30714).

2. Personnel Identification-Interior, Mines–5 (previously published on August 28, 1986; 51 FR 30715).

3. Safety Management Information System-Interior, Mines–6 (previously published on March 7, 1986; 51 FR 8035).

4. Personnel Security Files-Interior, Mines–7 (previously published on December 3, 1986; 51 FR 43672).

In two notices (WBM–4 and WBM–5), the existing routine use statements are respectively revised to reflect the release of information to a congressional office from the record of an individual in response to an inquiry that the individual has made to the congressional office.

In two notices (WBM–6 and WBM–7), the existing retention and disposal statements are respectively revised to reflect the appropriate retention and disposal schedules.

Part XII of the appendix to the compilation of the Department's systems of records notices contains the addresses of the Bureau of Mines facilities which are referenced in various systems notices. Part XII, which was last published in the **Federal Register** on April 11, 1977 (42 FR 18968), is revised, updated, and published below.

Since these changes do not involve any new or intended use of the information in the Department's systems of records, the revisions shall be effective upon publication in the **Federal Register.** (March 30, 1992). Additional information regarding these revisions may be obtained from the Departmental Privacy Act Officer, Office of the Secretary, U.S. Department of the Interior, 1849 "C" Street, NW., m.s. 2242, Washington, DC 20240.

Dated: March 25, 1992.

Janet L. Bishop,

Acting Director, Office of Management Improvement.

INTERIOR/WBM–4

SYSTEM NAME:

Property Control—Interior, Mines—4.

SYSTEM LOCATION:

(1) Bureau of Mines, U.S. Department of the Interior, 810 7th Street, NW., Washington, DC 20241. (2) All field facilities of the Bureau of Mines.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Employees who have custody or responsibility for Bureau of Mines property.

CATEGORIES OF RECORDS IN THE SYSTEM:

Contains information indicating what property, including equipment, motor vehicle operator's license, keys, motor pool vehicles, transportation request books, and parking spaces, for which the employee has custody or responsibility. In addition, all other records directly related to the property control function, and records on debts owed the Federal government due to loss or misuse of property.

The system also includes information on employee inventions which is maintained by name of invention, name of employee, and case number.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Federal Property and Administrative Services Act of 1949, as amended, 40 U.S.C. 483(b)(1).

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The primary uses of the records are (a) identification, assignment, and control of Bureau property; (b) assistance in locating carpools.

Disclosures outside of the Department of the Interior may be made (1) to the U.S. Department of Justice or in a proceeding before a court or adjudicative body when (a) the United States, the Department of the Interior, a component of the Department, or, when represented by the government, an employee of the Department is a party to litigation or anticipated litigation or has an interest in such litigation, and (b) the Department of the Interior determines that the disclosure is relevant or necessary to the litigation and is compatible with the purpose for which the records were compiled; (2) of information indicating a violation or potential violation of a statute, regulation, rule, order or license, to appropriate Federal, State, local or foreign agencies responsible for investigating or prosecuting the violation or for enforcing or implementing the statute, rule regulations, order or license; (3) to other Federal agencies for the purpose of collecting debts owed to the Federal government by administrative or salary offset, and (4) to a congressional office from the record of an individual in response to an inquiry that the individual has made to the congressional office.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

Disclosures pursuant to 5 U.S.C. 552a(b)(12). Pursuant to 5 U.S.C. 552a(b)(12), disclosures may be made to

a consumer reporting agency as defined in the Fair Credit Reporting Act. (15 U.S.C. 1681a(f) or the Federal Claims Collection Act of 1966 (31 U.S.C. 3701(a)(3)).

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Maintained in manual form in file folders or card indexes, a limited quantity on computer tape.

RETRIEVABILITY:

Indexed by employee name or control number.

SAFEGUARDS:

Security will be provided to meet the requirements of 43 CFR 2.51 for manual records.

RETENTION AND DISPOSAL:

Property records are destroyed 3 years after files are closed. Disposition is in accordance with the Bureau Records Control Schedule, Appendix 10. Inventions files are destroyed 2 years after case is closed or patent awarded. Disposition is in accordance with the Bureau Records Control Schedule, Appendix 5.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Division of Property and General Services Bureau of Mines, 810 7th Street, NW., Washington, DC 20241.

NOTIFICATION PROCEDURE:

System Manager, or with respect to records maintained at field facilities, the administrative officer of the facility. A written and signed request stating that the requester seeks information concerning records pertaining to him/her is required. See 43 CFR 2.60.

RECORD ACCESS PROCEDURE:

A request for access may be addressed to the System Manager or, with respect to records maintained at field facilities, the administrative officer of the facility. The request must be in writing and signed by the requester. The request must meet the content requirements of 43 CFR 2.63.

CONTESTING RECORD PROCEDURES:

A petition for amendment shall be addressed to the System Manager and must meet the content requirements of 43 CFR 2.71.

RECORD SOURCE CATEGORIES:

Employees. Property control information required for accountability purposes.

INTERIOR/WMB-5

SYSTEM NAME:

Personnel Identification—Interior, Mines—5.

SYSTEM LOCATION:

(1) Bureau of Mines, U.S. Department of the Interior, 810 7th Street, NW., Washington, DC 20241. (2) All field facilities of the Bureau of Mines.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All employees of the Bureau of Mines and contractor employees requiring access to Bureau facilities.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records concerning identification and location of employees.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 U.S.C. 301, 3101; 43 U.S.C. 1457.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The primary uses of the records are (a) to provide identification cards to employees: (b) locator information provided for use by management to contact employees. Disclosures outside the Department of the Interior may be made (1) to the U.S. Department of Justice or in a proceeding before a court or adjudicative body when (a) the United States, the Department of the Interior, a component of the Department, or, when represented by the government, an employee of the Department is a party to litigation or anticipated litigation or has an interest in such litigation, and (b) the Department of the Interior determines that the disclosure is relevant or necessary to the litigation and is compatible with the purpose for which the records were compiled; (2) of information indicating a violation or potential violation of a statute, regulation, rule, order or license, to appropriate Federal, State, local or foreign agencies responsible for investigating or prosecuting the violation or for enforcing or implementing the statute, rule, regulation, order or license, and (3) to a congressional office from the record of an individual in response to an inquiry that the individual has made to the congressional office.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Card indexes, manually.

RETRIEVABILITY:

Indexed by employee name and identification card number.

SAFEGUARDS:

Security will be provided to meet requirements of 43 CFR 2.51 for manual records.

RETENTION AND DISPOSAL:

Destroyed 3 months after return of identification credential. Disposition is in accordance with the Bureau Records Control Schedule, Appendix 10.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Division of Property and General Services, Bureau of Mines, 810 7th Street, NW., Washington, DC 20241.

NOTIFICATION PROCEDURE:

System Manager, or with respect to records maintained at field facilities, the administrative officer of the facility. A written and signed request stating that the requester seeks information concerning records pertaining to him/her is required. See 43 CFR 2.60.

RECORD ACCESS PROCEDURES:

A request for access may be addressed to the System Manager or, with respect to records maintained at field facilities, the administrative officer of the facility. The request must meet the content requirements of 43 CFR 2.63.

CONTESTING RECORD PROCEDURES:

A petition for amendment shall be addressed to the System Manager and must meet the content requirements of 43 CFR 2.71.

RECORD SOURCE CATEGORIES:

Employees. Information necessary to prepare the identification card and locator index.

INTERIOR/WBM-5

SYSTEM NAME:

Safety Management Information System—Interior, Mines-6.

SYSTEM LOCATION:

(1) Bureau of Mines, U.S. Department of the Interior, 810 7th Street, NW., Washington, DC 20241. (2) All field and headquarters organizations of the Bureau of Mines retain copies of source documents.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Employees, contractors, concessioners and public visitors to Bureau facilities who have been involved in an accident resulting in personal injury, illness, and/or property damage, or exposed to a health hazard.

CATEGORIES OF RECORDS IN THE SYSTEM:

Contains the name, social security number (employees only), occupation, date and location of accident; data elements about the accident for analytical purposes; and descriptive narrative concerning the reason for the loss producing event.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

(1) 5 U.S.C. 7901, (2) 28 U.S.C. 2671–2680, (3) 31 U.S.C. 3701, 3721, (4) Executive Order 12196, (5) 29 CFR Part 1960.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

The primary uses of the automated and manual records are to (a) provide summary data of injury, illness, and property loss information to Bureau management in a number of formats for analytical purposes in establishing programs to reduce or eliminate loss producing problem areas, (b) provide listings of individual cases to Bureau management to ensure that accidents occuring are reported through the Bureau Safety Management Information System for forwarding to the Department of the Interior Safety Management Information System, and (c) adjudicate tort and employee claims. Disclosures outside the Bureau of Mines may be made: (1) To a Federal, State, or local government agency that has partial or complete jurisdiction over the claim or related claims; (2) to provide the Department of Labor through the Department of the Interior quarterly summary listings of fatalities and disabling injuries and illnesses in compliance with 29 CFR 1960.66–.74; (3) to the U.S. Department of Justice or in a proceeding before a court or adjudicative body when (a) the United States, the Department of the Interior, a component of the Department, or when represented by the government, an employee of the Department is a party to litigation or anticipated litigation or has an interest in such litigation, and (b) the Department of the Interior determines that the disclosure is relevant to the litigation and is compatible with the purpose for which the records were compiled; (4) of information indicating a violation or potential violation of statute, regulation, rule, order, or license, to appropriate Federal, State, local, or foreign agencies responsible for investigating or prosecuting the violation or for enforcing or implementing the statute, rule, regulation, order, or license; and (5) to a congressional office from the record of an individual in response to an inquiry the individual has made to the congressional office.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

(1) Automated records are maintained on flexible disks. (2) Source documents (manual records) are maintained at Bureau field and headquarters organizations from which the accident is reported. (3) Manual records are maintained in book format and/or file folders.

RETRIEVABILITY:

(1) Automated records are retrievable by name or document control number. (2) Manual records are retrievable by name or document control number.

SAFEGUARDS:

(1) Automated records are maintained with safeguards meeting the FIPS PUB 41, "Computer Security Guidelines for Implementing the Privacy Act of 1974." (2) Security is provided to meet the requirements of 43 CFR 2.51 for manual records.

RETENTION AND DISPOSAL:

(1) The retention and disposal determination for the automated records stored on flexible disks is found in WBM Records Schedule, Appendix (H) and (C)(2), and (D)(2). (2) Disposal determination for the manual records is found in GRS1, Item 31.

SYSTEM MANAGER(S) AND ADDRESS:

Chief, Branch of Safety and Security Management Staff, Bureau of Mines, 810 7th Street, NW., Washington, DC 20241.

NOTIFICATION PROCEDURE:

To determine whether automated and/or manual records are maintained on you in this system, write to the System Manager or field or headquarters organizations in which the source document pertaining to yourself would be filed. A written and signed request stating that the requestor seeks information concerning records pertaining to him/her is required. See 43 CFR 2.60.

RECORDS ACCESS PROCEDURES:

A request for access should be addressed to the System Manager or the field or headquarters organization in which the source document for the individual would be filed. Describe as specifically as possible the records sought. If copies are desired indicate the maximum you are willing to pay. See 43 CFR 2.63.

CONTESTING RECORD PROCEDURES:

To request correction or the removal of material from your file(s), write the System Manager. See 43 CFR 2.71.

RECORD SOURCE CATEGORIES:

Supervisor of employees involved in accidents. Investigative reports by supervisors, safety and health professionals, other management officials, or any combination thereof.

INTERIOR/WBM-7

SYSTEM NAME:

Personnel Security Files—Interior. Mines—7.

SYSTEM LOCATION:

Bureau of Mines, Department of the Interior, 810 7th Street, NW., Washington, DC 20241.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Bureau of Mines employees and contractors, and former employees and contractors whose duties have been designated Special-Sensitive, Critical-Sensitive and Noncritical-Sensitive for national security purposes and/or whose duties have been designated ADP Special-Sensitive, ADP Critical Sensitive, ADP Noncritical-Sensitive or ADP Non-Sensitive. Employees traveling to foreign countries. Employees new to Federal employment whose duties have been designated Non-Sensitive. Executive Reservists whose duties have been designated one of the above three sensitive categories.

CATEGORIES OF RECORDS IN THE SYSTEM:

Manual records contain copies of records for processing personnel security investigations. The following are representatives of system documentation but other manual records pertinent to employee position and level of clearance may be a part of the file. Manual records include copies of SF–85 or SF–86 and/or SF–171 supplied by the individual concerned as well as copies of letters of transmittal, etc., between the Bureau of Mines, the Office of Personnel Management, the FBI, etc., concerning the individual's security investigation. Further, contains a copy of certification of clearance status, SF–189, and a Termination of Clearance Statement signed by the individual as appropriate. For those designated Non-Sensitive, the file contains a record of an NACI or NACIC investigation, adjudication, and determination of suitability if appropriate. For employees traveling outside the country, forms DI–1911 and DI–1175 and a foreign travel briefing/debriefing statement are

maintained. Automated records contain files regarding employee names, social security numbers, organizations, investigation and classification status and action dates, employee position description requiring clearance; suspense files of all periodic/regular requirements, such as employee investigations, reinvestigations, briefings, debriefings, foreign travel, and records disposal. The above are representative of system documentation but other automated records pertinent to employee position and level of clearance may be part of the automated file.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Executive Order 10450, as amended, Executive Order 11179, as amended, and Federal Personnel Management 732, as amended.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM INCLUDING CATEGORIES OF USERS AND THE PURPOSE OF SUCH USES:

The primary use of the automated and manual records is to identify individuals who have national security clearance and/or ADP access authorizations and their level of clearance. Disclosure outside the Department of the Interior may be made (1) to a Federal agency which has requested information relevant or necessary to its hiring or retention of an employee, or issuance of a security clearance, license, contract, grant or other benefit; (2) to Federal, State or local agencies where necessary to obtain information relevant to the hiring or retention of an employee, or the issuance of a security clearance, contract, license, grant or other benefit; (3) to the U.S. Department of Justice or in a proceeding before a court or adjudicative body when (a) the United States, the Department of the Interior, a component of the Department, or, when represented by the Government, an employee of the Department if a party to litigation or anticipated litigation or has an interest in such litigation, and (b) the Department of the Interior determines that the disclosure is relevant or necessary to the litigation and is compatible with the purpose for which the records were compiled; (4) of information indicating a violation or potential violation of a statute, regulation, rule, order or license, to appropriate Federal, State, local or foreign agencies responsible for investigating or prosecuting the violations or for enforcing or implementing the statute, rule, regulation, order or license; (5) to a congressional office from the record of an individual in response to an inquiry the individual has made to the congressional office; (6) to the Office of Personnel Management for matters concerned with oversight activities necessary for the Office to carry out its legally authorized Governmentwide personnel management programs and functions.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

(1) Automated records are maintained on flexible disks. (2) Source documents (manual records) are maintained in manual form in file folders.

RETRIEVABILITY:

(1) Automated records are retrievable by name and/or social security number. (2) Manual records are retrievable by name.

SAFEGUARDS:

(1) Automated records are maintained with safeguards meeting the FIPS PUB 41, "Computer Security Guidelines for Implementing the Privacy Act of 1974."

(2) Manual records are maintained in the same manner as defense classified material.

(3) Both automated and manual records are maintained in a safe having a three-position dial-type, manipulation proof, combination lock.

RETENTION AND DISPOSAL:

(1) The retention and disposal determination for the automated records stored on flexible disks is found in WBM Records Schedule, Appendix 1 (18)m. Automated records will be destroyed by erasure. (2) Manual records are held in active status until the individual is debriefed or terminated. Manual records are destroyed by fire, shredder, disintegrator or pulverizer not later than 5 years after separation or transfer of the individual or upon notification of death. The records disposal schedules applicable to these records are: Bureau of Mines Schedule, 435 WBM 2.1, Appendix 1(18) (f) and (h), and GRS 18, item 7.

SYSTEM MANAGER(S) AND ADDRESS:

Bureau Security Manager, Bureau of Mines, 810 7th Street, NW., Washington, DC 20241.

NOTIFICATION PROCEDURE:

To determine whether automated and/or manual records are maintained on you in this system, write to the System Manager. See 43 CFR 2.60.

RECORD ACCESS PROCEDURE:

A request for access should be addressed to the System Manager. A written and signed request stating that the requester seeks information concerning records pertaining to him/her is required. Describe as specifically as possible the record sought. If copies are desired, indicate the maximum you are willing to pay. See 43 CFR 2.63.

CONTESTING RECORD PROCEDURES:

To request correction or the removal of material from your files, write the System Manager. See 43 CFR 2.71.

RECORD SOURCE CATEGORIES:

Individual on whom the record is maintained as well as data furnished by other Federal agencies on the person concerned.

BILLING CODE 4310-33-M

National Park Service

Shiloh National Military Park, TN; Boundary Revision

Public Law 53-12, (28 Stat. 597), dated December 27, 1894, established Shiloh National Military Park. Executive Order No. 6166, dated June 10, 1933, ordered transfer of jurisdiction to the Secretary of the Interior, to be effective August 10, 1933. Section 7(c)(ii) of the Land and Water Conservation Fund Act, as amended by the Act of June 10, 1977 (Pub. L. 95-42, 91 Stat. 210) and the Act of March 10, 1980 (Pub. L. 96-203, 94 Stat. 81) authorized the Secretary when necessary for preservation, protection, interpretation or management of a National Park System unit, to acquire land adjacent to park areas by donation, purchase with donated funds, transfer from another Federal agency or exchange.

Notice is given that the boundary of Shiloh National Military Park has been revised pursuant to the above-referenced Acts, to encompass lands as are depicted on the map entitled "Boundary Map—Shiloh National Military Park," dated August 1991 prepared by the Land Resources Division, Southeast Regional Office, National Park Service. The revision is to depict those lands donated to the United States of America, Department of the Interior for inclusion in the Shiloh National Military Park.

This map is on file and available for inspection in the Land Resources Division, Southeast Regional Office, National Park Service, 75 Spring Street, SW., Atlanta, Georgia 30303, and in the office of the National Park Service, Department of the Interior, Washington, DC 20013-7127.

Dated: September 17, 1991.

C.W. Ogle,

Acting Regional Director, Southeast Region, National Park Service.

Editorial note: This document was received at the Office of the Federal Register on March 25, 1992.

BILLING CODE 4310-70-M

Yosemite National Park; Concession Contract Solicitation; Notice To Seek Prospective Concessioners, Phase One—Qualifying Process

SUMMARY: Yosemite National Park is seeking applicants to operate the park's principal hotel, food and merchandise concession. This is a fully competitive solicitation. This is Phase One of two phases. Phase One will be used to create a "short list" of applicants for Phase Two. Applicants must qualify under Phase One to be eligible to compete in Phase Two. Phase Two is expected to be announced in June 1992. This notice is in accordance with 36 CFR 51.4 and the Concession Policy Act, PL 89-249.

SUPPLEMENTARY INFORMATION: The current concession contract involves more than $80 million of annual sales in several operating locations in Yosemite National Park, California. The principle business is hotel services but includes extensive restaurant, grocery, gift, and recreation activities operated on a year around basis. The selected new concessioner will take over when the current contract expires in September 1993. The selection of the new concessioner will be done in a two phase process. The first phase is the subject of this announcement. This phase requires an application by letter that responds to questions posed in the Statement of Requirements—Phase One, which is available by writing or calling: National Park Service, Concession Program Management Division, Attention: Phase One, 600 Harrison Street, suite 600, San Francisco, CA 94107-1372, (415) 744-3981.

Applications will be accepted for SIXTY (60) days under the terms described in the Statement of Requirements—Phase One. The sixty (60) day application period will begin with the release for the Statement of Requirements—Phase One, which will occur shortly after the publication of this notice. Successful applicants under Phase One will be asked to make an extensive application under the Phase Two process which is expected to begin in June 1992. Final contracts are expected to be signed in early 1993 at the end of the selection process.

Dated: March 17, 1992.

Stanley T. Albright,

Regional Director, Western Region.

BILLING CODE 4310-70-M

INTERSTATE COMMERCE COMMISSION

[No. MC-C-30194]

Association of Texas Warehousemen, et al.; Petition for Declaratory Order; Certain For-Hire Motor Carrier Transportation Within Texas

AGENCY: Interstate Commerce Commission.

ACTION: Institution of declaratory order proceeding.

SUMMARY: In response to a joint request by an association representing 40 Texas warehouses and 7 individual Texas warehouses, the Commission has instituted this declaratory order proceeding under 5 U.S.C. 554(e) to determine whether certain for-hire motor transportation movements of merchandise from Texas warehouses to points in Texas are in interstate commerce subject to this Commission's regulation rather than in interstate commerce subject to regulation by the Railroad Commission of Texas (RCT). An opportunity to participate in the proceeding is provided interested persons and their comments are invited.

DATES: Comments (original and 10 copies) must be filed by April 14, 1992 and concurrently served on petitioners' representative, the RCT, the Texas Department of Commerce, and the United States Departments of Justice and Transportation. Each comment must contain the basis for the party's position either in support or opposition to petitioners' position. No replies are permitted.

ADDRESSES: Send an original and 10 copies of all documents to:

Office of the Secretary, Case Control Branch, Attn: No. MC–C–30194, Interstate Commerce Commission, Washington, DC 20423.

In addition, concurrently send one copy to each of the following:

Petitioners' representative:

Kenneth R. Hoffman, 401 West 15th Street, suite 800, Austin, TX 78701–1665, (512) 476–5434; (512) 476–5431 (FAX).

Railroad Commission of Texas, Transportation/Gas Utilities Division, P.O. Drawer 12967, Capitol Station, Austin, TX 78711.

Executive Director, Texas Department of Commerce, P.O. Drawer 12728, Austin, TX 78711.

Paul M. Geier, Assistant General Counsel for Litigation, U.S. Department of Transportation, Room 4102, 400 7th Street, SW., Washington, DC 20590, (202) 366–4731.

Roger W. Fones, Transportation, Energy, and Agriculture Section, U.S. Department of Justice, 555 4th Street, NW., Washington, DC 20001, (202) 307–6351.

Robert Nicholson, Appellate Section, U.S. Department of Justice, Room 3224, Main Building, 11th Street & Constitution Avenue, NW., Washington, DC 20530, (202) 514–2389.

FOR FURTHER INFORMATION CONTACT:

Tom Dahl, (202) 927–5289 or Richard Felder, (202) 927–5610, [TDD for hearing impaired (202) 927–5721].

SUPPLEMENTARY INFORMATION: The Association of Texas Warehousemen (ATW), representing 40 member Texas warehouse companies, and 7 individual Texas warehouse companies [1] (collectively, petitioners) jointly requested the Commission to issue a declaratory order finding that certain for-hire motor transportation from their warehouses to other points in Texas is in interstate commerce. Each shipment reached the warehouse from outside the State of Texas by for-hire transportation. Various Commission proceedings previously have addressed this issue, but correspondence between ATW and RCT indicate that RCT is prepared to prosecute petitioners if they use carriers for the movements within Texas that do not hold authority from RCT.

The correspondence shows that RCT's auditing staff believes that the transportation will lose its interstate identity at the warehouses unless the shipment, is marked as destined for delivery to another Texas location. RCT believes that movements from the warehouses to points within Texas would be in intrastate commerce subject to RCT regulation. RCT has indicated that the shippers, carriers, and warehousemen could be liable for fines if they use carriers that are not certified by RCT under the circumstances set forth by petitioners.

Prior case law is not in accord with RCT's views. *See, e.g., Armstrong Inc.—Transportation Within Texas*, 2 I.C.C. 2d 63 (1986), *aff'd sub nom. Texas* v. *United States*, 866 F.2d 1546 (5th Cir. 1989); and No. MC–C–30146, *The May Department Stores Company and Volume Shoe Corporation—Petition for Declaratory Order—Transportation within Single State of Merchandise Imported by Water* (not printed), served June 15, 1990. In view of RCT's intentions to take enforcement action against petitioners and others, the Commission has determined that the petition discloses a controversy sufficient to warrant the institution of a proceeding under 5 U.S.C. 554(e). Because of the need for expeditious treatment and the apparent well-settled nature of the issue, only 15 days from publication of this notice will be allowed for comments to be filed, and no replies will be accepted.

Additional information is contained in the Commission's decision. To obtain a copy of the full decision, write to, call, or pick up in person from: Office of the Secretary, room 2215, Interstate Commerce Commission, Washington, DC 20423. Telephone: (202) 927–6331.

[Assistance for the hearing impaired is available through TDD services: (202) 927–5721.]

Decided: March 26, 1992.

By the Commission, Joseph H. Dettmar, Acting Director, Office of Proceedings.

Sidney L. Strickland, Jr.,

Secretary.

[1] Texas Cartage Warehouse, Inc.; Dallas Warehouse Company; Dry Storage Company of Texas; Fite Distribution Services Company; Stillwell Distribution, Inc., d/b/a Houston Distribution; Shippers Warehouse, Inc.; and Trammel Crow Distribution Corp.

[Docket No. AB–55 (Sub-No. 411X)]

CSX Transportation, Inc.—Abandonment Exemption—Floyd County, KY

AGENCY: Interstate Commerce Commission.

ACTION: Notice of Exemption.

SUMMARY: the Commission exempts from the prior approval requirements of 49 U.S.C. 10903, *et seq.*, the abandonment by CSX Transportation, Inc., of 2 miles of its Long Fork Subdivision between Valuation Station 0.00 at Salisbury and Valuation Station 103+88 at Spurlock in Floyd County, KY, subject to standard labor protective conditions.

DATES: Provided no formal expression of intent to file an offer of financial assistance has been received, this exemption will be effective on April 29, 1992. Formal expressions of intent to file an offer [1] of financial assistance under 49 CFR 1152.27(c)(2) must be filed by April 9, 1992, petitions to stay must be filed by April 14, 1992, and petitions for reconsideration must be filed by April 24, 1992. Requests for a public use condition must be field by April 9, 1992.

ADDRESSES: Sending pleadings referring to Docket No. AB–55 (Sub–No. 411X) to:

BILLING CODE 7035–01–M

DEPARTMENT OF LABOR

Office of the Secretary

Agency Recordkeeping/Reporting Requirements Under Review by the Office of Management and Budget (OMB)

Background

The Department of Labor, in carrying out its responsibilities under the Paperwork Reduction Act (44 U.S.C. chapter 35), considers comments on the reporting/recordkeeping requirements that will affect the public.

List of Recordkeeping/Reporting Requirements Under Review

As necessary, the Department of Labor will publish a list of the Agency recordkeeping/reporting requirements under review by the Office of Management and Budget (OMB) since the last list was published. The list will have all entries grouped into new collections, revisions, extensions, or reinstatements. The Departmental Clearance Officer will, upon request, be able to advise members of the public of the nature of the particular submission they are interested in.

Each entry may contain the following information:

The Agency of the Department issuing this recordkeeping/reporting requirement.
The title of the recordkeeping/reporting requirement.
The OMB and/or Agency identification numbers, if applicable.
How often the recordkeeping/reporting requirement is needed.
Whether small businesses or organizations are affected.
An estimate of the total number of hours needed to comply with the recordkeeping/reporting requirements and the average hours per respondent.
The number of forms in the request for approval, if applicable.
An abstract describing the need for and uses of the information collection.

Comments and Questions

Copies of the recordkeeping/reporting requirements may be obtained by calling the Departmental Clearance Officer, Kenneth A. Mills (202) 523–5095). Comments and questions about the items on this list should be directed to Mr. Mills, Office of Information Resources Management Policy, U.S. Department of Labor, 200 Constitution Avenue, NW., room N–1301, Washington, DC 20210. Comments should also be sent to the Office of Information and Regulatory Affairs, Attn: OMB Desk Officer for (BLS/DM/ESA/ETA/OLMS/MSHA/OSHA/PWBA/VETS), Office of Management and Budget, room 3001, Washington, DC 20503 (202) 395–6880.

Any member of the public who wants to comment on recordkeeping/reporting requirements which have been submitted to OMB should advise Mr. Mills of this intent at the earliest possible date.

New

Employment and Training Administration

Reporting of Emergency Unemployment Compensation (EUC) Program
Weekly; Monthly; Quarterly
State or local governments
53 respondents
1,787 total hours
30 minutes per response
Allows for reporting under the Emergency Unemployment Compensation program to determine workload, allocations for administration and evaluation of program operation.

Revision

Bureau of Labor Statistics

Current Population Survey CATI/CAPI Overlap Sample

Form No.	Affected public	No. of respondents	Freq.	Ave. time per response
Revised	Households	2,150	4	0.1667 hours.

CPS with Debriefing
14,334 total hours

The Current Population Survey (CPS) is a household sample survey that is the primary source of data on the growth of the labor force and on trends in employment and unemployment. The overlap sample will benchmark differences in labor force estimates between the current system and the proposed system.

Reinstatement

Mine Safety and Health Administration

Program to Prevent Smoking in Hazardous Areas
1219–0041
On occasion
Businesses and other for profit; Small businesses or organizations
200 respondents; 30 minutes per response
100 total burden hours

Requires coal mine operators to develop programs to prevent persons from carrying smoking materials, matches, or lighter underground and to prevent smoking in hazardous areas, such as, in or around oil houses, explosives, etc. Mine operators are further required to submit the programs to MSHA for approval.

Escapeways and Escape Facilities
1219–0052
Weekly
Businesses or other for profit; small businesses or organizations
1,979 respondents
1 hour per response
148,029 total burden hours

Requires operators of underground coal mines to keep records of the results of mandatory weekly examinations of emergency escapeways. The records are used to determine that the integrity of the escapeways is being maintained.

Ventilation System and Methane and Dust Control Plan
1219–0084
On occasion
Semi-annually
Businesses or other for profit; small businesses or organizations.

	No. of respondents	Time per response	Total burden hours
Active mines	1,979	3 hours	11,874
New mines	200	8 hours	1,600
Total burden			13,474

Requires operators of underground coal mines to submit a detailed

ventilation system and methane and dust control plan and revisions thereof to MSHA for approval. The information is used to insure that a system is developed and used that will effectively ventilate the mine.

Examinations and Tests of Electrical Equipment

BILLING CODE 4510–43–M

Glass Ceiling Commission; Establishment

In accordance with the provisions of the Federal Advisory Committee Act and the Civil Rights Act of 1991, the Secretary of Labor has established the Glass Ceiling Commission.

The Glass Ceiling Commission (Commission), shall:

A. focus greater attention to the importance of eliminating artificial barriers to the advancement of women and minorities to management and decisionmaking positions in business, and promote work force diversity;

B. study the manner in which business fills management and decisionmaking positions, the developmental and skill-enhancing practices used to foster the necessary qualifications for advancement into such positions, and the compensation programs and reward structures currently utilized in the workplace; and

C. facilitate, establish procedures, and make recommendations for the Frances Perkins-Elizabeth Hanford Dole National Award for Diversity and Excellence in American Executive Management.

In carrying out this change, the Commission will be responsible for the following functions:

A. Advancement Study—The Commission shall conduct a study of opportunities for, and artificial barriers to, the advancement of women and minorities to management and decisionmaking positions in business. In conducting the study, the Commission shall—

1. examine the preparedness of women and minorities to advance to management and decisionmaking positions in business;

2. examine the opportunities for women and minorities to advance to management and decisionmaking positions in business;

3. conduct basic research into the practice, policies, and manner in which management and decisionmaking positions in business are filled;

4. conduct comparative research of businesses and industries in which women and minorities are promoted to management and decisionmaking positions, and businesses and industries in which women and minorities are not promoted to management and decisionmaking positions;

5. compile a synthesis of available research on programs and practices that have successfully led to the advancement of women and minorities to management and decisionmaking positions, in business, including training programs, reward programs, employee benefit structures, and family leave policies; and

6. examine any other issues and information relating to the advancement of women and minorities to management and decisionmaking positions in business.

B. Report—No later than 15 months after the date of the enactment of this Act (February 22, 1993), the Commission shall prepare and submit to the President and the appropriate committees of Congress a written report containing—

1. the findings and conclusions of the Commission resulting from the study conducted under subsection (a); and

2. recommendations based on the findings and conclusions described in paragraph 1 relating to the promotion of opportunities for, and elimination of artificial barriers to, the advancement of women and minorities to management and decisionmaking positions in business, including recommendations for—

(a) Policies and practices to fill vacancies at the management and decisionmaking levels;

(b) developmental practices and procedures to ensure that women and minorities have access to opportunities to gain the exposure, skills, and expertise necessary to assume management and decisionmaking positions;

(c) compensation programs and reward structures utilized to reward and retain key employees; and

(d) the use of enforcement (including such enforcement techniques and litigation, complaint investigations, compliance reviews, conciliation, administrative regulations, policy guidance, technical assistance, training, and public education) of Federal equal employment opportunity laws by Federal agencies as a means of eliminating artificial barriers to the advancement of women and minorities in employment.

C. Additional Study—The Commission may conduct such additional study of the advancement of women and minorities to management and decisionmaking positions in business as a majority of the members of the Commission determines to be necessary.

D. National Award—The Commission shall make recommendations to the President or his designated representative of businesses to receive the National Award for Diversity and Excellence in American Executive Management.

The Commission will require up to four years to carry out its assignment and will prepare a written report of its findings to the President and the relevant committees of Congress.

The Commission will function in accordance with the provisions of the Federal Advisory Committee Act. Its charter will be filed under the Act.

Interested persons are invited to submit comments regarding the establishment of the Commission. Such comments should be addressed to John A. Schall, Chief of Staff, Office of the Secretary, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210.

Signed at Washington, DC this 25th day of March, 1992.

Lynn Martin,

Secretary of Labor.

NATIONAL COMMISSION ON SEVERELY DISTRESSED PUBLIC HOUSING

Meeting Announcement

AGENCY: National Commission on Severely Distressed Public Housing.

ACTION: Notice of meeting.

SUMMARY: In according with the Federal Advisory Committee Act, Public Law 92–463, as amended, the National Commission on Severely Distressed Public Housing announces a forthcoming meeting of the Commission.

DATES: Thursday, April 2, 1992, Full Commission Meeting, 9 a.m.–5 p.m.

ADDRESSES: Capitol Hilton, 16th & K Streets, NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Carmelita Pratt, Administrative Officer, The National Commission on Severely Distressed Public Housing, 1100 L Street, NW., #7121, Washington, DC 20005 (202) 275–6933.

Type of Meeting: Open.

Carmelita R. Pratt,

Administrative Officer.

NATIONAL SCIENCE FOUNDATION

Special Emphasis Panel in Chemical and Thermal Systems; Meeting

In accordance with the Federal Advisory Committee Act (Pub. L. 92–463, as amended), the National Science Foundation (NSF) announces the following meeting:

Name: Special Emphasis Panel in Chemical and Thermal Systems.

Date and Time: April 10, 1992; 8:30 a.m. to 5 p.m.

Place: NSF, rm. 1133, 1800 G St., NW., Washington, DC.

Agenda: Review and evaluate nominations for the NSF Young Investigator and Research Initiations Awards Programs.

Contact Person: Drs. Maria K. Burka & Farley Fisher, Program Directors (202) 357–9606.

Purpose of Meeting: To provide advice and recommendations to the Division of Chemical and Thermal Systems concerning proposals submitted to the Division for financial support.

Typ of Meeting: Closed.

Reason for Closing: The nominations and proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the nominations and proposals. These matters are exempt under 5 U.S.C. 552b (c) (4) and (6) of the Government in the Sunshine Act.

Dated: March 24, 1992.

M. Rebecca Winkler,

Committee Management Officer.

BILLING CODE 7555-01-M

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Reactor Safeguards

Joint Meeting of the Subcommittees on Individual Plant Examinations/ Severe Accidents

The ACRS Subcommittees on Individual Plant Examinations and Severe Accidents will hold a joint meeting on April 21, 1992, in room P-110, 7920 Norfolk Avenue, Bethesda, MD.

The entire meeting will be open to public attendance.

The agenda for the subject meeting shall be as follows:

Tuesday, April 21, 1992—8:30 a.m. until the conclusion of business

The Subcommitttees will discuss the status of the Individual Plant Examination (IPE) program and the development of Severe Accident Management Guidelines.

Oral statements may be presented by member of the public with the concurrence of the Subcommittee Chairmen; written statements will be accepted and made available to the Committee. Recordings will be permitted only during those sessions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittees, their consultants, and staff. Persons desiring to make oral statements should notify the ACRS staff member named below as far in advance as is practicable so that approriate arrangements can be made.

During the meeting, the Subcommittees, along with any of their consultants who may be present, may exchange preliminary views regarding matters to be considered during the balance of the meeting.

The Subcommittees will then hear presentations by and hold discussions with representatives of the NRC staff, the nuclear industry, their respective consultants, and other interested persons regarding this review.

Further information regarding topics to be discussed, the scheduling of sessions open to the public, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted thereof can be obtained by a prepaid telephone call to the Designated Federal Official, Mr. Dean Houston (telephone 301/492-9521) between 7:30 a.m. and 4:15 p.m. (EST). Persons planning to attend this meeting are urged to contact the above named individual one or two days before the scheduled meeting to be advised of any changes in schedule, etc., that may have occurred.

Dated: March 23, 1992.

Sam Duraiswamy,

Nuclear Reactor Branch.

BILLING CODE 7590-01-M

[Docket No. 50-312]

Sacramento Municipal Utility District; Issuance of Amendment To Facility Operating License and Final Determination of No Significant Hazards Consideration

The U.S. Nuclear Regulatory Commission (NRC or the Commission) is reissuing a notice which was published on March 24, 1992 (57 FR 10193) to include the license amendment which was inadvertently omitted.

The U.S. Nuclear Regulatory Commission (NRC or the Commission) has issued Amendment No. 117 to Facility Operating License No. DPR-54 to Sacramento Municipal Utility District (SMUD or the licensee). The amendment removes the licensee's authority to operate the Rancho Seco Nuclear Generating Station (the facility), located in Sacramento County, California, and modifies the license from a full-power operating license to a possession only license. The amendment is published herewith. This license amendment will become effective ten (10) working days after the date of publication in the **Federal Register** of the Notice of Issuance of this amendment. If during this period a motion for a stay is filed with the U.S. Court of Appeals, the date when this amendment becomes effective will automatically be extended an additional ten (10) working days to provide the court with time to review the matter.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in title 10 of the Code of Federal Regulations (10 CFR) chapter I, which are set forth in the license amendment.

Notice of Consideration of Issuance of Amendment and Proposed No Significant Hazards Consideration Determination and Opportunity for Hearing in connection with this action was published in the **Federal Register** on October 10, 1990, (55 FR 41280). On November 8, 1990, the Environmental and Resources Conservation Organization (ECO or the petitioner) filed a petition to intervene and a request for a hearing concerning SMUD's application for a possession only license. SMUD and NRC staff opposed this petition. Pursuant to the Commission's Order of January 30, 1991, the Atomic Safety and Licensing Board (Board) was appointed to rule on the petition. The Board afforded ECO an opportunity to reply to the SMUD and staff opposition filings; ECO did so in its March 4 and April 15, 1991, filings entitled "Further Amendment to Environmental and Resource Conservation Organization Request for Hearing and Petition to Intervene." In a Memorandum and Order dated May 1, 1991, the Board concluded that ECO might be able to demonstrate standing and directed ECO to file contentions by June 3, 1991. ECO filed its contentions on June 3 and 10, 1991. A prehearing conference about these contentions was held before the Board on June 25, 1991, in Bethesda, Maryland. In a Memorandum and Order dated July 1, 1991, LBP-91-30, the Board denied ECO's petition because the petitioner had failed to satisfy the Commission's regulations for contentions and had not established standing under the National Environmental Policy Act (NEPA) or the Atomic Energy Act (AEA). On July 16, 1991, ECO filed an appeal before the Commission. In a Memorandum and Order dated February 6, 1992, CLI-92-02, the Commission upheld the Board's July 1, 1991, ruling that ECO has failed to demonstrate that it has standing to challenge this possession only license amendment.

Further, the Commission has applied the standards of 10 CFR 50.92 and has made a final determination that the amendment involves no significant hazards consideration and that the facility can continue to be maintained by the licensee without endangering the health and safety of the public. The basis for this determination is contained in the safety evaluation related to this action.

Additionally, the Commission has determined that this amendment satisfies the criteria for categorical exclusion in accordance with 10 CFR 51.22. Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared for this amendment.

For further details with respect to the action see (1) the application for amendment dated April 26, 1990, (2) Amendment No. 117 to Facility Operating License No. DPR-54, (3) the Commission's related safety evaluation, and (4) Commission Memorandum and Order, CLI-92-02, dated February 6, 1992. All of these items are available for public inspection at the Commission's Public Document Room, 2120 L Street, NW., Washington, DC, and the Martin Luther King Regional Library, 7340 24th Street Bypass, Sacramento, California 95822. A copy of items (2), (3), and (4) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Acting Associate Director, for Advanced Reactors.

Dated at Rockville, Maryland this 17th day of March 1992.

For the Nuclear Regulatory Commission.

Richard F. Dudley, Jr.,

Acting Director, Non-Power reactors, Decommissioning and Environmental Project Directorate Division of Advanced Reactors and Special Projects, Office of Nuclear Reactor Regulation.

Rancho Seco Nuclear Generating Station; Amendment to Facility Operating License

[Amendment No. 117; License No. DPR-54]

1. The U.S. Nuclear Regulatory Commission (the Commission) has found that:

A. The application for amendment filed by Sacramento Municipal Utility District (the licensee), dated April 26, 1990, complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations as set forth in 10 CFR chapter I;

B. The facility will be maintained in conformity with the application, the provisions of the Act, and the rules and regulations of the Commission;

C. There is reasonable assurance (i) that the activities authorized by this amendment can be conducted without endangering the health and safety of the public, and (ii) that such activities will be conducted in compliance with the Commission's regulations;

D. The issuance of this amendment will not be inimical to the common defense and security or to the health and safety of the public; and

E. The issuance of this amendment is in accordance with 10 CFR part 51 of the Commission's regulations, and all applicable requirements have been satisfied.

2. Accordingly, Facility Operating License No. DPR-54 is hereby amended by revising the indicated paragraphs as follows:

Paragraph 2.B. should be revised as follows:

B. Subject to the conditions and requirements incorporated herein, the Commission hereby licenses the Sacramento Municipal Utility District

(1) Pursuant to section 104b of the Act and 10 CFR part 50, "Domestic Licensing of Production and Utilization Facilities," to possess but not operate the facility at the designated location in Sacramento County, California, in accordance with the procedures and limitations set forth in this license;

(2) Pursuant to the Act and 10 CFR parts 30, 40 and 70, to receive, possess, and use at any time any byproduct, source, and special nuclear material as sealed neutron sources, sealed sources for reactor instrumentation and radiation monitoring equipment, calibration, and as fission detectors in amounts as previously required for reactor operation; and to possess but not to use special nucelar material previously received as reactor fuel;

(3) Pursuant to the Act and 10 CFR part 30, to receive, possess, and use at any time 100 millicuries each of any byproduct material, with restriction to chemical or physical form, for sample analysis or instrument calibration;

(4) Pursuant to the Act and 10 CFR parts 40 and 70, to receive, possess, and use at any time 100 milligrams each of any source or special nuclear material, without restriction to chemical or physical form, for sample analysis or instrument calibration;

(5) Pursuant to the Act and 10 CFR parts 30 and 70, to possess, but not separate, such byproduct and special nuclear materials as were produced by the previous operation of the facility.

Revise paragraphs 2.C.(1) and 2.C.(2) as follows:

(1) Maximum Power

The licensee is not authorized to operate the reactor.

(2) Techical Specifications

The Technical Specifications contained in Appendices A and B, as revised through Amendment No. 117, are hereby incorporated in the license. The licensee shall maintain the facility in accordance with the Technical Specifications.

Delete paragraphs 2.C(8), 2.C.(9), and 2.C(11) in their entirety.

Add new paragraph 2.C.(13) to read as follows:

(13) Confirmatory Order

The movement of nuclear fuel into the Reactor Building is prohibited without prior NRC approval.

3. This license amendment will become effective ten (10) working days after the date of publication in the **Federal Register** of the Notice of Issuance of this amendment. If during this period a motion for a stay is filed with the U.S. Court of Appeals, the date when this amendment becomes effective will automatically be extended an additional ten (10) working days to provide the court with time to review the matter.

Date of Issuance: March 17, 1992.

For the Nuclear Commission.

Dennis M. Crutchfield,

Acting Associate Director for Advanced Reactors, Office of Nuclear Reactor Regulation.

[FR Doc. 92-7222 Filed 3-27-92; 8:45 am]

BILLING CODE 7590-01-M

NUCLEAR WASTE TECHNICAL REVIEW BOARD

EBS Panel Meeting

Pursuant to the Nuclear Waste Technical Review Board's (the Board) authority under section 5051 of the Nuclear Waste Policy Amendments Act of 1987 (Pub. Law 100-203), the Board's Panel on the Engineered Barrier System (EBS Panel) will hold a meeting May 11, 1992, at the Tower Inn, 1515 George Washington Way, Richland, Washington 99352; (509) 946-4121.

The primary purpose of this meeting is to give the panel members insight into the status of and plans for defense high-level waste located at the Department of Energy's (DOE) Hanford Site. The panel has invited representatives of the DOE and its contractors to brief members on defense high-level waste management operations at Hanford, including plans for high-level waste vitrification. Other topics of interest to panel members may also be discussed at the meeting.

The meeting, which will begin in the morning, is anticipated to last the entire day. Exact times will be published in a forthcoming press release. The public is welcome to attend the meeting. Transcripts of the meeting will be available on a library-loan basis from Ms. Davonya Barnes beginning July 13, 1992.

In 1987, Congress established the Board to evaluate the technical and scientific validity of activities undertaken by the U.S. Department of Energy (DOE) under the Nuclear Waste Policy Act of 1982, as amended. Such activities include characterization of Yucca Mountain, Nevada, to determine its suitability as a potential site for the nation's first permanent repository for spent nuclear fuel and defense high-level waste. Some of this high-level waste will come from the Hanford Site.

For further information, contact Paula N. Alford, Director, External Affairs, 1100 Wilson Boulevard, suite 910, Arlington, Virginia 22209; (703) 235-4473.

Dated: March 24, 1992.

William D. Barnard,

Executive Director, Nuclear Waste Technical Review Board.

[FR Doc. 92-7200 Filed 3-27-92; 8:45 am]

BILLING CODE 8820-AM-M

EBS Panel Meeting

Pursuant to the Nuclear Waste Technical Review Board's (the Board) authority under section 5051 of the Nuclear Waste Policy Amendments Act of 1987 (Public Law 100-203), the Board's Panel on the Engineered Barrier System (EBS Panel) will hold a meeting May 13, 1992, at the Shilo Inn, 780 Lindsay Boulevard, Idaho Falls, Idaho 83402; (208) 523-0088.

The primary purpose of the meeting is to give the panel insight into the status of and plans for defense high-level waste located at the Department of Energy's (DOE) Idaho National Engineering Laboratory (INEL). The panel has invited representatives of the DOE and its contractors to brief members on defense high-level waste operations at the INEL, including plans for high-level waste immobilization. Other topics of interest to EBS Panel members may also be discussed at the meeting.

The meeting, which is anticipated to begin at 1 p.m., will last the entire afternoon. The public is welcome to attend. Exact times will be published in a forthcoming press release. Transcripts of the meeting will be available on a library-loan basis from Ms. Davonya Barnes beginning July 15, 1992.

In 1987, Congress established the Board to evaluate the technical and scientific validity of activities undertaken by the U.S. Department of Energy (DOE) under the Nuclear Waste Policy Act of 1982, as amended. Such activities include characterization of Yucca Mountain, Nevada, to determine its suitability as a potential site for the nation's first permanent repository for spent nuclear fuel and defense high-level waste. Some of this high-level waste will probably come from the INEL.

For further information, contact Paula N. Alford, Director, External Affairs, 1100 Wilson Boulevard, suite 910, Arlington, Virginia 22209; (703) 235-4473.

Dated: March 24, 1992.

William D. Barnard,

Executive Director, Nuclear Waste Technical Review Board.

BILLING CODE 8820-AM-M

OFFICE OF PERSONNEL MANAGEMENT

Director's Advisory Committee on Law Enforcement and Protective Occupations

AGENCY: Office of Personnel Management.

ACTION: Notice of open meetings.

SUMMARY: According to the provisions of section 10 of the Federal Advisory Committee Act (Pub. L. 92-463), notice is hereby given that the fifth and sixth meetings of the Director's Advisory Committee on Law Enforcement and Protective Occupations will be held at the times and places shown below:

DATES:

April 13, 1992, 2 p.m., Capital Hilton (South American Room), 1008 16th Street, NW., Washington, DC

April 30, 1992, 2 p.m., Sheraton Washington (Delaware Room), 2660 Woodley Road at Connecticut Avenue, NW., Washington, DC

AGENDA: The focus of the April 13th meeting will be to discuss basic pay for law enforcement work. The focus of the April 30th meeting will be to discuss overtime and other premium pay for law enforcement work.

FOR FURTHER INFORMATION CONTACT: Phyllis G. Foley, Director, Law Enforcement and Protective Occupations Task Force, Office of Compensation Policy, Personnel Systems and Oversight Group, Office of Personnel Management, room 7H30, 1900 E Street, NW., Washington, DC 20415.

SUPPLEMENTARY INFORMATION: The meetings are open to the public. If time permits, an opportunity will be provided for members of the public in attendance at the meetings to provide their views. Persons wishing to address the Advisory Committee orally at the meetings should submit a written request no later than the close of business on April 6, 1992, for the April 13th meeting and the close of business on April 23, 1992, for the meeting on April 30, 1992. The request must include the name and address of the person wishing to appear, the capacity in which the appearance will be made, a short summary of the intended presentation, and the amount of time desired.

Office of Personnel Management.

Constance Berry Newman,

Director.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-30508; File No. SR-NASD-90-53 as Amended]

Self-Regulatory Organizations; National Association of Securities Dealers, Inc.; Order Approving Amended Proposed Rule Change Relating to Retention of Jurisdiction and Conforming Changes to the Rules of Fair Practice

March 23, 1992.

On October 16, 1990, the National Association of Securities Dealers, Inc. ("NASD") submitted a proposed rule change [1] pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") [2] and Rule 19b-4 [3] thereunder and Amendments Nos. 1, 2, 3, 4, 5 and 6 on November 12, 1990, November 1, 1991, December 6, 1991, December 10, 1991, January 22, 1992 and February 28, 1992, respectively, to amend Article III, section 5 and Article IV, sections 3 and 4 of the NASD By-Laws, and Article IV, section 5 of the NASD Rules of Fair Practice [4] to retain jurisdiction over member firms and associated persons for two years from the date of resignation, cancellation or revocation of membership or the termination or revocation of an associated person's registration.[4] The NASD has requested that the rule go into effect on April 15, 1992, allowing time for the NASD to inform members of the rule's approval in the April Notice to Members.[5]

Notice of the original filing was given in Securities Exchange Act Release No. 28657 (November 29, 1990), 55 FR 50432 (December 6, 1990) ("original proposal"). The Commission received no comment letters on the proposed rule change. In response to comments from the Commission, the NASD amended the proposed rule change. Notice of the amended proposal was given by the issuance of the Commission release (Securities Exchange Act Release No. 30266, January 17, 1992) and by publication in the Federal Register (57 FR 3235, January 28, 1992.) [6] The Commission received no comment letters on the proposed rule change as amended.

[1] The NASD, in response to comments from the Commission, amended the proposed rule change that was published for comment in the Federal Register, 55 FR 50432 (December 6, 1990). See letter to Frank J. Wilson, Executive Vice President and General Counsel, NASD, from Kathryn V. Natale, Assistant Director, SEC, dated September 12, 1991.

[2] 15 U.S.C. 78s(b)(1) (1988).

[3] 17 CFR 240.19b-4 (1991).

[4] In response to a request for partial approval, the SEC approved the proposed amendments to Article V, sections 1 and 3 of the Rules of Fair Practice originally filed with the SEC in SR-NASD-90-53. See Securities Exchange Act Release No. 29983 (November 1, 1991), 56 FR 57088 (November 7, 1991).

[5] See Amendment No. 6.

[6] On December 6, 1991, the NASD filed Amendment No. 3 which set forth the member vote for the amended proposed rule change. On December 10, 1991, the NASD filed Amendment No. 4 which makes technical changes to Amendment No. 2. On January 22, 1992, the NASD filed Amendment No. 5 which indicated that any person currently subject to a hold under the NASD's existing practice will have the termination of his registration take effect on the effective date of the proposed rule change. The NASD will then have two years from that date to file a complaint pursuant to the provisions of the proposed rule change. On February 28, 1992, the NASD filed Amendment No. 6 which indicated that the NASD intends to make the proposed rule change effective on April 15, 1992. These amendments, as well as all other amendments, are available for inspection and copying in the Public Reference Room.

[7] Under the current provisions of the By-Laws, the NASD has one year from the effective date of the filing of a resignation of membership or a termination of registration to file a complaint for any actionable misconduct that occurred prior to the resignation by the member or termination by the associated person. If the NASD is not aware of misconduct by an associated person at the time a termination takes effect, the time period for filing a complaint could run before action is taken. It is for this reason that the NASD currently holds resignations and terminations retroactively.

[8] See Securities Exchange Act Release No. 30266 (January 17, 1992), 57 FR 3235 (January 28, 1992).

[9] The amended proposal also allows the NASD to require persons no longer associated with a member but subject to the Corporation's jurisdiction to report, either informally or on the record, orally or in writing with regard to any matter involved in any investigation or hearing to investigate the books, records and accounts of any person with relation to any matter involved in any investigation or hearing. No member or person shall fail to make any report as required in this section, or fail to permit any inspection of books, records and accounts as may be validly called for under section 5. In addition, the proposal provides that any notice requiring an oral or written report or calling for an inspection of books, records and accounts pursuant to section 5 shall be deemed to have been received by the member or person to whom it is directed by the mailing thereof to the last known address of the member or person as reflected on the Corporation's records.

[10] If a person's Form U-5 is amended on the last day of the two year period, the NASD will retain jurisdiction for a total of four years after the effective date of the person's termination.

[11] NASD By-Laws, Article IV, section 2(a)(3)(c) states that "(e)very application for registration filed with the Corporation shall be kept current at all times by supplementary amendments to the original application." In addition, the U-4 specifically states "(a)n applicant is under a continuing obligation to update information required by Form U-4 as changes occur."

I. Background

The NASD submitted the original proposal (SR-NASD-90-53) to amend the NASD By-Laws and Rules of Fair Practice to, among other things, codify procedures currently employed by the NASD in processing terminations of associated persons and cancellations and revocations of member firms. A significant aspect of the proposed procedures to be codified by the NASD was the practice of placing a hold on the effectiveness of the resignation of the membership of a member firm or the termination of the registration of an associated person if the NASD was aware at the time, or was investigating potential violations of its rules or the federal securities laws by the firm or person. The NASD also proposed to codify its practice of retroactively placing a hold on the resignations of membership or terminations of registration when it becomes aware of matters after the termination has been allowed to take effect which would have resulted in a hold at the time the documents were filed.[7]

The rule filing also proposed amending the By-Laws to provide that the NASD would continue to retain jurisdiction over a member firm whose membership was cancelled or revoked and an associated person whose registration was revoked, until the NASD resolved its inquiry. The proposed rule change was intended to address the situation under the current provisions where the NASD retains jurisdiction over a member who has resigned or an associated person who has terminated his registration, but loses jurisdiction over a member whose membership was cancelled or revoked and an associated person whose registration was revoked.

II. Discussion

The NASD subsequently amended the proposed rule change to substitute a fixed two-year jurisdictional period for the proposal to codify the practice of holding the effectiveness of resignations and terminations ("amended proposal").[8] In order to maintain the fairness and effectiveness of the NASD's disciplinary system, the NASD's current one-year time period for retaining jurisdiction to file a complaint was extended to a fixed two-year period from the effective date of resignation or termination or from the date of the NASD's revocation or cancellation of a member or associated person. The amended proposal will eliminate the need for the NASD to hold the effectiveness of resignations and terminations and to issue letter notices in connection therewith. Such a fixed two-year time limit will be less intrusive than the current indefinite and potentially unlimited hold process, and should allow sufficient time to bring virtually all disciplinary actions.

With respect to associated persons, the NASD is also proposing that a person whose association with a member has been terminated, who is no longer associated with any member of the Corporation, or who has had his registration revoked, remains subject to the filing of a compliant, if while subject to the Corporation's jurisdiction, such person fails to provide information requested by the Corporation pursuant to Article IV, section 5 of the NASD's Rules of Fair Practice.[9] In addition, the NASD is also proposing that the two-year period commence from the date of the filing of the last amendment to a person's Form U-5 that is filed within the two-year period. This will address the situation of a routine Form U-5 being filed at the time of termination followed by a subsequent amendment disclosing potential violations which would require an investigation. Running the two-year period from the time the last Form U-5 amendment is filed, so long as it is filed within the initial two-year period, will prevent a person from avoiding potential disciplinary action through his own active concealment or the dilatory conduct of others.[10] Moreover, because members are required to send any amended form U-5 to the terminated person, he or she will have notice of the time from which the two-year period will run. The NASD also noted that the two-year limit would be consistent with current rules which permit a person to become associated with another member without the need to requalify by examination up to two years from his date of termination.

The Commission believes that the proposed rule change as amended will help the NASD achieve its regulatory duties in a fair and efficient manner and will provide a clear workable standard. By extending the jurisdictional period to a fixed two-year period, the NASD is giving unambiguous notice to its members of the requirements of the rule. In addition, by allowing the NASD to require persons no longer associated with a member but still subject to NASD jurisdiction to provide information validly called for under Article IV, section 5 the NASD will be better able to protect investors and the public interest and discipline members and associated persons for violations of the securities laws. Also, because persons are under a continuing obligation to update information on the U-4 as changes occur and while subject to the NASD's jurisdiction, it is fair and reasonable to deem a notice received by the person or member if delivered to the last known address.[11]

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the

rules and regulations thereunder applicable to the NASD and, in particular, the requirements of section 15A and the rules and regulations thereunder. Specifically, the Commission believes that the proposed rule change is consistent with sections 15A(b) (6), (7) and (8) of the Act. In pertinent part, these Sections of the Act mandate that the rules of a national securities association be designed to protect investors and the public interest, provide for the disciplining of members and associated persons for violations of the securities laws, the rules and regulations thereunder, or the Association's rules, and provide a fair procedure for conducting disciplinary proceedings.[12]

It is Therefore Ordered, Pursuant to section 19(b)(2) of the Act, that the above-mentioned proposed rule change be, and hereby is, approved and will take effect on April 15, 1992.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority, 17 CFR 200.30-3(a)(12).

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010-01-M

Issuer Delisting; Application To Withdraw From Listing and Registration; (Magma Copper Company, Subordinated Reset Debentures Due 2001) File No. 1-10122

March 24, 1992.

Magma Copper Company ("Company") has filed an application with the Securities and Exchange Commission ("Commission"), pursuant to section 12(d) of the Securities Exchange Act of 1934 ("Act") and rule 12d2-2(d) promulgated thereunder, to withdraw the above specified securities from listing and registration on the American Stock Exchange, Inc. ("Amex").

The reasons alleged in the application for withdrawing this security from listing and registration include the following:

In making the decision to withdraw the Debentures from listing on the Amex, the Company considered the direct and indirect costs and expenses of maintaining the listing of the Debentures on the Amex or of listing the Debentures on another exchange, the number record holders of the Debentures, the availability of market makers for the Debentures and the fact that the Company's other debt securities (its 12% Senior Subordinated Notes due December 15, 2001, and its 11½% Senior Subordinated Notes due December 15, 2002) are not so listed. Based upon these factors, the Company does not believe that the listing of the Debentures on an exchange offers any particular advantage to the holders of the Debentures.

Any interested person may, on or before April 14, 1992, submit by letter to the Secretary of the Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549, facts bearing upon whether the application has been made in accordance with the rules of the exchanges and what terms, if any, should be imposed by the Commission for the protection of investors. The Commission, based on the information submitted to it, will issue an order granting the application after the date mentioned above, unless the Commission determines to order a hearing on the matter.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

[FR Doc. 92-7175 Filed 3-27-92; 8:45 am]

BILLING CODE 8010-01-M

Issuer Delisting; Application To Withdraw From Listing and Registration; (OMI Corp., Common Stock, $.50 Par Value) File No. 1-10164

March 24, 1992.

OMI Corp. ("Company") has filed an application with the Securities and Exchange Commission ("Commission"), pursuant to section 12(d) of the Securities Exchange Act of 1934 ("Act") and rule 12d2-2(d) promulgated thereunder, to withdraw the above specified security from listing and registration on the American Stock Exchange, Inc. ("Amex").

The reasons alleged in the application for withdrawing this security from listing and registration include the following:

In addition to being listed on the Amex, the Company's common stock is listed on the New York Stock Exchange, Inc. ("NYSE"). The Company's stock commenced trading on the NYSE at the opening of business on March 13, 1992 and concurrently therewith such stock was suspended from trading on the Amex.

In making the decision to withdraw its common stock from listing on the Amex, the Company considered the direct and indirect costs and expenses attendant on maintaining the dual listing of its common stock on the NYSE and on the Amex. The Company does not see any particular advantage in the dual trading of its stock and believes that dual listing would fragment the market for its common stock.

Any interested person may, on or before April 14, 1992 submit by letter to the Secretary of the Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549, facts bearing upon whether the application has been made in accordance with the rules of the exchanges and what terms, if any, should be imposed by the Commission for the protection of investors. The Commission, based on the information submitted to it, will issue an order granting the application after the date mentioned above, unless the Commission determines to order a hearing on the matter.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010-01-M

[Rel. No. IC-18625; 811-6068]

Salomon Brothers Institutional Series Funds Inc; Application

March 23, 1992.

AGENCY: Securities and Exchange Commission ("SEC" or "Commission").

ACTION: Notice of application for deregistration under the Investment Company Act of 1940 (the "Act").

APPLICANT: Salomon Brothers Institutional Series Funds Inc.

RELEVANT ACT SECTIONS: Section 8(f).

SUMMARY OF APPLICATION: Applicant seeks an order declaring that it has ceased to be an investment company.

FILING DATE: The application was filed on January 29, 1992.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the SEC orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving applicant with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on April 17, 1992, and should be accompanied by proof of service on applicant in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by writing to the SEC's Secretary.

ADDRESSES: Secretary, SEC, 450 5th Street, NW., Washington, DC 20549. Applicant, Seven World Trade Center, New York, New York 10048.

FOR FURTHER INFORMATION CONTACT: James M. Curtis, Staff Attorney, at (202) 504-2406, or Nancy M. Rappa, Branch Chief, at (202) 272-3030 (Office of Investment Company Regulation, Division of Investment Management).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee at the SEC's Public Reference Branch.

Applicant's Representations

1. Applicant is an open-end diversified management investment company that is organized as a corporation under the laws of Maryland. On April 18, 1990, applicant registered under the Act and filed a registration statement pursuant to section 8(b) of the Act. Applicant also filed a registration statement under the Securities Act of 1933 to register an indefinite number of shares of applicant's common stock. Applicant's registration statement was declared effective on October 2, 1990, but applicant made no initial public offering.

2. On September 26, 1990, applicant sold 100,000 of its shares to Salomon Brothers Asset Management Inc ("Asset Management") for an aggregate price of $100,000.

3. On January 24, 1992, Asset Management, applicant's sole shareholder, redeemed its entire holding in applicant for $99,037.86.

4. Applicant retains no securityholders, assets, or liabilities. Applicant is not a party to any litigation or administrative proceeding. Applicant is not now engaged in, nor does it intend to engage in, any business activities other than those necessary for the winding up of its affairs.

5. Applicant filed Articles of Dissolution with the Maryland State Department of Assessments and Taxation on February 25, 1992, and such Articles of Dissolution became effective on March 13, 1992.[1]

Margaret H. McFarland,

Deputy Secretary.

[FR Doc. 92-7177 Filed 3-27-92; 8:45 am]

BILLING CODE 8010-01-M

[Release No. IC-18619; 812-7758]

SunAmerica Capital Appreciation Fund, Inc., et al.; Application

March 20, 1992.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of application for order amending prior Order under the Investment Company Act of 1940 ("1940 Act").

APPLICANTS: SunAmerica Capital Appreciation Fund, Inc. (formerly Integrated Capital Appreciation Fund, Inc.) (the "Fund"), SunAmerica Cash Fund, SunAmerica Equity Portfolios, SunAmerica Income Portfolios, SunAmerica Money Market Securities, Inc. SunAmerica Multi-Asset Portfolios, Inc., SunAmerica Tax Free Portfolios, Home Investors Government Income Fund, Inc., SunAmerica Fund Group, Wellington Management Company, SunAmerica Asset Management Corp. ("SAAMCo"), and SunAmerica Capital Services, Inc. ("SACS").

RELEVANT 1940 ACT SECTIONS: Exemption requested under section 6(c) of the 1940 Act from sections 2(a)(32), 2(a)(35), 22(c) and 22(d) of the 1940 Act and Rule 22c-1 thereunder.

SUMMARY OF APPLICATION: Applicants seek an order amending an existing exemptive order dated June 14, 1985 (Investment Company Act Release No. 14577) (the "Existing Order") that permits the imposition and waiver of a contingent deferred sales charge on certain redemptions of the Fund's shares. The requested amended order would permit the investment company Applicants (the "Applicant Funds") and registered investment companies that may be established in the future for which SAAMCo serves as investment adviser, SACS serves as distributor, and which are sold on terms that are essentially identical to those of the Fund (collectively, the "SunAmerica Funds") to impose (and waive in certain cases) a contingent deferred sales charge that would be identical to the CDSC for the Fund.

FILING DATES: The application was filed on July 22, 1991, and an amended and restated application was filed on January 21, 1992.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the SEC orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving Applicants with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on April 15, 1992, and should be accompanied by proof of service on the Applicants, in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by writing to the SEC's Secretary.

ADDRESSES: Secretary, SEC, 450 5th Street, NW., Washington, DC 20549. Applicants, 733 Third Avenue, 3rd Floor, New York, New York 10017.

FOR FURTHER INFORMATION CONTACT: H.R. Hallock, Jr., Special Counsel, at (202) 272-3030 (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee at the SEC's Public Reference Branch.

Applicant's Representations

1. Each of the Applicant Funds is a registered open-end management investment company. SAAMCo, formerly named Integrated Resources Asset Management Corp, and presently a wholly owned subsidiary of Broad Inc., serves as investment adviser to each of the Applicant Funds. SACs, also a wholly owned subsidiary of Broad Inc., acts as distributor of each of the Applicant Funds' shares. Wellington Management Company serves as sub-adviser to certain of the Applicant Funds.

2. The Existing Order exempts the Fund, but not the other SunAmerica Funds, from the provisions of sections 2(a)(32), 2(a)(35), 22(c) and 22(d) of the 1940 Act and Rule 22c-1 thereunder to the extent necessary to permit the assessment (and waiver in certain cases) of a contingent deferred sales charge ("CDSC") on certain redemptions of its shares. SunAmerica Fund Group (formerly Equitec Siebel Fund Group) and Home Investors Government Income Fund, Inc., are also each individually subject to exemptive orders allowing the imposition of a CDSC.

---

[12] Specifically, section 15A(b)(6) provides, among other things, that "(t)he rules of the association are designed * * *, in general, to protect investors and the public interest * * *." Section 15A(b)(7) provides, among other things, that "(t)he rules of the association provide that * * * its members and persons associated with its members shall be appropriately disciplined for violation of any provisions of this title, the rules or regulations thereunder * * * or the rules of the association * * *" Section 15A(b)(8) provides, among other things, that "(t)he rules of the association * * *, in general, provide a fair procedure for the disciplining of members and persons associated with members * * *."

[1] Per a telephone conversation with applicant's counsel on Friday, March 20, 1992.

3. Applicants propose to amend the Existing Order to permit each of the SunAmerica Funds to establish a CDSC arrangement that would be identical to the CDSC arrangement currently used by the Fund as permitted by the Existing Order. SunAmerica Fund Group and Home Investor Government Income Fund, Inc. will, if an order is granted on the application, rely solely upon such order. Accordingly, the amended order would ensure that the CDSC is applied consistently to all of the SunAmerica Funds.

4. The terms of the CDSC arrangement as it currently exists for the Fund are as follows. The CDSC is imposed if any investor redeems an amount which causes the current value of the investor's shares of the Fund to fall below the total dollar amount of purchase payments made by the investor during the preceding five years. No contingent deferred sales charge is imposed to the extent that the net asset value of the shares redeemed does not exceed (i) the purchase payments made more than five years prior to the redemption, plus (ii) the dollar value of dividends or distributions reinvested in Fund shares, plus (iii) increases in the net asset value of the investor's shares above the total amount of payments for the purchase of the Fund's shares made during the preceding five years. At no time will such charges exceed five percent of the aggregate purchase payments made by the investor.

5. When determining the applicability of the CDSC to each redemption, shares are redeemed first whose value equals the amount of any increase in the net asset value of the investor's shares above the amount of the total payments for the purchase of shares within the last five years. In the event the redemption amount exceeds such increase in value, the next portion of the amount redeemed is the amount which represents the net asset value of the investor's shares purchased more than five years prior to the redemption and the amount purchased through reinvestment of dividends or distributions. Any portion of the amount redeemed that exceeds an amount which represents such increase in value and the value of shares purchased more than five years prior to the redemption and the amount purchased through reinvestment of dividends or distributions is subject to the CDSC.

6. Where the CDSC is imposed, the amount of the charge depends on the number of years from the time of payment for the purchase of Fund shares until the time of redemption of such shares. During the first year after purchase, the charge is five percent of the amount redeemed that is subject to the CDSC. That amount decreases by one percent per year until five years thereafter, at which time no charge is imposed upon redemption. The amount of the CDSC (if any) is calculated by determining the date on which the purchase payment that is the source of the shares to be redeemed was made and applying the appropriate percentage to the amount of the redemption subject to the CDSC.

7. The CDSC would be waived with respect to the following redemptions of the SunAmerica Funds' shares: (i) Redemption following the death or disability (as defined in section 72(m)(7) of the Internal Revenue Code) of a shareholder, (ii) redemptions in connection with certain distributions under a tax-deferred retirement plan, IRA, Keogh, custodial account pursuant to section 403(b) of the Code or redemptions resulting from the tax free return of an excess contribution to an IRA, and (iii) redemptions of shares purchased for personal investment purposes by officers, directors and employees of SAAMCo, its agents and its affiliates, and employees and registered representatives of SACS and any of the selected dealers engaged in the sale of shares of the SunAmerica Funds.

Applicants' Legal Analysis

1. Applicants request an order amending the Existing Order to exempt them from sections 2(a)(32), 2(a)(35), 22(c), and 22(d) of the 1940 Act and Rule 22c-1 thereunder and permit the imposition (and waiver in certain cases) of a CDSC. Applicants assert that such an exemption, as required by the standards for an exemption under section 6(c) of the 1940 Act, is in the public interest, consistent with the protection of investors, and consistent with the purposes fairly intended by the policy and provisions of the 1940 Act.

2. Applicants submit that the imposition of the CDSC is fair and is in the best interests of the shareholders. The proposed CDSC permits shareholders to have the advantage of greater investment dollars working for them from the time of their purchase of the shares. Moreover, the CDSC applies only to redemptions of amounts representing purchase payments. It does not apply to increases in the value of an investor's account through increases in the net asset value per share, or to amounts representing reinvestment of distributions or dividends. Where amounts attributable to purchase payments are redeemed (and thus no longer contribute to the annual distribution charge), Applicants submit that it is fair to impose on the withdrawing shareholder a lump-sum payment reflecting approximately the amount of distribution expense which has not been recovered through payments of distribution fees by any of the SunAmerica Funds exempted pursuant to any order granted on the application. Thus, the amount, computation and timing of the CDSC are designed to promote fair treatment of all shareholders. Applicants further submit that waiver of the CDSC in the circumstances described above will not harm the SunAmerica Funds or their remaining shareholders or unfairly discriminate among shareholders or purchasers.

3. The CDSC will apply only with respect to shares of the SunAmerica Funds, other than the Fund, that are acquired after the grant of the exemptive relief requested in the application and after the inclusion of the terms of the CDSC, as described in the application, in the then current prospectuses of the SunAmerica Funds. Each of the waiver provisions will also be disclosed fully in the prospectuses for the SunAmerica Funds.

Applicants' Condition

Applicants agree that the following condition may be imposed in any order of the SEC granting the requested relief:

The SunAmerica Funds will comply with the provisions of Rule 6c-10 under the 1940 Act as currently proposed and as it may be reproposed, adopted or amended.

For the Commission, by the Division of Investment Management, under delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 4710-01-M

TENNESSEE VALLEY AUTHORITY

Acid Rain Program Designated Representative

AGENCY: Tennessee Valley Authority.

ACTION: Notice.

SUMMARY: TVA is announcing the selection of a "designated representative" and "alternate designated representative" to serve as the agency's point of contact with the U.S. Environmental Protection Agency and States on acid rain program matters.

FOR FURTHER INFORMATION CONTACT: Jerry L. Golden, Manager, Clean Air Program, 2C Missionary Ridge Place, 1101 Market Street, Chattanooga, Tennessee 37402-2801; (615) 751-6779.

SUPPLEMENTARY INFORMATION: Under title IV of the Clean Air Act Amendments, section 402, Public Law 101-549, 104 Stat. 2588, affected utility units are authorized to act through a "designated representative" (DR) and "alternate designated representative" (ADR) in the conduct of SO_2 allowance and acid rain permitting activities. On February 19, 1992, at a public meeting, the TVA Board of Directors selected TVA's Senior Vice President, Fossil and Hydro Power, J. W. Dickey, to the TVA's DR for its affected utility units, and TVA's Vice President, Fossil and Hydro Projects, W. M. Bivens, to be TVA's ADR who will act when the DR is unavailable. TVA's affected utility units are those at its Allen, Bull Run, Cumberland, Gallatin, John Sevier, Johnsonville, Kingston, and Watts Bar fossil plants in Tennessee; Colbert and Widows Creek fossil plants in Alabama; and Paradise and Shawnee fossil plants in Kentucky.

Dated: March 6, 1992.

Edward S. Christenbury,

General Counsel and Secretary.

BILLING CODE 8120-03-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Intent to Rule on Application To Impose a Passenger Facility Charge (PFC) at Sarasota-Bradenton Airport, Sarasota, FL

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of intent to rule on application.

SUMMARY: The FAA proposes to rule and invites public comment on the application to impose a PFC at Sarasota-Bradenton Airport under the provisions of the Aviation Safety and Capacity Expansion Act of 1990 (title IX of the Omnibus Budget Reconciliation Act of 1990) (Pub. L. 101-508) and part 158 of the Federal Aviation Regulations (14 CFR part 158).

DATES: Comments must be received on or before April 29, 1992.

ADDRESSES: Comments on this application may be mailed or delivered in triplicate to the FAA at the following address: 9677 Tradeport Drive, suite 130, Orlando, Florida 32827-5397.

In addition, one copy of any comments submitted to the FAA must be mailed or delivered to Mr. Richard M. Vacar, Executive Director of the Sarasota Manatee Airport Authority at the following address: P O. Box 13399, Sarasota, Florida 34278.

Air carriers and foreign air carriers may submit copies of written comments previously provided to the Sarasota Manatee Airport Authority under § 158.23 of part 158.

FOR FURTHER INFORMATION CONTACT: Mr. Bart Vernace, Airports Plans and Programs Manager, 9677 Tradeport Drive, suite 130, Orlando, Florida 32827-5397. The application may be reviewed in person at this same location.

SUPPLEMENTARY INFORMATION: The FAA proposes to rule and invites public comment on the application to impose a PFC at Sarasota-Bradenton Airport under the provisions of the Aviation Safety and Capacity Expansion Act of 1990 (title IX of the Omnibus Budget Reconciliation Act of 1990) (Pub. L. 101-508) and part 158 of the Federal Aviation Regulations (14 CFR part 158). On March 20, 1992, the FAA determined that the application to impose a PFC submitted by Sarasota Manatee Airport Authority was substantially complete within the requirements of § 158.25 of part 158. The FAA will approve or disapprove the application, in whole or in part, no later than June 27, 1992.

The following is a brief overview of the application.

Level of the proposed PFC: $3.00.
Proposed charge effective date: September 1, 1992.
Proposed charge expiration date: September 1, 2012.
Total estimated PFC revenue: $65,082,600.
Brief description of proposed project(s):
Federal Aviation Regulation (FAR) Part 150 Program
Airfield Drainage Improvements
Drainage Improvements—U.S. 41 to Bay
Environmental Assessment (92/93)
Clearzone Land Acquisition—Runway 14/32 Extension
Lengthen Runway 14/32
Overlay Taxiway "A"
Master Plan Update (97/98)
Environmental Assessment (97/98)
Construct Airside "A"
Reconstruct Taxiway "D"
Reconstruct Taxiway "I"
Reconstruct Taxiway "C"
Land Acquisition—Parallel Runway 14/32
Construct Parallel Runway 14/32
Construct Airside "C"
Class or classes of air carriers which the public agency has requested not be required to collect PFCs:
Air Taxi/Commercial Operators.

Any person may inspect the application in person at the FAA Office listed above under **FOR FURTHER INFORMATION CONTACT.**

In addition, any person may, upon request, inspect the application, notice and other documents germane to the application in person at the Sarasota Manatee Airport Authority.

Issued in Atlanta, Georgia on March 20, 1992.

Marisue Haigler,

Assistant Manager, Airports Division, Federal Aviation Administration, Southern Region.

UNITED STATES INFORMATION AGENCY

Culturally Significant Objects Imported for Exhibition; Determination

Notice is hereby given of the following determination: Pursuant to the authority vested in me by the Act of October 19, 1965 (79 Stat. 985, 22 U.S.C. 2459), Executive Order 12047 of March 27, 1978 (43 FR 13359, March 29, 1978), and Delegation Order No. 85–5 of June 27, 1985 (50 FR 27393, July 2, 1985), I hereby determine that the objects to be included in the exhibit "Kathe Kollwitz" (see list [1]), imported from abroad for the temporary exhibition without profit within the United States, are of cultural significance. These objects are imported pursuant to a loan agreement with the foreign lender. I also determine that the temporary exhibition or display of the listed exhibit objects at the National Gallery of Art, Washington, DC, from May 3, 1992, to on or about August 16, 1992, is in the national interest.

Public notice of this determination is ordered to be published in the Federal Register.

Dated: March 25, 1992.

Alberto J. Mora,
General Counsel.

LEGAL SERVICES CORPORATION BOARD OF DIRECTORS
Meeting

TIME AND DATE: A meeting of the Board of Directors will be held on April 6, 1992. The meeting will commence at 9:30 a.m.

PLACE: The Hilton Palacio Del Rio Hotel, 200 South Alamo, The Lacondesa Room, 22nd Floor, San Antonio, TX. 78205, (512) 222–1400.

STATUS OF MEETING:
Open

Except that a portion of the meeting may be closed if a majority of the Board of Directors votes to hold an executive session. At the closed session, pursuant to receipt of the aforementioned vote, the Board of Directors will consider and vote on approval of the draft minutes of the executive session held on March 9, 1992. In addition, the Board of Directors will hear and consider the report of the General Counsel on litigation to which the Corporation is or may become a party. The Board of Directors will also receive and consider a report on current investigations from the Inspector General. The closing will be authorized by the relevant sections of the Government in the Sunshine Act [5 U.S.C. Sections 552b(c) (7) and (10)], the corresponding regulation of the Legal Services Corporation [45 CFR Sections 1622.5 (f) and (h)].[3] The closing will be certified by the Corporation's General Counsel as authorized by the above-cited provisions of law. A copy of the General Counsel's certification will be posted for public inspection at the Corporation's headquarters, located at 400 Virginia Avenue, S.W., Washington, D.C. 20024, in its three reception areas, and will otherwise be available upon request.

MATTERS TO BE CONSIDERED:

Open Session

1. Approval of Agenda.
2. Approval of Minutes of March 9, 1992 Meeting.
3. Chairman's and Members' Reports.
4. President's Report.
5. Consideration of Staff Report on the Insurance Project.
6. Inspector General's Report.
7. Consideration of Operations and Regulations Committee Report.
8. Consideration of Special Reauthorization Committee Report.
9. Consideration of Provision for the Delivery of Legal Services Committee Report.
10. Consideration of Audit and Appropriations Committee Report.
11. Consideration of Office of the Inspector General Oversight Committee Report.

[3] As to the Board's consideration and approval of the draft minutes of the executive session held on March 9, 1992, the closing is authorized as noted in the **Federal Register** notice corresponding to that Board meeting.

Closed Session [4]

12. Approval of Minutes of Executive Session Held on March 9, 1992.
12. Approval of Minutes of Executive Session Held on March 9, 1992.
13. Consideration of Report by Inspector General on Current Investigations and Other Matters.
14. Consideration of the General Counsel's Report on Pending Litigation to which the Corporation is a Party.

Open Session—(Resumed)

15. Consideration of Staff Recommendations for *Pro Bono* Recognition Awards to be Presented at the 1992 Annual Conference of Legal Services Providers.
16. Consideration of Other Business.

CONTACT PERSON FOR INFORMATION: Patricia D. Batie, Executive Office, (202) 863–1839.

Dated Issued: March 26, 1992.

Patricia D. Batie,
Corporate Secretary.

SECURITIES AND EXCHANGE COMMISSION
Agency Meeting

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Pub. L. 94–409, that the Securities and Exchange Commission will hold the following meeting during the week of March 30, 1992.

A closed meeting will be held on Tuesday, March 31, 1992, at 2:30 p.m.

Commissioners, Counsel to the Commissioners, the Secretary to the Commission, and recording secretaries will attend the closed meeting. Certain staff members who have an interest in the matters may also be present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, one or more of the exemptions set forth in 5 U.S.C. 552b(c)(4), (8), (9)(A) and (10) and 17 CFR 200.402(a)(4), (8), (9)(i) and (10), permit consideration of the scheduled matters at a closed meeting.

Commissioner Schapiro, as duty officer, voted to consider the items listed for the closed meeting in a closed session.

The subject matter of the closed meeting scheduled for Tuesday, March 31, 1992, at 2:30 p.m., will be:

Settlement of injunctive actions.
Settlement of administrative proceedings of an enforcement nature.
Institution of injunctive actions.
Institution of administrative proceedings of an enforcement nature.

At times, changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: George Kramer at (202) 272–2000.

Dated: March 17, 1992.

Jonathan G. Katz,
Secretary.

Part II

Department of the Interior

Bureau of Indian Affairs

Receipt of Petition for Federal Acknowledgment of Existence as an Indian Tribe; Notice

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

Receipt of Petition for Federal Acknowledgment of Existence as an Indian Tribe

March 13, 1992.

This is published in the exercise of authority delegated by the Secretary of the Interior to the Assistant Secretary—Indian Affairs by 209 DM 8.

Pursuant to 25 CFR 83.8(a) (formerly 25 CFR 54.8(a)) notice is hereby given that The Northern Cherokee Nation of the Old Louisiana Territory, c/o Beverly Baker Northup, 1502 E. Broadway, suite 201, Columbia, MO 65201, has filed a petition for acknowledgment by the Secretary of the Interior that the group exists as an Indian tribe. The petition was received by the Bureau of Indian Affairs (BIA) on February 19, 1992, and was signed by members of the group's governing body.

This is a notice of receipt of petition and does not constitute notice that the petition is under active consideration. Notice of active consideration will be sent by mail to the petitioner and other interested parties at the appropriate time.

Under § 83.8(d) (formerly 54.8(d)) of the Federal regulations, interested parties may submit factual and/or legal arguments in support of or in opposition to the group's petition. Any information submitted will be made available on the same basis as other information in the BIA's files. Such submissions will be provided to the petitioner upon receipt by the BIA. The petitioner will be provided an opportunity to respond to such submissions prior to a final determination regarding the petitioner's status.

The petition may be examined, by appointment, in the Department of the Interior, Bureau of Indian Affairs, Branch of Acknowledgment and Research, room 1362–MIB, 1849 C Street, NW., Washington, DC 20240, Phone: (202) 208–3592.

William D. Bettenberg,

Deputy Assistant Secretary—Indian Affairs.

Part III

Department of Health and Human Services

Centers for Disease Control

Revision of Requirements for Content of AIDS-Related Written Materials, Pictorials, Audiovisuals, Questionnaires, Survey Instruments, and Educational Sessions in Centers for Disease Control Assistance Programs; Notice

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control

Revision of Requirements for Content of AIDS-Related Written Materials, Pictorials, Audiovisuals, Questionnaires, Survey Instruments, and Educational Sessions in Centers for Disease Control Assistance Programs

AGENCY: Centers for Disease Control (CDC), Public Health Service, HHS.

ACTION: Revision of Requirements for Content of AIDS-Related Written Materials, Pictorials, Audiovisuals, Questionnaires, Survey Instruments, and Educational Sessions in Centers for Disease Control Assistance Programs.

SUMMARY: The Requirements for Content of HIV/AIDS-Related Written Materials, Pictorials, Audiovisuals, Questionnaires, Survey Instruments, and Educational Sessions, in Centers for Disease Control Assistance Programs are being revised after consideration of public comments to the proposed changes in terms and conditions relating to these requirements published in the **Federal Register** on December 13, 1991 (56 FR 65169).

EFFECTIVE DATE: March 30, 1992.

FOR FURTHER INFORMATION CONTACT: Gary West, National Center for Prevention Services, Centers for Disease Control, (404) 639–1480.

SUPPLEMENTARY INFORMATION: Since 1985, the Centers for Disease Control (CDC), as part of the terms and conditions for receipt of CDC funds for human immunodeficiency virus (HIV) prevention programs, has required that all educational and related program materials be reviewed by a Program Review Panel of the recipient. Since education about preventing HIV transmission involves effectively presenting sensitive subject matter, the purpose of this requirement has been to avoid disruptions of CDC-funded programs by requiring a careful consideration of the content, intended audience, and potential offensiveness of materials. A guidance document for this review, entitled "Content of AIDS-Related Written Materials, Pictorials, Audiovisuals, Questionnaires, Survey Instruments, and Educational Sessions in Centers for Disease Control Assistance Programs," was last revised and published in the **Federal Register** on June 7, 1990 (55 FR 23414).

In a **Federal Register** announcement published December 13, 1991 (56 FR 65169) CDC requested public comment on proposed changes in terms and conditions relating to these requirements. CDC received 53 responses, representing 24 concerned citizens and 29 organizations, including health departments and other governmental agencies, national organizations, and local organizations. The majority of the comments related to the proposed change in section 1.e, pertaining to the deletion of certain statutory provisions. Various comments were also received on other related issues. After considering these comments, CDC is now issuing final revised terms and conditions consistent with those proposed in the December 13, 1991 **Federal Register** Notice. Comments received and CDC responses to comments are summarized below:

1. Section 1.e pertaining to the Kennedy-Cranston provisions from previous fiscal year appropriations acts was proposed to be deleted.

Forty-eight respondents provided comments related to the deletion of this language; 28 agreed with the deletion. In general, respondents stated that this deletion will allow educators to produce credible materials that will be effective in preventing the further spread of HIV infection. Twenty respondents disagreed with the deletion, with the most frequent comments indicating concern that the lack of restrictions will promote drug use and sexual activity in our children and will encourage the homosexual lifestyle.

Examples of Comments Include

Deleting section 1.e under basic principles 'streamlines' the basic principles and is a welcomed revision.

Lifting of the restrictions will allow those working in areas of AIDS education and prevention to finally produce credible materials that will be effective in stemming the course of the epidemic.

We are pleased * * * (that CDC is deleting) the Kennedy-Cranston (provisions) which had restricted the development and dissemination of frank and explicit AIDS prevention materials.

I believe when teaching children, especially on this subject, it should always remain very conservative.

We are concerned about the possibility that the prohibition against materials that 'promote or encourage' intravenous drug use or sexual activity will be lifted. Why?? Is it in order for the encouragement of the gay lifestyle?

CDC Response: Certain provisions contained in the 1991 Labor, Health and Human Services, and Education and Related Agencies Appropriations Act (formerly referred to as the Kennedy-Cranston Amendment) are not part of the 1992 CDC Appropriations Act and do not apply to the programs which are presently being funded; therefore, they have been deleted from the requirements. Moreover, the respondents' comments do not reflect the fact that CDC's administratively-imposed restrictions, currently in place in the CDC Guidelines, already cover the practical situations where the Kennedy-Cranston language would have applied. The 1991 version of the Kennedy-Cranston provision in part prohibited the use of CDC funds to produce materials "* * * *designed to* promote or encourage, *directly*, intravenous drug abuse or sexual activity, homosexual or heterosexual." (Emphasis added). While Congress deleted this provision in CDC's 1992 appropriation act, Congress has not disturbed the more stringent "offensiveness" standard that CDC has developed administratively and which is retained unchanged in the Basic Principles in section 1 of these guidelines. Accordingly, it is CDC's view that any material which would have failed to meet the Kennedy-Cranston standard ("designed to promote * * * directly, intravenous drug abuse or sexual activity * * *") would also fail to meet the "offensiveness" standard that continues as part of the Basic Principles to be applied by Program Review Panels.

2. Section 2.c.(1)(b) was proposed to change the composition of Program Review Panels (which review other than school-based materials) to include an employee, or designated representative, of a State or local health department who has appropriate expertise to serve as a member of the panel.

Of the seven respondents who provided comments related to this revision, five agreed and two disagreed. One of the respondents who agreed with the revision was concerned, however, that not enough emphasis was placed on reviewing the materials for technical correctness on HIV issues. The two respondents who disagreed both expressed the opinion that this is an unnecessary requirement that should be encouraged, rather than mandated, by the guidelines.

One respondent suggested that "tribal" health department be added to "state/local health department."

Examples of Comments Include

The requirement * * * is good, but may necessitate some changes in current composition or number of panel members.

I am ambivalent about requiring (health department representation on panels) * * * It may benefit several programs in which such a perspective has not been present, but the requirement would also be an unnecessary burden for those panels in which such experience occurs naturally.

CDC Response: It is CDC's position that since health departments have the fundamental responsibility for safeguarding the public health within their jurisdictions, they must be represented on Program Review Panels to facilitate collaboration and coordination of efforts, to minimize duplication, and provide public health expertise. For purposes of this requirement, "tribal" health departments are considered "local" health departments.

3. Section 2.d. was to be revised to require that CDC-funded organizations that develop materials for other than school-based populations which are national, regional (multistate), or statewide in scope should include as a member of the Program Review Panel an employee of a State or local health department, or an appropriate designated representative of such department, consistent with the provisions of section 2.c(1).

One respondent conveyed support of this clarification for panels which approve material developed for distribution on a national, regional, or statewide basis.

CDC Response: We believe that representation of health departments on national, regional, and statewide review panels will provide opportunities for important public health expertise and experience to be considered when decisions are made regarding the potential offensiveness or effectiveness of materials that will be widely distributed.

4. In addition, CDC received nine comments related to issues that have been addressed in previous revisions of the guidelines:

a. Six respondents commented that they agree that panels reviewing materials intended for racial/ethnic minorities should be comprised of members of these groups; however, the respondents also believe that the same standard should apply for all targeted materials, including those for men who have sex with men, women, injecting drug users, or any other intended audiences.

CDC Response: As stated in the June 7, 1990 response (55 FR 23414, 23415), the current terms and conditions are not intended to limit the expertise of any group in evaluating materials, but are intended to prevent any one audience from dominating the membership of the panel. As indicated in section 2.c.(1)(a), recipients are encouraged to use consultants to augment the expertise of Program Review Panels on partjcular matters.

b. Two respondents commented that Program Review Panels should be "required" to include representatives of target audiences on the review panel, not just "consult with."

CDC Response: We believe that the choice of acquiring the expertise either through representation on the panel or through a consultant is best left to the discretion of the recipient.

c. One respondent questioned why panels reviewing materials for school-based populations should not also include a member with "technical (HIV) expertise."

CDC Response: Panels which review materials for use with school-based populations are to include representatives of groups such as teachers, school administrators, parents, and students. It is felt that these persons can provide the expertise needed to review these materials. Grantees are not precluded from inviting a health department representative to serve on the Program Review Panel in situations where the appropriate HIV-related expertise is not readily available. In addition to the above revisions, CDC has made editorial changes in the first paragraph of the content guidelines to clarify that this paragraph is part of the Basic Principles.

These revised terms and conditions are effective immediately and apply to all materials being developed or distributed with CDC funds that have not yet been reviewed by a Program Review Panel. Current grantees are being notified by mail of these revised terms and conditions.

The following final revised terms and conditions, which are consistent with those proposed in the **Federal Register** of December 13, 1991, are effective immediately.

Dated: March 24, 1992.

Robert L. Foster,

Acting Director, Office of Program Support, Centers for Disease Control.

Content of AIDS-Related Written Materials, Pictorials, Audiovisuals, Questionnaires, Survey Instruments, and Educational Sessions in Centers for Disease Control Assistance Programs; March 1992

1. Basic Principles

Controlling the spread of HIV infection and AIDS requires the promotion of individual behaviors that eliminate or reduce the risk of acquiring and spreading the virus. Messages must be provided to the public that emphasize the ways by which individuals can fully protect themselves from acquiring the virus. These methods include abstinence from the illegal use of IV drugs and from sexual intercourse except in a mutually monogamous relationship with an uninfected partner. For those individuals who do not or cannot cease risky behavior, methods of reducing their risk of acquiring or spreading the virus must also be communicated. Such messages can be controversial. These principles are intended to provide guidance for the development and use of educational materials, and to require the establishment of Program Review Panels to consider the appropriateness of messages designed to communicate with various groups.

a. Written materials (e.g., pamphlets, brochures, fliers), audiovisual materials (e.g., motion pictures and video tapes), and pictorials (e.g., posters and similar educational materials using photographs, slides, drawings, or paintings) should use terms, descriptors, or displays necessary for the intended audience to understand dangerous behaviors and explain less risky practices concerning HIV transmission.

(b) Written materials, audiovisual materials, and pictorials should not include terms, descriptors, or displays which will be offensive to a majority of the intended audience or to a majority of adults outside the intended audience unless, in the judgment of the Program Review Panel, the potential offensiveness of such materials is outweighed by the potential effectiveness in communicating an important HIV prevention message.

(c) Educational sessions should not include activities in which attendees participate in sexually suggestive physical contact or actual sexual practices.

(d) Messages provided to young people in schools and in other settings should be guided by the principles contained in "Guidelines for Effective School Health Education to Prevent the Spread of AIDS" (MMWR 1988:37 (suppl. no. S–2)).

2. Program Review Panel

a. Each recipient will be required to establish or identify a Program Review Panel to review and approve all written materials, pictorials, audiovisuals, questionnaires or survey instruments, and proposed educational group session activities to be used under the project plan. This requirement applies regardless of whether the applicant plans to conduct the total program activities or plans to have part of them conducted through other organization(s) and whether program activities involve

creating unique materials or using/distributing modified or intact materials already developed by others. Whenever feasible, CDC funded community-based organizations are encouraged to use a Program Review Panel established by a health department or an other CDC-funded organization rather than establish their own panel. The Surgeon General's Report on Acquired Immune Deficiency Syndrome (October 1986) and CDC-developed materials do not need to be reviewed by the panel unless such review is deemed appropriate by the recipient. Members of a Program Review Panel should:

(1) Understand how HIV is and is not transmitted; and

(2) Understand the epidemiology and extent of the HIV/AIDS problem in the local population and the specific audiences for which materials are intended.

b. The Program Review Panel will be guided by the CDC Basic Principles (in the previous section) in conducting such reviews. The panel is authorized to review materials only and is not empowered either to evaluate the proposal as a whole or to replace any other internal review panel or procedure of the recipient organization or local governmental jurisdiction.

c. Applicants for CDC assistance will be required to include in their applications the following:

(1) Identification of a panel of no less than five persons which represent a reasonable cross-section of the general population. Since Program Review Panels review materials for many intended audiences, no single intended audience shall predominate the composition of the Program Review Panel, except as provided in subsection (d) below. In addition:

(a) Panels which review materials intended for a specific audience should draw upon the expertise of individuals who can represent cultural sensitivities and language of the intended audience either through representation on the panels or as consultants to the panels.

(b) The composition of Program Review Panels, except for panels reviewing materials for school-based populations, must include an employee of a state or local health department with appropriate expertise in the area under consideration who is designated by the health department to represent the department on the panel. If such an employee is not available, an individual with appropriate expertise, designated by the health department to represent the agency in this matter, must serve as a member of the panel.

(c) Panels which review materials for use with school-based populations should include representatives of groups such as teachers, school administrators, parents, and students.

(d) Panels reviewing materials intended for racial and ethnic minority populations must comply with the terms of (a), (b), and (c), above. However, membership of the Program Review Panel may be drawn predominately from such racial and ethnic populations.

(2) A letter or memorandum from the proposed project director, countersigned by a responsible business official, which includes:

(a) Concurrence with this guidance and assurance that its provisions will be observed;

(b) The identity of proposed members of the Program Review Panel, including their names, occupations, and any organizational affiliations that were considered in their selection for the panel.

d. CDC-funded organizations that undertake program plans in other than school-based populations which are national, regional (multistate), or statewide in scope, or that plan to distribute materials as described above to other organizations on a national, regional, or statewide basis, must establish a single Program Review Panel to fulfill this requirement. Such national/regional/state panels must include as a member an employee of a state or local health department, or an appropriate designated representative of such department, consistent with the provisions of section 2.c(1). Materials reviewed by such a single (national, regional, or state) Program Review Panel do not need to be reviewed locally unless such review is deemed appropriate by the local organization planning to use or distribute the materials. Such national/regional/state organization must adopt a national/regional/statewide standard when applying Basic Principles 1.a and 1.b to the respective concepts of "intended audience" and "majority of adults outside the intended audience."

e. When a cooperative agreement/grant is awarded, the recipient will:

(1) Convene the Program Review Panel and present for its assessment copies of written materials, pictorials, and audiovisuals proposed to be used;

(2) Provide for assessment by the Program Review Panel text, scripts, or detailed descriptions for written materials, pictorials, or audiovisuals which are under development;

(3) Prior to expenditure of funds related to the ultimate program use of these materials, assure that its project files contain a statement(s) signed by the Program Review Panel specifying the vote for approval or disapproval for each proposed item submitted to the panel;

(4) Provide to CDC in regular progress reports signed statement(s) of the chairperson of the Program Review Panel specifying the vote for approval or disapproval for each proposed item that is subject to this guidance.

BILLING CODE 4160-18-M

federal register

Monday
March 30, 1992

Part IV

Department of the Treasury

Office of Foreign Assets Control

31 CFR Part 550

Libyan Sanctions Regulations; Final Rule

DEPARTMENT OF THE TREASURY

Office of Foreign Assets Control

31 CFR Part 550

Libyan Sanctions Regulations

AGENCY: Office of Foreign Assets Control, Department of the Treasury.

ACTION: Final rule; amendments to the list of specially designated nationals of Libya.

SUMMARY: The Libyan Sanctions Regulations are being amended to add the names of 46 companies to appendix A, Organizations Determined To Be Within the Term of "Government of Libya" (Specially Designated Nationals of Libya). Appendix A contains the names of companies, banks, and other entities, whether located outside or inside of Libya, which the Director of the Office of Foreign Assets Control has determined to be owned or controlled by, or acting or purporting to act directly or indirectly on behalf of, the Government of Libya. This list may be expanded or amended at any time.

EFFECTIVE DATE: March 27, 1992.

ADDRESSES: Copies of this list are available upon request at the following location: Office of Foreign Assets Control, U.S. Department of the Treasury, Annex, 1500 Pennsylvania Avenue NW., Washington, DC 20220.

FOR FURTHER INFORMATION CONTACT: J. Robert McBrien, Chief, International Programs Division, Office of Foreign Assets Control, tel. (202) 566–5021.

SUPPLEMENTARY INFORMATION: The Libyan Sanctions Regulations, 31 CFR part 550 (the "Regulations"), were issued by the Treasury Department to implement Executive Orders No. 12543 (51 FR 875, Jan. 9, 1986) and 12544 (51 FR 1235, Jan. 10, 1986), in which the President declared a national emergency with respect to Libya, invoking the authority, *inter alia*, of the International Emergency Economic Powers Act (50 U.S.C. 1701 *et seq.*), and ordering specific measures against the Government of Libya. The Regulations were amended by a final rule published in the **Federal Register** (56 FR 20540, May 6, 1991) which added appendix A, a list of organizations determined to be within the term "Government of Libya." The Regulations were amended further by a final rule published in the **Federal Register** (56 FR 37156, Aug. 5, 1991) which removed the numerical designations from appendix A, merged the separate categories in appendix A, added the names of twelve companies to appendix A, and added a new appendix B, "Individuals Determined To Be Specially Designated Nationals of the Government of Libya," to the end thereof. The Regulations were also amended by a final rule published in the **Federal Register** (56 FR 65993, Dec. 20, 1991) which removed one name from appendix B.

Section 550.304 of the Regulations defines the term "Government of Libya" as follows:

(a) The "Government of Libya" includes:

(1) The State and the Government of Libya, as well as any political subdivision, agency, or instrumentality thereof, including the Central Bank of Libya;

(2) Any partnership, association, corporation, or other organization substantially owned or controlled by the foregoing;

(3) Any person to the extent that such person is, or has been, or to the extent that there is reasonable cause to believe that such person is, or has been, since the effective date, acting or purporting to act directly or indirectly on behalf of any of the foregoing;

(4) Any other person or organization determined by the Secretary of the Treasury to be included within paragraph (a) of this section.

(b) A person specified in paragraph (a)(2) of this section shall not be deemed to fall within the definition of Government of Libya solely by reason of being located in, organized under the laws of, or having its principal place of business in, Libya.

Determinations that persons fall within the definition of the "Government of Libya" are effective upon the date of determination by the Director of FAC, acting under authority delegated by the Secretary of the Treasury. Public notice is effective upon the date of publication or upon actual notice, whichever is sooner.

This rule amends appendix A to part 550 to provide public notice of the worldwide application of the Regulations to each name listed at appendix A, to provide further public notice that the absence of any particular name from the list is not to be construed as evidence that the person does not meet the definition of the "Government of Libya," and to provide public notice of 46 additional companies determined to be "specially designated nationals" of the Government of Libya. The rule clarifies that all listed organizations meet the definition of "Government of Libya" not only at the listed addresses inside or outside of Libya, but also at all their other locations worldwide. The rule stipulates further that the absence of any particular person from the specially designated nationals list is not to be construed as evidence that it is not owned or controlled by, or acting or purporting to act directly or indirectly on behalf of, the Government of Libya.

Appendix A consists of organizations determined by the Director of FAC to be owned or controlled by, or acting or purporting to act directly or indirectly on behalf of, the Government of Libya. The persons listed in appendix A thus fall within the definition of the "Government of Libya" contained in § 550.304(a) of the regulations, and are subject to all prohibitions applicable to other components of the Government of Libya. All unlicensed transactions with such persons, or in property in which they have an interest, are prohibited anywhere in the world.

The list of specially designated nationals is a partial one, since FAC may not be aware of all the agencies and officers of the Government of Libya or of all the persons that might be owned or controlled by the Government of Libya or acting as agents or front organizations for Libya, and which thus qualify as specially designated nationals of the Government of Libya. Therefore, persons engaging in transactions may not rely on the fact that any particular person is not on the specially designated nationals list as evidence that it is not owned or controlled by, or acting or purporting to act directly or indirectly on behalf of, the Government of Libya. The Treasury Department regards it as incumbent upon all U.S. persons to take reasonable steps to ascertain for themselves whether persons they enter into transactions with are owned or controlled by the Government of Libya or are acting or purporting to act on its behalf, or on behalf of other countries subject to blocking or transactional restrictions (at present, Cuba, Haiti, Iraq, North Korea, and Vietnam).

Section 206 of the International Emergency Economic Powers Act, 50 U.S.C. 1705, as amended by the Uniform Sentencing Act, 18 U.S.C. 3571 and 3581, provides for civil penalties not to exceed $10,000 per count for violations of the Regulations, fines of up to $250,000 and imprisonment for up to 12 years for willful violations of the Regulations by individuals, and fines of up to $500,000 for organizations.

Because the Regulations involve a foreign affairs function, Executive Order 12291 and the provisions of the Administrative Procedure Act, 5 U.S.C. 553, requiring notice of proposed rulemaking, opportunity for public participation, and delay in effective date, are inapplicable. Because no notice of proposed rulemaking is required for this rule, the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, does not apply.

List of Subjects in 31 CFR Part 550

Administrative practice and procedure, Banks, Banking, Blocking of assets, Foreign trade, Libya, Penalties, Reporting and recordkeeping requirements, Securities, Specially designated nationals, Travel restrictions.

PART 550—LIBYAN SANCTIONS REGULATIONS

For the reasons set forth in the preamble, 31 CFR part 550 is amended as set forth below:

1. The authority citation for part 550 continues to read as follows:

Authority: 50 U.S.C. 1701 *et seq.*; 22 U.S.C. 2349aa–8 & –9; 49 U.S.C. 1514; E.O. 12543, 51 FR 875 (Jan. 9, 1986); E.O. 12544, 51 FR 1235 (Jan. 10, 1986).

Appendix A—[Amended.]

2. Appendix A to part 550, "Organizations Determined To Be Within the Term 'Government of Libya' (Specially Designated Nationals of Libya)," is amended by adding the following paragraph as a preamble to the list of names:

The names and addresses listed below are the most complete ones currently known to the Office of Foreign Assets Control. Listed organizations located in Libya meet the definition of "Government of Libya" not only at their locations inside of Libya, but also at all their other locations worldwide. Listed organizations outside of Libya also meet the definition of "Government of Libya" not only at their cited addresses, but also at all their other locations worldwide. The absence of any particular person from the list of specially designated nationals is not to be construed as evidence that it is not owned or controlled by, or acting or purporting to act directly or indirectly on behalf of, the Government of Libya. Please note that name variations and addresses are subject to change over time and that the Office of Foreign Assets Control will update name and address information periodically.

3. Appendix A to part 550 is also amended by adding the following names in their proper alphabetical positions:

A. Bortolotti & Co. S.P.A.,
(a.k.a. Bortolotti)
Via Predore, 50, 24067 Sarnico, Bergamo, Italy.
Cremona, Italy.

Ad-Dar Al Jamahiriya for Publishing Distribution & Advertising,
P.O. Box 17459, Misurata, Libya.
P.O. Box 950, Tripoli, Libya.
P.O. Box 321, Benghazi, Libya.
P.O. Box 20108, Sebha, Libya.
P.O. Box 547, Valletta, Malta.
P.O. Box 15977, Casablanca, Morocco.

Agip North Africa and Middle East Oil Company,
(a.k.a. Agip (N.A.M.E.) Limited),
Adahr, P.O. Box 346, Sciara Giakarta, Tripoli, Libya.
Benghazi Office, P.O. Box 4120, Benghazi, Libya.

Aquitaine Libye
Omar El Mokhtar Street, P.O. Box 282, Tripoli, Libya.

Arabian Gulf Oil Company,
(a.k.a. AGOCO),
P.O. Box 263, Al Kish, Benghazi, Libya.
P.O. Box 693–325, Ben Ashour Street, Tripoli, Libya.
Sarir Field, Libya.
Windsor House, 42–50 Victoria Street, London SW1H 0NW, United Kingdom.

Azzawiya Oil Refining Company
P.O. Box 6451, Tripoli, Libya.
Benghazi Asphalt Plant Office, Benghazi, Libya.

Central Bank of Libya,
Al-Fatah Street, P.O. Box 1103, Tripoli, Libya.
Benghazi, Libya.
Sebha, Libya.

Chempetrol,
(a.k.a. Chempetrol International),
145, Flat 8, Tower Road, Sliema, Malta.

Chempetrol International Ltd.,
5th Floor, Quality Court, Chancery Lane, London WC2A 1HP, United Kingdom.
28 Lincoln's Inn Fields, London WC2A 3HH, United Kingdom.

F.A. Petroli S.P.A.
Italy.

General Arab African Enterprise,
(a.k.a. GAAE),
(a.k.a. General Arab African Company),
(a.k.a. GAAC),
P.O. Box 6059, 219 Mohammed el Megarief Street, Tripoli, Libya.
Nasser Street, Benghazi, Libya.

Jamahiriya Bank,
(f.k.a. Masraf Al-Gumhouria),
P.O. Box 3224, Martyr Street, Megarief, Tripoli, Libya.
Emhemed Megrief Street, Tripoli, Libya.
P.O. Box 1291, Benghazi, Libya.
(38 local branches in Libya).

Joint Oil,
(a.k.a. Joint Oil Tunisia)
(a.k.a. Joint Exploration, Exploitation and Petroleum Services Company)
(a.k.a. Societe de Recherche et D'Exploitation Commune et de Service Petroliere)
(a.k.a. Libyan-Tunisian Exploration Company),
B.P. 350 Houmt Souk 4180, Djerba Island, Tunisia.
7th of November offshore field, Gulf of Gabes
Planning & Logistic Group Complex, Port of Zarzis, Tunisia.

Libyan Agricultural Bank,
(a.k.a. The Agricultural Bank),
(a.k.a. National Agricultural Bank of Libya),
52, Omar El Mokhtar Street, P.O. Box 1100, Tripoli, Libya.
(1 city branch and 27 branches in Libya).

Libyan Arab Foreign Bank,
(a.k.a. LAFB),
Dat El Imad Complex Tower No. 2, P.O. Box 2542, Tripoli, Libya.

Mediterranean Power Electric Company Limited,
A 16B, Industrial Estate, Marsa, Malta.

National Commercial Bank S.A.L.,
P.O. Box 4647, Shuhada Square, Tripoli, Libya.
P.O. Box 160, Benghazi, Libya.
(22 branches in Libya).

LIST OF PUBLIC LAWS

Note: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's **List of Public Laws.**

Last List March 25, 1992

CFR CHECKLIST

This checklist, prepared by the Office of the Federal Register, is published weekly. It is arranged in the order of CFR titles, stock numbers, prices, and revision dates.

An asterisk (*) precedes each entry that has been issued since last week and which is now available for sale at the Government Printing Office.

A checklist of current CFR volumes comprising a complete CFR set, also appears in the latest issue of the LSA (List of CFR Sections Affected), which is revised monthly.

The annual rate for subscription to all revised volumes is $620.00 domestic, $155.00 additional for foreign mailing.

Mail orders to the Superintendent of Documents, Attn: New Orders, P.O. Box 371954, Pittsburgh, PA 15250-7954. All orders must be accompanied by remittance (check, money order, GPO Deposit Account, VISA, or Master Card). Charge orders may be telephoned to the GPO Order Desk, Monday through Friday, at (202) 783-3238 from 8:00 a.m. to 4:00 p.m. eastern time, or FAX your charge orders to (202) 512-2233.

[1] Because Title 3 is an annual compilation, this volume and all previous volumes should be retained as a permanent reference source.

[2] The July 1, 1985 edition of 32 CFR Parts 1–189 contains a note only for Parts 1–39 inclusive. For the full text of the Defense Acquisition Regulations in Parts 1–39, consult the three CFR volumes issued as of July 1, 1984, containing those parts.

[3] The July 1, 1985 edition of 41 CFR Chapters 1–100 contains a note only for Chapters 1 to 49 inclusive. For the full text of procurement regulations in Chapters 1 to 49, consult the eleven CFR volumes issued as of July 1, 1984 containing those chapters.

[4] No amendments to this volume were promulgated during the period Jan. 1, 1987 to Dec. 31, 1991. The CFR volume issued January 1, 1987, should be retained.

[5] No amendments to this volume were promulgated during the period Apr. 1, 1990 to Mar. 31, 1991. The CFR volume issued April 1, 1990, should be retained.

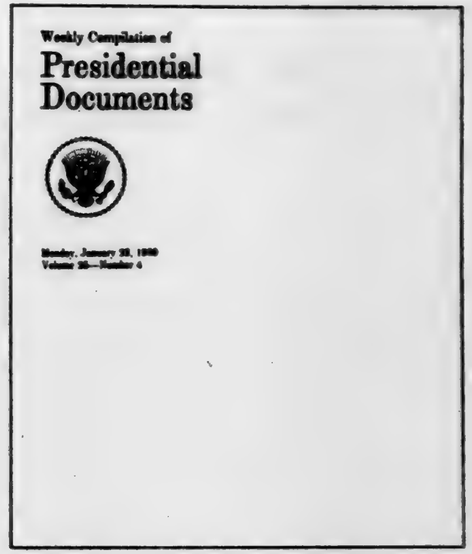
[6] No amendments to this volume were promulgated during the period July 1, 1989 to June 30, 1991. The CFR volume issued July 1, 1989, should be retained.

[7] No amendments to this volume were promulgated during the period July 1, 1990 to June 30, 1991. The CFR volume issued July 1, 1990, should be retained.

The authentic text behind the news . . .

The Weekly Compilation of Presidential Documents

Administration of George Bush



This unique service provides up-to-date information on Presidential policies and announcements. It contains the full text of the President's public speeches, statements, messages to Congress, news conferences, personnel appointments and nominations, and other Presidential materials released by the White House.

The Weekly Compilation carries a Monday dateline and covers materials released during the preceding week. Each issue contains an Index of Contents and a Cumulative Index to Prior Issues.

Separate indexes are published periodically. Other features include lists of acts approved by the President, nominations submitted to the Senate, a checklist of White House press releases, and a digest of other Presidential activities and White House announcements.

Published by the Office of the Federal Register, National Archives and Records Administration.

The United States Government Manual 1991/92

As the official handbook of the Federal Government, the *Manual* is the best source of information on the activities, functions, organization, and principal officials of the agencies of the legislative, judicial, and executive branches. It also includes information on quasi-official agencies and international organizations in which the United States participates.

Particularly helpful for those interested in where to go and who to see about a subject of particular concern is each agency's "Sources of Information" section, which provides addresses and telephone numbers for use in obtaining specifics on consumer activities, contracts and grants, employment, publications and films, and many other areas of citizen interest. The *Manual* also includes comprehensive name and agency/subject indexes.

Of significant historical interest is Appendix C, which lists the agencies and functions of the Federal Government abolished, transferred, or changed in name subsequent to March 4, 1933.

The *Manual* is published by the Office of the Federal Register, National Archives and Records Administration.

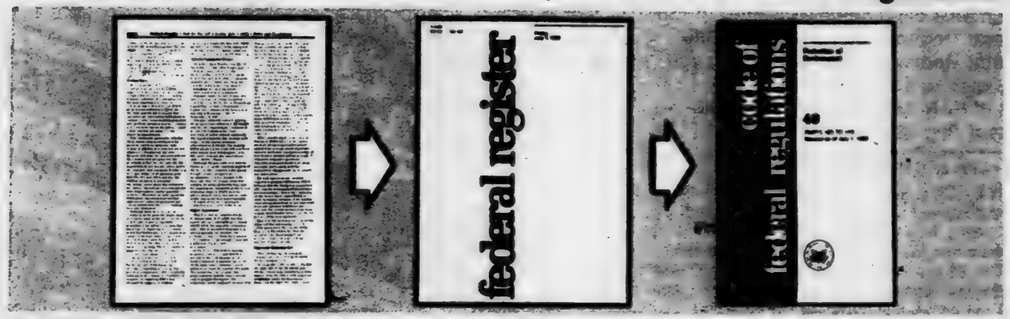
The Federal Register

Regulations appear as agency documents which are published daily in the **Federal Register** and codified annually in the **Code of Federal Regulations**



The **Federal Register**, published daily, is the official publication for notifying the public of proposed and final regulations. It is the tool for you to use to participate in the rulemaking process by commenting on the proposed regulations. And it keeps you up to date on the Federal regulations currently in effect.

Mailed monthly as part of a **Federal Register** subscription are: the LSA (List of CFR Sections Affected) which leads users of the **Code of Federal Regulations** to amendatory actions published in the daily **Federal Register**; and the cumulative **Federal Register Index**.

The **Code of Federal Regulations** (CFR) comprising approximately 196 volumes contains the annual codification of the final regulations printed in the **Federal Register**. Each of the 50 titles is updated annually.

Individual copies are separately priced. A price list of current CFR volumes appears both in the **Federal Register** each Monday and the monthly LSA (List of CFR Sections Affected). Price inquiries may be made to the Superintendent of Documents, or the Office of the Federal Register.

Would you like to know...

if any changes have been made to the Code of Federal Regulations or what documents have been published in the Federal Register without reading the Federal Register every day? If so, you may wish to subscribe to the *LSA (List of CFR Sections Affected)*, the *Federal Register Index*, or both.

LSA • List of CFR Sections Affected

The LSA (List of CFR Sections Affected) is designed to lead users of the Code of Federal Regulations to amendatory actions published in the Federal Register. The LSA is issued monthly in cumulative form. Entries indicate the nature of the changes—such as revised, removed, or corrected.
$21.00 per year

Federal Register Index

The index, covering the contents of the daily Federal Register, is issued monthly in cumulative form. Entries are carried primarily under the names of the issuing agencies. Significant subjects are carried as cross-references.
$19.00 per year.

A finding aid is included in each publication which lists Federal Register page numbers with the date of publication in the Federal Register.

Note to FR Subscribers:
FR Indexes and the LSA (List of CFR Sections Affected) are mailed automatically to regular FR subscribers.

Briefings on How To Use the Federal Register
For information on briefings in Washington, DC and St. Louis, MO, see announcement on the inside cover of this issue.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 57 FR 12345.

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC

WHEN: April 7, at 9:00 a.m.
WHERE: Office of the Federal Register, First Floor Conference Room, 1100 L Street NW., Washington, DC.
RESERVATIONS: 202-523-5240.
DIRECTIONS: North on 11th Street from Metro Center to corner of 11th and L Streets

ST. LOUIS, MO

WHEN: April 23; at 9:00 a.m.
WHERE: Room 1612, Federal Building, 1520 Market Street, St. Louis, MO

Rules and Regulations

Federal Register
Vol. 57, No. 62
Tuesday, March 31, 1992

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 91-NM-167-AD; Amendment 39-8211; AD 92-07-15]

Airworthinesss Directives; Boeing Model 757 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to certain Boeing Model 757 series airplanes, that requires the inspection and modification, if necessary, of the wing fixed inboard trailing edge upper panel, and replacement of aluminum fasteners with oversized titanium fasteners. This amendment is prompted by reports from the manufacturer indicating that aluminum fasteners were used to attach the graphite panel assembly to the wing structure. This combination of materials could lead to fastener corrosion. The actions specified by this AD are intended to prevent the separation of the fixed inboard trailing edge upper panel and consequent damage to airplane structure, hydraulic lines, and wire bundles.

DATES: Effective May 5, 1992.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of May 5, 1992.

ADDRESSES: The service information referenced in this AD may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124. This information may be examined at the FAA, Transport Airplane Directorate, Rules Docket, 1601 Lind Avenue SW., Renton, Washington; or at the Office of the Federal Register, 1100 L Street NW., room 8401, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Mr. Thomas Rodriguez, Seattle Aircraft Certification Office, Airframe Branch, ANM-120S; telephone (206) 227-2779. Mailing address: FAA, Northwest Mountain Region, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington 98055-4056.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations to include an airworthiness directive (AD) that is applicable to certain Boeing Model 757 series airplanes was published in the **Federal Register** on October 23, 1991 (56 FR 54805). That action proposed to require the inspection and modification, if necessary, of the wing fixed inboard trailing edge upper panel, and replacement of aluminum fasteners with oversized titanium fasteners.

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the comments received.

One commenter supports the rule as proposed.

One commenter is concerned about the proposed requirement to verify part numbers on the affected panels, because many panels may have been painted over. Consequently, some operators may be required to sand down large areas of the panels in order to verify part numbers and this, in itself, may damage the panels. Therefore, in lieu of the visual inspection, this commenter suggests that the rule be revised to permit operators to review maintenance/purchasing records in order to determine whether a graphite panel was installed. The commenter states that it is not critical to know the panel's actual part number; it is only necessary to know whether the panel is made of graphite. The FAA agrees that instructions should be provided for those operators who are unable to determine the part numbers of the panels by a visual inspection. However, rather than providing for a review of records, the FAA considers it more appropriate that the material of the panel be determined. Paragraph (a) has been revised to include instructions for those situations where the part number of the panel is not visible; these instructions describe a method for determining whether a panel is made of graphite or fiberglass. (The manufacturer advises that it is planning to revise the applicable service information to specify similar instructions to determine panel material.)

One commenter expresses concern over the requirement to modify the graphite panels, since it involves removing the Tedlar protective film and possibly damaging the graphite plies. This commenter suggests that the rule be revised to require that the panels be modified only as necessary, based on the condition of corrosion degradation of the panel. The FAA does not agree. Removing the Tedlar protective film must be accomplished because the single ply of fiberglass will not bond to the Tedlar; therefore, exposure of the graphite is necessary. The primary concern with the graphite panels is corrosion due to the presence of dissimilar materials, namely, graphite and aluminum. In situations where these two materials are present, it is the aluminum structure (aluminum attachment fasteners and aluminum wing structure under the panel) that will be degraded. The FAA does not anticipate any degradation of the graphite panels, but is requiring that the panels be modified in order to protect the aluminum wing structure under the panel.

Two commenters request that the proposed compliance time of 15 months be extended to 18 or 24 months so that the modification could be accomplished during a regularly scheduled "C," "2C," or "3C" check. By doing so, operators would not be faced with special schedules or unnecessary downtime. The FAA concurs that the compliance time may be extended somewhat. The proposed compliance time of 15 months was selected as the interval that was considered to be the average time for scheduling a normal heavy maintenance visit for the majority of affected operators. The FAA's intent was that the modification be accomplished during such a visit, where special equipment and trained maintenance personnel would be available if necessary. The FAA is aware that maintenance schedules do vary from operator to operator and, based on the information provided by the commenters, it is apparent that 18 months is a more realistic average interval for normal

maintenance scheduling. The FAA has determined that the compliance time may be extended to 18 months without compromising safety, and has revised the final rule accordingly.

One commenter requests that the proposed compliance time be extended because of the possibility of problems in obtaining the required oversized titanium fasteners. The FAA does not concur that a parts availability problem exists. The FAA has researched the availability of the number of parts and finds that ample parts will be available for the affected fleet within the compliance time. As explained previously, however, the compliance time has been extended from the proposed 15 months to 18 months for other reasons.

The manufacturer advises that it is planning to revise the cited service bulletin to reduce the number of affected airplanes. Based on the data available, the manufacturer states that only four graphite-edged panels were released to the airlines and delivered to the "Group 1" airplanes. Three of the four panels have been identified and located; the fourth has been located within one operator's fleet, but has not yet been located on a specific airplane. Based on this information supplied by the manufacturer, the FAA has revised the applicability of the final rule to reflect a reduction in the number of affected airplanes.

By changing the applicability, the number of affected U.S.-registered airplanes is reduced from 227 (as was indicated in the notice) to 137; likewise, the number of airplanes of the affected design in the worldwide fleet is reduced from 371 to 263. The economic impact paragraph, below, has been revised to incorporate these lower figures.

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the rule with the changes previously described. The FAA has determined that these changes will neither increase the economic burden on any operator nor increase the scope of the AD.

There are approximately 263 Model 757 series airplanes of the affected design in the worldwide fleet. The FAA estimates that 137 airplanes of U.S. registry will be affected by this AD, that it will take approximately 78 work hours per airplane to accomplish the required actions, and that the average labor rate is $55 per work hour. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $587,730. (This figure is $386,100 less than the total cost figure specified in the proposal.)

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption **ADDRESSES.**

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

92-07-15. Boeing: Amendment 39-8211. Docket 91-NM-167-AD.

Applicability: Model 757 series airplanes; variable numbers NA010, NA011 and NA501 through NA531, and line numbers 142 through 371; certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

To prevent the separation of the fixed inboard trailing edge upper panel and consequent damage to airplane structure, hydraulic lines, and wire bundles, accomplish the following:

(a) For airplanes having variable numbers NA010, NA011, and NA501 through NA531: Within the next 18 months after the effective date of this AD, accomplish the procedures specified in either subparagraph (a)(1) or (a)(2) of this AD:

(1) Determine the panel assembly part number of the left and right wing in accordance with Boeing Service Bulletin 757-57-0036, dated June 13, 1991.

(i) If a panel assembly part number is 113N1611-9 (left), -10 (right), -11 (left), or -12 (right): No further action is required.

(ii) If a panel assembly part number is 113N1611-13 (left), -14 (right), -15 (left), or -16 (right): Prior to further flight, modify the fixed inboard trailing edge upper panel in accordance with Boeing Service Bulletin 757-57-0036, dated June 13, 1991.

(2) With the panel installed on the airplane, locate a small area on the sloped surface of the panel near one of the three edges where fasteners are installed through the panel. Sand the small area with light pressure until paint, primer, and Tedlar protective film layers are removed.

(i) If the exposed skin layer is any color other than black, no further action is required.

(ii) If the exposed skin layer is black, modify the fixed inboard trailing edge upper panel, prior to further flight, in accordance with Boeing Service Bulletin 757-57-0036, dated June 13, 1991.

(b) For airplanes having line numbers 142 through 371: Within the next 18 months after the effective date of this AD, modify the fixed inboard trailing edge upper panel in accordance with Boeing Service Bulletin 757-57-0036, dated June 13, 1991.

(c) An alternative method of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Seattle Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate. The request shall be forwarded through an FAA Principal Maintenance Inspector, who may concur or comment and then send it to the Manager, Seattle, ACO.

(d) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

(e) The inspection and modifications shall be done in accordance with Boeing Service Bulletin 757-57-0036, dated June 13, 1991. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington; or at the Office of the Federal Register, 1100 L Street NW., room 8401, Washington, DC.

(f) This amendment becomes effective on May 5, 1992.

Issued in Renton, Washington, on March 10, 1992.

James V. Devany,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 92-7307 Filed 3-30-92; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 91-CE-73-AD; Amendment 39-8219; AD 92-08-08]

Airworthiness Directives; de Havilland Model DHC-3 Otter Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD) that is applicable to de Havilland Model DHC-3 Otter airplanes that have a Servo-Aero Engineering 20000 Series Kit installed on a Pratt & Whitney PT6A-135/135A engine. This action requires a one-time inspection to ensure existence and correct assembly of the fuel condition lever lock, and if nonexistent or incorrectly assembled, installation in accordance with the applicable service information. If the fuel condition lever lock is nonexistent or is incorrectly assembled, inadvertent engine shutdown could occur. The actions specified by this AD are intended to prevent loss of control of the airplane caused by inadvertent engine shutdown.

DATES: Effective May 18, 1992.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of May 18, 1992.

ADDRESSES: Service information that is applicable to this AD may be obtained from Servo-Aero Engineering Inc., 37 Mortensen Avenue, Salinas, California 93905; Telephone (408) 422-7866. This information may also be examined at the Federal Aviation Administration, Central Region, Office of the Assistant Chief Counsel, room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

FOR FURTHER INFORMATION CONTACT: Mr. Chinh Vuong, Aerospace Engineer, FAA, Los Angeles Aircraft Certification Office, 3329 E. Spring Street, Long Beach, California 90806-2425; Telephone (213) 988-5264; Facsimile (213) 988-5210.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations to include an AD that is applicable to de Havilland Model DHC-3 Otter airplanes that have a Servo-Aero Engineering 20000 Series Kit installed on a Pratt & Whitney PT6A-135/135A engine was published in the **Federal Register** on December 27, 1991 (56 FR 67017). The action proposed a one-time inspection to ensure existence and correct assembly of the fuel condition lever lock, and installation if nonexistent or incorrectly assembled. The actions would be accomplished in accordance with the instructions in Servo-Aero Service Bulletin SB001, dated July 24, 1991.

Interested persons have been afforded an opportunity to participate in the making of this amendment. No comments were received on the proposed rule or the FAA's determination of the cost to the public. After careful review, the FAA has determined that air safety and the public interest require the adoption of the rule as proposed except for minor editorial corrections. The FAA has determined that these minor corrections will not change the meaning of the AD nor add any additional burden upon the public than was already proposed.

The FAA estimates that 2 airplanes in the U.S. registry will be affected by this AD, that it will take approximately 4 workhours per airplane to accomplish the required action, and that the average labor rate is approximately $55 an hour. Parts are provided by the manufacturer at no cost to the operator. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $440.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the final evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **"ADDRESSES".**

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new AD:

92-08-08 DE HAVILLAND: Amendment 39-8219; Docket No. 91-CE-73-AD.

Applicability: Model DHC-3 Otter airplanes (all serial numbers) that have a Servo-Aero Engineering 20000 Series Kit installed on a Pratt & Whitney PT6A-135/135A engine, certificated in any category.

Compliance: Required within the next 100 hours time-in-service after the effective date of this AD, unless already accomplished.

To prevent loss of control of the airplane caused by inadvertent engine shutoff, accomplish the following:

(a) Visually inspect the Pratt & Whitney PT6A-135/135A engine to ensure that a fuel condition lever lock, part number (P/N) 20037-18, is installed and ensure that it is correctly assembled in accordance with the instructions in Servo-Aero Service Bulletin SB001, dated July 24, 1990.

(b) If a fuel condition lever lock is not installed or is not assembled in accordance with the instructions in Servo-Aero Service Bulletin SB001, dated July 24, 1990, prior to further flight, install a fuel condition lever position lock, (P/N) 20037-18, in accordance with the instructions in Servo-Aero Service Bulletin SB001, dated July 24, 1990.

(c) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

(d) An alternative method of compliance or adjustment of the compliance time that provides an equivalent level of safety may be approved by the Manager, Los Angeles Aircraft Certification Office, 3329 E. Spring Street, Long Beach, California 90806-2425. The request should be forwarded through an FAA Maintenance Inspector, who may add comments and then send it to the Manager, Los Angeles Aircraft Certification Office.

Note: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Los Angeles Aircraft Certification Office.

(e) The installation required by this AD shall be done in accordance with Servo-Aero Service Bulletin SB001, dated July 24, 1990. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Servo-Aero Engineering Inc., 37 Mortensen Avenue, Salinas, California 93905. Copies may be inspected at the FAA, Central Region, Office of the Assistant Chief Counsel, room 1558, 601 E. 12th Street, Kansas City, Missouri, or at the Office of the Federal Register, 1100 L Street, NW; room 8401, Washington, DC.

(f) This amendment (39–8219) becomes effective on May 18, 1992.

Issued in Kansas City, Missouri, on March 25, 1992.

Richard F. Yotter,

Acting Manager, Small Airplane Directorate, Aircraft Certification Service.

[FR DOC. 92–7396 Filed 3–30–92; 8:45 am]

BILLING CODE 4910–13–M

14 CFR Part 71

[Airspace Docket No. 91–ASO–14]

Revocation of Transition Area, Union, SC

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment revokes the Union, SC, Transition Area. The 700-foot transition was established several years ago to provide controlled airspace protection for instrument flight rules (IFR) aircraft while executing a standard instrument approach procedure (SIAP) planned for the Union County Airport. The SIAP was never implemented, nor are instrument aeronautical operations planned for the airport. Consequently, the additional controlled airspace of the transition area is not required.

EFFECTIVE DATE: 0901 UTC, August 20, 1992.

FOR FURTHER INFORMATION CONTACT: James G. Walters, Airspace Section, System Management Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone (404) 763–7646.

SUPPLEMENTARY INFORMATION:

History

On May 21, 1991, the FAA proposed to amend part 71 of the Federal Aviation Regulations (14 CFR part 71) to revoke the Union, SC, Transition Area (56 FR 23254). Several years ago the 700-foot transition area was established to provide additional controlled airspace for protection of IFR aircraft executing a standard instrument approach procedure planned for the Union County Airport. The instrument approach procedure was never implemented, nor are instrument aeronautical operations planned for the airport. Thus, the additional controlled airspace is not required. Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. The Union, SC, Transition Area was published in § 71.181 of FAA Order 7400.7 effective November 1, 1991, which is incorporated by reference in 14 CFR 71.1.

The Rule

This amendment to part 71 of the Federal Aviation Regulations revokes the Union, SC, Transition Area. This action will raise the floor of controlled airspace from 700 feet to 1200 feet above the surface in vicinity of the Union County Airport.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Aviation safety, Transition areas, Incorporation by reference.

Adoption of the Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

PART 71—[AMENDED]

1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. app. 1348(a), 1354(a), 1510; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389; 49 U.S.C. 106(g); 14 CFR 11.69.

§ 71.1 [Amended]

2. The incorporation by reference in 14 CFR 71.1 of the Federal Aviation Administration Order 7400.7, Compilation of Regulations, published April 30, 1991, and effective November 1, 1991, is amended as follows:

Section 71.181 Transition Areas

* * * * *

Union, SC [Removed]

* * * * *

Issued in East Point, Georgia, on March 19, 1992.

Don Case,

Acting Manager, Air Traffic Division, Southern Region.

BILLING CODE 4910–13–M

FEDERAL TRADE COMMISSION

16 CFR Part 4

Miscellaneous Rules

AGENCY: Federal Trade Commission.

ACTION: Final Rule.

SUMMARY: On August 9, 1989, the Federal Trade Commission ("FTC") requested comments on proposed amendments to its rules to reflect the amendments to the fee and fee waiver provisions of the Freedom of Information Act ("FOIA"), as embodied in the Freedom of Information Reform Act of 1986 ("Reform Act"), and guidelines promulgated by the Office of Management and Budget pursuant to the Reform Act amendments. 54 FR 32654.

Amendments were also proposed to reduce certain fees and increase others to reflect changes in, or more accurate information about, the costs of providing services, and authorize the use of credit cards to pay fees. In addition, amendments were proposed to make all of the fee and fee waiver provisions applicable not only to FOIA requests, but also to requests for public records and to requests from other government agencies seeking information for purposes other than law enforcement. To this end, Rule 4.8 is restructured to include all provisions generally relating to fees and fee waivers for agency records. Other provisions of the current rule, which pertain only to public records, are moved to Rule 4.9.

In addition to changes pertaining to fees and fee waivers, the amendments proposed changes to conform Rule 4.10 ("Nonpublic records") to the provisions of the Reform Act that expand the exemption for investigative records, and that create new categories for records that are not subject to the FOIA.

The FTC has also determined to expand existing delegations, and to authorize the Director of the Information Services Division to decide issues relating to requests for copies of public documents, to decide issues relating to initial requests under the FOIA and the Privacy Act, and to limit public use of copying facilities. The final rule also corrects cross-references found in Rules 4.7, 4.9, and 4.13.

EFFECTIVE DATE: March 31, 1992.

FOR FURTHER INFORMATION CONTACT: Keith Golden, Information Services Division, Federal Trade Commission, 6th & Pennsylvania Avenue, NW., Washington, DC 20580, (202) 326–2410.

SUPPLEMENTARY INFORMATION:

I. Previous Proposed Rule

All of the changes to the Rules that were proposed by the Commission on August 9, 1989 have been incorporated as proposed. See 54 FR 32654. No comments were received regarding those proposals, and the FTC has determined to adopt the proposals without change. Public comment is not required on either the delegation of authority or the technical corrections. See 5 U.S.C. 553(b)(A).

II. Delegation of Authority to Consider Access Requests

The Commission has also determined to expand existing delegations and authorize the Director of the Information Services Division to exercise authority that can now be exercised by the Deputy Executive Director for Planning and Information under its access rules. The Director of the Information Services Division, as well as the Deputy Executive Director for Planning and information, will therefore be authorized to decide issues relating to requests for copies of public documents, to decide issues relating to initial requests under the FOIA and the Privacy Act, and to limit public use of copying facilities. The rules affected by this change include: Rules 4.8(c), (e), (g), and (h); Rules 4.9(a)(4); Rules 4.11(a)(1)(iii)(A), (B), and (C); Rules 4.11(a)(1)(iv)(A), (B), and (C); Rules 4.11(a)(2)(ii) (A) and (B); and Rules 4.13(e), (f), (h), (i)(1), and (j).

III. Technical Corrections

A. Rule 4.7(c)

Procedures for handling *ex parte* communications are outlined in Rule 4.7(c). That rule indicates that the Secretary shall make relevant portions of such information part of the Commission's public record and references Rule 4.8. That reference is in error. The correct reference is to Rule 4.9, which describes the types of documents that are routinely made public by the Commission. The change to Rule 4.7(c) corrects that typographical error.

B. Rule 4.9(a)(2)

In 1987 the Commission delegated authority to the General Counsel to authorize the use of nonpublic information on the basis that the use is in the public interest and will be used for teaching, lecturing, or writing purposes by Commission employees. 52 FR 34765 (September 15, 1987). That delegation of authority is found in Rule 5.12(c). 16 CFR 5.12(c). Rule 4.9(a)(2) references that rule, but was inadvertently not revised when Rule 5.12(c) was amended. The change in Rule 4.9(a)(2) corrects that oversight and clearly states that the General Counsel may make nonpublic records available under the provisions of Rule 5.12(c).

C. Rule 4.13(k)

The cross-reference citation to the Commission's fee schedule is changed to reflect the renumbering of the rule containing that fee schedule.

List of Subjects in 16 CFR Part 4

Administrative practice and procedure, Freedom of Information Act.

In consideration of the foregoing, the Commission amends title 16, chapter 1, subchapter A of the Code of Federal Regulations, as follows:

PART 4—MISCELLANEOUS RULES

1. The authority for part 4 continues to read as follows:

Authority: Sec. 6, 38 Stat. 721; 15 U.S.C. 46.

2. Section 4.7(c)(3) is revised to read as follows:

§ 4.7 Ex parte communications.

* * * * *

(c) * * *

(3) All written responses, and memoranda stating the substance of all oral responses, to the materials described in paragraphs (c)(1) and (2) of this section. The Secretary shall make relevant portions of any such materials part of the public record of the Commission, pursuant to § 4.9, and place them in the docket binder of the proceeding to which it pertains, but they will not be considered by the Commission as part of the record for purposes of decision unless introduced into evidence in the proceeding. The Secretary shall also send copies of the materials to or otherwise notify all parties to the proceeding.

3. Section 4.8(a) is redesignated as § 4.9(a)(3), and amended by adding a paragraph heading before the first sentence. In addition, § 4.9 is amended by revising paragraph (a)(2) and adding paragraph (a)(4) to read as follows:

§ 4.9 Public records.

(a) * * *

(2) Records that are exempt from disclosure or are otherwise not available from the Commission's public record may be made available for inspection and copying only upon request under the procedures set forth in § 4.11, or as provided in §§ 4.10(d)–(g), 4.13, and 4.15(b)(3), by the General Counsel under § 5.12(c), or by the Commission.

* * * * *

(3) *Location of Public Records.* * * *

* * * * *

(4) *Copying of public records.*

(i) *Procedures.* Reseasonable facilities for copying public records are provided at each office of the Commission. Subject to appropriate limitations and the availability of facilities, any person may copy public records available for inspection at each of those offices. Further, the agency will provide copies to any person upon request. Written requests for copies of public records should be addressed to the Director of the Information Services Division, and should specify as clearly and accurately as reasonably possible the records desired. For records that cannot be specified with complete clarity and particularity, requesters must provide descriptions sufficient to enable qualified Commission personnel to locate the records sought. In any instance, the Commission, the Deputy Executive Director for Planning and Information, the Director of the Information Services Division, or the official in charge of each office may prohibit the use of Commission facilities to produce more than one copy of any public record, and may refuse to permit the use of such facilities for copying records that have been published or are publicly available at places other than the offices of the Commission.

(ii) *Costs; agreement to pay costs.* Requesters will be charged search and duplication costs prescribed by Rule 4.8 for requests under this section. All requests shall include a statement of the information needed to determine fees, as provided by § 4.8(c), and an agreement to pay fees (or a statement that the requester will not pay fees if a fee waiver is denied), as provided by § 4.8(d). Requests may also include an application for a fee waiver, as provided by § 4.8(e). Advance payment may be required, as provided by § 4.8(h).

(iii) *Records for sale at another government agency.* If requested materials are available for sale at a another government agency, the requester will not be provided with

copies of the materials but will be advised to obtain them from the selling agency.

4. Section 4.8 is revised to read as follows:

§ 4.8 Costs for obtaining Commission records.

(a) *Definitions.* For the purpose of this section:

(1) The term *search* includes all time spent looking for material that is responsive to a request, including page-by-page or line-by-line identification of material within documents.

(2) The term *duplication* refers to the process of making a copy of a document in order to respond to a request for Commission records.

(3) The term *review* refers to the examination of documents located in response to a request to determine whether any portion of such documents may be withheld, and the reduction or other processing of documents for disclosure. Review does not include time spent resolving general legal or policy issues regarding the release of the document.

(4) The term *direct costs* means expenditures that the Commission actually incurs in processing requests. Not included in direct costs are overhead expenses such as costs of document review facilities or the costs of heating or lighting such a facility or other facilities in which records are stored. The direct costs of specific services are set forth in § 4.8(b)(6).

(b) *Fees.* User fees pursuant to 31 U.S.C. 483(a) and 5 U.S.C. 552(a) shall be charged according to this paragraph.

(1) *Commercial use requesters.* Commercial use requesters will be charged for the direct costs to search for, review, and duplicate documents. A commercial use requester is a requester who seeks information for a use or purpose that furthers the commercial, trade, or profit interests of the requester or the person on whose behalf the request is made.

(2) *Educational requesters, non-commercial scientific institution requesters, and representative of the news media.* Requesters in these categories will be charged for the direct costs to duplicate documents, excluding charges for the first 100 pages. An *educational institution* is a preschool, a public or private elementary or secondary school, an institution of graduate higher education, an institution of undergraduate higher education, an institution of professional education, and an institution of vocational education, which operates a program or programs of scholarly research. A *non-commercial scientific institution* is an institution that is not operated on a *commercial* basis as that term is referenced in paragraph (b)(1) of this section, and that is operated solely to conduct scientific research the results of which are not intended to promote any particular product or industry. A *representative of the news media* is any person actively gathering news for an entity that is organized and operated to publish or broadcast news to the public. *News* means information that is about current events or that would be of current interest to the public.

(3) *Other requesters.* Other requesters will be charged for the direct costs to search for and duplicate documents, except that the first 100 pages of duplication and the first two hours of search time shall be furnished without charge.

(4) *Waiver of small charges.* Notwithstanding the provisions of paragraphs (b)(1), (2), and (3), charges will be waived if the total chargeable fees for a request do not exceed $5.00.

(5) *Materials available without charge.* These provisions do not apply to recent Commission decisions and other materials that may be made available to all requesters without charge while supplies last.

(6) *Schedule of direct costs.* The following uniform schedule of fees applies to records held by all constituent units of the Commission.

Duplication

Paper Copy (up to 8½" X 14")
(Reproduced by Commission staff)—$0.14 per page
(Reproduced by Requester)—$0.05 per page
Computer Paper—$0.14 per page

Microfilm Services

Film Copy—Paper to 16mm film—$0.02 per frame
Fiche Copy—Paper to 105mm fiche—$0.02 per frame + $0.23 per fiche
Film Copy—Duplication of existing 100 ft. roll of 16mm film—$3.35 per roll
Fiche Copy—Duplication of existing 105mm fiche—$0.04 per roll
Paper Copy—Converting existing 16mm film to paper
(Conversion by Commission Staff)—$0.23 per page
(Conversion by Requester)—$0.14 per page
Paper Copy—Converting existing 105mm fiche to paper
(Conversion by Commission Staff)—$0.23 per page
(Conversion by Requester)—$0.14 per page
Film Cassettes—$3.00 per cassette

Other Charges

Computer Tape—$18.50 per tape
Certification—$10.35 each
Express Mail—$5.00 for the first pound and $.80 for each additional pound (per request)

Search and Review Fees

Agency staff is divided into three categories: clerical, attorney/economist, and other professional. Fees for search and review are assessed on a quarter-hourly basis, and are determined by identifying the category into which the staff member(s) conducting the search or review belong(s), determining the average quarter-hourly wages of all staff members within that category, and adding 16 percent to reflect the cost of additional benefits accorded to government employees. The exact fees are calculated and announced periodically and are available from the Public Reference Section, Federal Trade Commission, Sixth Street and Pennsylvania Avenue, NW., Washington, DC 20580; (202) 326–2222.

(c) *Information to determine fees.* Each request for records shall set forth whether the request is made for other than commercial purposes and whether the requester is an educational institution, a noncommercial scientific institution, or a representative of the news media. The Deputy Executive Director for Planning and Information or the Director of the Information Services Division initially, or the General Counsel or Commission on appeal, will use this information, any additional information provided by the requester, and any other relevant information to determine the appropriate fee category in which to place the requester.

(d) *Agreement to pay fees.* (1) Each request that does not contain an application for a fee waiver shall specifically indicate the requester's willingness either:

(i) To pay, in accordance with § 4.8(b) of these rules, whatever fees may be charged for processing the request; or

(ii) A willingness to pay such fees up to a specified amount.

(2) Each request that contains an application for a fee waiver must specifically indicate:

(i) The requester's willingness to pay, in accordance with § 4.8(b) of the rules, whatever fees may be charged for processing the request;

(ii) The requester's willingness to pay fees up to a specified amount; or

(iii) That the requester is not willing to pay fees if the waiver is not granted.

(3) If the agreement required by this section is absent, and if the estimated fees exceed $25.00, the requester will be advised of the estimated fees and the request will not be processed until the requester agrees to pay such fees.

(e) *Public interest fee waivers—*(1) *Procedures.* A requester may apply for a waiver of fees. The requester shall explain why a waiver is appropriate under the standards set forth in this paragraph. The application shall also include a statement, as provided by paragraph (d) of this section, of whether the requester agrees to pay costs if the waiver is denied. The Deputy Executive Director for Planning and Information or the Director of the Information Services Division initially, and the General Counsel or Commission on appeal, will rule on applications for fee waivers.

(2) *Standards.* (i) The first requirement for a fee waiver is that disclosure will likely contribute significantly to public understanding of the operations or activities of the government. This requirement shall be met if:

(A) The subject matter of the requested information concerns the operations or activities of the Federal government;

(B) The disclosure is likely to contribute to an understanding of these operations or activities;

(C) The understanding to which disclosure is likely to contribute is the understanding of the public at large, as opposed to the understanding of the individual requester or a narrow segment of interested persons; and

(D) The likely contribution to public understanding will be significant.

(ii) The second requirement for a fee waiver is that the request not be primarily in the commercial interest of the requester. Satisfaction of this requirement shall be determined by considering:

(A) Whether the requester has a commercial interest that would be furthered by the requested disclosure; and

(B) If so, whether the public interest in disclosure is outweighed by the identified commercial interest of the requester so as to render the disclosure primarily in the requester's commercial interest.

(f) *Unsuccessful searches.* Charges may be assessed for search time even if the agency fails to locate any responsive records or if it locates only records that are determined to be exempt from disclosure.

(g) *Aggregating requests.* If the Deputy Executive Director for Planning and Information or the Director of the Information Services Division initially, or the General Counsel or Commission on appeal, reasonably believes that a requester, or a group of requesters acting in concert, is attempting to evade an assessment of fees by dividing a single request into a series of smaller requests, the requests may be aggregated and fees charged accordingly.

(h) *Advance payment.* If the Deputy Executive Director for Planning and Information or the Director of the Information Service Division initially, or the General Counsel or Commission on appeal, estimates or determines that allowable charges that a requester may be required to pay are likely to exceed $250.00, or if the requester has previously failed to pay a fee within 30 days of the date of billing, the requester may be required to pay some or all of the total estimated charge in advance. Further, the requester may be required to pay all unpaid bills, including accrued interest, prior to processing the request.

(i) *Means of payment.* Payment shall be made by check or money order payable to the Treasury of the United States, or by credit card. Procedures for paying fees by credit card are available from the Public Reference Section, Federal Trade Commission, Sixth Street and Pennsylvania Avenue, N.W., Washington, D.C 20580; (202) 326–2222.

(j) *Interest charges.* The Commission will begin assessing interest charges on an unpaid bill starting on the 31st day following the day on which the bill was sent. Interest will accrue from the date of the billing, and will be calculated at the rate prescribed in 31 U.S.C. 3717.

(k) *Effect of the Debt Collection Act of 1982 (Pub. L. 97–365)* The Commission may pursue repayment, where appropriate, by employing the provisions of the Debt Collection Act, Public Law 97–365), including disclosure to consumer reporting agencies and use of collection agencies.

5. Section 4.10 is amended by revising paragraph (a)(5) and adding paragraph (a)(11) to read as follows:

§ 4.10 Nonpublic information

(a) * * *

(5) Records or information compiled for law enforcement purposes, but only to the extent that production of such law enforcement records or information:

(i) Could reasonably be expected to interfere with enforcement proceedings;

(ii) Would deprive a person of a right to a fair trial or an impartial adjudication;

(iii) Could reasonably be expected to constitute an unwarranted invasion of personal privacy;

(iv) Could reasonably be expected to disclose the identity of a confidential source, including a State, local, or foreign agency or authority or any private institution that furnished information on a confidential basis, and, in the case of a record or information compiled by a criminal law enforcement authority in the course of a criminal investigation, or by an agency conducting a lawful national security intelligence investigation, information furnished by a confidential source;

(v) Would disclose techniques and procedures for law enforcement investigations or prosecutions, or would disclose guidelines for law enforcement investigations or prosecutions if such disclosure could reasonably be expected to risk circumvention of the law; or

(vi) Could reasonably be expected to endanger the life or physical safety of any individual.

* * * * *

(11) Records in an investigation or proceeding that involves a possible violation of criminal law, when there is reason to believe that the subject of the investigation or proceeding is not aware of its pendency, and disclosure of the existence of the investigation could reasonably be expected to interfere with enforcement proceedings. When a request is made for records under § 4.11(a), the Commission may treat the records as not subject to the requirements of the Freedom of Information Act.

* * * * *

6. Section 4.11 is amended as follows:

a. Paragraphs (a)(1)(i)(C), (D), and (E) are revised to read as follows;

b. Paragraphs (a)(1)(iii)(A), (B), and (C) are revised to read as follows;

c. Paragraphs (a)(1)(iv)(A), (B), and (C) are revised to read as follows;

d. Paragraph (a)(2)(i)(A) is revised to read as follows;

e. Paragraph (a)(2)(ii)(B) is revised to read as follows; and

f. Paragraph (d) is amended by adding the following sentence to the end of the paragraph.

§ 4.11 Request for disclosure of records.

(a) * * *

(1) * * *

(i) * * *

(C) *Costs; agreement to pay costs.* Requesters will be charged search and duplication costs prescribed by Rule 4.8 for requests under this section. All requests shall include a statement of the information needed to determine fees, as provided by § 4.8(c), and an agreement to pay fees (or a statement that the requester will not pay fees if a fee waiver is denied), as provided by § 4.8(d). Requests may also include an application for a fee waiver, as provided by § 4.8(e). An advance payment may be required in appropriate cases as provided by § 4.8(h).

(D) *Failure to agree to pay fees.* If a request does not include an agreement to pay fees, and if the requester is notified of the estimated costs pursuant to Rule 4.8(d)(3), the request will be deemed not to have been received until

the requester agrees to pay such fees. If a requester declines to pay fees and is not granted a fee waiver, the request will be denied.

(E) *Records for sale at another government agency.* If requested materials are available for sale at another government agency, the requester will not be provided with copies of the materials but will be advised to obtain them from the selling agency.

* * * * *

(iii) *Time limit for initial determination.* (A) The Deputy Executive Director for Planning and Information or the Director of the Information Services Division shall, within ten (10) working days of the receipt of a request, either grant or deny, in whole or in part, such request.

(B) The Deputy Executive Director for Planning and Information or the Director of the Information Services Division may extend this time limit by not more than ten working days if such extension is:

(1) Necessary for locating records or transferring them from physically separate facilities; or

(2) Necessary to search for, collect, and appropriately examine a voluminous amount of separate and distinct records which are sought in a single or series of closely related requests; or

(3) Necessary for consultation with another agency having a substantial interest in the determination, or for consultation among two or more components of the Commission having substantial subject matter interest therein.

(C) If the Deputy Executive Director for Planning and Information or the Director of the Information Services Division extends the time limit for initial determination pursuant to paragraph (A)(1)(iii)(B), the requester shall be notified in accordance with 5 U.S.C. 552(A)(6)(B).

* * * * *

(iv) *Initial determination.* (A) The Deputy Executive Director for Planning and Information or the Director of the Information Services Division shall grant access to requested records, or any portions thereof, that must be made available under the Freedom of Information Act. He shall deny access to records that are exempt under the Freedom of Information Act (5 U.S.C. 552(b)), unless he determines that such records fall within a category the Commission or the General Counsel has previously authorized to be made available to the public as a matter of policy. Denials shall set forth the reasons therefore and advise the requester that this determination can be appealed to the General Counsel either because the requester believes the records are not exempt, or because the requester believes the General Counsel should exercise his discretion to release such records notwithstanding their exempt status.

(B) The Deputy Executive Director for Planning and Information or the Director of the Information Services Division is deemed to be the sole official responsible for all denials of initial requests, except denials to materials contained in active investigatory files in which case the Director or Deputy Director of the Bureau or the Director of the Regional Office responsible for the investigation shall be the responsible official.

(C) Records to which access has been granted will be made available to the requester and will remain available for inspection and copying for a period not to exceed thirty days from date of notification to the requester unless the requester asks for and receives the consent of the Deputy Executive Director for Planning and Information or the Director of the Information Services Division to a longer period. Records assembled pursuant to a request will remain available only during this period and thereafter will be refiled. Appropriate fees may again be imposed for any new or renewed request for the same records.

* * * * *

(2) * * *

(i) * * *

(A) If an initial request for records is denied in its entirety, the requester may, within 30 days of the date of the determination appeal such denial to the General Counsel. If an initial request is denied in part, the time for appeal shall not expire until 30 days after the date of the letter notifying the requester that all records to which access has been granted have been made available. The appeal shall be in writing and should include a copy of the initial request and a copy of the response to that initial request, if any. The appeal shall be addressed as follows:

Freedom of Information Act Appeal, Office of the General Counsel, Federal Trade Commission, 6th Street and Pennsylvania Avenue, NW., Washington, DC 20580.

* * * * *

(ii) * * *

(B) The Commission or the General Counsel may, by written notice to the requester in accordance with 5 U.S.C. 552(a)(6)(B), extend the time limit for deciding an appeal by not more than ten (10 working days for the reasons set forth in paragraph (a)(1)(iii)(B) of this section, provided that the amount of any extension utilized during the initial consideration of the request under that subsection shall be substracted from the amount of additional time otherwise available.

* * * * *

(d) * * * Requests under this section shall be subject to the fee and fee waiver provisions of § 4.8.

* * * * *

7. Section 4.13(e), (f), (h), (i)(1), (j) and (k) are revised to read as follows:

§ 4.13 Privacy Act rules.

* * * * *

(e) *Disclosure of requested information to individuals.* Within ten (10) working days of receipt of a request under § 4.13(c) the Deputy Executive Director for Planning and Information or the Director of the Information Services Division shall acknowledge receipt of the request. Within thirty (30) working days of the receipt of a request under § 4.13(c) the Deputy Executive Director for Planning and Information or the Director of the Information Services Division shall inform the requester whether a system of records containing retrievable information pertaining to the requester exists, and if so, either that his request has been granted or that the requested records or information is exempt from disclosure pursuant to § 4.13(m). When, for good cause shown, the Deputy Executive Director for Planning and Information or the Director of the Information Services Division is unable to respond within thirty (30) working days of the receipt of the request, he shall notify the requester of that fact and approximately when it is anticipated that a response will be made.

(f) *Special procedures: Medical records.* When the Deputy Executive Director for Planning and Information or the Director of the Information Services Division determines that disclosure of a medical or psychological record directly to a requesting individual could have an adverse effect on the individual, he shall require the individual to designate a medical doctor to whom the record will be transmitted.

* * * * *

(h) *Agency review of request for correction or amendment of record.* Whether presented in person or by mail, requests under § 4.13(g) shall be acknowledged by the Deputy Executive Director for Planning and Information or the Director of the Information Services Division within ten (10) working days of the receipt of the request if action on the request cannot be completed and the individual notified of the results within that time. Thereafter, the Deputy Executive Director for Planning and Information or the Director of the Information Services Division shall promptly either make the requested amendment or correction or inform the requester of his refusal to make the amendment or correction, the reasons for the refusal, and the requester's right to appeal that determination in accordance with § 4.13(i).

(i) *Appeal of initial adverse agency determination.* (1) If an initial request is denied under § 4.13(c) or § 4.13(g), the requester may appeal that determination to the Commission. The appeal shall be in writing and addressed as follows:

Privacy Act Appeal, Office of the General Counsel, Federal Trade Commission, 6th Street and Pennsylvania Avenue, NW., Washington, DC 20580

The Commission shall notify the requester within thirty (30) working days of the receipt of his appeal of the disposition of that appeal, except that the thirty (30) day period may be extended for good cause, in which case the requester will be advised of the approximate date on which review will be completed.

* * * * *

(j) *Disclosure of record to person other than the individual to whom it pertains.* Except as provided by 5 U.S.C. 552a(b), the written request or prior written consent of the individual to whom a record pertains, or of his parent if a minor, or legal guardian if incompetent, shall be required before such record is disclosed. If the individual elects to inspect a record in person and desires to be accompanied by another person, the Deputy Executive Director for Planning and Information or the Director of the Information Services Division may require the individual to furnish a signed statement authorizing his record to be disclosed in the presence of the accompanying named person.

(k) *Fees.* No fees shall be charged for searching for a record, reviewing it, or for copies of records made by the Commission for its own purposes incident to granting access to a requester. Copies of records to which access has been granted under this section may be obtained by the requester from the Deputy Executive Director for Planning and Information upon payment of the reproduction fees provided in § 4.8(b)(6).

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Part 4

[Docket No. RM89-7-001; Order No. 533-A]

Regulations Governing Submittal of Proposed Hydropower License Conditions and Other Matters

March 25, 1992.

AGENCY: Federal Energy Regulatory Commission, Department of Energy.

ACTION: Correction to order on rehearing of final rule.

SUMMARY: This document corrects an error in the section number of an amendment in the order on rehearing of the final rule which was published December 2, 1991 (56 FR 61137). The order addressed requests to modify the final rule adopted in this proceeding governing hydropower procedural regulations.

EFFECTIVE DATE: January 2, 1992.

FOR FURTHER INFORMATION CONTACT: Merrill Hathaway, Office of the General Counsel, (202) 208-0825.

SUPPLEMENTARY INFORMATION: The order on rehearing of the final rule as published on December 2, 1991, is corrected as follows to show the correct section number:

§ 4.30 [Corrected]

On page 61154 in the third column, in § 4.30, paragraph (b)(28) is corrected to read (b)(27).

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 175

[Docket No. 90F-0320]

Indirect Food Additives: Adhesives and Components of Coatings

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the food additive regulations to provide for the safe use of isodecyl benzoate as a component of adhesives for articles intended to contact food. This action is in reponse to a petition filed by Velsicol Chemical Corp.

DATES: Effective March 31, 1992; written objections and requests for a hearing by April 30, 1992.

ADDRESSES: Written objections to the Dockets Management Branch (HFA-305), Food and Drug Administration, rm. 1-23, 12420 Parklawn Dr., Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Daniel N. Harrison, Center for Food Safety and Applied Nutrition (HFF-335), Food and Drug Administration, 200 C Street SW., Washington, DC 20204, 202-254-9500.

SUPPLEMENTARY INFORMATION: In a notice published in the Federal Register of February 8, 1990 (55 FR 4481), FDA announced that a food additive petition (FAP 0B4187) had been filed by Velsicol Chemical Corp., 5600 North River Rd., Rosemont, IL 60018-5119, proposing that § 175.105 Adhesives (21 CFR 175.105) be amended to provide for the safe use of isodecyl benzoate as a component of adhesives for articles intended to contact food.

FDA has evaluated data in the petition and other relevant material. The agency concludes that these data establish the safe use of the food additive isodecyl benzoate, and that § 175.105 should be amended as set forth below.

In accordance with § 171.1(h) (21 CFR 171.1(h)), the petition and the documents that FDA considered and relied upon in reaching its decision to approve the petition are available for inspection at the Center for Food Safety and Applied Nutrition by appointment with the information contact person listed above. As provided in 21 CFR 171.1(h), the agency will delete from the documents any materials that are not available for public disclosure before making the documents available for inspection.

The agency has carefully considered the potential environmental effects of this action. FDA has concluded that the action will not have a significant impact on the human environment, and that an environmental impact statement is not required. The agency's finding of no significant impact and the evidence supporting that finding, contained in an environmental assessment, may be seen in the Dockets Management Branch (address above) between 9 a.m. and 4 p.m., Monday through Friday.

Any person who will be adversely affected by this regulation may at any time on or before April 30, 1992 file with the Dockets Management Branch (address above) written objections thereto. Each objection shall be separately numbered, and each numbered objection shall specify with particularity the provisions of the regulation to which objection is made and the grounds for the objection. Each numbered objection on which a hearing is requested shall specifically so state. Failure to request a hearing for any particular objection shall constitute a waiver of the right to a hearing on that objection. Each numbered objection for which a hearing is requested shall include a detailed description and analysis of the specific factual information intended to be presented in support of the objection in the event that a hearing is held. Failure to include such a description and analysis for any particular objection shall constitute a waiver of the right to a hearing on the objection. Three copies of all documents shall be submitted and shall be identified with the docket number found in brackets in the heading of this document. Any objections received in response to the regulation may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

List of Subjects in 21 CFR Part 175

Adhesives, Food additives, Food packaging.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Director, Center for Food Safety and Applied Nutrition, 21 CFR part 175 is amended as follows:

PART 175—INDIRECT FOOD ADDITIVES: ADHESIVES AND COMPONENTS OF COATINGS

1. The authority citation for 21 CFR part 175 continues to read as follows:

Authority: Secs. 201, 402, 409, 706 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321, 342, 348, 376).

2. Section 175.105 is amended in paragraph (c)(5) by alphabetically adding a new entry to the table to read as follows.

§ 175.105 Adhesives.

Director, Center for Food Safety and Applied Nutrition.

[FR Doc. 92-7324 Filed 3-30-92; 8:45 am]

BILLING CODE 4160-01-M

21 CFR Part 178

[Docket No. 90F-0350]

Indirect Food Additives: Adjuvants, Production Aids, and Sanitizers

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the food additive regulations to provide for the additional safe uses of hexamethylene bis(3,5-di-*tert*-butyl-4-hydroxyhydrocinnamate) as a stabilizer in certain polymers, adhesives, and waxes intended for use in food-contact articles. This action responds to a petition filed by Ciba-Geigy Corp.

DATES: Effective March 31, 1992; written objections and requests for a hearing by April 30, 1992.

ADDRESSES: Submit written objections to the Dockets Management Branch (HFA-305), Food and Drug Administration, rm. 1-23, 12420 Parklawn Dr., Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Sandra L. Varner, Center for Food Safety and Applied Nutrition (HFF-335), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202-254-9511.

SUPPLEMENTARY INFORMATION: In a notice published in the **Federal Register** of November 21, 1990 (55 FR 48693), FDA announced that a food additive petition (FAP 0B4227) had been filed by Ciba-Geigy Corp., Seven Skyline Dr., Hawthorne, NY 10532-2188, proposing that § 178.2010 Antioxidants and/or stabilizers for polymers (21 CFR 178.2010) be amended to provide for the additional safe uses of hexamethylene bis(3,5-di-*tert*-butyl-4-hydroxyhydrocinnamate) as a stabilizer in polymers complying with § 175.105 Adhesives (21 CFR 175.105), § 175.125 Pressure-sensitive adhesives (21 CFR 175.125), § 175.300 Resinous and polymeric coatings (21 CFR 175.300), § 175.320 Resinous and polymeric coatings for polyolefin films (21 CFR 175.320), § 176.170 Components of paper and paperboard in contact with aqueous and fatty foods (21 CFR 176.170), § 176.180 Components of paper and paperboard in contact with dry food (21 CFR 176.180), § 177.1210 Closures with sealing gaskets for food containers (21 CFR 177.1210), § 177.2600 Rubber articles intended for repeated use (21 CFR 177.2600), § 178.3800 Preservatives for wood (21 CFR 178.3800), and § 178.3850 Reinforced wax (21 CFR 178.3850).

FDA has evaluated data in the petition and other relevant material. The agency concludes that these data support the requested safe uses of the additive, and that the regulations should be amended in § 178.2010 as set forth below.

In accordance with § 171.1(h) (21 CFR 171.1(h)), the petition and the documents that FDA considered and relied upon in reaching its decision to approve the petition are available for inspection at the Center for Food Safety and Applied Nutrition by appointment with the information contact person listed above. As provided in 21 CFR 171.1(h), the agency will delete from the documents any materials that are not available for public disclosure before making the documents available for inspection.

The agency has carefully considered the potential environmental effects of this action. FDA has concluded that the action will not have a significant impact on the human environment, and that an environmental impact statement is not required. The agency's finding of no significant impact and the evidence supporting that finding, contained in an environmental assessment, may be seen in the Dockets Management Branch (address above) between 9 a.m. and 4 p.m., Monday through Friday.

Any person who will be adversely affected by this regulation may at any time on or before April 30, 1992, file with the Dockets Management Branch (address above) written objectives thereto. Each objection shall be separately numbered, and each numbered objection shall specify with particularity the provisions of the regulation to which objection is made and the grounds for the objection. Each numbered objection on which a hearing is requested shall specifically so state. Failure to request a hearing for any particular objection shall constitute a waiver of the right to a hearing on that objection. Each numbered objection for which a hearing is requested shall include a detailed description and analysis of the specific factual information intended to be presented in support of the objection in the event that a hearing is held. Failure to include such a description and analysis for any particular objection shall constitute a waiver of the right to a hearing on the objection. Three copies of all documents shall be submitted and shall be identified with the docket number found in brackets in the heading of this document. Any objections received in response to the regulation may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

List of Subjects in 21 CFR Part 178

Food additives, Food packaging.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Director, Center for Food Safety and Applied Nutrition, 21 CFR part 178 is amended as follows:

PART 178—INDIRECT FOOD ADDITIVES: ADJUVANTS, PRODUCTION AIDS, AND SANITIZERS

1. The authority citaton for 21 CFR part 178 continues to read as follows:

Authority: Secs. 201, 402, 409, 706 of the Federal, Food, Drug, and Cosmetic Act (21 U.S.C. 321, 342, 348, 376).

2. Section 178.2010 is amended in the table in paragraph (b) by revising the "Limitations" column for the entry "Hexamethylenebis (3, 5-di-*tert*-butyl-4-hydroxyhydrocinnamate)" to read as follows:

§ 178.2010 Antioxidants and/or stabilizers for polymers.

* * * * *

(b) * * *

Substances	Limitations
* * * * *	
Hexamethylenebis (3, 5-di-*tert*-butyl-4-hydroxyhydrocinnamate) (CAS Reg. No. 35074-77-2).	For use only: 1. As provided in § 177.2470(b)(1) and § 177.2480(b)(1) of this chapter. 2. In adhesives complying with § 175.105 of this chapter. 3. At levels not to exceed 1 percent by weight in pressure-sensitive adhesives complying with § 175.125 of this chapter. 4. At levels not to exceed 1 percent by weight in can end cement formulations complying with § 175.300(b)(3)(xxxi) of this chapter. 5. At levels not to exceed 1 percent by weight in side seam cement formulations complying with § 175.300(b)(3)(xxxii) of this chapter. 6. At levels not to exceed 1 percent by weight in petroleum alicyclic hydrocarbon resins, polyamide resins, and terpene resins complying with § 175.320 of this chapter. 7. At levels not to exceed 1 percent by weight in rosin and rosin derivatives when used in accordance with § 178.170(a)(5) of this chapter. 8. At levels not to exceed 1 percent by weight in petroleum alicyclic hydrocarbon resins or their hydrogenated products complying with § 178.170(b)(2) of this chapter. 9. At levels not to exceed 1 percent by weight in terpene resins complying with § 175.300(b)(3)(xi) of this chapter, when such terpene resins are used in accordance with § 178.170(b)(1) of this chapter. 10. At levels not to exceed 1 percent by weight in resins and polymers authorized for use in accordance with § 178.180 of this chapter. 11. At levels not to exceed 1 percent by weight in closures with sealing gaskets complying with § 177.1210 of this chapter. 12. At levels not to exceed 1 percent by weight in rubber articles intended for repeated use complying with § 177.2600 of this chapter. 13. At levels not to exceed 1 percent by weight in petroleum hydrocarbon resin and rosins and rosin derivatives used in accordance with § 178.3800 of this chapter. 14. At levels not to exceed 1 percent by weight in reinforced wax complying with § 178.3850 of this chapter.

BILLING CODE 4160-01-M

FOOD AND DRUG ADMINISTRATION

21 CFR Parts 182 and 184

[Docket No. 78N-0335]

Glycerophosphates; Affirmation of GRAS Status as Direct Human Food Ingredients

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is: (1) Affirming that calcium glycerophosphate is generally recognized as safe (GRAS) as a direct human food ingredient in conventional food: (2) removing calcium, manganese, and potassium glycerophosphates from 21 CFR Part 182, subpart I, for use as nutrients used in food; and (3) taking no action with respect to the listing of calcium, manganese, and potassium glycerophosphates in 21 CFR part 182, subpart F, for use in dietary supplements. The safety of these ingredients as nutrients in food has been evaluated under the comprehensive safety review conducted by the agency.

DATES: Effective April 30, 1992. The Director of the Office of the Federal Register approves the incorporation by reference in accordance with 5 U.S.C.

552(a) and 1 CFR part 51 of a certain publication in 21 CFR 184.1201, effective on April 30, 1992.

FOR FURTHER INFORMATION CONTACT: Julius Smith, Center for Food Safety and Applied Nutrition (HFF–335), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–254–9500.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of May 15, 1979 (44 FR 28336), FDA published a proposal to affirm that calcium glycerophosphate is GRAS for use as a direct human food ingredient in conventional food. (FDA is using the term "conventional food" to refer to food that would fall within any of the 43 categories listed in § 170.3(n) (21 CFR 170.3(n)). The agency also proposed to remove potassium glycerophosphate and manganese glycerophosphate from the list of GRAS ingredients because there were no reported uses for these substances. The proposal was published in accordance with the announced FDA review of the safety of GRAS and prior-sanctioned food ingredients.

In accordance with § 170.35 (21 CFR 170.35), copies of the scientific literature review on glycerophosphates and the report of the Select Committee on GRAS Substances on glycerophosphates are available for public review in the Dockets Management Branch (HFA–305), Food and Drug Administration, rm. 1–23, 12420 Parklawn Dr., Rockville, MD 20857. Copies of these documents also are available for public purchase from the National Technical Information Service, as announced in the proposal.

In addition to proposing to affirm the GRAS status of calcium glycerophosphate and to remove manganese and potassium glycerophosphate from the GRAS list, FDA gave public notice that it was unaware of any prior-sanctioned food ingredient uses for these substances other than the uses listed in part 181—Prior-Sanctioned Food Ingredients (21 CFR part 181). Persons asserting additional or extended uses in accordance with approvals granted by the U.S. Department of Agriculture or FDA before September 7, 1958, were given notice to submit proof of those sanctions, so that the safety of any prior-sanctioned uses could be determined. That notice was also an opportunity to have additional prior-sanctioned uses of the glycerophosphates recognized by issuance of an appropriate regulation under part 181, or affirmed as GRAS under part 184 or 186 (21 CFR part 184 or 186), as appropriate. FDA also gave notice that failure to submit proof of any applicable prior sanction in response to the proposal would constitute a waiver of the right to assert that sanction at any future time.

No reports of prior-sanctioned uses for these ingredients were submitted in response to the proposal. Therefore, in accordance with the proposal, any right to assert a prior sanction for uses of these ingredients under conditions different from those set forth in part 181 has been waived.

After publication of the May 5, 1979, proposal to affirm the GRAS status of calcium glycerophosphate and to remove manganese and potassium glycerophosphates from the GRAS list, the agency issued, in the **Federal Register** of September 5, 1980 (45 FR 58837), a document outlining the reorganization of 21 CFR part 182 to provide separate listings for the use of GRAS ingredients in dietary supplements and for the use of the same ingredients as nutrients in conventional food. The reorganization document stated that creation of these separate lists was intended to facilitate the separate GRAS reviews of these substances as nutrients and as dietary substances. The reorganization thus resulted in the listings of calcium, manganese, and potassium glycerophosphates on both the GRAS "Dietary Supplements" list (21 CFR 182, subpart F), and the GRAS "Nutrients" list (21 CFR 182, subpart I).

One comment was received in response to the agency's proposal on glycerophosphates. The comment submitted information on the use of manganese glycerophosphate in enteral dietary formulas which are used under medical supervision. The company, a pharmaceutical manufacturer, stated that this use was not included in FDA's survey of food manufacturers for the purpose of determining the specific foods in which various glycerophosphates are used and the levels of usage. The company, therefore, requested that the agency retain manganese glycerophosphate on the GRAS list to permit its continued use in enteral dietary supplement formulas.

FDA's May 15, 1979 (44 FR 28336), proposal to affirm the GRAS status of calcium glycerophosphate and to remove manganese and potassium glycerophosphates from the GRAS list addressed the use of these ingredients in conventional foods (those described in the food categories listed in the 21 CFR 170.3(n)). The proposal did not address the use of these ingredients in dietary supplements or in enteral formulas designed for use under medical supervision in the nutritional management of patients. Although use in enteral formulas was reported in the comments to this proposal, FDA did not take any action on the use of the subject glycerophosphates in dietary supplements or enteral formulas because it had only limited information on such uses. Therefore, calcium, manganese, and potassium glycerophosphates will continue to be listed as GRAS for use in dietary supplements in part 182, subpart F. Likewise, even though enteral formulas are not dietary supplements, use of vitamins and minerals in enteral formulas will be considered to be covered under the GRAS listing for dietary supplements in part 182, subpart F.

Therefore, in the **Federal Register** of March 14, 1991 (56 FR 10843), a tentative final rule was published: (1) Affirming that calcium glycerophosphate is GRAS as a direct human food ingredient in conventional food; (2) removing calcium, manganese and potassium glycerophosphates from 21 CFR part 182, subpart I, for use an nutrients used in food; and (3) taking no action with respect to the listing of calcium, manganese, and potassium glycerophosphates in 21 CFR part 182, subpart F, for use in dietary supplements. This action was published as a tentative final rule because the proposal to affirm glycerophosphate was published 12 years earlier in the **Federal Register** of May 15, 1979 (44 FR 28336). The agency believed that because of the length of time that has passed, it would be prudent to allow an opportunity for additional comments on the proposed action.

No comments were received in response to the tentative final rule. Therefore, the agency is issuing this final rule to affirm calcium glycerophosphate for use in conventional foods and to remove calcium, manganese, and potassium glycerophosphates from subpart I, of part 182 for use as nutrients. FDA is retaining the listing of calcium, manganese, and potassium glycerophosphates in part 182, subpart F, pending further action on the dietary supplement use of these ingredients.

As explained in the tentative final rule, the format of the final regulation for calcium glycerophosphate differs from the format of the proposed regulation. FDA has modified § 184.1201(c) to make clear the agency's determination that its GRAS affirmation is based upon current good manufacturing practice (CGMP) conditions of use, including both the technical effects and the food categories listed. This change removes the maximum CGMP level of use that was included in the proposal. FDA concludes, that it is unnecessary to include this level of use in the regulation to assure the safe use of this ingredient.

FDA is also modifying this final rule to adopt specifications for calcium glycerophosphate that have been published in the "Food Chemicals Codex," 3d Ed. (1981), pp. 51–52. No differences exist between these specifications and the specifications that were proposed for adoption from the "Food Chemicals Codex," 2d Ed. (1972), pp. 130–131. This change, therefore, has no substantive effect. Therefore, the agency is adding new § 184.1201 to 21 CFR subpart B.

In the tentative final rule, the agency determined under 21 CFR 25.24(b)(7) that the GRAS affirmation of calcium glycerophosphate as a direct human food ingredient for use in conventional food under 21 CFR 184.1201 is an action of a type that does not individually or cumulatively have a significant effect on the human environment. No comments were submitted on this aspect of the tentative final rule. Therefore, FDA continues to conclude that neither an environmental assessment nor an environmental impact statement is required.

As explained in the tentative final rule, the agency has carefully considered the potential environmental effects of removing manganese glycerophosphate and potassium glycerophosphate from the GRAS list for use as nutrients in food (21 CFR part 182, subpart I). FDA has concluded that this action will not have a significant impact on the human environment and that an environmental impact statement is not required. The agency's finding of no significant impact and the evidence supporting that finding, contained in an environmental assessment, may be seen at the Dockets Management Branch, (address above) between 9 a.m. and 4 p.m., Monday through Friday.

In accordance with the Regulatory Flexibility Act, the agency has considered the potential effects that this rule would have on small entities, including small businesses. In accordance with section 605(b) of the Regulatory Flexibility Act, the agency has determined, that no significant economic impact on a substantial number of small entities would derive from this action.

In accordance with Executive Order 12291, FDA has analyzed the potential economic effects of this final rule and has determined that the final rule is not a major rule as determined by that Order.

The agency's finding of no major economic impact and no significant impact on a substantial number of small entities, and the evidence supporting these findings, are contained in a threshold assessment which may be seen in the Dockets Management Branch (address above).

List of Subjects

21 CFR Part 182

Food ingredients, Food packaging, Spices and flavorings.

21 CFR Part 184

Food ingredients, Incorporation by reference.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Director, Center for Food Safety and Applied Nutrition, 21 CFR parts 182 and 184 are amended as follows:

PART 182—SUBSTANCES GENERALLY RECOGNIZED AS SAFE

1. The authority citation for 21 CFR part 182 continues to read as follows:

Authority: Secs. 201, 402, 409, 701 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321, 342, 348, 371).

§§ 182.8201, 182.8455, and 182.8628 [Removed]

2. Section 182.8201 *Calcium glycerophosphate*, § 182.8455 *Manganese glycerophosphate*, and § 182.8628 *Potassium glycerophosphate* are removed from subpart I.

PART 184—DIRECT FOOD SUBSTANCES AFFIRMED AS GENERALLY RECOGNIZED AS SAFE

3. The authority citation for 21 CFR part 184 continues to read as follows:

Authority: Secs. 201, 402, 409, 701 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321, 342, 348, 371).

4. New § 184.1201 is added to subpart B to read as follows:

§ 184.1201 Calcium glycerophosphate.

(a) Calcium glycerophosphate ($C_3H_7CaO_6P$, CAS Reg. No. 27214–00–2) is a fine, white, odorless, almost tasteless, slightly hygroscopic powder. It is prepared by neutralizing glycerophosphoric acid with calcium hydroxide or calcium carbonate. The commercial product is a mixture of calcium β-, and *D*-, and *L*-α-glycerophosphate.

(b) The ingredient meets the specifications of the "Food Chemicals Codex," 3d Ed. (1981), pp. 51–52, which is incorporated by reference in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from the National Academy Press, 2101 Constitution Ave. NW., Washington, DC 20418, or may be examined at the Office of the Federal Register, 1100 L St. NW., Washington, DC.

(c) In accordance with § 184.1(b)(1), the ingredient is used in food with no limitation other than current good manufacturing practice. The affirmation of this ingredient as generally recognized as safe (GRAS) as a direct human food ingredient is based upon the following current good manufacturing practice conditions of use:

(1) The ingredient is used as a nutrient supplement as defined in § 170.3(o)(20) of this chapter.

(2) The ingredient is used in gelatins, puddings, and fillings as defined in § 170.3(n)(22) of this chapter.

(d) Prior sanctions for this ingredient different from the uses established in this section or different from that as set forth in part 181 of this chapter, do not exist or have been waived.

Dated: March 20, 1992.

Fred R. Shank,

Director, Center for Food Safety and Applied Nutrition.

BILLING CODE 4160–01–M

---

21 CFR Parts 312, 606, 610, 630, and 640

Drugs and Biologics; Technical Amendments

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule; technical amendment.

SUMMARY: The Food and Drug Administration (FDA) is amending the drugs and biologics regulations to correct certain typographical and other inadvertent errors. This action is being taken to clarify and improve the accuracy of the regulations.

EFFECTIVE DATE: March 31, 1992.

FOR FURTHER INFORMATION CONTACT: Joanne Binkley, Center for Biologics Evaluation and Research (HFB–132), Food and Drug Administration, 3800 Rockville Pike, Bethesda, MD 20892, 301–295–8188.

SUPPLEMENTARY INFORMATION: FDA has discovered certain nonsubstantive errors that have been incorporated into the agency's codified regulations on drugs and biologics. FDA is correcting

these errors. The errors in the regulations are as follows:

1. In 21 CFR 312.145 *Guidelines*, the address for the Congressional, Consumer, and International Affairs Staff listed in paragraph (b) is incorrect. This office has been relocated and the agency is correcting the address.

2. In 21 CFR 606.121 *Container label*, the address for the Dockets Management Branch listed in paragraph (a) is incorrect. In the **Federal Register** of June 10, 1991 (56 FR 26668), FDA announced the relocation of the Dockets Management Branch, effective June 14, 1991.

3. In 21 CFR 610.41 *History of hepatitis B surface antigen*, the reference to § 640.75 should be changed to § 640.120. In the **Federal Register** of March 21, 1990 (55 FR 10420), § 640.75 *Alternative procedures* was removed. The alternative procedures for Source Plasma formerly codified as § 640.75 are included in the more general alternative procedures codified at § 640.120.

4. In 21 CFR 630.4 *Tests for safety*, the words "injection" and "penicillin" in paragraph (e)(3) were misspelled. The agency is correcting these errors.

5. In 21 CFR 640.67 *Laboratory tests*, the reference to § 610.40 (d)(1) and (d)(2) in paragraph (a) was incorrectly listed as § 610.40 (d)(2) and (3). The agency is correcting this error.

6. In 21 CFR 640.120 *Alternative procedures*, the **Federal Register** citation at the end of the section inadvertently listed "March 22, 1990" as the date of publication. It should have read "March 21, 1990."

Publication of this document constitutes final action on these changes under the Administrative Procedure Act (5 U.S.C. 553). Notice and public procedure are unnecessary because FDA is merely correcting nonsubstantive errors.

List of Subjects

21 CFR Part 312

Drugs, Exports, Imports, Investigations, Labeling, Medical research, Reporting and recordkeeping requirements, Safety.

Part 606

Blood, Labeling, Laboratories, Reporting and recordkeeping requirements.

Part 610

Biologics, Labeling, Reporting and recordkeeping requirements.

Part 630

Biologics, Labeling.

Part 640

Blood, Labeling, Reporting and recordkeeping requirements.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs, 21 CFR Parts 312, 606, 610, 630, and 640 are amended as follows:

PART 312—INVESTIGATIONAL NEW DRUG APPLICATION

1. The authority citation for 21 CFR part 312 continues to read as follows:

Authority: Secs. 201, 301, 501, 502, 503, 505, 506, 507, 701 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321, 331, 351, 352, 353, 355, 356, 357, 371); sec. 351 of the Public Health Service Act (42 U.S.C. 262).

§ 312.145 [Amended]

2. Section 312.145 *Guidelines* is amended in paragraph (b) by removing "Park Bldg., rm. 158, 5600 Fishers Lane, Rockville, MD 20857" and adding in its place "8800 Rockville Pike, Bethesda, MD 20892".

PART 606—CURRENT GOOD MANUFACTURING PRACTICE FOR BLOOD AND BLOOD COMPONENTS

3. The authority citation for 21 CFR part 606 continues to read as follows:

Authority: Secs. 201, 301, 501, 502, 505, 510, 520, 701, 704 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321, 331, 351, 352, 355, 360, 360j, 371, 374); secs. 215, 351, 353, 361 of the Public Health Service Act (42 U.S.C. 216, 262, 263a, 264).

§ 606.121 [Amended]

4. Section 606.121 *Container label* is amended in paragraph (a) by removing "rm. 4–62, 5600 Fishers Lane," and adding in its place "rm. 1–23, 12420 Parklawn Dr.,".

PART 610—GENERAL BIOLOGICAL PRODUCTS STANDARDS

5. The authority citation for 21 CFR part 610 continues to read as follows:

Authority: Secs. 201, 501, 502, 503, 505, 510, 701 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321, 351, 352, 353, 355, 360, 371); secs. 215, 351, 352, 353, 361 of the Public Health Service Act (42 U.S.C. 216, 262, 263, 263a, 264).

§ 610.41 [Amended]

6. Section 610.41 *History of hepatitis B surface antigen* is amended by removing "§ 640.75" and adding in its place "§ 640.120".

PART 630—ADDITIONAL STANDARDS FOR VIRAL VACCINES

7. The authority citation for 21 CFR part 630 continues to read as follows:

Authority: Secs. 201, 501, 502, 503, 505, 510, 701 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321, 351, 352, 353, 355, 360, 371); secs. 215, 351, 352, 353, 361 of the Public Health Service Act (42 U.S.C. 216, 262, 263, 263a, 264).

§ 630.4 [Amended]

8. Section 630.4 *Tests for safety* is amended in paragraph (e)(3) by removing "inpection" and adding in its place "injection" and by removing "pencillin" and adding in its place "penicillin".

PART 640—ADDITIONAL STANDARDS FOR HUMAN BLOOD AND BLOOD PRODUCTS

9. The authority citation for 21 CFR part 640 continues to read as follows:

Authority: Secs. 201, 501, 502, 503, 505, 510, 701 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321, 351, 352, 353, 355, 360, 371); secs. 215, 351, 352, 353, 361 of the Public Health Service Act (42 U.S.C. 216, 262, 263, 263a, 264).

§ 640.67 [Amended]

10. Section 640.67 *Laboratory tests* is amended in paragraph (a) by removing "§ 610.40(d) (2) and (3)" and adding in its place "§ 610.40 (d)(1) and (d)(2)".

Dated: March 25, 1992.

Michael R. Taylor,

Deputy Commissioner for Policy.

BILLING CODE 4160–01–M

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

21 CFR Part 1308

Schedules of Controlled Substances: Procedures for Removing Certain Anabolic Steroid Products From all or Part of the Controlled Substances Act; Correction

AGENCY: Drug Enforcement Administration, Department of Justice.

ACTION: Correction to final regulations.

SUMMARY: This document contains corrections to the final regulations which were published Friday, August 30, 1991 (56 FR 42935). The regulations relate to the administrative procedures for removing regulatory control from the manufacture, distribution and possession of specific products which contain anabolic steroids.

EFFECTIVE DATE: March 31, 1992.

FOR FURTHER INFORMATION CONTACT: Howard McClain, Jr., Chief, Drug and Chemical Evaluation Section, Drug Enforcement Administration, Washington, DC 20537, Telephone: (202) 307–7183.

SUPPLEMENTARY INFORMATION: The final regulations that are the subject of these corrections describe a process by which qualifying products will be identified as being excluded from, or exempt from, certain regulatory controls of the Controlled Substances Act (21 U.S.C. 801 et seq.). As published, the final regulations contain errors which may prove to be confusing and are in need of clarification.

Accordingly, the publication on August 30, 1991, of the final regulations which were the subject of FR Doc. 91–20824, is corrected as follows:

§ 1308.33 [Corrected]

On page 42937, in first column, in § 1308.33, paragraph (c)(10)(a) and (b) are correctly designated as (c)(10) (i) and (ii).

* * * * *

Dated: March 25, 1992.

Robert C. Bonner,

Administrator of Drug Enforcement.

26 CFR Part 1

[T.D. 8361]

RIN 1545–AO66

Definition of Compensation for Qualified Plans; Correction

AGENCY: Internal Revenue Service, Treasury.

ACTION: Correction to final regulations.

SUMMARY: This document contains corrections to Treasury Decision 8361, which was published in the **Federal Register** for Thursday, September 19, 1991 (56 FR 47659). The final regulations relate to the scope and meaning of the term "compensation" for tax-qualified retirement plans under section 414(s) of the Internal Revenue Code of 1986.

EFFECTIVE DATE: September 19, 1991.

FOR FURTHER INFORMATION CONTACT: Marjorie Hoffman, (202) 377–9372 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

The final regulations that are the subject of these corrections conform the regulations to section 1115 of the Tax Reform Act of 1986 and section 1011(j)(1) of the Technical and Miscellaneous Revenue Act of 1988. These regulations provide rules for defining compensation for purposes of applying any provision that specifically refers to section 414(s).

Need for Correction

As published, T.D. 8361 contains errors which may prove to be misleading and are in need of clarification.

Correction of Publication

Accordingly, the publication of final regulations (T.D. 8361), which was the subject of FR Doc. 91–21925, is corrected as follows:

§ 1.414(s)–1 [Corrected]

1. On page 47662, column 3, § 1.414(s)–1(a)(2), line 9, the language "under a pension, profit sharing, or stock" is corrected to read "under a pension, profit-sharing, or stock".

2. On page 47664, column 1, § 1.414(s)–1(d)(2)(ii), lines 13 and 14, the language "differential, and call-in premiums); bonuses; or any one of the types of" is corrected to read "differential, and call-in premiums), bonuses, or any one of the types of ".

§ 1.415–2 [Corrected]

3. On page 47668, column 2, § 1.415–2(d)(10), line 8, the language "paragraph (d)(3) of this paragraph, if" is corrected to read "paragraph (d)(3) of this section, if".

4. On page 47668, column 2, § 1.415–2(d)(11)(i), line 2, the language "*under sections 6041 and 6051.*" is corrected to read "*under sections 6041, 6051, and 6052.*".

5. On page 47668, column 3, § 1.415–2(d)(11)(i), lines 4 through 6 from the top of the column, the language "written statement under sections 6041(d) and 6051(a)(3). See §§ 1.6041–1(a), 1.6041–2(a)(1) and 31.6051–1(a)(1)(i)(c)." is corrected to read "written statement under sections 6041(d), 6051(a)(3), and 6052. See §§ 1.6041–1(a), 1.6041–2(a)(1), 1.6052–1, and 1.6052–2, and also see § 31.6051–1(a)(1)(i)(C) of this chapter.".

Dale D. Goode,

Federal Register Liaison Officer, Assistant Chief Counsel (Corporate).

26 CFR Part 1

[T.D. 8362]

RIN 1545–AO62

Limitation on Annual Compensation for Qualified Plans; Correction

AGENCY: Internal Revenue Service, Treasury.

ACTION: Correction to final regulations.

SUMMARY: This document contains corrections to Treasury Decision 8362, which was published in the **Federal Register** for Thursday, September 19, 1991 (56 FR 47603). The final regulations relate to the $200,000 annual compensation limit for tax-qualified retirement plans under section 401(a)(17) of the Internal Revenue Code of 1986.

EFFECTIVE DATE: September 19, 1991.

FOR FURTHER INFORMATION CONTACT: Marjorie Hoffman, (202) 377–9372 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

The final regulations that are the subject of these corrections conform the regulations to section 1106 of the Tax Reform Act of 1986 and section 1011(d)(4) of the Technical and Miscellaneous Revenue Act of 1988. These regulations provide guidance necessary to comply with the law and affect sponsors of, and participants in, tax-qualified retirement plans.

Need for Correction

As published, T.D. 8362 contains errors which may prove to be misleading and are in need of clarification.

Correction of Publication

Accordingly, the publication of final regulations (T.D. 8362), which was the subject of FR Doc. 91–21926, is corrected as follows:

§ 1.401(a)(17) [Corrected]

1. On page 47605, column 2, § 1.401(a)(17)–1(a)(1), line 12, the language "compensation in excess of the annual" is corrected to read "compensation in excess of the annual compensation".

2. On page 47605, column 2, § 1.401(a)(17)–1(a)(1), line 4 from the bottom of that paragraph, the lanaguage "subject to the annual limitation. These" is corrected to read "subject to the annual compensation limit. These".

3. On page 47605, column 3, § 1.401(a)(17)–1(b)(2), line 3, the language "paragraph (b), the limit in effect for the" is corrected to read

"paragraph (b), the annual compensation limit in effect for the".

4. On page 47605, column 3, § 1.401(a)(17)–1(b)(3)(iii), line 2, the language "*than 12–months*—(A) *Proration required.*" is corrected to read "*than 12 months*—(A) *Proration required.*"

5. On page 47606, column 1, § 1.401(a)(17)–1(b)(3)(iii)(A), line 11 from the top of the column, the language "accrual for all months, then the annual" is corrected to read "accruals for all months, then the annual".

6. On page 47606, column 2, § 1.401(a)(17)–1(b)(6), in *Example 2*, line 8, the language "(B's 1990 compensation capped by the 1990" is corrected to read "(B's 1990 compensation capped by the 1990 annual compensation".

7. On page 47606, column 2, § 1.401(a)(17)–1(b)(6), in *Example 2*, line 10, the language "capped by the 1989 limit), and $200,000 (B's" is corrected to read "capped by the 1989 annual compensation limit), and $200,000 (B's".

8. On page 47606, column 2, § 1.401(a)(17)–1(b)(6), in *Example 3*, line 4, the language "application of the limits is $230,000 (1989)," is corrected to read "application of the annual compensation limits is $230,000 (1989),".

9. On page 47606, column 3, § 1.401(a)(17)–1(b)(6), in paragraph (a) of *Example 5*, line 8 from the top of the column, the language "may not exceed the annual limit in effect for" is corrected to read "may not exceed the annual compensation limit in effect for".

10. On page 47606, column 3, § 1.401(a)(17)–1(b)(6), in paragraph (b) of *Example 5*, the last three sentences are corrected to read, "The plan year compensation under the plan formula before application of the annual compensation limit under section 401(a)(17) for Employee B is $224,877 ($230,000 minus $5,123). After application of the annual compensation limit, the plan year compensation for the 1991 plan year for Employee A is $222,220 (the annual compensation limit for 1991). Therefore, the allocation of employer contributions under the plan allocation formula for 1991 for Employee B is $28,985 ($222,220 (Employee B's plan year compensation after application of the annual compensation limit for 1991) multiplied by 13.0435%)."

11. On page 47607, line 1 of column 1, § 1.401(a)(17)–1(b)(6), in *Example 6*, the language "not exceed the 1991 annual limit of $222,220." is corrected to read "not exceed the 1991 annual compensation limit of $222,220.".

12. On page 47607, column 1, § 1.401(a)(17)–1(c)(1), line 8, the language "limit also applies in determining" is corrected to read "annual compensation limit also applies in determining".

13. On page 47607, column 1, § 1.401(a)(17)–1(c)(3), line 2, the language "this paragraph (c), the annual limit" is corrected to read "this paragraph (c), the annual compensation limit".

14. On page 47607, column 1, § 1.401(a)(17)–1(c)(4), line 4, the language "the limit to a plan year apply for" is corrected to read "the annual compensation limit to a plan year apply for".

15. On page 47607, column 1, § 1.401(a)(17)–1(c)(5), line 4, the language "regarding the application of the limit to" is corrected to read "regarding the application of the annual compensation limit to".

16. On page 47607, column 2, § 1.401(a)(17)–1(d)(1)(ii)(B), line 8, the language "(d)(2)(ii), any extension or renegotiation" is corrected to read "(d)(1)(ii), any extension or renegotiation".

17. On page 47608, column 2, § 1.401(a)(17)–(e)(3)(iii)(A), line 4, the language "§ 1.401(a)–13(c) and (d) to section" is corrected to read "§ 1.401(a)(4)–13(c) and (d) to section".

18. On page 47608, column 3, § 1.401(a)(17)–1(e)(4)(iii)(A) (*2*), line 5, the language "compensation limit for the current plan" is corrected to read "annual compensation limit for the current plan".

19. On page 47608, column 3, § 1.401(a)(17)–1(e)(4)(iii)(A)(*2*), next to the last line of that paragraph, the language "to the section 401(a)(17) compensation" is corrected to read "to the section 401(a)(17) annual compensation".

20. On page 47608, column 3, § 1.401(a)(17)–1(e)(4)(iii)(B), line 9, the language "meaning of §§ 1.401(a)(4)–13(d)) for each" is corrected to read "meaning of § 1.401(a)(4)–13(d)) for each".

21. On page 47609, column 1, § 1.401(a)(17)–1(e)(5), line 2, the following sentence is added after the language "illustrate the rules in this paragraph (e)."

In each example, it is assumed that, under the definition of compensation provided in Plan Y, Employee A's compensation for each calendar year of employment exceeds the annual compensation limit for that calendar year.

22. On page 47609, column 2, § 1.401(a)(17)–1(e)(5), in paragraph (b) of *Example 1*, line 6 from the top of the column, the language "§ 1.401(a)–13(c)(3) (formula with wear-away)." is corrected to read "§ 1.401(a)(4)–13(c)(3) (formula with wear-away).".

23. On page 47609, column 2, § 1.401(a)(17)–1(e)(5), in *Example 2*, line 24, the language "the formula in § 1.401(a)–13(c)(2) (formula" is corrected to read "the formula in § 1.401(a)(4)–13(c)(2) (formula".

24. On page 47609, column 2, § 1.401(a)(17)–1(e)(5), in *Example 3*, line 13, the language "formula in § 1.401(a)–13(c)(4) (formula with" is corrected to read "formula in § 1.401(a)(4)–13(c)(4) (formula with".

25. On page 47609, column 3, § 1.401(a)(17)–1(e)(5), in paragraph (b) of *Example 5*, line 5, the language "limited by the respective annual limit for" is corrected to read "limited by the respective annual compensation limit for".

26. On page 47609, column 3, § 1.401(a)(17)–1(e)(5), in paragraph (b) of *Example 5*, line 11, the language "Employee A's high 3 consecutive year's" is corrected to read "Employee A's high 3 consecutive years' ".

27. On page 47610, column 1, § 1.401(a)(17)–1(e)(5), in paragraph (a) of *Example 6*, the last three lines of that paragraph, the language "section 401(a)(17) limit for every year through 1992. Assume that the annual limit for 1992 is $245,000." is corrected to read "section 401(a)(17) annual compensation limit for every year through 1992. Assume that the annual compensation limit for 1992 is $245,000.".

28. On page 47610, column 1, § 1.401(a)(17)–1(e)(5), in paragraph (b) of *Example 6*, line 1, the language "(b) Employee's A's frozen accrued benefit" is corrected to read "(b) Employee A's frozen accrued benefit".

Minimum Coverage Requirements; Correction

AGENCY: Internal Revenue Service, Treasury.

ACTION: Correction to final regulations.

SUMMARY: This document contains corrections to final regulations published in the **Federal Register** for Thursday, September 19, 1991, at page 47638 (56 FR 47638). The final regulation relates to the minimum coverage requirements of section 410(b) of the Internal Revenue Code of 1986.

EFFECTIVE DATE: September 19, 1991.

FOR FURTHER INFORMATION CONTACT: Rebecca Wilson at 202–377–9372 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

The final regulation that is the subject of these corrections relates to section 410(b) of the Internal Revenue Code of 1986.

Need for Correction

As published, the final regulation contains errors which may prove to be misleading and are in need of clarification.

Correction of Publication

Accordingly, the publication of the final regulation which was the subject of FR Doc. 91–21927 is corrected as follows:

1. On page 47638, column 1, in the preamble, under the heading "EFFECTIVE DATE", line 3, the language "after January 1, 1989, and applied to" is corrected to read "after January 1, 1989, and are applied to".

2. On page 47640, column 3, in the preamble, the last line of paragraph "a", under the heading "*Other Rules*", the language "the benefit under the plan." is corrected to read "the plan, benefit under the plan.".

3. On page 47641, column 2, in the preamble, the last sentence in the paragraph heading "g" under the heading "*Other Modifications*", is corrected to read "As another example, a rule has been added to the final regulation to provide that ratio percentages are calculated to the nearest hundredth of a percentage point.".

§ 1.410(b)–2 [Corrected]

4. On page 47643, column 2, § 1.410(b)–2(b)(2)(ii), the first sentence of *Example 1*, is corrected to read "For a plan year, Plan A benefits 70 percent of an employer's nonhighly compensated employees and 100 percent of the employer's highly compensated employees.".

5. On page 47643, column 2, § 1.410(b)–2(b)(5), line 4, the language "year if the plan is maintained by an" is corrected to read "year if and only if the plan is maintained by an".

6. On page 47643, column 2, § 1.410(b)–2(b)(6), line 4, the language "year if the plan benefits no highly" is corrected to read "year if and only if the plan benefits no highly".

7. On page 47643, column 3, § 1.410(b)–2(b)(7), last line in the paragraph, the language "employee, respectively." is corrected to read "employee.".

8. On page 47643, column 3, § 1.410(b)–2(c)(2)(ii)(A), line 2, the language "employees with accrued benefits under" is corrected to read "employees with vested accrued benefits under".

9. On page 47643, column 3, § 1.410(b)–2(d), line 3, the language "beginning on or after January 1, 1993, a" is corrected to read "beginning on or after January 1, 1989, a".

10. On page 47648, column 2, § 1.410(b)–5(d)(8)(ii), eighth line from the top of the column, the language "§ 1.401(a)(4)–12) plan provisions" is corrected to read "§ 1.401(a)(4)–12), plan provisions".

11. On page 47648, column 3, § 1.410(b)–6(e)(2)(i), lines 5 and 14, the language "employee's separately-determined" is corrected to read "employee's separately determined".

12. On page 47650, column 1, § 1.410(b)–5(e)(4)(iii), line 6, the language "7(c)(4)(iv)(D). In imputing permitted" is corrected to read "7(c)(4)(iii)(D). In imputing permitted.

13. On page 47650, column 2, § 1.410(b)–5(e)(5), line 14, the language "accruals, compensation and other items" is corrected to read "accruals, compensation, and other items".

14. On page 47653, column 2, § 1.410(b)–6(d)(1), line 6, the language "the meaning of § 410(b)–7(b)) benefits" is corrected to read "the meaning of § 1.410(b)–7(b)) benefits".

15. On page 47655, column 1, § 1.410(b)–6(g), line 7, the language "matching contributions that are tied to" is corrected to read "matching contributions or employee after-tax contributions that are tied to".

16. On page 47655, column 3, § 1.410(b)–7(c)(1), the last sentence of the paragraph was omitted and should read "Similarly, the portion of a plan that consists of contributions described in § 1.410(m)–1(b)(4)(ii) (i.e., matching contributions that fail to satisfy the allocation and other requirements applicable to matching contributions and are therefore required to be tested separately) and the portion of the plan that does not consist of such contributions are treated as separate plans for purposes of section 410(b).".

17. On page 47656, column 1, § 1.410(b)–7(c)(5), line 13, the language "bargained employees covered another" is corrected to read "bargained employees covered under another".

18. On page 47657, column 3, § 1.410(b)–9, line 2 of the second full paragraph from the bottom of the column, the language "Nonhighly compensated employee an" is corrected to read "Nonhighly compensated employee means an".

RIN 1545–AI66

Permitted Disparity With Respect to Benefits and Contributions; Correction

AGENCY: Internal Revenue Service, Treasury.

ACTION: Correction to final regulations.

SUMMARY: This document contains corrections to final regulations published in the **Federal Register** for Thursday, September 19, 1991, at page 47610 (56 FR 47610). The final regulation relates to the permitted disparity in employer contributions to and employer-derived benefits under qualified plans.

EFFECTIVE DATE: September 19, 1991.

FOR FURTHER INFORMATION CONTACT: Patricia McDermott, (202) 377–9372 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

This final regulation relates to section 401(l) of the Internal Revenue Code of 1986.

Need for Correction

As published, the final regulation contains errors which may prove to be misleading and are in need of clarification.

Correction of Publication

Accordingly, the publication of the final regulation which was the subject of FR Doc. 91–21923 is corrected as follows:

1. On page 47612, column 2, in the preamble, in paragraph 3.a., the fourth full paragraph in the column, fifth line from the bottom of the paragraph, the language "excess allowance in terms of the benefit" is corrected to read "offset allowance in terms of the benefit".

§ 1.401(a)(5)–1 [Corrected]

2. On page 47615, column 1, under § 1.401(a)(5)–1(d), line 1, the language "(d) *Certain disparity permitted.* (1)" is corrected to read "(d) *Certain disparity permitted.*"

3. On page 47615, column 1, under § 1.401(a)(5)–1(d), paragraph designations "(i)" and "(ii)" are

corrected to read "(1)" and "(2)", respectively.

4. On page 47616, column 2, under § 1.401(a)(5)–1(e)(8), in line 24 of *Example 1*, the language "uses the plan year as the 12 month period for" is corrected to read "uses the plan year as the 12-month period for".

5. On page 47616, column 2, under § 1.401(a)(5)–1(e)(8), in line 3 of *Example 2*, the language "service and service for Z when A retires at" is corrected to read "service for Z when A retires at".

6. On page 47616, column 3, under § 1.401(a)(5)–1(e)(8), the eleventh line of the column, in *Example 2*, the language "(the amount of X's final pay)—$4,114 (the" is corrected to read "(the amount of X's final pay) minus $4,114 (the".

7. On page 47616, column 3, under § 1.401(a)(5)–1(e)(8), the sixth and seventh lines from the bottom of paragraph (b) of *Example 3*, the language "A's accrued benefit under the plan as of the close of the plan year ($11,250) does not" is corrected to read "A's benefit under the plan as of the close of the plan year and before application of the final pay limitation ($11,250) does not".

8. On page 47616, column 3, under § 1.401(a)(5)–1(e)(8), the third sentence in paragraph (c) of *Example 3*, should read "Accordingly, A's benefit as of the close of the 2015 plan year and before application of the final pay limitation is $11,310 (90 percent × $14,500 × 26/30).".

9. On page 47616, column 3, under § 1.401(a)(5)–1(e)(8), the last line in the column, the language "plan's final pay limitation, A's accrued" is corrected to read "plan's final pay limitation, A's.

§ 1.401(l)–0 [Corrected]

10. On page 47617, column 3, under § 1.401(l)–0, in the entry for § 1.401(l)–3(c) heading, the language "(c) Uniformity disparity." is corrected to read "(c) Uniform disparity.".

11. On page 47618, column 1, under § 1.401(l)–0, in the first line of the entry for § 1.401(l)–3(d)(9) heading, the language "(9) Reduction in the ¾ of 1 percent factor if" is corrected to read "(9) Reduction in the 0.75-percent factor if".

§ 1.401(l)–1 [Corrected]

12. On page 47620, column 2, under § 1.401(l)–1(c)(17)(ii), line 3, the language "under this paragraph (c)(16), annual" is corrected to read "under this paragraph (c)(17), annual".

§ 1.401(l)–2 [Corrected]

13. On page 47621, column 3, under § 1.401(l)–2(d)(4)(i), line 1, the language "(i) the integration level under the plan" is corrected to read "(i) The integration level under the plan".

14. On page 47621, column 3, under § 1.401(l)–2(d)(5), line 2, the language "*plan year*. If a plan uses paragraph (4) of" is corrected to read "*plan year*. If a plan uses paragraph (2) or (4) of".

15. On page 47622, column 1, under § 1.401(l)–2(d)(5), the second line from the top of the column, the language "compensation for the period of plan" is corrected to read "compensation for the plan year or the period of plan".

16. On page 47622, column 1, under § 1.401(l)–2(e), line 4, the language "of tax described in paragraph (b)(2)(ii)" is corrected to read "of tax described in paragraph (b)(2)(ii)(B)".

§ 1.401(l)–3 [Corrected]

17. On page 47624, column 2, under § 1.401(l)–3(c)(1), line 9, the language "is uniform if and only if the plan uses" is corrected to read "is uniform only if the plan uses".

18. On page 47624, column 2, under § 1.401(l)–3(c)(2)(ii) lines 2 and 3, the language "*disparity for 35 years*. The plan formula provides a benefit as described in" is corrected to read "*disparity for 35 years*. The plan contains a benefit formula as described in".

19. On page 47624, column 3, under § 1.401(l)–3(c)(2)(ii)(A), line 2, the language "up to 35, the plan formula provides the" is corrected to read "up to 35, the benefit formula provides the".

20. On page 47624, column 3, under § 1.401(l)–3(c)(2)(ii)(B), line 2, the language "service, the plan provides a benefit at a" is corrected to read "service, the benefit formula provides a".

21. On page 47624, column 3, under § 1.401(l)–3(c)(2)(iii), line 3, the language "plan formula provides a benefit as" is corrected to read "plan contains a benefit formula as".

22. On page 47624, column 3, under § 1.401(l)–3(c)(2)(iii)(A), line 3, the language "fewer than 35 years, the plan formula" is corrected to read "fewer than 35 years, the benefit formula".

23. On page 47624, column 3, under § 1.401(l)–3(c)(2)(iii)(B), line 3, the language "plan formula provides a benefit at a" is corrected to read "benefit formula provides a".

24. On page 47624, column 3, under § 1.401(l)–3(c)(2)(iii)(C), lines 3 and 4, the language "(c)(2)(iii)(B) of this section, the plan provides a benefit at a uniform" is corrected to read "(c)(2)(iii)(B) of this section, the benefit formula provides a uniform".

25. On page 47625, column 2, under § 1.401(l)–3(c)(3), the third sentence in *Example 2* is removed.

26. On page 47625, column 2, under § 1.401(l)–3(c)(3), in line 15 of *Example 2*, the language "The plan thus provides a" is corrected to read "The benefit formula thus provides a".

27. On page 47625, column 2, under § 1.401(l)–3(c)(3), the ninth line from the bottom of *Example 2*, the language "percentage of 2.75 percent (68.75 percent × ⅓₆" is corrected to read "percentage of 2.75 percent (68.75 percent × ⅓₆".

28. On page 47625, column 2, under § 1.401(l)–3(c)(3), the fourth line from bottom of *Example 2*, the language "paragraph (c) because the plan does not" is corrected to read "paragraph (c) because the benefit formula does not".

29. On page 47626, column 2, § 1.401(l)–3(d)(7), line 3, the language "paragraph (4) of the definition of plan" is corrected to read "paragraph (2) or (4) of the definition of plan".

30. On page 47626, column 2, § 1.401(l)–3(d)(7), line 6, the language "the period of plan participation) and has" is corrected to read "the plan year or the period of plan participation) and has".

31. On page 47627, column 1, § 1.401(l)–3(d)(iii)(A), line 20, the language "excess allowance must be reduced to" is corrected to read "excess or offset allowance must be reduced to".

32. On page 47627, column 2, § 1.401(l)–3(d)(9)(iv)(A), second line from the bottom of table, the language "the taxable wage base or final" is corrected to read "The taxable wage base or final".

33. On page 47627, column 3, § 1.401(l)–3(d)(10), line 5 in paragraph (b) of *Example 1*, the language "social security retirement age in calendar" is corrected to read "social security retirement age in the calendar".

34. On page 47627, column 3, § 1.401(l)–3(d)(10), line 11 in paragraph (b) of *Example 1*, the language "in paragraph (d)(9) of this section. The 0.69" is corrected to read "in paragraph (d)(9) of this section. The 0.69-".

35. On page 47627, column 3, § 1.401(l)–3(d)(10), line 17 in paragraph (b) of *Example 1*, the language "(d)(6) of this section. The 0.6 percent factor" is corrected to read "(d)(6) of this section. The 0.6-percent factor".

36. On page 47627, column 3, § 1.401(l)–3(d)(10), in line 8 in paragraph (b) of *Example 2*, the language "a plan-wide bases under paragraph" is corrected to read "a plan-wide basis under paragraph".

37. On page 47628, column 1, § 1.401(l)–3(d)(10), line 21 of *Example 4*, the language "benefit under the plan. Employee's final" is corrected to read "benefit under the plan. Employee B's final".

38. On page 47628, column 1, § 1.401(l)–3(d)(10), in lines 23 and 24 in *Example 4*, the language "1992 plan year is $52,800 ($47,000 + $53,400 + $58,000/3. This is because annual" is corrected to read "1992 plan year is $52,800 (($47,000 + $53,400 + $58,000/3). This is because annual".

39. On page 47628, column 1, § 1.401(l)–3(d)(10), in *Example 4*, the third line from the bottom of the column, the language "Employee A's benefit by reference to" is corrected to read "Employee B's benefit by reference to".

40. On page 47630, column 1, § 1.401(l)–3(e)(6), in *Example 1*, the fifth line from the top of the column, the language "of service for X, the plan provides a benefit" is corrected to read "of service, the plan provides a benefit".

41. On page 47630, column 1, § 1.401(l)–3(e)(6), in *Example 3*, line 14, the language "0.375 percent factor provided in the table for" is corrected to read "0.375-percent factor provided in the table for".

42. On page 47630, column 3, under § 1.401(l)–3(e)(6), in *Example 6*, the sixth line from the top of the column, the language "than a qualified disability benefit)" is corrected to read "than a temporary disability benefit)".

§ 1.401(l)–4 [Corrected]

43. On page 47632, column 3, under § 1.401(l)–4(b)(3)(iv)(B), line 3, the language "employer contributions are allocated to" is corrected to read "employer contributions are allocated to the".

44. On page 47633, column 1, under § 1.401(l)–4(c)(3)(ii)(C), lines 3 and 4, the language "same excess benefit percentage by an amount for all employees, and" is corrected to read "same excess benefit percentage for all employees, and".

45. On page 47633, column 3, under § 1.401(l)–4(e)(1)(ii), the first and second sentences are corrected to read "(ii) 'Railroad retirement covered compensation for an employee means 12 multiplied by the average of the 60 highest monthly railroad retirement taxable wage bases in effect for the employee's period of employment. The monthly railroad retirement taxable wage base is determined by dividing the railroad retirement taxable wage base for the calendar year in which the month occurs by 12.'".

46. On page 47634, column 1, under § 1.401(l)–4(e)(3), line 3, the language "benefit excess plan and offset plans" is corrected to read "benefit excess plans and offset plans".

47. On page 47634, column 1, § 1.401(l)–4(e)(3)(ii), line 2, the language "3(d) are made by multiplying the 0.56" is corrected to read "3(d) are made by multiplying the 0.56-percent".

§ 1.401(l)–5 [Corrected]

48. On page 47636, column 1, under § 1.401(l)–5(b)(9), line 4 in paragraph (a) of *Example 4*, the language "general test under § 1.401(a)(4)–3(b). Plan M" is corrected to read "general test under § 1.401(a)(4)–3(c). Plan M".

49. On page 47636, column 2, under § 1.401(l)–5(b)(9), paragraph (a) of *Example 4*, the sixth line from the top of the column, the language "disparity provided for Employee B for the" is corrected to read "disparity for Employee B for the".

50. On page 47637, column 1, under § 1.401(l)–5(c)(4), line 10 in paragraph (a) of *Example 4*, the language "excess plan disparity fraction under Plan P" is corrected to read "plan disparity fraction under Plan P".

51. On page 47637, column 2, under § 1.401(l)–5(d), second line from bottom of the paragraph, the language "permitted disparity limits are not" is corrected to read "permitted disparity limits are".

§ 1.401(l)–6 [Corrected]

52. On page 47637, column 2, under § 1.401(l)–6(c), line 8, the language "1.401.(l)–5 and the requirements" is corrected to read "1.401(l)–5 and the requirements of".

53. On page 47637, column 3, under § 1.401(l)–6(d)(4), the last sentence in the paragraph is removed.

BILLING CODE 4830–01–M

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

29 CFR Part 1952

North Carolina State Plan; Level of Federal Enforcement

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Change in level of federal enforcement.

SUMMARY: On October 24, 1991, OSHA resumed its exercise of concurrent Federal enforcement authority in the State of North Carolina by terminating the pre-existing Operational Status Agreement for the North Carolina State Plan. At that time, OSHA initiated limited Federal enforcement authority with regard to all pending and new complaints of discrimination filed either with OSHA or the State; all complaints of unsafe and unhealthful working conditions brought to OSHA's attention by employees or referred by others; and referrals from North Carolina Governor James Martin's 800 "Safety Line". In response to a further request from the State's Labor Commissioner for additional assistance, this document provides notice that Federal enforcement authority will be expanded with regard to the backlog of safety and health complaints filed with the State of North Carolina by employees in the private sector (not State and local government employees) and not yet investigated by the State.

EFFECTIVE DATE: March 20, 1992.

FOR FURTHER INFORMATION CONTACT: James Foster, Director, Office of Information and Consumer Affairs, Occupational Safety and Health Administration, room N3647, 200 Constitution Avenue, NW., Washington, DC 20210, (202) 523–8148.

SUPPLEMENTARY INFORMATION:

A. Background

Section 18 of the Occupational Safety and Health Act of 1970, 29 U.S.C. 667, provides that States which wish to assume responsibility for developing and enforcing their own occupational safety and health standards, may do so by submitting, and obtaining Federal approval of, a State plan. State plan approval occurs in stages which include initial approval under section 18(b) of the Act and, ultimately, final approval under section 18(e). In the interim, between initial approval and final approval, there is a period of concurrent Federal/State jurisdiction within a State operating an approved plan. See 29 CFR 1954.3 for guidelines and procedures.

On February 1, 1973, notice was published in the **Federal Register** (38 FR 3041) announcing the initial approval of the North Carolina State plan and the adoption of subpart I to 29 CFR part 1952 containing the decision. On February 20, 1975, OSHA and the State of North Carolina entered into an Operational Status Agreement which suspended the exercise of Federal concurrent enforcement authority in all except specifically identified areas. See

40 FR 16643, as amended by 44 FR 74819, and redesignated at 51 FR 2486. The pertinent provisions concerning the level of Federal enforcement in the State were codified at 29 CFR 1952.155. However, on October 24, 1991, OSHA announced the termination of that agreement and the reinstitution of limited concurrent Federal jurisdiction to the degree necessary to assure occupational safety and health protection to employees in the State of North Carolina. Specifically, OSHA announced its intention to exercise Federal concurrent enforcement authority with regard to (1) all currently pending and new complaints of discrimination under section 11(c) of the Act, 29 U.S.C. 660(c), and equivalent State law filed either with OSHA or the State; (2) all complaints of unsafe or unhealthful working conditions brought to OSHA's attention on or after October 24, 1991 by employees or referred by others; and (3) referrals from North Carolina Governor James Martin's 800 "Safety Line". Additionally, the notice reserved OSHA's general right to exercise concurrent authority under a variety of special circumstances; for example, when the State is unable to obtain a warrant for inspection of an establishment which has refused entry to the State. See 56 FR 55193. The supplemental Federal assistance provided to the State of North Carolina as outlined by the October 24, 1991 **Federal Register** notice was intended to assure protection to the workers in the State of North Carolina by supplementing the State plan enforcement efforts.

Subsequently, by letters dated March 2 and 6, 1992, North Carolina requested from Federal OSHA additional "temporary assistance regarding all complaints." In response, by letter dated March 17, 1992, Dorothy L. Strunk, acting Assistant Secretary for Occupational Safety and Health, agreed to provide temporary assistance by "accepting responsibility for the backlog of complaints filed with the State (by private sector employees) but not yet investigated." (Backloggerd complaints from State and local government workers will be retained by the State, as Federal OSHA has no jurisdiction.) This assistance should allow the North Carolina staff to handle any new complaints filed with North Carolina after March 20, 1992 and to devote additional resources to conducting random schedule "programmed" inspections.

Thus, in response to North Carolina's request, Federal OSHA will assume responsibility for investigating all backlogged health and safety complaints received by the North Carolina Department of Labor but not yet investigated as of March 20 1992. Complainants will be notified by letter of the transfer of their complaint by North Carolina and acceptance by Federal OSHA. The U.S. Department of Labor will follow its usual procedures for handling complaints, and, as appropriate may make an effort to contact the complainant to verify the complaint and to obtain updated information on whether the complained-of hazard is still present in the workplace. The State of North Carolina will continue to respond to new complaints it receives of unsafe or unhealthful working conditions, according to its own procedures. Federal OSHA will similarly continue to exercise its enforcement authority over new complaints it receives of unsafe or unhealthful working conditions as well as referrals from the Governor's "Safety Line" and all discrimination complaints.

B. Decision

Notice is hereby given that, consistent with the October 24, 1991 announcement of the exercise of concurrent Federal enforcement authority, and in response to North Carolina's recent request for additional temporary assistance, to protect the safety and health of workers in the State, Federal enforcement authority will be exercised with regard to safety or health complaints filed with the State of North Carolina by private sector workers and not yet investigated by the State as of March 20, 1992.

Authority: Sec. 18, Pub. L. 91-596, 84 Stat. 1608 (29 U.S.C. 667)

Dorothy L. Strunk,

Acting Assistant Secretary.

BILLING CODE 4510-26-M

DEPARTMENT OF THE TREASURY

Office of Foreign Assets Control

31 CFR Part 580

Haitian Transactions Regulations

AGENCY: Office of Foreign Assets Control, Treasury.

ACTION: Final rule.

SUMMARY: The Haitian Transactions Regulations (the "Regulations") implement the President's Executive Orders 12775 of October 4, 1991, 56 FR 50641, and 12779 of October 28, 1991, 56 FR 55975, which block all property and interests in property of the Government of Haiti located within the United States or within the possession or control of U.S. persons including their overseas branches, prohibit payments or transfers of funds to the *de facto* regime in Haiti by U.S. persons, and prohibit import and export trade between the United States and Haiti, with specified exceptions.

EFFECTIVE DATES: March 31, 1992, except that §§ 580.201, 580.202, 580.204, 580.208, 580.209 and 580.210 were effective as of 12:23 p.m., e.d.t., October 4, 1991; §§ 580.205, 580.206, and 580.207 are effective as of 11:59 p.m., e.s.t., November 5, 1991; and § 580.203 is effective as of 12 p.m., e.s.t., December 12, 1991.

FOR FURTHER INFORMATION CONTACT: William B. Hoffman, Chief Counsel, tel.: 202/535-6020, or Steven I. Pinter, Chief of Licensing, tel.: 202/535-9449, Office of Foreign Assets Control, Department of the Treasury, Washington, DC.

SUPPLEMENTARY INFORMATION: On October 4, 1991, the President issued Executive Order 12775, declaring a national emergency with respect to Haiti, invoking the authority, *inter alia*, of the International Emergency Economic Powers Act (50 U.S.C. 1701 *et seq.*), ordering specified measures against Haiti, and authorizing the Secretary of the Treasury, in consultation with the Secretary of State, to take such actions, including the promulgation of rules and regulations, as may be necessary to carry out the purposes of the Order. On October 28, 1991, the President issued Executive Order 12779, ordering additional measures against Haiti pursuant to the declaration of a continued national emergency. In implementation of these orders, the Treasury Department is issuing the Regulations. The Regulations block all property and interests in property of the Government of Haiti, its agencies, instrumentalities and controlled entities, including the Banque de la Republique d'Haiti, that on or after October 4, 1991, were in or come within the United States, or were in or come within the possession or control of U.S. persons, including their overseas branches. The Regulations also generally prohibit direct or indirect payments or transfers of funds or other financial or investment assets or credits to the *de facto* regime in Haiti by any U.S. person or by any person organized under the laws of Haiti and owned or controlled by a U.S. person. Finally, the Regulations prohibit import and export trade between the United States and Haiti, with specified exceptions. The Regulations prohibit the importation into the United States, directly or indirectly, of any goods of Haitian origin other than

publications and other informational materials, or of services performed in Haiti. The Regulations also prohibit the exportation from the United States to Haiti, directly or indirectly, of any goods, technology or services, other than (1) publications and other informational materials, (2) donations of articles intended to relieve human suffering, and (3) rice, beans, sugar, wheat flour, and cooking oil.

Certain transactions and payments are authorized or required by general license; these include:

(1) Importation of household and personal effects of Haitian origin by persons arriving from Haiti, and exportation to Haiti of accompanying baggage and accompanying personal effects;

(2) Payments for telecommunications;

(3) Specific licenses for the importation of certain machinery, parts and materials;

(4) Specific licenses for imports from and exports to assembly/production operations in Haiti;

(5) Specific licenses for the exportation of commercial shipments for humanitarian purposes of medicine and medical supplies;

(6) Importation and exportation of diplomatic pouches; and

(7) A requirement that blocked financial property be placed in interest-bearing accounts.

All General Licenses issued by the Office of Foreign Assets Control prior to March 31, 1992, may continue to be relied upon to validate actions taken prior to this date during the period of their validity. Specific licenses issued prior to this date continue in effect according to their terms unless modified by the Office of Foreign Assets Control.

Authorizations contained in General Licenses issued prior to publication of these regulations can now be found in the following sections:

Issuance date	License No.	Regulation section
11/06/91, 11/15/91	General License No. 1 as amended.	Section 580.504.

12/12/91	General License No. 6.	Section 580.203.
01/21/92	General License No. 7.	Section 580.508.
02/05/92	General License No. 8.	Section 580.515.

Transactions otherwise prohibited under this part may be authorized by a general license contained in subpart E or by a specific license issued pursuant to the procedures described in § 580.801(b) of subpart H.

Since the Regulations involve a foreign affairs function, Executive Order 12291 and the provisions of the Administrative Procedure Act (5 U.S.C. 553), requiring notice of proposed rulemaking, opportunity for public participation, and delay in effective date, are inapplicable. Because no notice of proposed rulemaking is required for this rule, the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, does not apply.

The Regulations are being issued without prior notice and public procedure pursuant to the Administrative Procedure Act (5 U.S.C. 553). For this reason, the collections of information contained in the Regulations have been reviewed and, pending receipt and evaluation of public comments, approved by the Office of Management and Budget under control number 1505-0133. Comments concerning the average annual burden and suggestions for reducing this burden should be directed to the Office of Management and Budget, Paperwork Reduction Project, Washington, DC 20503, with copies to the Office of Foreign Assets Control, Department of the Treasury 1500 Pennsylvania Ave., NW.—Annex, Washington, DC 20220. Any such comments should be submitted not later than 60 days from publication.

The collections of information in the Regulations are contained in §§ 580.204(d), 580.503, 580.506, 580.509, 580.510, 580.514, 580.515, 580.601, 580.602, 580.603, 580.703, and 580.801. This information is required by the Office of Foreign Assets Control for licensing, compliance, civil penalty, and enforcement purposes. This information will be used to determine the eligibility of applicants for the benefits provided through specific licenses, to determine whether persons subject to the Regulations are in compliance with applicable requirements, and to determine whether and to what extent civil penalty or other enforcement action is appropriate. The likely respondents and recordkeepers are individuals and business organizations.

Estimated total annual reporting and/or recordkeeping burden: 2000 hours.

The estimated annual burden per respondent/recordkeeper varies from 60 minutes to 4 hours depending on individual circumstances, with an estimated average of 2 hours.

Estimated number of respondents and/or recordkeepers: 1000.

Estimated annual frequency of responses: 1000.

List of Subjects in 31 CFR Part 580

Administrative practice and procedure, Banking and finance, Blocking of assets, Exports, Haiti, Imports, Penalties, Reporting and recordkeeping requirements, Transfer of assets.

For the reasons set forth in the preamble, 31 CFR part 580 is added to 31 CFR chapter V as follows:

PART 580—HAITIAN TRANSACTIONS REGULATIONS

Subpart A—Relation of this Part to Other Laws and Regulations

Sec.
580.101 Relation of this part to other laws and regulations.

Subpart B—Prohibitions

580.201 Prohibited transactions involving property in which the Government of Haiti has an interest; transactions with respect to securities.
580.202 Prohibited payments or transfers to the *de facto* regime in Haiti.
580.203 Holding of certain types of blocked property in interest-bearing accounts.
580.204 Effect of transfers violating the provisions of this part.
580.205 Prohibited importation of goods or services from Haiti.
580.206 Prohibited exportation of goods, technology or services to Haiti
580.207 Exemption of informational materials.
580.208 Prohibited grants or extensions of credits or loans.
580.209 Evasions.
580.210 Effective date.

Subpart C—General Definitions

580.301 Blocked account; blocked property.
580.302 Credits.
580.303 *De facto* regime in Haiti.
580.304 Effective date.
580.305 Entity.
580.306 General license.
580.307 Government of Haiti.
580.308 Haiti.
580.309 Haitian origin.
580.310 Informational materials.
580.311 Interest.
580.312 License.
580.313 Person.
580.314 Property; property interest.
580.315 Specific license.
580.316 Transfer.
580.317 United States.
580.318 U.S. financial institution.
580.319 United States person; U.S. person.

Subpart D—Interpretations

580.401 Reference to amended sections.
580.402 Effect of amendment.
580.403 Termination and acquisition of an interest of the Government of Haiti.

560.404 Payments to the *de facto* regime in Haiti prohibited; procedures for making payments to the Federal Reserve Bank of New York.
560.405 Indirect payments to the *de facto* regime in Haiti; payments by subsidiaries in third countries.
560.406 Setoffs prohibited.
560.407 Payments in kind.
560.408 Offshore transactions.
560.409 Transshipments through the United States prohibited.
560.410 Importation from third countries; transshipments.
560.411 Exportation to third countries; transshipments.
560.412 Importation into and release from bonded warehouse or foreign trade zone.

Subpart E—Licenses, Authorizations and Statements of Licensing Policy

560.501 Effect of license or authorization.
560.502 Exclusion from licenses and authorizations.
560.503 Payments and transfers to blocked accounts in U.S. financial institutions.
560.504 Importation of household and personal effects.
560.505 Transactions related to telecommunications authorized.
560.506 Transactions related to mail authorized.
560.507 Transactions related to informational materials.
560.508 Importation of certain machinery, parts and materials.
560.509 Reserve accounts.
560.510 Commercial exportation of medicines and medical supplies.
560.511 Diplomatic pouches authorized.
560.512 Importation of certain gifts authorized.
560.513 Certain exportations for the Organization of American States.
560.514 Investment and reinvestment of Government of Haiti funds held in blocked accounts.
560.515 Importation from and exportation to assembly/production operations.

Subpart F—Reports.

560.601 Required records.
560.602 Reports to be furnished on demand.
560.603 Registration of persons holding blocked property subject to § 560.201.

Subpart G—Penalties

560.701 Penalties.
560.702 Prepenalty notice.
560.703 Presentation responding to prepenalty notice.
560.704 Penalty notice.
560.705 Referral to United States Department of Justice.
560.706 Seizure of shipments.

Subpart H—Procedures

560.801 Licensing.
560.802 Decisions.
560.803 Amendment, modification, or revocation.
560.804 Rulemaking.
560.805 Delegation by the Secretary of the Treasury.
560.806 Rules governing availability of information.
560.807 Customs procedures: merchandise specified in § 560.205.

Subpart I—Paperwork Reduction Act

560.901 Paperwork Reduction Act notice.

Authority: 50 U.S.C. 1701 *et seq.*; E.O. 12775, 56 FR 50641 (Oct. 7, 1991); E.O. 12779, 56 FR 55975 (Oct. 30, 1991).

Subpart A—Relation of This Part to Other Laws and Regulations

§ 560.101 Relation of this part to other laws and regulations.

(a) This part is separate from, and independent of, the other parts of this chapter. No license or authorization contained in or issued pursuant to those other parts authorizes any transaction prohibited by this part. No license or authorization contained in or issued pursuant to any other provision of law or regulations authorizes any transaction prohibited by this part.

(b) No license or authorization contained in or issued pursuant to this part relieves the involved parties from complying with any other applicable laws or regulations.

Subpart B—Prohibitions

§ 560.201 Prohibited transactions involving property in which the Government of Haiti has an interest; transactions with respect to securities.

(a) Except as authorized by regulations, orders, directives, licenses, or otherwise, all property and interests in property of the Government of Haiti, that are in the United States, that hereafter come within the United States, or that are or hereafter come within the possession or control of United States persons including their overseas branches, are blocked.

(b) Except as authorized by regulations, orders, directives, licenses, or otherwise, no property or interest in property of the Government of Haiti that is in the United States, that hereafter comes within the United States, or that is or hereafter comes within the possession or control of U.S. persons, including their overseas branches, may be transferred, paid, exported, withdrawn or otherwise dealt in.

(c) Unless authorized by a license expressly referring to this section, the acquisition, transfer (including the transfer on the books of any issuer or agent thereof), disposition, transportation, importation, exportation, or withdrawal of, or the endorsement or guaranty of signatures on, or otherwise dealing in any security (or evidence thereof) registered or inscribed in the name of the Government of Haiti is prohibited irrespective of the fact that at any time (either prior to, on, or subsequent to 12:23 p.m., e.d.t., October 4, 1991) the registered or inscribed owner thereof may have, or appears to have, assigned, transferred, or otherwise disposed of any such security.

§ 560.202 Prohibited payments or transfers to the de facto regime in Haiti.

Except as authorized by regulations, orders, directives, licenses, or otherwise, no direct or indirect payments or transfers may be made to the *de facto* regime in Haiti of funds, including currency, cash, or coins of any nation, or of other financial or investment assets or credits, by any United States person, or by any person organized under the laws of Haiti and owned or controlled by a United States person. All transfers or payments owed to the Government of Haiti shall be made when due into an account at the Federal Reserve Bank of New York, as provided in § 560.404, or credited to a blocked reserve account, as provided in § 560.509.

§ 560.203 Holding of certain types of blocked property in interest-bearing accounts.

(a) Any person, including a U.S. financial institution, currently holding property subject to § 560.201 which, as of the effective date of this section, December 12, 1991, or the date of receipt if subsequent to the effective date, is not being held in an interest-bearing account, or otherwise invested in a manner authorized by the Office of Foreign Assets Control, shall transfer such property to, or hold such property or cause such property to be held in, an interest-bearing account in a U.S. financial institution with value as of the effective date of this section or the date of receipt if subsequent to the effective date, unless otherwise authorized or directed by the Office of Foreign Assets Control. This requirement shall apply to currency, bank deposits, accounts, any other financial assets, and any proceeds resulting from the sale of tangible or intangible property. If interest is credited to an account separate from that in which the interest-bearing asset is held, the name of the account party on both accounts must be the same and must clearly indicate the blocked Government of Haiti entity having an interest in the accounts.

(b) For purposes of this section, the term "interest-bearing account" means a blocked account in a U.S. financial institution earning interest at rates that are commercially reasonable for the amount of funds in the account. Except as otherwise authorized, the funds may not be invested or held in instruments the maturity of which exceeds 90 days.

(c) This section does not apply to blocked tangible property, such as chattels, nor does it create an affirmative obligation on the part of the holder of such blocked tangible property to sell or liquidate the property and put the proceeds in a blocked account. However, the Office of Foreign Assets Control may issue licenses permitting or directing sales of tangible property in appropriate cases.

§ 560.204 Effect of transfers violating the provisions of this part.

(a) Any transfer after 12:23 p.m., e.d.t., October 4, 1991, which is in violation of any provision of this part or of any regulation, order, directive, license, or other direction or authorization hereunder and involves any property in which the Government of Haiti has or has had an interest since such date, is null and void and shall not be the basis for the assertion or recognition of any interest in or right, remedy, power or privilege with respect to such property.

(b) No transfer before 12:23 p.m., e.d.t., October 4, 1991, shall be the basis for the assertion or recognition of any right, remedy, power, or privilege with respect to, or interest in, any property in which the Government of Haiti has an interest, or has had an interest since such date, unless the person with whom such property is held or maintained had written notice of the transfer or by any written evidence had recognized such transfer prior to such date.

(c) Unless otherwise provided, an appropriate license or other authorization issued by or pursuant to the direction or authorization of the Director of the Office of Foreign Assets Control before, during, or after a transfer shall validate such transfer or render it enforceable to the same extent as it would be valid or enforceable but for the provisions of the International Emergency Economic Powers Act and this part, and any ruling, order, regulation, direction or instruction issued hereunder.

(d) Transfers of property which otherwise would be null and void or unenforceable, by virture of the provisions of this section, shall not be deemed to be null and void or unenforceable pursuant to such provisions, as to any person with whom such property was held or maintained (and as to such person only) in cases in which such person is able to establish to the satisfaction of the Director of the Office of Foreign Assets Control each of the following:

(1) Such transfer did not represent a willful violation of the provisions of this part by the person with whom such property was held or maintained;

(2) The person with whom such property was held or maintained did not have reasonable cause to know or suspect, in view of all the facts and circumstances known or available to such person, that such transfer required a license or authorization by or pursuant to this part and was not so licensed or authorized, or if a license or authorization did purport to cover the transfer, that such license or authorization had been obtained by misrepresentation of a third party or the withholding of material facts or was otherwise fradulently obtained; and

(3) Promptly upon discovery that:

(i) Such transfer was in violation of the provisions of this part or any regulation, ruling, instruction, license or other direction or authorization hereunder, or

(ii) Such transfer was not licensed or authorized by the Office of Foreign Assets Control, or

(iii) If a license did purport to cover the transfer, such license had been obtained by misrepresentation of a third party or the withholding of material facts or was otherwise fraudulently obtained;

the person with whom such property was held or maintained filed with the Office of Foreign Assets Control, U.S. Treasury Department, Washington, DC, a report setting forth in full the circumstances relating to such transfer. The filing of a report in accordance with the provisions of this paragraph shall not be deemed to be compliance or evidence of compliance with paragraphs (d) (1) and (2) of this section.

(e) Unless licensed or authorized pursuant to this part, any attachement, judgment, decree, lien, execution, garnishment or other judicial process is null and void with respect to any property in which on or since 12:23 p.m., e.d.t., October 4, 1991, there existed an interest of the Government of Haiti.

§ 560.205 Prohibited importation of goods or services from Haiti.

(a) Except as otherwise authorized, no goods or services of Haitian origin, other than publications and other informational materials, may be imported into the United States.

(b) The importation into the United States through 11:59 p.m., e.s.t., December 5, 1991, of goods containing parts of materials exported to Haiti prior to 11:59 p.m., e.s.t., November 5, 1991, which were assembled or processed into goods containing parts or materials exported from the United States, is authorized.

Note to paragraph (b): Transactions authorized by paragraph (b) of this section have been completed prior to publication of this part. The text of paragraph (b) is included for the convenience of the user. See also § 560.506.

§ 560.206 Prohibited exportation of goods, technology or services to Haiti.

Except as otherwise authorized, no goods, technology (including technical data or other information), or services may be exported from the United States, either directly or indirectly, to Haiti, except (a) publications and other informational materials, (b) donations of articles intended to relieve human suffering, such as food, clothing, medicine and medical supplies, and (c) rice, beans, sugar, wheat flour, and cooking oil.

§ 560.207 Exemption of informational materials.

(a) The importation from Haiti, and the exportation to Haiti, whether commercial or otherwise, of informational materials, as defined in § 560.310, are exempt from the prohibitions and regulations of this part.

(b) All transactions of common carriers incident to the importation or exportation of informational materials between the United States and Haiti are exempt from the prohibitions and regulations of this part.

(c) This section does not authorize transactions related to informational materials not fully created and in existence at the date of the transaction, or to the substantive or artistic alteration or enhancement of informational materials, or to the provision of marketing and business consulting services by a person subject to the jurisdiction of the United States. Such prohibited transactions include, without limitation, payment of advances for informational materials not yet created and completed, provision of services to market, produce or co-produce, create or assist in the creation of informational materials, and payment of royalties to a person in Haiti with respect to income received for enhancements or alterations made by U.S. persons to informational materials imported from Haiti.

(d) This section does not authorize transactions incident to the transmission of restricted technical data as defined in part 779 of the Export Administration Regulations, 15 CFR parts 768 through 799, or to the exportation of goods for use in the transmission of any data. The exportation of such goods to Haiti is prohibited, as provided in § 560.206 of this part and § 785.1 of the Export Administration Regulations.

Example #1: A U.S. publisher ships 500 copies of a book to Haiti directly from Miami

aboard a chartered aircraft, and receives payment by a bank in Haiti. These are permissible transactions under this section.

Example #2: A Haitian party exports a single master copy of a Haitian motion picture to a U.S. party and licenses the U.S. party to duplicate, distribute, show and exploit in the United States the Haitian film in any medium, including home video distribution, for five years, with the Haitian party receiving 40% of the net income. The transactions relating to the activities described in this example are authorized under this section or § 580.507.

Example #3: A U.S. recording company proposes to contract with a Haitian musician to create certain musical compositions in Haiti and to advance royalties of $10,000 to the musician. This is a prohibited transaction. The U.S. party is prohibited under § 580.206 from contracting for the Haitian musician's services to be performed in Haiti. No informational materials are in being at the time of this proposed transaction. However, the U.S. recording company may propose to contract with a Haitian musician for services to be performed outside of Haiti, irrespective of whether the informational materials are in being at the time of the proposed transaction, provided the Haitian national is not acting on behalf of the *de facto* regime. See §§ 580.206 and 580.309(c).

Example #4: A Haitian party enters into a sub-publication agreement licensing a U.S. party to print and publish copies of a musical composition and to sub-license rights of public performance, adaptation, and arrangement of the musical composition, with payment to be a percentage of income received. All transactions related to the activities described in this example are authorized under this section and 580.507, except for synchronization, adaptation, and arrangement, which constitute artistic enhancement of the Haitian composition. Payment to the Haitian party may not reflect income received as a result of these enhancements.

§ 580.208 Prohibited grants or extensions of credits or loans.

Except as authorized, no U.S. person may grant or extend credits or loans to the Government of Haiti.

§ 580.209 Evasions.

Any transaction for the purpose of, or which has the effect of, evading or avoiding any of the prohibitions set forth in this subpart is hereby prohibited.

§ 580.210 Effective date.

The effective dates of the prohibitions and directives contained in this subpart B are as follows:

(a) With respect to §§ 580.201, 580.202, 580.204, 580.208, 580.209 and 580.210, 12:23 p.m., e.d.t., October 4, 1991;

(b) With respect to §§ 580.205, 580.206 and 580.207, 11:59 p.m., e.s.t., November 5, 1991;

(c) With respect to § 580.203, 12:00 p.m. e.s.t., December 12, 1991.

Subpart C—General Definitions

§ 580.301 Blocked account; blocked property.

The terms *blocked account* and *blocked property* shall mean any account or property in which the Government of Haiti has an interest, and with respect to which payments, transfers, exportations, withdrawals or other dealings may not be made or effected except pursuant to an authorization or license from the Office of Foreign Assets Control authorizing such action.

§ 580.302 Credits.

The term *credits* means any transfer or extension of funds or credit on the basis of an obligation to repay, or any assumption or guarantee of the obligation of another to repay an extension of funds or credit. The term "credits" includes, but is not limited to: overdrafts; purchases of debt securities issued by the Government of Haiti after October 4, 1991; sales of financial assets subject to an agreement to repurchase; renewals or refinancings whereby funds or credits are transferred to or extended to the Government of Haiti; and drawdowns on existing lines of credit.

§ 580.303 De facto regime in Haiti.

(a) The term *de facto regime in Haiti* includes:

(1) Those who seized power illegally from the democratically elected government of President Jean-Bertrand Aristide on September 30, 1991, and any agencies, instrumentalities or entities purporting to act on behalf of the *de facto* regime in Haiti or under the asserted authority thereof, or any extraconstitutional successor thereto;

(2) Any partnership, association, corporation, or other organization substantially owned or controlled by the foregoing;

(3) Any person to the extent that such person is, or has been, or to the extent that there is reasonable cause to believe that such person is, or has been, since 12:23 p.m., e.d.t., October 4, 1991, acting or purporting to act directly or indirectly on behalf of any of the foregoing; or

(4) Any other person or organization determined by the Director of the Office of Foreign Assets Control to be included within this section. Such determinations shall be published from time to time in the **Federal Register**, but shall be binding prior to such publication upon any person receiving actual notice thereof.

(b) A partnership, association, corporation, or other organization shall not be deemed to fall within the definition of the *de facto regime in Haiti* solely by reason of being located in, organized under the laws of, or having its principal place of business in, Haiti.

§ 580.304 Effective date.

The term *effective date* refers to the effective date of the applicable prohibition, as identified in § 580.210.

§ 580.305 Entity.

The term *entity* includes a corporation, partnership, association, or other organization.

§ 580.306 General license.

The term *general license* means any license or authorization the terms of which are set forth in this part.

§ 580.307 Government of Haiti

The term *Government of Haiti* includes the state and the Government of Haiti or any persons purporting to be the Government of Haiti (including the *de facto* regime in Haiti), as well as any political subdivision, agency, instrumentality or controlled entity thereof, including the Banque de la Republique d'Haiti.

§ 580.308 Haiti.

The term *Haiti* means the Republic of Haiti and all areas under the jurisdiction or authority thereof.

580.309 Haitian origin.

The term *goods or services of Haitian origin* includes:

(a) Goods produced, manufactured, grown, extracted or processed within Haiti;

(b) Goods which have entered into Haitian commerce; and

(c) Services performed in Haiti, or by a Haitian national, wherever located, who is acting as an agent, employee, or contractor of the *de facto* regime in Haiti.

§ 580.310 Informational materials.

(a) For purposes of this part, the term *informational materials* means:

(1) Publications, films, posters, phonograph records, photographs, microfilms, microfiche, tapes, and other informational articles, including tangible items described in the following:

(2) 15 CFR 799.1, Control List, Group 5, CL No. 7599I: microfilm that reproduces the content of certain publications, and similar materials;

(3) 15 CFR 799.1, Control List, Group 9, CL No. 7599I: certain publications and related materials; and

(4) 15 CFR 799.3, General License GTDA, technical data available to all destinations;

(b) The term "informational materials" does not include:

(1) Items that are controlled for export for national security reasons under section 5 of the Export Administration Act of 1979, or with respect to which acts are prohibited by chapter 37 of title 18 of the United States Code; and

(2) Intangible items, such as telecommunications transmissions.

§ 580.311 Interest.

Except as otherwise provided in this part, the term "interest" when used with respect to property (*e.g.*, "an interest in property") means an interest of any nature whatsoever, direct or indirect.

§ 580.312 License.

Except as otherwise specified, the term *license* means any license, authorization, or directive contained in or issued by the Office of Foreign Assets Control pursuant to this part.

§ 580.313 Person.

The term *person* means an individual, partnership, association, corporation, or other organization.

§ 580.314 Property; property interest.

The terms *property* and *property interest* include, but are not limited to, money, checks, drafts, bullion, bank deposits, savings accounts, debts, indebtedness, obligations, notes, debentures, stocks, bonds, coupons, any other financial instruments, bankers acceptances, mortgages, pledges, liens or other rights in the nature of security, warehouse receipts, bills of lading, trust receipts, bills of sale, any other evidences of title, ownership or indebtedness, letters of credit any documents relating to any rights or obligations thereunder, powers of attorney, goods, wares, merchandise, chattels, stocks on hand, ships, goods on ships, real estate mortgages, deeds of trust, vendors sales agreements, land contracts, real estate and any interest therein, leaseholds, ground rents, options, negotiable instruments, trade acceptances, royalties, book accounts, accounts payable, judgements, patents, trademarks or copyrights, insurance policies, safe deposit boxes and their contents, annuities, pooling agreements, services of any nature whatsoever, contracts of any nature whatsoever, and any other property, real, personal, or mixed, tangible or intangible, or interest or interests therein, present, future or contingent.

§ 580.315 Specific license.

The term *specific license* means any license, authorization, or directive not set forth in this part but issued by the Office of Foreign Assets Control pursuant to this part in response to a written application.

§ 580.316 Transfer.

The term *transfer* means any actual or purported act of transaction, whether or not evidenced by writing, and whether or not done or performed within the United States, the purpose, intent, or effect of which is to create, surrender, release, convey, transfer, or alter, directly or indirectly, any right, remedy, power, privilege, or interest with respect to any property and, without limitation upon the forgoing, shall include the making, execution, or delivery of any assignment, power, conveyance, check, declaration, deed, deed of trust, power of attorney, power of appointment, bill of sale, mortgage, receipt, agreement, contract, certificate, gift, sale, affidavit, or statement; the appointment of any agent, trustee, or fiduciary; the creation or transfer of any lien; the issuance, docketing, filing, or the levy of or under any judgment, decree, attachment, injunction, execution, or other judicial or administrative process or order, or the service of any garnishment; the acquisition of any interest of any nature whatsoever by reason of a judgment or decree of any foreign country; the fulfillment of any condition; the exercise of any power of appointment, power of attorney, or other power; or the acquisition, disposition, transportation, importation, exportation, or withdrawal of any security.

§ 580.317 United States.

The term *United States* means the United States, its territories and possessions, and all areas under the jurisdiction or authority thereof.

§ 580.318 U.S. financial institution.

The term *U.S. financial institution* means any U.S. person (including foreign branches) that is engaged in the business of accepting deposits, making, granting, transferring, holding, or brokering loans or credits, or purchasing or selling foreign exchange, securities, commodity futures or options, or procuring purchasers and sellers thereof, as principal or agent; including, but not limited to, depository institutions, banks, savings banks, trust companies, securities brokers and dealers, commodity futures and options brokers and dealers, forward contract and foreign exchange merchants, securities and commodities exchanges, clearing corporations, investment companies, employee benefit plans, and U.S. holding companies, U.S. affiliates, or U.S. subsidiaries of any of the foregoing. This term includes those branches, offices and agencies of foreign financial institutions which are located in the United States, but not such institutions' foreign branches, offices, or agencies.

§ 580.319 United States person; U.S. person.

The term *United States person* or *U.S. person* means any United States citizen; permanent resident alien; juridical person organized under the laws of the United States or any jurisdiction within the United States, including foreign branches; or any person in the United States.

Subpart D—Interpretations

§ 580.401 Reference to amended sections.

Except as otherwise specified, reference to any section of this part or to any regulation, ruling, order, instruction, direction, or license issued pursuant to this part shall be deemed to refer to the same as currently amended.

§ 580.402 Effect of amendment.

Any amendment, modification, or revocation of any section of this part or of any order, regulation, ruling, instruction, or license issued by or under the direction of the Director of the Office of Foreign Assets Control shall not, unless otherwise specifically provided, be deemed to affect any act done or omitted to be done, or any civil or criminal suit or proceeding commenced or pending prior to such amendment, modification, or revocation. All penalties, forfeitures, and liabilities under any such order, regulation, ruling, instruction, or license shall continue and may be enforced as if such amendment, modification, or revocation had not been made.

§ 580.403 Termination and acquisition of an interest of the Government of Haiti.

(a) Whenever a transaction licensed or authorized by or pursuant to this part results in the transfer of property (including any property interest) away from the Government of Haiti, such property shall no longer be deemed to be property in which the Government of Haiti has or has had an interest unless there exists in the property another such interest, the transfer of which has not been effected pursuant to license or other authorization.

(b) Unless otherwise specifically provided in a license or authorization issued pursuant to this part, if property (including any property interest) is transferred to the Government of Haiti, such property shall be deemed to be property in which there exists an interest of the Government of Haiti.

§ 580.404 Payments to the de facto regime in Haiti prohibited; procedures for making payments to the Federal Reserve Bank of New York.

(a) The prohibitions on payments and transfer to the *de facto* regime in Haiti in § 580.202 shall apply to payments and transfers of any kind whatsoever, including payment of debt obligations, fees, taxes, and royalties owed to the Government of Haiti, and also including payment or transfer of dividends, interest payments, and other periodic payments.

(b) Payments or transfers owed to the Government of Haiti shall be made to "Government of Haiti Account No. 021083909," established on the books of the Federal Reserve Bank of New York pursuant to § 580.202. Payments or transfers of funds into Government of Haiti Account No. 021083909 over FedWire should be made using Typecode 15. The transfer instructions should name "Government of Haiti Account No. 021083909" and identify the nature of the payment.

§ 580.405 Indirect payments to the de facto regime in Haiti; payments by subsidiaries in third countries.

The prohibitions in § 580.202 on payments or transfers to the *de facto* regime in Haiti apply to indirect payments (including reimbursement of a non-U.S. person for payment) made after 12:23 p.m., e.d.t., October 4, 1991. Unlicensed payments or transfers made to the *de facto* regime in Haiti from U.S. subsidiaries or branches in third countries shall, where such payments or transfers are normally made from the United States or Haiti, be considered an evasion of the prohibitons set forth in § 580.202. Payments or transfers routinely made from such third-country entities, however, are not prohibited.

§ 580.406 Setoffs prohibited.

(a) A setoff against a blocked account, whether by a U.S. financial institution or other U.S. person, is a prohibited transfer under § 580.202 if effected after 12:23 p.m., e.d.t., October 4, 1991.

(b) Except as licensed or otherwise authorized, a setoff as a method of settling payments with the *de facto* regime in Haiti, as by netting or canceling a debt or other obligation, is prohibited.

§ 580.407 Payments in kind.

Payments in kind made to the *de facto* regime in Haiti in lieu of a payment or transfer of funds, which term includes currency, cash or coins of any nation, as well as other financial or investment assets or credits, shall be considered an evasion of the prohibitions in subpart B.

§ 580.408 Offshore transactions.

The prohibitions contained in § 580.201 apply to transactions by U.S. persons in locations outside the United States with respect to property in which the U.S. person knows, or has reason to know, that the Government of Haiti has or has had an interest since the effective date.

§ 580.409 Transshipments through the United States prohibited.

(a) The prohibitions in § 580.206 apply to the importation into the United States, for transshipment or transit, of goods or services which are intended or destined for Haiti.

(b) The prohibitions in § 580.205 apply to the importation into the United States, for transshipment or transit, of goods or services of Haitian origin which are intended or destined for third countries.

(c) Goods in which the Government of Haiti has an interest which are imported into or transshipped through the United States are blocked pursuant to § 580.201.

§ 580.410 Importation from third countries; transshipments.

(a) Importation into the United States from third countries of goods containing raw materials or components of Haitian origin is not prohibited if those raw materials or components have been incorporated into manufactured products or substantially transformed in a third country.

(b) Importation into the United States of goods of Haitian origin that have been transshipped through a third country without being incorporated into manufactured products or substantially transformed in a third country is prohibited.

§ 580.411 Exportation to third countries; transshipments.

Exportation of goods, technology (including technical data and other information), or services from the United States is prohibited if the exporter knows, or has reason to know, that the goods, technology or services are intended for transshipment to Haiti (including passage through, or storage in, intermediate destinations). The exportation from the United States of goods or technology intended specifically for incorporation or substantial transformation into a third-country product is also prohibited if the particular product is to be used in Haiti, is being specifically manufactured to fill a Haitian order, or if the manufacturer's sales of the particular product are predominantly to Haiti.

§ 580.412 Importation into and release from bonded warehouse or foreign trade zone.

The prohibitions in § 580.205 apply to importation into a bonded warehouse or a foreign trade zone of the United States. However, § 580.205 does not prohibit the release from a bonded warehouse or a foreign trade zone of goods of Haitian origin imported into a bonded warehouse or a foreign trade zone prior to the effective date of § 580.205 or in a transaction authorized pursuant to this part after the effective date.

Note: Pursuant to § 580.201, property in which the Government of Haiti has an interest may not be released unless authorized or license by the Office of Foreign Assets Control.

Subpart E—Licenses, Authorizations, and Statements of Licensing Policy

§ 580.501 Effect of license or authorization.

(a) No license or other authorization contained in this part, or otherwise issued by or under the direction of the Director of the Office of Foreign Assets Control, shall be deemed to authorize or validate any transaction effected prior to the issuance of the license, unless specifically provided in such license or authorization.

(b) No regulation, ruling, instruction, or license authorizes any transaction prohibited under this part unless the regulation, ruling, instruction, or license is issued by the Office of Foreign Assets Control and specifically refers to this part. No regulation, ruling, instruction, or license referring to this part shall be deemed to authorize any transaction prohibited by any provision of this chapter unless the regulation, ruling, instruction or license specifically refers to such provision.

(c) Any regulation, ruling, instruction or license authorizing any transaction otherwise prohibited under this part has the effect of removing a prohibition or prohibitions in subpart B from the transaction, but only to the extent specifically stated by its terms. Unless the regulation, ruling, instruction or license otherwise specifies, such an authorization does not create any right, duty, obligation, claim, or interest in, or with respect to, any property which would not otherwise exist under ordinary principles of law.

§ 580.502 Exclusion from licenses and authorizations.

The Director of the Office of Foreign Assets Control reserves the right to exclude any person from the operation of any license, or from the privileges therein conferred, or to restrict the applicability thereof with respect to particular persons, transactions or property or classes thereof. Such action shall be binding upon all persons receiving actual or constructive notice thereof.

§ 580.503 Payments and transfers to blocked accounts in U.S. financial institutions.

(a) Any payment of funds or transfer of credit or other assets, including any payment or transfer by any U.S. person outside the United States, to a blocked account in a U.S. financial institution located in the United States in the name of the Government of Haiti is hereby authorized, including incidental foreign exchange transactions, provided that such payment or transfer shall not be made from any blocked account if such payment or transfer represents, directly or indirectly, a transfer of any interest of the Government of Haiti to any other country or person.

(b) This section authorizes transfer of the funds of a blocked demand deposit account to a blocked interest-bearing account under the same name or designation as was used for the demand deposit account, as required pursuant to § 580.203 or at the instruction of the depositor, at any time. If such transfer is to a blocked account in a different U.S. financial institution, such transfer must be made to a blocked account in a U.S. financial institution located in the United States, and the transferee financial institution must furnish within 10 business days of the date of transfer, the notification described in paragraph (h) of this section to the Office of Foreign Assets Control, Blocked Assets Division.

(c) This section does not authorize any transfer from a blocked account within the United States to an account held outside the United States.

(d) This section does not authorize any payment or transfer to any blocked account held in a name other than that of the Government of Haiti where such government is the ultimate beneficiary of such payment or transfer.

(e) This section does not authorize any payment or transfer of credit comprising an integral part of a transaction which cannot be effected without the subsequent issuance of a further license.

(f) This section does not authorize the crediting of the proceeds of the sale of securities or other assets, held in a blocked account or a sub-account thereof, or the income derived from such securities or assets, to a blocked account or sub-account under any name or designation which differs from the name or designation of the specific blocked account or sub-account in which such securities or assets were or are held.

(g) This section does not authorize any payment or transfer from a blocked account in a U.S. financial institution to a blocked account held under any name or designation which differs from the name or designation of the specific blocked account or sub-account from which the payment or transfer is made.

(h) The authorization in paragraph (a) of this section is subject to the condition that written notification from the U.S. financial institution receiving an authorized payment or transfer is furnished to the Office of Foreign Assets Control, Blocked Assets Division, within 10 business days from the date of payment or transfer. This notification shall confirm that the payment or transfer has been deposited in a blocked account under the regulations in this part and shall provide the account number, the name and address of the Government of Haiti entity in whose name the account is held, the name and address of the transferee U.S. financial institution, the name and address of the transferor financial institution, the amount of the payment or transfer, and the name and telephone number of a contact person at the transferee financial institution from whom compliance information may be obtained.

(i) This section authorizes the transfer of assets between blocked accounts in U.S. financial institutions at the instruction of the depositor for purposes of investment and reinvestment of assets in which the Government of Haiti has an interest, as authorized in § 580.514. If such transfer is to a blocked account in a different U.S. financial institution, the transferee financial institution must furnish within 10 business days of the date of transfer the notification described in paragraph (h) of this section to the Office of Foreign Assets Control, Blocked Assets Division.

§ 580.504 Importation of household and personal effects.

(a) The importation of household and personal effects of Haitian origin, including baggage and articles for family use, of a person arriving in the United States directly or indirectly from Haiti is authorized. Articles included in such effects may be imported without limitation provided they were actually used by such person or family abroad, are not intended for any other person or for sale, and are not otherwise prohibited from importation.

(b) Persons departing the United States for Haiti are authorized to export from the United States accompanying personal baggage and accompanying personal effects.

§ 580.505 Transactions related to telecommunications authorized.

All transactions of U.S. common carriers incident to the receipt or transmission of telecommunications between the United States and Haiti are authorized, provided any payment owed to the *de facto* regime in Haiti is paid into a blocked account in a U.S. financial institution. For purposes of this section, the term "telecommunications" shall mean telephone, telex, and telegraph transmissions, and transmissions for the gathering or broadcast of news.

§ 580.506 Transactions related to mail authorized.

All transactions by U.S. persons, including payment and transfers to common carriers incident to the receipt or transmission of mail between the United States and Haiti, are authorized. For the purposes of this section the term "mail" shall include parcels only to the extent the parcels contain goods exempt from this part or otherwise eligible for exportation to or importation from Haiti under a general or specific license.

§ 580.507 Transactions related to informational materials.

(a) All financial and other transactions directly incident to the physical importation or exportation of informational materials are authorized.

(b) Transactions relating to the dissemination of informational materials are authorized, including remittance of royalties paid for informational materials that are reproduced, translated, subtitled, or dubbed. This section does not authorize the remittance of royalties or other payments relating to works not yet in being, or for marketing and business consulting services, or for artistic or other substantive alteration or enhancements to informational materials, as provided in § 580.207(c).

§ 580.508 Importation of certain machinery, parts and materials.

(a) The importation into the United States through 11:59 p.m., e.s.t., December 5, 1991, of machinery owned or leased by U.S. persons and used in Haiti in the assembly or processing of articles, including spare parts for such machinery, is authorized.

(b) The importation into the United States through 11:59 p.m., e.s.t., December 5, 1991, of parts or materials

exported to Haiti prior to 11:59 p.m., e.s.t., November 5, 1991, which were intended to be assembled or processed into goods containing parts or materials exported from the United States, is authorized.

Note to paragraphs (a) and (b): Transactions authorized by paragraphs (a) and (b) of this section have been completed prior to publication of this part. The text of this general license is included for the convenience of the user.

(c) Specific licenses may be issued on a case-by-case basis authorizing the importation into the United States after 11:59 p.m., e.s.t., December 5, 1991, of machinery owned or leased by U.S. persons and used in Haiti in the assembly or processing of articles, including spare parts for such machinery, and parts or materials exported to Haiti prior to 11:59 p.m., e.s.t., November 5, 1991, which were intended to be assembled or processed into goods containing parts or materials exported from the United States.

(d) Applications for specific licenses should be made in advance of the proposed importation from Haiti. Applications for specific licenses to import machinery should include a description of the machinery, information regarding the interest of U.S. persons in the machinery, and information regarding the use of the machinery in Haiti. Applications for specific licenses to import parts or materials should provide evidence of exportation to Haiti prior to the effective date and evidence that the goods into which they were to be assembled or processed would have contained parts exported from the United States prior to the effective date. Such evidence may include, without limitation, invoices, manifests, bills of lading, and other documentation describing the parts and materials and establishing shipment prior to the effective date.

§ 580.509 Reserve accounts.

(a) United States persons and U.S.-controlled Haitian entities that are required under § 580.202 to make payments and transfers of certain funds owed to the Government of Haiti into Government of Haiti Account No. 021083909 at the Federal Reserve Bank of New York may elect instead to apply for a specific license authorizing them to establish a blocked reserve account on their books in the name of the Haitian governmental entity to whom the amount is owed. Specific licenses may be issued to permit the crediting of such reserve accounts for amounts due and owing to the Government of Haiti, which amounts shall include the principal amount of funds due, plus interest thereon, determined pursuant to paragraph (b) of this section, accrued from the later of October 4, 1991, or the date that timely payment to the Government of Haiti was required, to the date of crediting to the reserve account. In the case of funds already credited to Government of Haiti Account No. 021083909, specific licenses may be issued authorizing transfer of such amounts (including accrued interest) to reserve accounts established pursuant to this section. Such licenses are revocable and are conditioned upon continued compliance with the requirements of this part. Upon revocation of a license or at the direction of the Director of the Office of Foreign Assets Control, the credit balances in such reserve accounts must be funded and paid into Government of Haiti Account No. 021083909.

(b) Amounts credited to reserve accounts pursuant to this section shall bear interest at a rate not less than the weekly average effective Federal Funds rate, as published by the Federal Reserve Board, applicable to each week of the period in which credit balances are maintained pursuant to this section.

(c) If necessary to assure the availability of credit balances blocked in reserve accounts pursuant to this section, the Director of the Office of Foreign Assets Control may at any time require the immediate funding and payment of such blocked credit balances into Government of Haiti Account No. 021083909 at the Federal Reserve Bank of New York, as provided in § 580.404, or the supplying of any form of security deemed necessary.

(d) A person receiving a specific license under paragraph (a) of this section will be required to certify to the Office of Foreign Assets Control within 15 business days after receipt of that license that it has established the reserve account on its book as provided in paragraph (a). Unless otherwise provided, a person licensed to establish such a reserve account shall file monthly reports with the Office of Foreign Assets Control setting forth all credits to the reserve account, and interest payable in accordance with paragraph (b) of this section on the reserve account, together with the nature of the debt and the name of the Haitian governmental entity to which it is owed. The report shall also contain a certification from an authorized official of the entity submitting the report that the entity is in compliance with all other requirements of this part.

§ 580.510 Commercial exportation of medicines and medical supplies.

Specific licenses may be issued on a case-by-case basis for commercial shipments to Haiti for humanitarian purposes of medicine and medical supplies. No shipment to the *de facto* regime in Haiti, or to anyone acting for or on behalf of the *de facto* regime, will be licensed. Applications for specific licenses should be made in advance of the proposed exportation to Haiti, and should provide notice and evidence of the nature, quantity, value, and purchaser of the articles to be shipped.

§ 580.511 Diplomatic pouches authorized.

The importation into the United States from Haiti, and the exportation from the United States to Haiti, of diplomatic pouches and their contents are permitted.

§ 580.512 Importation of certain gifts authorized.

The importation into the United States is authorized for goods of Haitian origin sent as gifts to persons in the United States where the value of the gift is not more than $100.

§ 580.513 Certain exportations for the Organization of American States.

All transactions ordinarily incident to the exportation of any goods or services from the United States for official or personal use by personnel employed by the diplomatic missions of the Organization of American States to Haiti are authorized, not for resale, and unless the exportation is otherwise prohibited by law.

§ 580.514 Investment and reinvestment of Government of Haiti funds held in blocked accounts.

(a) U.S. financial institutions are hereby authorized to invest and reinvest assets held in blocked accounts in the name of the Government of Haiti, subject to the following conditions:

(1) The assets representing such investments and reinvestments are credited to a blocked account or sub-account which is in the name of the Government of Haiti and which is located in the United States or within the possession or control of a U.S. person; and

(2) The proceeds of such investments and reinvestments are not credited to a blocked account or sub-account under any name or designation which differs from the name or designation of the specific blocked account or sub-account in which such funds or securities were held; and

(3) No immediate financial or economic benefit accrues (*e.g.*, through pledging or other use) to the *de facto* regime in Haiti.

(b) (1) U.S. persons seeking to avail themselves of this authorization must register with the Office of Foreign Assets Control, Blocked Assets Section, before undertaking transactions authorized under this section.

(2) Transactions conducted pursuant to this section must be reported to the Office of Foreign Assets Control, Blocked Assets Division, in a report filed no later than 10 business days following the last business day of the month in which the transactions occurred.

§ 580.515 Importation from and exportation to assembly/production operations.

(a) Specific licenses may be issued on a case-by-case basis authorizing certain exportations from the United States to Haiti, and importations into the United States from Haiti, by certain U.S. persons engaged in the assembly or processing in Haiti of articles for export to the United States which contain parts or materials exported from the United States.

(b) A license must be issued prior to any exportation to or importation from Haiti. Applications should be directed to the Office of Foreign Assets Control and should provide the following information:

(1) Identification of the U.S. importer and the assembly or processing operation in Haiti, including principal owners and managers. If either the U.S. importer or the assembly or processing operation in Haiti is owned by a Haitian person or persons, the name and address of such person(s) shall be provided;

(2) A declaration that the Haitian assembly or processing operation was producing articles for exportation to the United States prior to November 6, 1991;

(3) A declaration that no United States person identified in paragraph (b)(1) of this section has, since October 4, 1991, directly or indirectly paid or transferred funds to the *de facto* regime or otherwise engaged in any activity prohibited by Executive Orders 12775 and 12779;

(4) A description of the method by which any amounts owed to the Government of Haiti (including the *de facto* regime) by United States persons identified in paragraph (b)(1) of this section in connection with the articles assembled or processed in Haiti are being paid (*i.e.*, into an account at the Federal Reserve Bank of New York or as otherwise authorized by the Office of Foreign Assets Control);

(5) A description of the article(s) assembled or produced in Haiti, as well as the parts or materials they contain which are exported from the United States; and

(6) A description of any tariff preference which will be claimed with respect to the articles exported to the United States (*e.g.*, a reduction in dutiable value under subheading 9802.22.80, HTS, or duty-free treatment under the Caribbean Basin Economic Recovery Act).

(c) Unless otherwise provided for in the license, the license shall permit until its expiration date exportations and importations by the named licensee for the purposes and under the conditions set forth in the license. The licensee shall immediately advise the Office of Foreign Assets Control of any action or event which materially affects the accuracy or completeness of any statement or representation made in the license application and shall refrain from engaging in any transaction authorized by the license pending written authorization by the Office of Foreign Assets Control.

(d) The licensee shall provide to the Office of Foreign Assets Control, Licensing Division, within 30 days of the close of each three month period following the date of issuance of the license a report summarizing each transaction authorized by the license which was undertaken during the reporting period. The report shall list the description and quantity of all exports and imports, as well as the dates and U.S. ports of exportation and importation.

Subpart F—Reports

§ 580.601 Required records.

(a) Except as otherwise provided, every person engaging in any transaction subject to the provisions of this part shall keep a full and accurate record of each transaction engaged in, regardless of whether such transaction is effected pursuant to license or otherwise, and such record shall be available for examination for at least 5 years after the date of such transaction. Except as otherwise provided, every person holding property subject to § 580.201 shall keep a full and accurate record of such property, and such record shall be available for examination for the period of time that such property is blocked and for at least 5 years after the date such property is unblocked.

(b) Any person, other than an individual, required to maintain records pursuant to this section, must designate an individual to be responsible for providing information concerning such records to the Office of Foreign Assets Control when so requested.

§ 580.602 Reports to be furnished on demand.

Every person is required to furnish under oath, in the form of reports or otherwise, from time to time and at any time as may be required, complete information relative to any transaction, regardless of whether such transaction is effected pursuant to license or otherwise, subject to the provisions of this part. Such reports may be required to include the production of any books of account, contracts, letters, or other papers connected with any such transaction or property, in the custody or control of the person required to make such reports. Reports with respect to transactions may be required either before or after such transactions are completed. The Director of the Office of Foreign Assets Control may, through any person or agency, conduct investigations, hold hearings, administer oaths, examine witnesses, receive evidence, take depositions, and require by subpoena the attendance and testimony of witnesses and the production of all books, papers, and documents relating to any matter under investigation, regardless of whether any report has been required or filed in connection therewith.

§ 580.603 Registration of persons holding blocked property subject to § 580.201.

(a) Any individual holding property subject to § 580.201 must register with the Office of Foreign Assets Control, Blocked Assets Division by the latter of April 30, 1992, or within 10 days after the date such property is received or becomes subject to § 580.201.

(b) Any person, other than an individual, holding property subject to § 580.201 must register the person designated under § 580.601(b) to be responsible for providing information concerning records under § 580.601(a) with the Ofice of Foreign Assets Control, Blocked Assets Division by the later of April 30, 1992, or 10 days after the date such property is received and becomes subject to § 580.201.

Subpart G—Penalties

§ 580.701 Penalties

(a) Attention is directed to section 206 of the International Emergency Economic Powers Act (50 U.S.C. 1705), which provides that:

A civil penalty of not to exceed $10,000 may be imposed on any person who violates any license, order, or regulation issued under the International Emergency Economic Powers Act.

Whoever willfully violates any license, order, or regulation issued under the International Emergency Economic Powers Act shall, upon conviction, be fined not more than $50,000, or, if a natural person, may be imprisoned for not more than ten years, or both; and any officer, director, or agent of any corporation who knowingly participates in such violation may be punished by a like fine, imprisonment, or both.

Section 206 of the International Emergency Economic Powers Act is applicable to violations of any provision of this part and to violations of the provisions of any license, ruling, regulation, order, direction, or instruction issued by or pursuant to the direction or authorization of the Secretary of the Treasury pursuant to this part or otherwise under the International Emergency Economic Powers Act.

(b) Attention is directed to 18 U.S.C. 1001, which provides that:

Whoever, in any matter within the jurisdiction of any department or agency of the United States knowingly and willfully falsifies, conceals or covers up by any trick, scheme, or device a material fact, or makes any false fictitious or fraudulent statements or representations, or makes or uses any false writing or document knowing the same to contain any false, fictitious or fraudulent statement or entry, shall be fined not more than $10,000 or imprisoned not more than five years, or both.

(c) Violations of this part may also be subject to relevant provisions of the Customs laws and other applicable laws.

§ 580.702 Prepenalty notice.

(a) *When required.* If the Director of the Office of Foreign Assets Control (the "Director") has reasonable cause to believe that there has occurred a violation of any provision of this part or a violation of the provisions of any license, ruling, regulation, order, direction or instruction issued by or pursuant to the direction or authorization of the Director pursuant to this part or otherwise under the International Emergency Economic Powers Act, and the Director determines that further proceedings are warranted, he shall issue to the person concerned a notice of his intent to impose a monetary penalty. The prepenalty notice shall be issued whether or not another agency has taken any action with respect to this matter.

(b) *Contents*—(1) *Facts of violation.* The prepenalty notice shall describe the violation, specify the laws and regulations allegedly violated, and state the amount of the proposed monetary penalty.

(2) *Right to make presentations.* The prepenalty notice also shall inform the person of his right to make a written presentation within 30 days of mailing of the notice as to why a monetary penalty should not be imposed, or, if imposed, why it should be in a lesser amount than proposed.

§ 580.703 Presentation responding to prepenalty notice.

(a) *Time within which to respond.* The named person shall have 30 days from the date of mailing of the prepenalty notice to make a written presentation to the Director.

(b) *Form and contents of written presentation.* The written presentation need not be in any particular form, but shall contain information sufficient to indicate that it is in response to the prepenalty notice. It should contain responses to the allegations in the prepenalty notice and set forth the reasons why the person believes the penalty should not be imposed or, if imposed, why it should be in a lesser amount than proposed.

§ 580.704 Penalty notice.

(a) *No violation.* If, after considering any presentations made in response to the prepenalty notice, the Director determines that there was no violation by the person named in the prepenalty notice, he promptly shall notify the person in writing of the determination and that no monetary penalty will be imposed.

(b) *Violation.* If, after considering any presentations made in response to the prepenalty notice, the Director determines that there was a violation by the person named in the prepenalty notice, he promptly shall issue a written notice of the imposition of the monetary penalty to that person.

§ 580.705 Referral to United States Department of Justice.

In the event that the person named does not pay the penalty imposed pursuant to this subpart to make payment arrangements acceptable to the Director within 30 days of the mailing of the written notice of the imposition of the penalty, the matter shall be referred to the United States Department of Justice for appropriate action to recover the penalty in a civil suit in a Federal district court.

§ 580.706 Seizure of shipments.

Import shipments into the United States of goods of Haitian origin in violation of § 580.205 shall be seized. No such importation shall be permitted to proceed, except as specifically authorized by the Office of Foreign Assets Control. Such shipments shall be subject to licensing, penalties, or seizure and forfeiture action pursuant to this part, the Customs laws, or other applicable provisions of law, depending on the circumstances.

Subpart H—Procedures

§ 580.801 Licensing.

(a) *General licenses.* General licenses have been issued authorizing under appropriate terms and conditions certain types of transactions which are subject to the prohibitions contained in subpart B of this part. All such licenses are set forth in subpart E of this part. It is the policy of the Office of Foreign Assets Control not to grant applications for specific licenses authorizing transactions to which the provisions of an outstanding general license are applicable. Persons availing themselves of certain general licenses may be required to file reports and statements in accordance with the instructions specified in those licenses. Failure to file such reports or statements will nullify the authority of the general license as to those persons.

(b) *Specific licenses*—(1) *General course of procedure.* Transactions subject to the prohibitions contained in Subpart B of this part which are not authorized by general license may be effected only under specific licenses.

(2) *Applications for specific licenses.* Applications for specific licenses to engage in any transactions prohibited by or pursuant to this part may be filed by letter with the Office of Foreign Assets Control. Any person having an interest in a transaction or proposed transaction may file an application for a license authorizing such transaction, but the applicant for a specific license is required to make full disclosure of all parties in interest to the transaction so that a decision on the application may be made with full knowledge of all relevant facts and so that the identity and location of the persons who know about the transaction may be easily ascertained in the event of inquiry.

(3) *Information to be supplied.* The applicant must supply all information specified by relevant instructions and/or forms, and must fully disclose the names of all the parties who are concerned with or interested in the proposed transaction. If the application is filed by an agent, the agent must disclose the name of his principal(s). Such documents as may be relevant shall be attached to each application as a part of such application except that documents previously filed with the Office of Foreign Assets Control may, where appropriate, be incorporated by reference. Applicants may be required to furnish such further information as is deemed necessary to a proper determination by the Office of Foreign Assets Control. If an applicant or other party in interest desires to present additional information or discuss or argue the application, he may do so at any time before or after decision. Arrangements for oral presentation should be made with the Office of Foreign Assets Control.

(4) *Effect of denial.* The denial of a license does not preclude the reopening of an application or the filing of a further application. The applicant or any other party in interest may at any time request explanation of the reasons for a denial by correspondence or personal interview.

(5) *Reports under specific licenses.* As a condition upon the issuance of any license, the licensee may be required to file reports with respect to the transaction covered by the license, in such form and at such times and places as may be prescribed in the license or otherwise.

(6) *Issuance of license.* Licenses will be issued by the Office of Foreign Assets Control acting on behalf of the Secretary of the Treasury or licenses may be issued by the Secretary of the Treasury acting directly or through any specifically designated person, agency, or instrumentality.

(c) *Address.* License applications, reports, and inquiries should be addressed to the appropriate division or individual within the Office of Foreign Assets Control, or to its Director, at the following address: Office of Foreign Assets Control, U.S. Department of the Treasury, 1500 Pennsylvania Avenue, NW., Annex, Washington, DC 20220.

§ 580.802 Decisions

The office of Foreign Assets Control will advise each applicant of the decision respecting filed applications. The decision of the Office of Foreign Assets Control acting on behalf of the Secretary of the Treasury with respect to an application shall constitute final agency action.

§ 580.803 Amendment, modification, or revocation.

The provisions of this part and any rulings; licenses, whether general or specific; authorizations; instructions; orders; or forms issued hereunder may be amended, modified, or revoked at any time.

§ 580.804 Rulemaking.

(a) In general, rulemaking by the Office of Foreign Assets Control involves foreign affairs functions of the United States, and for that reason is exempt from the requirements under the administrative Procedure Act (5 U.S.C. 553) for notice of proposed rulemaking, opportunity for public comment, and delay in effective date. Wherever possible, however, it is the practice of the Office of Foreign Assets Control to receive written submissions or hold informal consultations with interested parties before the issuance of any rule or other public document.

(b) Any interested person may petition the Director of the Office of Foreign Assets Control in writing for the issuance, amendment, or repeal of any rule.

§ 580.805 Delegation by the Secretary of the Treasury.

Any action which the Secretary of the Treasury is authorized to take pursuant to Executive Orders 12775 and 12779 and any further Executive orders relating to the national emergency declared with respect to Haiti in Executive Order 12775 may be taken by the Director of the Office of Foreign Assets Control.

§ 580.806 Rules governing availability of information.

(a) The records of the Office of Foreign Assets Control which are required by the Freedom of Information Act (5 U.S.C. 552) to be made available to the public shall be made available in accordance with the definitions, procedures, requirements for payment of fees, and other provisions of the Regulations on the Disclosure of Records of the Office of the Secretary and of other bureaus and offices of the Department of the Treasury issued under 5 U.S.C. 552 and published as part 1 of this title.

(b) The records of the Office of Foreign Assets Control required by the Privacy Act (5 U.S.C. 552a) to be made available to an individual shall be made available in accordance with the definitions, procedures, requirements for payment of fees, and other provisions of the Regulations on Disclosure of Records of the Departmental Office and of other bureaus and offices of the Department of the Treasury issued under 5 U.S.C. 552a and published as part 1 of this title.

(c) Any form used in connection with the Haitian Transactions Regulations may be obtained in person from or by writing to the Office of Foreign Assets Control, U.S. Department of the Treasury, 1500 Pennsylvania Avenue, NW., Annex, Washington, DC 20220.

§ 580.807 Customs procedures: merchandise specified in § 580.205.

(a) With respect to goods specified in § 580.205 and not otherwise licensed or excepted from the scope of that section, appropriate Customs officers shall not accept or allow any:

(1) Entry for consumption or warehouse (including any appraisement entry, any entry of goods imported in the mails, regardless of value, and any informal entries);

(2) Entry for immediate exportation;

(3) Entry for Transportation and exportation;

(4) Withdrawal from warehouse;

(5) Admission, entry, transfer or withdrawal to or from a foreign trade zone; or

(6) Manipulation or manufacture in a warehouse or in a foreign trade zone.

(b) Customs officers shall accept or allow the importation of Haitian-origin goods under the procedures listed in paragraph (a) of this section if:

(1) The merchandise was imported prior to 11:59 p.m., e.s.t., November 5, 1991, or

(2) The merchandise was imported prior to 11:59 p.m., e.s.t., December 5, 1991, pursuant to § 580.205(b) or § 580.508 (a) or (b), or

(3) A specific license pursuant to this part is presented, or

(4) Instructions authorizing the transaction are received from the Office of Foreign Assets Control.

(c) Whenever a specific license is presented to an appropriate Customs officer in accordance with this section, one additional legible copy of the entry, withdrawal or other appropriate document with respect to the merchandise involved shall be filed with the appropriate Customs officers at the port where the transaction is to take place. Each copy of any such entry, withdrawal or other appropriate document, including the additional copy, shall bear plainly on its face the number of the license pursuant to which it is filed. The original copy of the specific license shall be presented to the appropriate Customs officers in respect of each such transaction and shall bear a notation in ink by the licensee or person presenting the license showing the description, quantity and value of the merchandise to be entered, withdrawn or otherwise dealt with. This notation shall be so placed and so written that there will exist no possibility of confusing it with anything placed on the license at the time of its issuance. If the license in fact authorizes

the entry, withdrawal, or other transaction with regard to the merchandise, the appropriate Customs officer, or other authorized Customs employee, shall verify the notation by signing or initialing it after first assuring himself that it accurately describes the merchandise it purports to represent. The license shall thereafter be returned to the person presenting it and the additional copy of the entry, withdrawal or other appropriate document shall be forwarded by the appropriate Customs officer to the Office of Foreign Assets Control.

(d) If it is unclear whether an entry, withdrawal or other action affected by this section requires a specific license, the appropriate Customs officer shall advise such person to communicate directly with the Office of Foreign Assets Control to request that instructions be sent to the Customs officer to authorize him to take action with regard thereto.

Subpart I—Paperwork Reduction Act

§ 580.901 Paperwork Reduction Act notice.

The information collection requirements in §§ 580.204(d), 580.503, 580.508, 580.509, 580.510, 580.514 580.515, 580.601, 580.602, 580.603, 580.703, and 580.801 have been approved by the Office of Management and Budget under the Paperwork Reduction Act and assigned control number 1505–0133.

Dated: February 26, 1992.

R. Richard Newcomb,

Director, Office of Foreign Assets Control.

Approved: March 17, 1992.

Peter K. Nunez,

Assistant Secretary (Enforcement).

[FR Doc. 92–7329 Filed 3–26–92; 8:45 am]

BILLING CODE 4810-25-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 64

[Docket No. FEMA 7535]

Federal Insurance Administration; List of Communities Eligible for the Sale of Flood Insurance

ACTION: Final rule.

SUMMARY: This rule identifies communities participating in the National Flood Insurance Program (NFIP). These communities have applied to the program and have agreed to enact certain floodplain management measures. The communities' participation in the program authorizes the sale of flood insurance to owners of property located in the communities listed.

EFFECTIVE DATES: The dates listed in the fourth column of the table.

ADDRESSES: Flood insurance policies for property located in the communities listed can be obtained from any licensed property insurance agent or broker serving the eligible community, or from the National Flood Insurance Program (NFIP) at: Post Office Box 457, Lanham, MD 20706, (800) 638–7418.

FOR FURTHER INFORMATION CONTACT: Frank H. Thomas, Assistant Administrator, Office of Loss Reduction, Federal Insurance Administration, Federal Center Plaza, 500 C Street, SW, room 417, Washington, DC 20472, (202) 646–2717.

SUPPLEMENTARY INFORMATION: The National Flood Insurance Program (NFIP), enables property owners to purchase flood insurance which is generally not otherwise available. In return, communities agree to adopt and administer local floodplain management measures aimed at protecting lives and new construction from future flooding. Since the communities on the attached list have recently entered the NFIP, subsidized flood insurance is now available for property in the community.

In addition, the Director of the Federal Emergency Management Agency has identified the special flood hazard areas in some of these communities by publishing a Flood Hazard Boundary Map (FHBM) or a Flood Insurance Rate Map (FIRM). The date of the flood map, if one has been published, is indicated in the fifth column of the table. In the communities listed where a flood map has been published, Section 102 of the Flood Disaster Protection Act of 1973, as amended, requires the purchase of flood insurance as a condition of Federal or federally related financial assistance for acquisition or construction of buildings in the special flood hazard area shown on the map.

The Director finds that the delayed effective dates would be contrary to the public interest. The Director also finds that notice and public procedure under 5 U.S.C. 553(b) are impracticable and unnecessary.

Pursuant to the provisions of 5 U.S.C. 605(b), the Administrator, Federal Insurance Administration, to whom authority has been delegated by the Director, FEMA, hereby certifies that this rule, if promulgated will not have a significant economic impact on a substantial number of small entities. This rule provides routine legal notice stating the community's status in the NFIP and imposes no new requirements or regulations on participating communities.

List of Subjects in 44 CFR Part 64

Flood insurance and floodplains.

Accordingly, 44 CFR part 64 is amended as follows:

PART 64—[AMENDED]

1. The authority citation for part 64 continues to read as follows:

Authority: 42 U.S.C. 4001 *et seq.*, Reorganization Plan No. 3 of 1978, E.O. 12127.

§ 64.6 List of Eligible Communities.

BILLING CODE 6718-21-M

44 CFR Part 353

Fee for Services in Support, Review, and Approval of State and Local Government or Licensee Radiological Emergency Plans and Preparedness

AGENCY: Federal Emergency Management Agency (FEMA).

ACTION: Notice; hourly user fee rate.

SUMMARY: In accordance with 44 CFR part 353, FEMA has established its fiscal year (FY) 1992 hourly user fee rate for Radiological Emergency Preparedness (REP) Program services at $47.00 per hour.

DATE: The user fee rate is effective April 1, 1992.

FOR FURTHER INFORMATION CONTACT: Megs Hepler, Chief, Field Operations Branch, Radiological Preparedness Division, Office of Technological Hazards, Federal Emergency Management Agency, Washington, DC 20472, (202) 646-2867.

SUPPLEMENTARY INFORMATION: As authorized by 31 U.S.C. 9701, an hourly user fee will be charged for site-specific Radiological Emergency Preparedness (REP) Program services identified in 44 CFR part 353 and rendered by FEMA professional staff. During FY 1992, recipients will be charged for site-specific services rendered by FEMA professional staff at $47.00 per hour beginning April 1, 1992, but will not be charged for other Federal agency activities related to these services. Additional costs incurred by FEMA for site-specific services provided by FEMA's contractors will be charged to the licensees at the rate and cost incurred by FEMA.

More specifically, this fee will be charged to nuclear power plant licensees for FEMA professional staff services that: (1) Support site-specific offsite radiological emergency preparedness for commercial nuclear power plants; (2) contribute to a licensee's compliance with the U.S. Nuclear Regulatory Commission's regulatory requirements; and (3) are directly related to obtaining and maintaining an operating license. 44 CFR part 353 contains a detailed schedule of site-specific services. No charge will be assessed for any work not related to a specific commercial nuclear power plant site.

Specific cost categories considered in the development of the FY 1992 hourly user fee rate include:

(1) Personnel compensation (salaries) for professional REP staff;

(2) Personnel benefits for professional REP staff;

(3) Administrative support including clerical salaries and benefits, printing, and reproduction costs;

(4) Travel costs; and

(5) Overhead support (e.g., rent and utilities).

Dated: March 24, 1992.

Grant C. Peterson,

Associate Director, State and Local Programs and Support.

DEPARTMENT OF TRANSPORTATION

Federal Transit Administration

49 CFR Part 663

Pre-Award, Post-Delivery Audits of Rolling Stock Questions and Answers

AGENCY: Federal Transit Administration, DOT.

ACTION: Disposition of inquires.

SUMMARY: This document publishes questions and answers regarding the Federal Transit Administration's (FTA) Pre-Award and Post-Delivery Audits of Rolling Stock Purchases, 49 CFR part 663. Since publication of that regulation, the FTA has received a number of inquiries from transit vehicle manufacturers and recipients of FTA funds about the level of information the regulation requires to be made available in connection with the audit certifications of Buy America content. The following questions and answers are published today to provide guidance on that issue to recipients of FTA funds, vehicle manufacturers, and other affected entities. This document does not amend or in any way affect the regulation, which remains in effect as published on September 24, 1991.

DATES: The rolling stock audit regulation, 49 CFR part 663, went into effect on October 24, 1991 (56 FR 48384, September 24, 1991).

FOR FURTHER INFORMATION CONTACT: James A. Archibald, Associate Administrator for Budget and Policy, room 9310, FTA, 400 Seventh Street SW., Washington, DC 20590, (202) 366-4050.

SUPPLEMENTARY INFORMATION: The FTA regulation on pre-award and post-delivery audits of rolling stock implements section 319 of the Surface Transportation and Uniform Relocation Assistance Act of 1987 (the STURAA), which requires a pre-award and post-delivery audit of rolling stock purchased with FTA funds to assure compliance with, among other things, the FTA Buy America requirements at 49 CFR part 661.

Since publication of the final rule on September 24, 1991, FTA has received a number of questions about the level of detail required by 49 CFR part 663 in connection with the required Buy America certifications. In developing the following answers in response to these frequently asked questions, the FTA took into consideration legislative history accompanying the STURAA. Specifically, the bill's Conference Report states that "(i)t is the intent of the Conferees that any paperwork requirements imposed by this provision will not create a significant cost burden." (House Report 100-27, p. 231.) Accordingly, the following questions and answers are being published to provide guidance to affected parties, including recipients of FTA funds and transit vehicle manufacturers. This notice does not amend or in any way affect the regulation, which remains in effect as published in the **Federal Register** on September 24, 1991.

Level of Cost Data

1. *Question:* What level of cost data does the FTA require to meet the requirements of 49 CFR part 663?

Answer: The FTA will accept a level of documentation in which costs presented on the document comply with the definition presented in § 661.11(o)(1) of the Buy America regulation (49 CFR part 661):

> The cost of a component or a subcomponent is the price that a bidder or offeror must pay to a subcontractor or supplier for the component or subcomponent.
> • • •
> The cost used in the computation of domestic content may include appropriate fully allocated costs of the component or subcomponent, which would include overhead and profit allocations.

Percentage Format

2. *Question:* May cost information be presented in percentage format?

Answer: The information on cost can be presented in either dollar or percentage format. See the "Domestic Content Sample Worksheet" below for an example of how a percentage format would be calculated.

DOMESTIC CONTENT SAMPLE WORKSHEET

ITEM	Cost	Percent domestic
One transit bus (ABC Bus Mfg. Co.).	$100	At least 60% of total cost.

HOW 60% WAS ACHIEVED

Component	Domestic content
(1) Engine (XYZ Engine Co).	$30.00 (30% of total bus cost).
(2) Transmission (MNO Co.).	20.00 (20% of total bus cost).
(3) Wheels (DEF Wheel Co.).	15.00 (15% of total bus cost
Sub-total	65.00 (65% of total bus cost) (5% more than required; no further components need be identified)

BREAKDOWN OF COMPONENTS RE. MINIMUM DOMESTIC CONTENT

Sub-components	Domestic content
(1) Engine (total cost $30.00):	
1.1 Valves (PRQ Valve Co.).	$12.00 (40% of cost of engine).
1.2 Block (GHI Block Co.).	10.50 (35% of cost of engine).
Sub-total	22.50 (75% of cost of engine). (15% more than required; no further sub-components need be identified)
(2) Transmission (total cost $20.00):	
2.1 Gears (STV Gear Co.).	4.00 (20% of cost of transmission).
2.2 Housing (LMN Co.).	8.00 (40% of cost of transmission).
Sub-total	12.00 (60% of cost of transmission). (minimum percentage achieved; no further sub-components need be identified)
(3) Wheels (total cost $15.00):	
3.1 Castings (RST Foundry).	10.00 (66.6% of cost of wheels).
Sub-total	10.00 (66.6% of cost of wheels) (6.6% more than required; no further sub-components need be identified)

Pre-Award Calculations

3. *Question.* May the pre-award component and subcomponent information be presented as a commitment from the manufacturer that the domestic content information which is reported will be achieved?

Answer: The pre-award data may be based on estimates used in developing the bid for the equipment. The post-delivery review will demonstrate the compliance with the pre-award certification that Buy America requirements have been met and will require presentation of any changes which have occurred during the production process. The Buy America legislation does not require exact conformance on a component-by-component or subcomponent-by-subcomponent basis between the two audits, only that Buy America requirements be complied with, and the purpose of the post-delivery audit is to verify such compliance.

Extent of Review

4. *Question:* To what level of detail must the pre-award and post-delivery reviews be applied to confirm the veracity of the component and subcomponent domestic content data?

Answer: The applicable regulatory language requires only that the grant recipient based its certification on its own satisfaction that compliance has occurred, based upon its own review of documentation provided by the manufacturer. The only information required to be reviewed by the recipient is a listing of the component and subcomponent parts, identified by manufacturer, country or origin and costs (as defined above), as well as the actual location of the final assembly point with a description of the final assembly activities and cost.

There is no requirement that the recipient perform a complete audit of detailed source documents to ascertain the veracity of the manufacturer's documentation.

Issued on: March 25, 1992.

Brian W. Clymer,

Administrator.

Federal Aviation Administration

14 CFR Ch. I

[Docket No. 26788; Summary Notice No. PR-92-3]

Summary of Rulemaking Petition Received from American Airlines, Inc.

AGENCY: Federal Aviation Administration [FAA], DOT.

ACTION: Notice of petition for rulemaking.

SUMMARY: Pursuant to FAA's rulemaking provisions governing the application, processing, and disposition of petitions for rulemaking (14 CFR part 11), this notice contains a summary of a petition by American Airlines, Inc., to suspend the effectiveness of certain slot allocations and to modify subparts K and S of part 93 of the Federal Aviation Regulations. The purpose of this notice is to improve the public's awareness of this aspect of the FAA's regulatory activities. Neither the publication of this notice nor the inclusion or omission of information in the summary is intended to affect the legal status of the petition or its final disposition.

DATES: Comments on petitions received must identify the petition docket number involved and be received on or before June 1, 1992.

ADDRESSES: Send comments on the petition in triplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rules Docket [AGC-101], Docket No. 26788, 800 Independence Avenue SW., Washington, DC 20591.

FOR FURTHER INFORMATION CONTACT: Stephen W. Brice, Office of the Chief Counsel, AGC-230, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591, (202) 267-3491.

SUPPLEMENTARY INFORMATION: The petition, any comments received, and a copy of any final disposition are filed in the assigned regulatory docket and are available for examination in the Rule Docket (AGC-10), room 915, FAA Headquarters Building [FOB-10A], Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone (202) 267-3132.

Part 93, subpart K, of the Federal Aviation Regulations (14 CFR part 93, subpart K) limits the number of aircraft operations per hour at O'Hare International Airport between 6:45 a.m. and 9:15 p.m. local time and limits the type of aircraft that may use commuter slots. Under § 93.123(c), commuter operations are those conducted by a propeller-driven aircraft having a maximum certificated seating capacity of less than 75 passenger seats or a turbojet aircraft having a maximum certificated seating capacity of less than 56 passenger seats.

In Amendment 93-62 (56 FR 41200, August 14, 1991), the FAA allowed slot holders at O'Hare to use up to 25% of their commuter slot holdings, subject to time period limitations established by Air Traffic Control, for aircraft holding up to 110 passenger seats. This amendment is scheduled to expire September 18, 1993, unless extended by the Administrator.

Petitioner requests that the requirements of part 93, subpart K, of the Federal Aviation Regulations be amended to (1) suspend the 30 and 60 minute slot restrictions at O'Hare; (2) eliminate the distinction between commuter and air carrier slots at O'Hare or increase the number of commuter slots for which larger aircraft may be used from 25%, as allowed under Amendment 93-62, to 45%; (3) impose slot restrictions at Midway Airport or establish a Chicago area slot system incorporating O'Hare and Midway; (4) permit American to revise its selection of commuter slot times for operations with larger aircraft under Amendment 93-62; and (5) make Amendment 93-62 permanent.

In consideration of the complexity and potential impacts of the rulemaking action requested, the FAA believes that a full comment period of 60 days is necessary to obtain reasoned comments from the users of the airspace system. The FAA is publishing a summary of the petition for public comment in accordance with the procedures contained in agency regulations, 14 CFR 11.27(b)

Issued in Washington, DC on March 25, 1992.

Donald P. Byrne,

Assistant Chief Counsel, Regulations and Enforcement Division.

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 92-NM-24-AD]

Airworthiness Directives; British Aerospace Model Viscount 810 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes the adoption of a new airworthiness directive (AD) that is applicable to all British Aerospace Model Viscount 810 series airplanes. This proposal would require inspections of the lower skin panels of the elevator for skin quilting, corrosion, and delamination, and replacement, if necessary; application of water displacement fluid and anti-corrosion protective treatment to inner surfaces of the elevator lower skins; and rebalancing of the left and right elevators. This proposal is prompted by a report of delamination and corrosion found in a lower skin panel of the starboard elevator. The actions specified by the proposed AD are intended to prevent loss of elevator structural integrity and reduced controllability of the airplane.

DATES: Comments must be received by May 18, 1992.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM-103, Attention: Rules Docket No. 92-NM-24-AD, 1601 Line Avenue SW., Renton, Washington 98055-4056. Comments may be inspected at this location between 9 a.m. and 3 p.m., Monday through Friday, except Federal holidays.

The service information referenced in the proposed rule may be obtained from British Aerospace, PLC, Librarian for Service Bulletins, P.O. Box 17414, Dulles International Airport, Washington, DC 20041-0414. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. William Schroeder, Aerospace Engineer, Standardization Branch, ANM-113, FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington 98055-4056; telephone (206) 227-2148; fax (206) 227-1320.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or aguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 92-NM-24-AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM-103, Attention: Rules Docket No. 92-NM-24-AD, 1601 Lind Avenue SW., Renton, Washington 98055-4056.

Discussion:

The Civil Aviation Authority, which is the airworthiness authority for the United Kingdom, recently notified the FAA that an unsafe condition may exist on all British Aerospace Model Viscount 810 series airplanes. The Civil Aviation Authority advises that a case has been reported of delamination and corrosion found in the lower skin panel of the starboard elevator on one airplane. If uncorrected, this condition could lead to loss of the structural integrity of the elevator and reduced controllability of the airplane.

British Aerospace has issued Viscount Alert Preliminary Technical Leaflet (PTL) 196, dated March 1991, which describes procedures for: (1) Performing external visual inspections of the left and right elevator lower skin panels to detect skin quilting, corrosion, and delamination; (2) replacing quilted or corroded skins with a single thickness skin, if necessary; (3) applying water displacement fluid and anti-corrosion protective treatment to the inner surfaces of the elevator lower skins; and (4) rebalancing the left and right elevators. The Civil Aviation Authority classified this service bulletin as mandatory.

This airplane model is manufactured in the United Kingdom and is type certificated for operation in the United States under the provisions of § 21.29 of the Federal Aviation Regulations and the applicable bilateral airworthiness agreement. Pursuant to this bilateral airworthiness agreement, the Civil Aviation Authority has kept the FAA informed of the situation described above. The FAA has examined the findings of the Civil Aviation Authority, reviewed all available information, and determined that AD action is necessary for products of this type design that are certificated for operation in the United States.

Since an unsafe condition has been identified that is likely to exist or develop on other airplanes of the same type design registered in the United States, the proposed AD would require repetitive external visual inspections of the left and right elevator lower skin panels for skin quilting, corrosion, and delamination; and replacement of quilted or corroded skins with a single thickness skin, if necessary. It would also require the application of water displacement fluid and anticorrosion protective treatment to the inner surfaces of the elevator lower skins, and rebalancing of the left and right elevators. The actions would be required to be accomplished in accordance with the PTL described previously.

The FAA estimates that 4 airplanes of U.S. registry would be affected by this proposed AD, that it would take approximately 20 work hours per airplane to accomplish the proposed actions, and that the average labor rate is $55 per work hour. Based on these figures, the total cost impact of the proposed AD on U.S. operators is estimated to be $4,400.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation: (1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **"ADDRESSES."**

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

British Aerospace: Docket 92-NM-24-AD.

Applicability: Model Viscount 810 series airplanes, certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

To prevent loss of elevator structural integrity and reduced controllability of the airplane, accomplish the following:

(a) Within 60 days after the effective date of this AD, visually inspect the external surface of the left and right elevator lower skins for skin quilting, corrosion, and delamination, in accordance with British Aerospace Viscount Alert Preliminary Technical Leaflet (PTL) 196, dated March 1991.

(b) As a result of the inspection required by paragraph (a) of this AD, accomplish the procedures specified in either paragraph (b)(1) or (b)(2) of this AD, as applicable, in accordance with British Aerospace Viscount Alert PTL 196, dated March 1991:

(1) If no discrepancies are detected, apply water displacing fluid and anti-corrosion protective treatment to the inner surfaces of the elevator lower skins, and rebalance the elevators.

(2) If any discrepancies are detected, prior to further flight, replace quilted, corroded, or delaminated skins with a single thickness skin; apply water displacing fluid and anti-corrosion protective treatment to the inner surfaces of the elevator lower skins; and rebalance the elevators.

(c) Repeat the visual inspection of the elevator skins required by paragraph (a) of this AD, and inspect the condition of the corrosion protective treatment inside the elevators, at intervals not to exceed 860 hours time-in-service or 12 months, whichever occurs first. Replace any quilted, corroded, or delaminated skins, and renew any deteriorated corrosion protective treatment, prior to further flight, in accordance with British Aerospace Viscount Alert Preliminary Technical Leaflet (PTL) 196, dated March 1991.

(d) An alternative method of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Standardization Branch, ANM-113, FAA, Transport Airplane Directorate. The request shall be forwarded through an FAA Principal Maintenance Inspector, who may concur or comment and then send it to the Manager, Standardization Branch, ANM-113.

(e) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

Issued in Renton, Washington, on March 18, 1992.

James V. Devany,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

14 CFR Part 39

[Docket No. 92-NM-05-AD]

Airworthiness Directives; Aerospatiale Model Nord 262A Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes the supersedure of a existing airworthiness directive (AD), applicable to Aerospatiale Model Nord 262A series airplanes, that currently requires periodic inspection and treatment of the rudder hinge support tubes. This action would require a visual and x-ray inspection of the rudder hinge support assembly for corrosion, and replacement of one or both supports of the rudder hinge support assembly, if necessary. This proposal is prompted by findings of internal corrosion and/or corrosion penetrating through tube walls on in-service airplane rudder hinge support tubes. The actions specified by the proposed AD are intended to prevent corrosion of the rudder hinge support assembly, which could lead to failure of the assembly and subsequent loss of rudder control.

DATES: Comments must be received by May 18, 1992.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM-103, Attention: Rules Docket No. 92-NM-05-AD, 1601 Lind Avenue SW., Renton, Washington 98055-4056. Comments may be inspected at this location between 9 a.m. and 3 p.m., Monday through Friday, except Federal holidays.

The service information referenced in the proposed rule may be obtained from Aerospatiale, 316 Route de Bayonne, 31060 Toulouse, Cedex 03, France. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington.

FOR FURTHER INFORMATION CONTACT: William Schroeder, Standardization Branch, ANM-113, FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington 98055-4056; telephone (206) 227-2113; fax (206) 227-1320.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 92-NM-05-AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM-103, Attention: Rules Docket No. 92-NM-05-AD, 1601 Lind Avenue SW., Renton, Washington 98055-4056.

Discussion

On May 21, 1985, the FAA issued AD 85-12-04, Amendment 39-5076 (50 FR 3919, May 28, 1985), to require periodic inspections for corrosion of the rudder hinge support tubes on Aerospatiale Model Nord 262A series airplanes, and treatment, if necessary. That action was prompted by an investigation by the manufacturer, which demonstrated that the protective treatment procedure currently specified to prevent corrosion is incomplete and inadequate. The requirements of that AD are intended to address corrosion that could lead to failure of the rudder hinge support tubes and subsequent loss of rudder control.

Since the issuance of that AD, inspections conducted have detected internal corrosion and/or corrosion penetrating through tube walls on in-service airplane rudder hinge support tubes. As a result of these findings, the manufacturer has defined new corrosion tolerance levels and has determined appropriate protective treatment methods. These new treatment methods will better address the unsafe condition presented by corrosion.

Aerospatiale has issued N262-Fregate Service Bulletin No. 55-10, Revision 3, dated May 25, 1991, that describes procedures for conducting detailed visual and x-ray inspections to detect corrosion inside and outside the rudder hinge support tubes. The service bulletin specifies new corrosion tolerance levels, and provides instructions for new protection treatments of the rudder hinge support assembly. The Direction Générale de l'Aviation Civile (DGAC), which is the airworthiness authority for France, classified this service bulletin as mandatory.

Aerospatiale also has issued N262-Fregate Service Bulletin No. 55-11, Revision 2, dated May 25, 1991, which describes procedures for replacing rudder hinge support tubes that exceed corrosion tolerance levels, with support tubes that have an improved protective finish. The DGAC classified this service bulletin as mandatory when corrosion levels exceed specified tolerance levels.

This airplane model is manufactured in France and is type certificated for operation in the United States under the provisions of § 21.29 of the Federal Aviation Regulations and the applicable bilateral airworthiness agreement. Pursuant to this bilateral airworthiness agreement, the DGAC has kept the FAA informed of the situation described above. The FAA has examined the findings of the DGAC, reviewed all available information, and determined that AD action is necessary for products of this type design that are certificated for operation in the United States.

Since an unsafe condition has been identified that is likely to exist or develop on other airplanes of the same type design registered in the United States, the proposed AD would supersede AD 85-12-04 to require a visual and x-ray inspection of the rudder hinge support assembly for corrosion and, if corrosion tolerance levels are exceeded, replacement of one or both supports of the rudder hinge support assembly. The actions would be required to be accomplished in accordance with the service bulletins described previously.

The FAA estimates that 14 airplanes of U.S. registry would be affected by this proposed AD. It would take approximately 9 work hours per airplane to accomplish the proposed inspections; this number of work hours is no greater than the number of work hours currently required to complete the actions required by the existing AD. To accomplish the optional modification would require an additional 4 work hours. The average labor rate is $55 per work hour. Based on these figures, the total cost impact of the proposed AD on U.S. operators is estimated to be $6,930 to accomplish the required inspections, or $495 per airplane. The cost to U.S. operators who elect to accomplish the modification will be an additional $220 per airplane.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation: (1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption "**ADDRESSES.**"

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89

§ 39.13 [Amended]

2. Section 39.13 is amended by removing Amendment 39-5076 (50 FR 3919, May 28, 1985), and by adding a new airworthiness directive (AD), to read as follows:

Aerospatiale: Docket 92-NM-05-AD. Supersedes AD 85-12-04, Amendment 39-5076.

Applicability: Model Nord 262A series airplanes, certificated in any category.

Compliance: Required as indicated, unless accomplished previously. To prevent corrosion in the rudder hinge support assembly that could lead to loss of rudder control, accomplish the following:

(a) Within 100 hours time-in-service or three months, whichever occurs first after July 5, 1985 (the effective date of AD 85-12-04, Amendment 39-5076), inspect and protect against corrosion, or replace conponents if necessary, in accordance with paragraph II, Accomplishment Instructions, of Aerospatiale N262 Fregate Service Bulletin No. 55-10, Revision 2, dated January 31, 1984. Repeat the inspection at intervals not to exceed 6 years.

(b) Within 6 years after the most recent inspection performed in accordance with paragraph (a) of this AD, perform a visual and x-ray inspection of the rudder hinge support assembly for corrosion and apply corrosion protection treatments, in accordance with Aerospatiale 262-Fregate Service Bulletin No. 55-10, Revision 3, dated May 25, 1991. Compliance with this paragraph constitutes terminating action for the inspection requirements of paragraph (a) of this AD.

(c) As a result of the visual inspection required by paragraph (b) of this AD, accomplish either subparagraph (c)(1) or (c)(2) of this AD, as applicable:

(1) If no corrosion is detected, repeat the visual inspection at intervals not to exceed 6 years.

(2) If corrosion is detected, accomplish either sub-paragraph (c)(2)(i) or (c)(2)(ii) of this AD, as applicable:

(i) If internal corrosion is penetrating tube walls, or if deformation or buckling is evidenced, or if external corrosion is outside the tolerance limits specified in Aerospatiale 262-Fregate Service Bulletin No. 55-10, Revision 3, dated May 25, 1991: Prior to further flight, replace corroded components in accordance with Aerospatiale 262-Fregate Service Bulletin No. 55-11, Revision 2, dated May 25, 1991. Thereafter, at intervals not to exceed 6 years, repeat the visual inspection of tubes not replaced, as well as tubes replaced as a result of accomplishing Modification 861 described in the Service Bulletin 55-11, Revision 2, dated May 25, 1991.

(ii) If internal corrosion is not penetrating tube walls, or if external corrosion is within the tolerance limits specified in Aerospatiale 262-Fregate Service Bulletin No. 55-10, Revision 3, dated May 25, 1991: Prior to further flight, apply external protective treatment in accordance with that Aerospatiale service bulletin. Thereafter, repeat the visual inspection at intervals not to exceed 6 years.

(d) As a result of the X-ray inspection required by paragraph (b) of this AD, accomplish either subparagraph (d)(1) or (d)(2) of this AD, as applicable:

(1) If no corrosion or buckling is detected: Prior to further flight apply internal protective treatment, in accordance with Aerospatiale 262-Fregate Service Bulletin No. 55-10, Revision 3, dated May 25, 1991.

(2) If any corrosion is detected, accomplish either sub-paragraph (d)(2)(i) or (d)(2)(ii) of this AD, as applicable:

(i) If corrosion is detected on both tubes of the upper support tube section, or on the lower support tube section, or on the support tube assembly: Prior to further flight replace corroded components in accordance with Aerospatiale 262-Fregate Service Bulletin No. 55-10, Revision 3, dated May 25, 1991.

(ii) If corrosion is detected on only one tube of the upper or lower support tube sections: Within 3 months or 600 landings of the discovery of corrosion, whichever occurs first, replace corroded components in accordance with Aerospatiale 262-Fregate Service Bulletin No. 55-10, Revision 3, dated May 25, 1991.

(e) Accomplishment of Modification 866, in accordance with Aerospatiale 262-Fregate Service Bulletin No. 55-11, Revision 2, dated May 25, 1991, constitutes terminating action for the inspections required by this AD for the component replaced.

(f) An alternative method of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may

be used when approved by the Manager, Standardization Branch, ANM-113. The request shall be forwarded through an FAA Principal Maintenance Inspector, who may concur or comment and then send it to the Manager, Standardization Branch.

(g) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

Issued in Renton, Washington, on March 18, 1992.

James V. Devany,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

14 CFR Part 39

[Docket No. 92-NM-30-AD]

Airworthiness Directives; Boeing Model 757 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes the supersedure of an existing airworthiness directive (AD), applicable to certain Boeing Model 757 series airplanes, that currently requires incorporation of an operational procedure into the FAA-approved Airplane Flight Manual (AFM) to address uncommanded spoiler deployments on final approach. That AD also requires identification and replacement of failed spoiler Power Control Actuators (PCA) in the event of an uncommanded spoiler deployment. That AD was prompted by reports of single uncommanded asymmetric spoiler deployments at flaps 25 and 30 caused by failed spoiler PCAs. This action would require replacing all spoiler PCAs with modified PCAs. The actions specified by the proposed AD are intended to prevent uncommanded spoiler deployments caused by failed spoiler PCAs.

DATES: Comments must be received by May 18, 1992.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM-103, Attention: Rules Docket No. 92-NM-30-AD, 1601 Lind Avenue SW., Renton, Washington 98055-4056. Comments may be inspected at this location between 9 a.m. and 3 p.m., Monday through Friday, except Federal holidays.

The service information referenced in the proposed rule may be obtained from Boeing Commercial Airplane Group, P.O. Box 3707, Seattle, Washington 98124. This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Timothy J. Dulin, Seattle Aircraft Certification Office, Systems and Equipment Branch, ANM-130S; telephone (206) 227-2675; fax (206) 227-1181. Mailing address: FAA, Northwest Mountain Region, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington 98055-4056.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Comments wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 92-NM-30-AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM-103, Attention: Rules Docket No. 92-NM-30-AD, 1601 Lind Avenue SW., Renton, Washington 98055-4056.

Discussion

On November 4, 1991, the FAA issued AD 91-24-10, Amendment 39-8096 (56 FR 57590, November 13, 1991), to require incorporation of an operational procedure into the FAA-approved Airplane Flight Manual (AFM) to address uncommanded spoiler deployments on final approach. That AD also requires identification and replacement of failed spoiler Power Control Actuators (PCA) in the event of an uncommanded spoiler deployment. That action was prompted by reports of single uncommanded asymmetric spoiler deployments at flaps 25 and 30. The cause of these incidents has been determined to be the failure of spoiler PCA blocking/thermal relief valve seal flanges and leakage past spoiler PCA trunnion seals. Both of these conditions allow hydraulic retract pressure leakage to return, such that inadequate hydraulic pressure is available to prevent aerodynamic spoiler panel float. The aerodynamic effect on the airplane, whether it be airplane roll or unusual vibration, will be different, depending on which spoiler panel floats. Failure of a second spoiler PCA on one wing with flaps 25 or 30 selected could result in the inability to maintain lateral control of the airplane. The requirements of AD 91-24-10 are intended to reduce the risk associated with uncommanded spoiler deployments caused by failed spoiler PCAs.

Since the issuance of that AD, the manufacturer has identified design changes to the spoiler PCAs that would effectively correct ther unsafe condition.

The FAA has reviewed and approved Boeing Alert Service Bulletin 757-27A0105, dated December 5, 1991, that describes procedures for replacement of all spoiler PCAs with modified spoiler PCAs. The modified PCAs have changes to the blocking and relief valve housing and trunnion rod seals that will prevent the spoiler float caused by the internal leakage. Once the modified PCAs are installed, the need for the previously imposed operational limitations is eliminated.

Since an unsafe condition has been identified that is likely to exist or develop on other products of this same type design, the proposed AD would supersede AD 91-24-10 to require replacement of all spoiler PCAs with modified PCAs. The action would be required to be accomplished in accordance with the service bulletin described previously.

The proposed compliance time for the replacement requirement is 24 months for outboard spoiler PCAs, and 48 months for inboard spoiler PCAs. The FAA considers these compliance times to be acceptable because, in the interim, the previously required operational procedures (requiring immediate retraction to flaps 20 and use of flaps 20 and V_{ref} 20 for landing in the event of an uncommanded spoiler deployment on final approach) will ensure safe flight with spoiler PCAs that are susceptible to failure. Aerodynamic lift forces on the spoiler panels are significantly increased when the flaps are extended beyond the flaps 20 position; therefore, reducing the flaps setting to flaps 20 from flaps 25 or 30 decreases the upward aerodynamic loading on the spoiler PCA, reducing the spoiler deflection and resultant roll upset.

Additionally, safety is assured in the interim since the existing AD also requires that failed spoiler PCAs be identified and replaced prior to continued flight.

There are approximately 408 Boeing Model 757 series airplanes of the affected design in the worldwide fleet. The FAA estimates that 260 airplanes of U.S. registry would be affected by this proposed AD, that it would take approximately 78 work hours per airplane to accomplish the proposed actions, and that the average labor rate is $55 per work hour. Required parts would be provided by the manufacturer at no cost to operators. Based on these figures, the total cost impact of the proposed AD on U.S. operators is estimated to be $1,115,400, or $4,290 per airplane.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket and the location provided under the caption **ADDRESSES.**

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by removing amendment 39-8096 (56 FR 57590, November 13, 1991), and by adding a new airworthiness directive (AD), to read as follows:

Boeing: Docket 92-NM-30-AD. Supersedes AD 91-24-10, Amendment 39-8096.

Applicability: Model 757 series airplanes, line position 001 through 408, certificated in any category.

Compliance: Required as indicated, unless accomplished previously.

To prevent uncommanded spoiler deployments caused by failed spoiler Power Control Actuators (PCA), accomplish the following:

(a) Within 10 days after December 2, 1991 (the effective date of AD 91-24-10, amendment 39-8096), incorporate the following procedures into the Limitations Section of the FAA-approved Airplane Flight Manual (AFM). This may be accomplished by inserting a copy of this AD into the AFM.

"If, upon selection of flap 25 or 30, the SPOILERS EICAS message is observed, uncommanded airplane roll is encountered, or sustained control wheel displacement is required, immediately retract flaps to 20 and use flaps 20 and V_{ref} 20 for landing. Select the ground proximity flap override switch to override."

(b) If, upon selection of flap 25 or 30, the SPOILERS EICAS message is observed, the SPOILERS caution light illuminates, or uncommanded airplane roll is encountered, prior to further flight, determine if a spoiler PCA fault ball is displayed on any of the spoiler control modules. If a spoiler fault ball is displayed, prior to further flight, identify the failed spoiler PCA pair and replace both spoiler PCAs, unless the direction of the roll upset is known, in which case only the spoiler PCA in the wing of the roll direction must be replaced. Any spoiler PCA that has been removed in accordance with this paragraph must not be installed on any airplane until the spoiler PCA is modified in accordance with Boeing Alert Service Bulletin 757-27A0105, dated December 5, 1991.

(c) Within 24 months after the effective date of this AD, replace all outboard spoiler PCAs (positions 1, 2, 3, 10, 11, and 12), in accordance with Boeing Alert Service Bulletin 757-27A0105, dated December 5, 1991.

(d) Within 48 months after the effective date of this AD, replace all inboard spoiler PCAs (positions 4, 5, 6, 7, 8, and 9), in accordance with Boeing Alert Service Bulletin 757-27A0105, dated December 5, 1991.

(e) Replacement of all spoiler PCAs, as required by paragraphs (c) and (d) of this AD, constitutes terminating action for the requirements of this AD for that airplane. Once replacement is accomplished, the operating limitations required by paragraphs (a) and (b) of this AD may be removed.

(f) An alternative method of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Seattle Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate. The request shall be forwarded through an FAA Principal Maintenance Inspector, who may concur or comment and then send it to the Manager, Seattle ACO.

(g) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

Issued in Renton, Washington, on March 17, 1992.

James V. Devany,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

14 CFR Part 71

[Airspace Docket No. 91-ANM-16]

Proposed Alteration of Jet Routes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to alter the descriptions of the jet routes located in Colorado, Kansas, Nebraska, South Dakota, Wyoming and Utah to alter the jet route structure to accommodate the new Denver International Airport, scheduled to open in October 1993. Two new VHF Omnidirectional Range/Tactical Air Navigation (VORTAC), Mile High (DVV) and Falcon (FQF), are being established north and south of the new airport. This notice proposes to relocate the jet route structure to the new navigational aids.

DATES: Comments must be received on or before May 7, 1992.

ADDRESSES: Send comments on the proposal in triplicate to:

Manager, Air Traffic Division, ANM-500, Docket No. 91-ANM-16, Federal Aviation Administration, 1601 Lind Avenue, Southwest, Renton, WA 98055-4056.

The official docket may be examined in the Rules Docket, Office of the Chief Counsel, room 916, 800 Independence Avenue, SW., Washington, DC, weekdays, except Federal holidays, between 8:30 a.m. and 5 p.m.

An informal docket may also be examined during normal business hours at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Lewis W. Still, Airspace and Obstruction Evaluation Branch (ATP–240), Airspace-Rules and Aeronautical Information Division, Air Traffic Rules and Procedures Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone: (202) 267–9250.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronatical, economic, environmental, and energy related aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 91–ANM–16." The postcard will be date/time stamped and returned to the commenter. All communications received on or before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Inquiry Center, APA–220, 800 Independence Avenue, SW., Washington, DC 20591, or by calling (202) 267–3485. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11–2A which describes the application procedure.

The Proposal

The FAA is considering an amendment to part 71 of the Federal Aviation Regulations (14 CFR part 71) to alter the descriptions of the jet routes located in Colorado, Kansas, Nebraska, South Dakota, Wyoming, and Utah. The new Denver International Airport is scheduled to open in October 1993. This notice proposes to alter the jet route structure to accommodate the new airport. Two new VORTAC's would be established north and south of the new airport. The changes would be phased-in prior to the actual opening date of the new airport to ease the burden on users and the air traffic control system. Jet routes listed in this document are published in section 75.100 of Handbook 7400.7 effective November 1, 1991, which is incorporated by reference in 14 CFR 71.1.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Jet routes, Incorporation by reference.

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—[AMENDED]

1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. app. 1348(a), 1354(a), 1510; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389; 49 U.S.C. 106(g); 14 CFR 11.69.

§ 71.1 [Amended]

2. The incorporation by reference in 14 CFR 71.1 of the Federal Aviation Administration Order 7400.7, Compilation of Regulations, published April 30, 1991, and effective November 1, 1991, is amended as follows:

Section 75.100 Jet Routes.

[Airspace Docket No. 91–ANM–17]

Proposed Alteration of VOR Federal Airways

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to alter the descriptions of the VOR Federal airways located in Colorado, Nebraska, and Wyoming to alter the en route airway structure to accommodate the new Denver International Airport, scheduled to open in October 1993. Two new VHF Omnidirectional range/Tactical Air Navigation (VORTAC), Mile High (DVV) and Falcon (FQF), would be established north and south of the new airport. In addition, a VHF Omnidirectional Range/Distance Measuring Equipment (VOR/DME) would be installed on the Jeffco Airport (BJC), Broomfield, CO. This notice proposes to relocate the en route airway structure to the new navigational aids.

DATES: Comments must be received on or before May 7, 1992.

ADDRESSES: Send comments on the proposal in triplicate to:

Manager, Air Traffic Division, ANM–500, Docket No. 91–ANM–17, Federal Aviation Administration, 1601 Lind Avenue, Southwest, Renton, WA 98055–4056

The official docket may be examined in the Rules Docket, Office of the Chief Counsel, room 916, 800 Independence Avenue, SW., Washington, DC, weekdays, except Federal holidays, between 8:30 a.m. and 5:00 p.m.

An informal docket may also be examined during normal business hours at the office of the Regional Air Traffic Division.
